James Butler, owner of East View Farm, president of both the Empire City Trotting Club and the Brighton Beach Trotting Association, is to make a very radical change in the conduct of his racing stable this year. Since he parted with John Kelly last autumn he has had no professional trainer in charge of his horses at the farm. He has rather taken the place of head trainer himself and looked after the under trainers. He says he likes it, and if it should ever become necessary for him to start life anew, he believes he would adopt the profession of training and driving horses. He has a natural inclination for the business, is fond of the horses, and believes he would make a great success out of it. He has owned and raced trotters for the past fifteen years, and has had quite enough experience to enable him to make a pretty fair trainer, and as to driving, he is just about as expert with the reins as the best of the amateurs. His work in the matinee races last season at the Empire City track was a revelation to many of the spectators, who did not know he ever drove; but the rail birds who had watched the horses work all season knew he could drive, for they had seen him jogging every day along with John Kelly, horse for horse. It was fun and exercise for him, but at the same time it was an education which he could get in no other way. His drive of Don Derby 2:06, his fast young pacer, in a matinee race at the Empire track last fall against Dr. Monical and Hontas Crooke was an artistic piece of work, winning the race in straight heats in 2:10, 2:11.

During the winter Mr. Butler has looked after a large bunch of broodmares, dozens of youngsters, his record horses and stallions alone, and has managed fairly well with his assistants. He has the work divided in a systematic manner. Certain of his assistants look after the yearlings and weanlings, another corps has charge of the two year olds, and so on, each to his own department. In this way he has wintered some 200 head at the farm, which includes all of his campaigning horses with the exception of five head which are in charge of Ed. Geers at the Memphis track.

He is to try a new plan with his campaigning horses this year. All of the horses which he intends to campaign on the Grand Circuit will go to Ed. Geers. Then he is going to have another bunch campaigned on the half-mile tracks. He has decided to turn them over to Tommy Murphy, the Long Island trainer, who will have quite an imposing string. He will have Intact 2:19, by Allerton—Lucy Wilton, dam of Gayton 2:08, by Wilton, Hettie G. 2:05, by Egg Hot—Bettina, by Betterton, Tobasco, a green pacer, by Direct—Pepper Sauce, by Onward, Lady Direct, a green mare, by Direct—Lulu F., by Christmas. This string may be added to from time to time by promising ones among the youngsters at the farm which may look like good prospects to develop. In case any of them show Grand Circuit form they will be transferred to the Geers string and sent for bigger money.

The fast young pacer Don Derby 2:06, by Chas. Derby—Bertha, by Alcantara, is to be kept at the Empire City track to be used by his owner in the matinees of the New York Driving Club, which is the amateur end of the Empire City Trotting Club. He will be likely to have others reserved for the matinees, but has not yet decided as to which they will be. He will take a greater interest in the wagon contests, so far as driving himself is concerned, than he did last year.

## Has a College Education.

Scott Hudson, who brought out the blind trotter Rhythmic and drove him to a record of 2:08 last year, has a college education. It is said when Scott returned home from college his father asked him what he intended doing, thinking he would receive an answer that the young man had decided on studying law or medicine, was dumbfounded, when the answer came, "I am going down to Lexington to buy me a trotter, sir." There was no argument put up against his decision for the old man knew if Scott made up his mind to buy a trotter that he would certainly buy a trotter. He went to Lexington, but could not find a trotter to suit him, but hired out to drive trotters that season for T. G. Anglin and was fairly successful from the start. He has continued his chosen profession ever since and has accumulated about \$100,000 in the ten years he has been driving trotters. Last year he won \$21,500 with Rhythmic alone, the largest sum ever won on the Grand Circuit in one season with a trotter, including first money in such noted stakes as the M. & M. for \$10,000, Bonner Memorial \$10,000, Woodruff \$5,000 and Empire \$5,000.

Jack's Napa Soda untangles the feet.

## Quality, Not Quantity.

One frequently sees and more frequently hears that this or that pedigree is the best in the world, and the subject has quite recently become one of importance to at least several owners of well-bred colts. We have received during the last few months innumerable communications from breeders or owners concerning the relative merits of their own and the colts of others. It has been especially noticeable in almost every instance that owners are carried away with the belief that a great pedigree consists of popular trotting crosses, piled one on top of the other, overlooking the fact that the essential virtue of a pedigree is lacking unless the individual members represented in these trotting crosses have themselves accomplished something. Two or three producing dams are worth any number of fashionable trotting crosses from which nothing has come; in other words, a pedigree tracing back for five or six generations, each cross a fashionable one, might be comparatively valueless, if a trotter had never come from the family, which means of course if none of the dams had produced a trotter of note. Great horses make great pedigrees, and the more great trotters that are to be found in the maternal ancestry of a horse the greater the pedigree. With the first, second and third dams famous broodmares, a pedigree can be a very strong one; in fact, almost fascinating, even if the sires represented are not great. Such a pedigree as this is more likely to be productive of great results than where the various dams have produced nothing, even though the sires themselves may have been of the sensational order. In the past breeders have been prone to judge blood lines too leniently, instead of insisting that a great trotter is absolutely essential in a family before that family can lay claim to distinction.

Any number of horses of mediocrity, while they are themselves an evidence of speed producing qualities do not place a family in the same position as does one really great race horse. We do not mean an obscure family from which may come an extremely fast horse, but all else being equal, the family that produces extremely fast horses, even in limited numbers, is relatively greater than that from which have come innumerable 2:30 trotters. For many years the opinion prevailed among unthinking horsemen that the Dictator family lacked real greatness as compared with some others, yet to-day there is not one enlightened student of blood lines and performances that does not consider the Dictator family infinitely superior to several families that are especially noted for the numbers of their 2:30 performers. After all, it is quality rather than quantity that is of the greatest value, and if judged by this test many of the so-called remarkable pedigrees would be found to have little to commend them. A filly that is a half sister to a great trotter is, all else being equal, more valuable for breeding purposes than one whose dam has never produced anything, and consequently a filly that has three or four producing dams, mares that have given to the world really high class horses, is just that much more valuable, and, naturally, infinitely more valuable than one that, no matter how well bred, has no maternal ancestor that has ever produced a first class horse. Students of the breeding problem have had reason within the last twenty years to materially change their line of reasoning, and to-day pedigrees must contain something more than a succession of fashionably bred sires and dams; they must contain horses that have done something themselves to prove their worthiness. It is for this reason that producing dams are so eagerly sought after, and on this principle that half brothers and sisters to noted performers command more money than animals that have no close relationship to a first class trotter or pacer. Blood lines are essential, but only for what they accomplish in the way of producing great race horses.—*Kentucky Stock Farm.*

## Increase the Premiums.

A contemporary makes the following sensible suggestion:

"This is the season when fair managers usually arrange their premium lists and classifications for the ensuing autumn and decide on the amount of money that is to be devoted to each division and breed. The prizes for horses and other live stock, at most fairs is too small, in some cases ridiculously so. However, it is a matter of give and take. Managers decline to offer large prizes without the prospect of seeing them carried off with competition of the right sort. But if the exhibitors will get in touch with these managers and agree to make a showing worthy of an adequate increase of prizes it seems that there ought not to be much trouble in attaining the desired end."

It is said that David Cahill believes that Charley Herr 2:07, is still good enough to go to the races and will train the old campaigner again this year.

## The New Hartford Futurity.

Secretary Horace Wilson has made public the conditions for the Hartford Futurity, which is for foals of this year. The value of the stake has been raised from \$10,000 to \$15,000, and the total payment to start will be but \$35, less than one-quarter of 1 per cent, probably one of the most liberal futurities ever devised. Nominations close April 1, and a payment is required when the mare is named. Two or three plans for this stake were discussed during the week, and it was finally decided to make it somewhat on the same plan as the Charter Oak Stake of \$10,000 and the Ohio Stake for a like amount. It is quite an innovation for a futurity, but judging from the opinion expressed by several breeders who were interviewed on the subject, it will meet the approval of those who have mares to nominate. It is certainly a radical change in colt racing. It will be a three heat race, finishing at the end of three heats, unless there should happen to be a tie. It is arranged to so divide the money that on each heat will depend the amount a colt can win. Two thousand five hundred dollars will be hung up for the winner of each of the three heats, with \$500 for the second. At the end of the three heats there will be \$4500 to be distributed according to the standing of the colts in the summary. \$3000 going to the first, \$1000 to the second and \$500 to the third. In case of a tie between two or more colts, they alone shall go a heat to decide the winner. Should a colt be a winner of a portion of the money and be distanced in a subsequent heat, it will not affect its winnings, and in case of a dead heat the money will be divided.

A pacing division for three year olds is also provided for in the stake and \$1500 of the amount of the purse is set aside for them, \$1000 to the first, \$300 to the second and \$200 to the third, according to the summary in the usual way, the race being at two in three heats. In the trotting division there is every incentive for a driver to go out and try for each heat. If a colt is able to land all three of them, he can win \$10,500 of the purse, the largest sum ever possible to win as first money in a trotting stake. A colt that can do no better than third will get no part of the money, except in the division of the \$4500 at the end of the three heats, and then his share is but \$500. Both Mr. Welch, and Secretary Wilson believe that this plan will insure spirited racing, and that it will inaugurate an entire new system in colt racing, which will tend greatly to increase public interest in them.

## A Hard Collar Preferred.

There is a striking analogy between the shoulders of a horse and the hand of a man. Each is respectively the lever by which the power is applied. Broadly speaking, every implement designed for the use of the hand is provided with a handle, and this handle is made to fit the hand, not the hand for the handle. It is about a certain size, is rounded, smooth and hard; at least, it is never made soft, with a view of being easier on the hand.

The three qualifications last named should be present in the horse collar, says a correspondent of *The Ohio Farmer*. If the collar is the proper length and fits the horse, and is stuffed full and round, it may be as hard as iron without danger of galling the shoulder. Certainly, the collar must fit the horse exactly. Of course, the hames must be drawn up high enough so that the draft will not center on the shoulder joint. The logic of this is simple. If the handle of a manual implement galls the hand it is because of its roughness or improper shape, never because it is too hard. If it is to be continuously used the man does not put on a mitten in warm weather to overcome a defect in it; neither does he demand that the handle be made of something soft, but simply that it be properly shaped, smooth and hard. The collar, which is round and hard, rolls on the skin at every motion of the animal, somewhat after the manner of a ball bearing, admitting the air, and thereby cooling the parts; but the flat, soft collar sticks so closely that it compels the skin to move on the underlying flesh in such a way as to produce irritation and deep seated galls.

## First Foal at Dreamworld.

Under date of February 10th the following telegram was received from Boston: First 1903 foal at Dreamworld last night, the one we anxiously hoped for, a beautiful bay filly by Ponce de Leon out of Prelacy, which is fast approaching the record breaking line as a broodmare. At ten years she is the dam of five perfect fillies in succeeding years by one stallion. Prelates, champion two year old, sold for \$4600 at public auction; Miss Previous, the world's greatest yearling, sold at public auction at world's record price of \$10,300; her 1901 weanling sold for \$1600 at public auction, and our last year's filly, Poncelacy, I consider the finest possible.—Thomas W. Lawson.

## THOROUGHBRED DEPARTMENT.

Durnell's career on the French turf was a brief one. It began and ended in the same year. It opened promisingly and closed in disaster. It was in the spring of 1901 that he first appeared on the courses of this country. It was in the fall of the same year that he made his hurried and unwilling exit, propelled by an edict of the Societe de Encouragement ruling him off. This edict was of a most sweeping nature. It shut Durnell out of all weighing rooms, debarred him from all training grounds, and forbade him to enter, or run, or ride any horse on race courses ruled by the Code des Courses. Some days later the Societe des Steeplechases met and approved of the ruling. The edict against Durnell was pronounced only after a full and searching investigation by the Inquiry Comite des Courses de la Societe de Encouragement.

Durnell started out here in the dual role of jockey and trainer. He rode and trained horses belonging to Baron Leonino, Lord Carnarvon and other owners. As a rider he was popular with the patrons of the courses, and as a trainer he apparently left nothing to be desired. In both capacities, as trainer and as jockey, his services were in constant demand. Brief as was his stay here, it is said that he made much money. Success seemed to attend him on every hand. Go where he would his services as a rider were eagerly sought for, and he had all the horses that any one man could care to train if not more than any one man could properly attend to.

It was at St. Cloud on October 28, 1891, that he was suspended as a jockey until the end of the year for not having started with Londres in the Prix de Marly le Roy. On the same day Ethere, trained by him, won the last race on the card at 40 to 1. This was the last of Durnell in France. Some days later, or to be exact on November 7th, and after a thorough investigation, he was warned away from all weighing rooms, off all training grounds, and forbidden to enter, or run, or ride any horse; on race courses ruled by the Code des Courses. This ruling, as related, was approved by the Societe des Steeplechases and Durnell's career here was closed.

Whatever opinion American turfmen may have of the ruling in this case, or whatever hope they may entertain of Durnell's restoration to the good graces of the Societe de Encouragement, there is no doubt here as to the justice of the ruling and apparently no sentiment that would nourish the hope of restoration. The Societe de Encouragement is a deliberate body. It considers its judgments well before pronouncing them, but having pronounced them the persons at whom they are aimed must abide by them. The chances of the American jockeys Henry and Reiff being restored to favor form a favorite topic for French horsemen, but "Boots" Durnell seems to be forgotten and it is improbable that he would obtain a license should he apply for one.—*Paris Correspondent Daily America.*

If Kinley Mack, the Islington horse which won the Brooklyn, Suburban and Beverwyck Handicaps and the Autumn Cup of 1900, does not make a success in the stud it will not be because he has not had a chance. James B. Haggin has taken a striking fancy to the superb bay and is breeding more first class mares to him at Elmendorf than to any other stallion, Salvator not excepted. The preference of the Master of Rancho del Paso and Elmendorf for Kinley Mack is shown by the record of the Elmendorf entries in the Brighton Produce Stakes for 1905.

E. S. Gardner, owner of the Avondale Stud, who has been visiting at Hamburg Place at the invitation of John E. Madden, reports that though now twenty-eight years, his great stallion Himyar, sire of the immortal Domino, is still the picture of health and will make a full season again this year.

Himyar now ranks as the oldest thoroughbred stallion in active service in the country, and is one of the oldest horses ever in the stud in America. He is now a year older than was imp. Bonnie Scotland and Star Davis when they died, two years older than imp. Mortimer, Longfellow, imp. Sovereign and imp. Glencoe when they passed away; three years older than Pat Molloy, Asterfield, Lexington and imp. Leamington were when they died, and four years older than Spendthrift when he died.

He is within one year of the age of the great Norfolk which broke the record among famous sires by living until he was twenty-nine years old.

That McChesney is the best horse on the running turf to-day is thoroughly believed by George Ehrlich, a St. Louis turfman, who has been operating for some time at New Orleans. During a trip to his home Ehrlich gave an interesting interview about "Big

Mac" that will prove of interest to Eastern horse followers. He said: "He is kind as a lamb, gentle as a dove and sound as the proverbial dollar. There is no danger of his being broken down. He comes to the post, stands perfectly still, then gets off with the best of the breakers. If you want him to run the first sixth or eighth in eleven seconds, just ask him to do it. If you want to have it run in eighteen seconds he will do it.

"You can ride him with a silk thread. He needs no holding and no urging. He just does as you bid him. He can run on any kind of a track, carry any kind of weight and, best of all, overcome all obstacles, such as hard luck, interference, etc. They sent speed wonders like L'Etrienne out to run him off his feet. He ran with them, and when he got ready, left them. They let him set the pace and tried to beat him with stretch runners like Federal. He set the pace and had lots left to win with when they got to him. He can carry a ton of lead, take up a child and win from good horses.

"Hermis?" He will beat him sure. Why? Hermis is a good horse, but he is a rank one. He wants to run in front. Now McChesney can beat any horse constituted like this. Send them over a mile and one-half, then take Hermis back. McChesney will lay right with him. The boy on McChesney can go 'Cluck, cluck, git up, git up.' McChesney will not mind that as long as the boy does not hunch him with his hands and heels. But it will set Hermis to fighting for his head. Hence if they want to rate him they will choke him. If they let him run Big Mac will lay with him to the final sixteenth and then come on.

"Chuctanunda might beat him at seven-eighths. Outside of that they have no horses East or West that can make him run. He eats well, works well and has not a bad characteristic or a fault. You can tip-toe stake horses with him or rate him to crabs. Above all he possesses that wonderful ability to take all the worst of the luck and the conditions and win by a nose in a drive or by ten lengths in a gallop.

Wealth and L'Etrienne are 1:13 mares for six furlongs. He can breeze to them at any part of it. There is no distance horse at New Orleans capable of giving him an argument, so we can not prove what he can do there. I would like to see him hook up with Chuctanunda, Major Daingerfield and Hermis with the understanding that the other three were to take turns at him; that is, Chuctanunda to set the first five furlongs, Daingerfield the second five and let the other two battle out in the last quarters."

Barney Schreiber has repurchased a half interest in Corrigan, a horse formerly owned by him that has achieved some fame while carrying the colors of Burns and Waterhouse. This son of Sain will in future run in the name of C. P. Waterhouse, who retains a half interest in him.

Clifford, a great favorite during his racing days both East and West, and one of the sturdiest built horses that ever carried silk, has not been a stud success thus far. Eight of his crop of 1902 are in the list, one a bay filly out of the famous imported mare Caledonia.

The Jockey Club Stewards intend to be more strict than usual in the matter of issuing licenses to trainers this year. No trainer will be permitted to handle a horse until his application has been regularly passed upon by the Board of Stewards. This is a move in the right direction and might well be copied by the local stewards. There has been too much latitude in the issuance of trainers' licenses to incompetent men at the California tracks, and the question of competency should cut as much figure in determining the right of an applicant to a trainer's license as the more frequently investigated question of honesty.

Jockey Boland, who commenced riding week before last, has an enviable record, having ridden four winners and one third horse out of a total of six mounts.

Although three of the six starters in the California Derby were bred and raised at Rancho del Paso, the victory went to an Eastern bred animal, Claude having been bred by W. P. Knight of Kentucky.

The class of horses which competed this year for the California Derby was much better than in former years, and the easy victory of Claude stamps him as a formidable candidate in the various Derbies in which he is entered in different States.

James B. Haggin has secured from W. C. Whitney the racehorse Nasturtium, and the horse has been transferred from La Belle to Elmendorf Stud Farm, Lexington, Ky. Whether Mr. Haggin has leased or bought Nasturtium from Mr. Whitney no one appeared to know. Nasturtium is now four years old. He is by Watercress-Margerique by Order, and will be remembered as Mr. Whitney's candidate for the English Derby last year, when he was shipped to England with

as much care as had he been a prince. He cost Mr. Whitney \$50,000 as a two-year-old, and won for him the Flatbush and other good stakes. At Elmendorf he will be the stable companion to the famous Water Color, a rival son of Watercress.

Half the horses get sour and first show temper through the bad handling of their boys. Watch the average lad who is about to "work out" a horse, and is told to break from, say, the quarter pole. He will begin to fight his horse long before he gets there, and have him crazy before the work begins. In the same way going to the post for a race, half the riders are nagging their mounts long before they line up—and after that fight them every minute till the race is run.

The Eastern jockeys are complaining lustily over the methods in vogue here in regard to charges for the use of lockers in the jockeys' room and the 2 per cent exacted for collecting jockeys' fees, also over the manner of securing mounts, where a fee is expected, and if not paid making it exceedingly disagreeable. They declare that no fees are charged for any of these things at the East and that boys, in order to get good mounts in this section must cater to the collector; in short, that all are not treated with consideration.

There is sound foundation for the report that Tod Sloan will soon blossom out as a trainer in England. The Earl of Carnarvon has offered the little American sole charge of his powerful string now in the hands of Grensil at the Earl's private establishment, Whatcombe, Berks. The Earl and Tod have been fast friends ever since the latter first went to England, and it was through the American jockey that he last year purchased in France his champion miller, Mauvezin. Though Tod is loath to settle down permanently if it is possible for him to again obtain a license from the English Jockey Club, he will probably accept this offer unless some action is taken in his case at the annual meeting of the club next April. There will be no difficulty as to a trainer's license, for anyone can train on outside grounds in England, unless actually ruled off the turf. It is only when a trainer is desirous of using their private grounds—Newmarket Heath—for a training ground that the club has any say in the matter. It is quite possible that Tod might be refused a license to train on the Heath, but it will not be necessary for him to apply for one, as he can train at any outside point, and still run the horses in his charge in any race on the Newmarket courses he sees fit to.

### The Best Ever Used.

Mr. C. F. Harrison, of Marshalltown, Iowa, writes: "I have used Quinn's Ointment on a curb of two years standing, removed the same and am more than pleased with results. It is the best blister that I have ever tried. I shall recommend it to all my friends and send you another order at an early date." This is only another expression which we are receiving daily from the best horsemen throughout the United States. For curbs, splints, spavins, wind-puffs and all blemishes try this valuable remedy. Price one dollar per bottle. Satisfaction guaranteed or money refunded. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot from your druggist.

The trustees of the estate of the late Frank Jones have decided to close the stables, remove all horses owned by purchasers and discharge all help. This brings to an end one of the finest breeding farms in New Hampshire.

Like all good things, Jackson's Napa Soda has a dozen counterfeiters.

## Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

## GOMBAULT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

**SUPERSEDES ALL CAUTERY OR FIRING.**

Impossible to produce any scar or blemish. The safest best Blister ever used. Take the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charge paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

## ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

### AT THE TRAPS.

The California Wing Club shoot on the first instant was well attended, the program arranged was a satisfactory one, and the initial pigeon shoot of the season passed off without a hitch. A number of well known shooters were also present as spectators. The main event started at 10 o'clock, and was the regular club match at twenty pigeons. Twenty-four shooters entered the match, four of them guests of the club. Each shooter was handicapped in distance, 31 yards being the longest and 26 the shortest distance from the traps. Besides the club purse of \$150, twelve shooters shot for a side pool, \$5 entrance. Clarence Nauman, Dr. A. T. Derby and Dr. A. M. Barker of San Jose scored straight, and divided \$100 in the club race. E. J. Donohoe, G. A. Haight, W. R. Murdoch and Henry Wagner, who each grassed 19 birds, divided the balance of the club purse. In the side pool Dr. Derby and Nauman divided \$50, and C. A. Haight won the balance of the purse. Captain Whitworth of the United States Army, Starter "Dick" Dwyer, "Smith" and W. C. Brown, the two latter well known devotees of trap shooting in past years, shot as guests of the club. The weather conditions were most pleasant and the birds supplied were strong and rapid flyers.

Following the club race came a six-bird pool with fourteen entries. Eight shooters, M. O. Feudner, Dr. McConnell, P. J. Walsh, C. A. Haight, H. Wagner, R. Dwyer, C. C. Nauman and Dr. Barker, scored straight and divided the purse.

A ten-bird race, \$5 entrance, brought twelve men to the shooting platform. The winners on clean scores were: A. M. Shields, C. C. Nauman and H. Wagner. A six-bird pool shoot at 33 yards rise concluded the day's shooting. In this event the purse was cut up between "Dick" Dwyer, G. H. T. Jackson, "Pete" Walsh and Clarence Nauman.

Nauman was unquestionably the star performer of the day. He grassed every bird trapped for him. Dr. Barker, who is a steady and reliable shooter, killed all of his birds, but could not score two, which dropped outside of the boundary fence. Walsh's chance for a straight in the ten-bird race was spoiled when he shot at his fourth pigeon. A wandering Fox Terrier came over the fence from the outside and was in line of fire for a brief time. When the dog was finally driven away a tailless black and white bird was sprung from No. 3 trap, shot at and escaped. The brief wait acted practically as a balk, an experience known to many trap-shooters. Three birds dead out in the club race was also hard luck for Walsh.

Ed. Donohoe, Dr. Derby and Dr. O'Connell were in good fettle and shot well. The scores and handicap distances, etc., are summarized as follows:

Club match, 20 pigeons, \$150 added money, distance handicap, six high guns. Side pool, \$5 entrance, 3 moneys, 12 entries—

Nauman, C. C.	31 yds.—2212 2112 2112 2112—20	Derby, Dr. A. T.	30 "—2222 2222 2111 1212—20
Barker, A. M.	29 "—1121 1212 1221 2121—20	Donohoe, E. J.	30 "—2121 2121 2121 2122—19
Haight, C. A.	31 "—2222 2222 2221 1222—19	Murdoch, W. R.	30 "—1121 2121 2121 2122—19
Wagner, H. F.	29 "—2121 2121 2121 1012—19	Feudner, M. O.	31 "—1221 2121 2222 2222—18
Walsh, P. J.	31 "—1112 1122 1222 2012—18	"Smith"	30 "—1221 2121 1011 1111—18

Sacramento shooters opened the blue rock season at the capital city last Sunday under the auspices of the Blue Rock Gun Club. A good program furnished an excellent day's sport, as the weather conditions were so perfect. One of the features of the day was a shooting party of visitors from Davisville, Cal., who were the nom de plumes of Googen-

heimer, Spoonbill, Skeeche, Poor Bill, etc. The scores made were as follows:

Ten targets—Veller 8, Fical 5, Shaw 6, Davis Sr. 8, Vandeford 4, Gusto 10, Wilbur 7, Kerr Jr. 5, Davis Jr. 5, Adams 5, Snook 4, Amber 4, Hunt 6, Newbert 10, Morgan 7, Shaw 7, Vetter 8, Gusto 7, Davis Sr. 9, Adams 7, Kerr Jr. 9, Snook 5, Wilbur 8, Vandeford 7, Field 5, Gusto 7, Vetter 5, Newbert 10, Morgan 7, Hunt 6.

Club shoot, twenty-five birds—Vandeford 12, Kerr Jr. 14, Wilbur 20, Shaw 16, Davis Sr. 22, Fical 14, Gusto 23, Newbert 23, Vetter 13, Davis Jr. 16, Amber 17, Woodworth 23.

Fifteen birds—Just 12, Eckhardt 10, Adams 10, Morgan 13, Vetter 13, Newbert 15, Just 12, Hunt 8, Gusto 14, Amber 10, Eckhardt 13, Snook 9, Davis Sr. 13, Morgan 8, Shaw 10, McWilliams 13, Woodworth 13, Just 8, Googenheimer 13, Poor Bill 11, Skeeche 8, Spoonbill 12, Hunt 8, Fical 8.

Ten birds—Snook 7, McWilliams 8, Shaw 8, Eckhardt 7, Just 8, Morgan 7, Woodworth 8, Fical 5, Morgan 9, Eckhardt 9, McWilliams 9, Gusto 8.

Fifteen birds (pool shoot)—Poor Bill 9, Davis Sr. 13, Skeeche 12, Gusto 13, Just 12, McWilliams 11.

Pool shoot (fifteen birds)—Googenheimer 13, Spoonbill 14, Wilson 10, Morean 11, Fical 10, Woodworth 13.

Pool shoot (fifteen birds)—Poor Bill 8, Googenheimer 11, Spoonbill 11, Skeeche 13, Gusto 13, Just 11, McWilliams 12, Davis Sr. 12, Kerr Jr. 2, Fical 6, Woodworth 8.

Ten birds (pool shoot) Just 7, McWilliams 9, Spoonbill 9, Gusto 9, Poor Bill 7, Skeeche 8.

Ten birds—Googenheimer 10, Fical 9, Wilbur 7, O'Brien 4, Googenheimer 7, Poor Bill 7, Gusto 7, Davis Sr. 10, Skeeche 8, Spoonbill 9.

Ten birds—Fical 8, Kerr Jr. 10, Shaw 8, Webber 9, Fical 9, Davis Jr. 6.

Ten birds—Googenheimer 8, Spoonbill 10, Skeeche 6, Poor Bill 7, Shaw 7, Kerr Jr. 5.

Five birds—Skeeche 5, Googenheimer 4, Poor Bill 4, Spoonbill 5.

S. A. Tucker, the well-known representative of the Parker gun, is on his way West to the Pacific Coast. He reached Detroit last Friday, during the progress of John Parker's tournament, and was a welcome addition to the representative gathering of sportsmen at the "Wayne"—headquarters for all trap shooters visiting Detroit.

Mr. Tucker, by the way, owns one of the best farms in the State of Rhode Island, its peach and apple orchard being the envy of the farmers for miles around. Of course, not a single specimen of this blue-blooded fruit is allowed to go to waste. All that are not sent to market are carefully barreled and put in a cold-storage house erected on the Tucker farm for this purpose.

Upon his semi-annual visits to Rhode Island, Mr. Tucker, prior to departing for the Pacific Coast, fills a trunk with the biggest and reddest of the apples in cold storage and invariably carries a pocket full of them in his overcoat each day while en route for California.

To this habit a poor fellow on the train leaving Cleveland, one day last week, owes his life. The attention of other passengers in the car was attracted to the man's starving condition, but, as there was no dining car on the train, there was no possible relief at hand. Tucker, learning the man's condition, promptly produced two luscious pippins and the famished traveler was revived. At the first station substantial food was procured, and an hour later the man left the train with the flush of returning strength in his cheeks.

"And yet," says Tucker, "the boys call me a Reuben for carrying apples with me on my business trips."—*Rider and Driver.*

### A Unique Tent.

One of the most pleasant features of an outing trip is a comfortable tent. Most tents, for that matter, are comfortable when erected; but a drawback to the convenient use and carrying of most tents is that they are cumbersome and unwieldy when not in actual use. The packing around of a tent, tent ropes, poles, pegs, etc., is at times a handicap to the enjoyment of a vacation in the country. Many styles of tents have been designed and tried but in the main the usual shortcomings are more or less intensified after a brief trial.

What seems unquestionably to be nearly perfection in a small tent, to accommodate one, two or three people, is an umbrella tent designed by that genial sportsman, Henry E. Skinner. The center pole is made in three sections; the top is a waterproof, strong umbrella, about five feet in diameter. The utility of this device over all others will be found in the abundance of head room. The walls of the tent at the base can be easily extended to a ten foot circle. Another important feature is that the tent can be folded into a small, compact roll three feet long, the whole not weighing more than three pounds. The tent will be patented and from present indications the H. E. Skinner Company will be busy the coming season filling orders for these tents.

The work of planting a million salmon fry from the United States fishery at Baird has been completed. Three-fourths of the small fish were placed in the McCloud river and the remainder in the Pit river, near the mouth of the McCloud. The fry of this season are declared to be exceptionally fine fish. For two months preceding their liberation the fish were fed at the Baird hatchery.

### A Buffalo Farm to be Established in Wisconsin.

Here is the latest in trusts—the "buffalo trust," designed to corral all the living specimens of the former monarch of the prairie. In the entire country to-day, according to the latest government statistics, there are not more than 400 head, including those in private parks or municipal zoological gardens.

Of this remnant of the magnificent bison the United States government has, in the Yellowstone Park, 32 head. Chicago, in its famous Lincoln Park, by the shores of Lake Michigan, has 15 of the highly prized animals. Golden Gate Park, San Francisco, owns exactly 6. The Zoological Garden in Cincinnati contains 4, and Central Park, New York, has 7.

The private collection of the late Austin Corbin, which his estate maintained in the Corbin game preserves in New Hampshire, has passed into the control of the commissioners of the Zoological Gardens in Bronx Park, New York city. The Corbin collection has been reduced by death and accidents in transportation so that it probably does not number more than a dozen head, but all are splendid specimens, and the group forms one of the most attractive features of New York's latest public show place. At Norumbega Park two head are on exhibition.

Trappers, hunters, cattle kings of the great West and army officers on United States posts in far off Arizona, Dakota and Montana shake their heads dubiously when asked, "Is it not possible to preserve this noble animal? Must the buffalo disappear from view like the Indians, whose wigwams formerly dotted the plains of the West?"

It is interesting to learn, therefore, that Major Gordon W. Lillie ("Pawnee Bill"), whose life has been spent to a large extent in the freedom of the plains and on the vast cattle ranges of the territory running from the British Northwest to the Pan-Handle strip in Texas, is forming what may well be called a "buffalo trust."

Major Lillie, who has probably made half a dozen fortunes in the last 10 years, and at present has ample means to carry out his cherished project, has quietly obtained possession of 288 head of buffalo. It is likely that within a few weeks he will have become the owner of all the remaining buffalo not owned by the government or on exhibition in municipal parks or in private game preserves.

About a month ago "Pawnee Bill," as Major Lillie is affectionately called by his friends and admirers, purchased the herd of 78 head on the famous Goodnight ranch in the Pan Handle section in Texas. On his own extensive range in Oklahoma Major Lillie has 210 head. He is negotiating for a herd of about 30 head owned by two brothers in North Dakota, near the Manitoba line, and it is almost certain that he will come into possession of the few remaining buffalo in Montana, only a dozen, known as the Allard herd.

This means that in forming what may be called the "one man buffalo trust," Major Lillie will have corralled practically all the members of the species in the world. This has been no small task, as may easily be comprehended, but Major Lillie and his able lieutenant, L. F. Nicodemus, were equal to the proposition.

What are Major Lillie's plans is the question that naturally arises. Here they are:

Major Lillie explains that it is his intention not only to prevent the extinction of the former ruler of the prairie, but to round up practically all the remaining specimens and place them on a ranch in Wisconsin, there to breed and supply the market from a place easily accessible to Milwaukee and Chicago live stock buyers. With these ends in view, he has arranged for the purchase of a great farm known as the Daniel Wells place, four miles north of Kenosha, Wis. Here he will establish the first buffalo ranch ever laid out east of the Mississippi river.

If asked why this move from the natural home of the bison is to be made, Major Lillie will say that it is for strictly business purposes. He maintains that the ranges of the far West are no longer fitted as a home for the rapidly disappearing buffalo family.

There is the dreaded Texas fever, that plague of the cattle raiser, which every few years sweeps up from the Panhandle country, infecting the buffaloes, and leaving the bones of noble specimens to bleach where once the bison roamed in freedom and full vigor. Then it is well known that notwithstanding the effect of the march of civilization upon the habits and tastes of the Indians, the red man still pines for a goodly chunk of buffalo meat.

No matter how closely watched by Indian agents and the government troops, it is not an infrequent occurrence for the Indians to make a raid, as they did last year on Major Lillie's Oklahoma herd, and carry off some of the noblest specimens to grace one of their annual feasts. Major Lillie says he has learned by experience that an Indian would face a regiment in order to secure a buffalo for the banquet.

With the opening of the Wisconsin ranch, and the raising of the buffalo for commercial purposes, Major Lillie expects to reduce the losses from disease to a very small percentage. His Oklahoma herd increased during 1902 twenty-five per cent. Had the animals been within easy shipping distance of the Chicago live stock market, many thousands of dollars could have been realized from the sale of the carcasses, pelts and heads.

Market men in Boston say that twenty-five buffaloes were needed to supply the epicures in that city, New York and Chicago during the last holiday season. Nearly every one knows that a live buffalo is a very valuable possession for show purposes, but few understand that a dead bison is worth almost as much as his brother or sister alive and kicking. A thoroughly sound buffalo slaughtered is worth from \$1000 to \$1200 on the market, this on the estimate that the carcass

will "dress up" from 600 to 900 pounds. The pelt alone is worth \$150, and not infrequently from \$200 to \$300 is paid for the noble head.

Major Lillie does not attempt to explain a phenomenon of nature which has militated against the rapid reproduction of the buffalo. He merely states as a fact that 80 per cent of the calves on his Oklahoma ranch are males. He says that the only thing to do is to wait for nature to remedy this inequality.

The place Major Lillie has purchased for the breeding place and home of the "buffalo trust" is well watered and offers many hundreds of acres for grazing land. Ample buildings are already on the farm, and will be fitted for the quarters of the buffaloes, their herders and Indian tenders.

Of course, Major Lillie will make the winter quarters of the "Pawnee Bill" show on the Wells farm, but this is only a minor feature of his enterprise. It is estimated that \$500,000 will have been invested in the purchase and equipment of the property. But the Major feels assured that this expenditure, combined with intelligent management, will compel success, and handsome dividends will be returned upon the outlay of \$1,000,000.

Throughout the far West Major Lillie is known as a man of daring, coolness and business shrewdness. He is the president of the Arkansas Valley National Bank, at Pawnee, Ok.

He is not a plainsman by birth, but was born and raised in a quiet home near Bloomington, Ill., about 40 years ago. When a youth he went with his father to Kansas and to-day, in his unassuming way, among friends, he will admit that he was the rawest of "tenderfeet." From the time he was 15 years old he associated with trappers and cattlemen, and he has bought and driven cattle through the Indian Territory when it was as much as a man's life was worth to cross that wild country with a herd. To-day Major Lillie has in his employ a quaint character known as "Trapper Tom," who took the "tenderfoot" into camp when the present "Pawnee Bill," was only 15 years old.

From his associations with the Arapahoes, Cheyennes and Kiowas young Lillie became familiar with tribal tongues, and was appointed government interpreter for the Pawnee tribe. In the great rush to the Cherokee strip Major Lillie, who was known to be familiar with the best locations for town sites and farms, rode at the head of 5000 land-seekers, but, with his army, was held up by the government until the strip was declared open to settlement. He founded the town of Pawnee, where his family spends several months of each year.

In speaking of the transportation of live buffalo, he said that it was one of the most difficult problems breeders, shippers and showmen have to contend with. "When you observe the low-hanging head," he said, "and bear in mind the obstinacy and contrariness of the beast, you may realize how difficult it is to get a herd of buffalo on board ships, cattle cars or a show train. I have seen my men spend as much as four hours in loading an intractable specimen on a train in Oklahoma. Then, in traveling any distance, despite all precautions, a buffalo will constantly jam his head against the end of the stall or side of the car. This naturally renders him fretful and feverish and makes the percentage of loss quite heavy."

If Major Lillie's plans in connection with the "one man buffalo trust" are as successfully carried out as they have been conceived, Easter households will, within a few years, be favored with the dish now known as a luxury, and so dear to the plainsman in his trips across the western prairies, for buffalo meat will be within reach of all.

### The White Ptarmigan.

One of the most interesting new exhibits at the American Museum of Natural History is a case containing specimens of the white-tailed ptarmigan, or "mountain grouse," so mounted as to illustrate the unique way in which nature has provided for the protection of her children.

The ptarmigan, an inhabitant of the Rockies and of Alaska, is one of the many birds which change their color from brown or gray in the summer months to snowy white in the winter, so that in each case it is enabled to elude its natural enemies by reason of its close color resemblance to its surroundings. But unlike the majority of its fellows who are provided with a variable molt, the ptarmigan dons a distinctive suit of clothing, spring and fall as well, making, all told, four changes in the year's course.

The exhibit at the American Museum is the first in New York of its kind to illustrate the changes of the seasons, and is unusually excellent, for the specimens in it were secured just as the four coats were at their best. In one division of the large case is a ptarmigan with its young in the summer time, its plumage not unlike that of a partridge in color and marking, and closely corresponding to the browns of the grasses in which its nest is made. It is told by E. R. Warren, a bird lover of Butte, who has made of the ptarmigan a special study, that when he had approached a nest of mother and young for the purpose of securing photographs with the birds plainly in sight, he suddenly lost sight of them.

In a few moments the brood appeared again in the same spot where he had marked his nest before, both mother and young birds with necks stretched as if looking for something far above them in the air. Several experiences of the kind induced Mr. Warren also to look toward the sky when the ptarmigan disappeared, and he noticed invariably that some hawk or other bird of prey was sweeping in wide circles not far from the ground.

The second division of the ptarmigan case at the American Museum contains the birds in their autumn plumage, a mixture of brown and white, with the latter becoming predominant as the approach of

winter dries up the grasses and at length covers the ground with its white mantle. At this stage of the year it happens that the ptarmigan becomes very shy, is seldom seen out in the open, and when away from cover does not allow the near approach of the human, with whom it has been very friendly during the summer. The winter molt is completed in November, and for some little time, until the snow has reached its regular winter depth of from two to five feet, the ptarmigan is seen hardly at all, except as it comes to water. But let the snow cover all growing things near the ground, and the ptarmigan comes out bravely again, and in a way even more friendly than during the summer months, when the photographer was able to approach within a dozen feet for his snapshot.

The ptarmigan finds its winter food in the buds of willow branches and moss which flowing water has spared from the snow. For the slaking of thirst it has been known to eat snow, after the fashion of the small boy coasting. Two specimens of ptarmigan in winter plumage are in the third division of the case at the museum.

In the fourth division are specimens of the bird in spring attire, brown and white, but with the former predominating, as the latter did the fall before. Observers say that in the spring the ptarmigan becomes shy again until its summer moulting has given it renewed assurance of safety.

In contrast with the ways of the ptarmigan and other edible birds, attention is called to those of the crow, always black and visible, but provided with a saving odor of musk so strong as to announce to all the hawk and eagle kind that to eat crow one must indeed be hard up. In the animal kingdom the weasel, with its annual change from black to white, is an interesting example of the same protection of nature. It is, however, a double protection in the weasel's case, because, with all its snowy coat, the extreme tip of the weasel's tail remains black, so that the winter hunter shooting at the only part of the moving animal clearly visible upon the snow may invariably speed his bullet too late, or at the worst, cut from Mr. Weasel's appendage a few stray hairs.

### San Francisco Fly-Casting Club.

The opening contests at Stow lake last Saturday and Sunday brought out a fair representation of fly-casters, notably so a number of new beginners. The initial event in delicacy casting is remarkable for the number of high scores made. The change made in style, scoring and the tackle used in this event will be found to be a beneficial one. Instead of the heavier tackle heretofore used, the contestants now cast with lighter tackle and endeavor to make casts such as would catch fish on a stream. A splash of fly or line counting as a demerit of one foot, thus bringing the sport to a degree practical in every essential.

The lure casting event is notable in this respect, on Saturday Mr. Kenniff came within a fraction of tying his world's tournament score, and on the day following, he scored the phenomenal record of 93 4-15ths, coming as near to perfection as will possibly be cast again in this event for some time to come. The general excellence of the work done prevents extended individual notice, the complete scores for both day's casting are given below.

SATURDAY CONTEST No. 1—Stow Lake, February 28, 1903. Wind, northeast. Weather, fair. Judges—Messrs. Kierulff and Edwards. Referee, Mr. Young Clerk, Mr. Brotherton.

Reed, F. H.	84	89	93 8-12	87 6-12
Dinkel pie, HGW.	40			90 7-12

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage. The fractions in lure casting are 15ths.

### Bad for the Bass.

Striped bass anglers are getting a few fish here and there; a 24 pound bass was taken last Sunday at Point Richmond by Wm. Brown. The net fishermen have taken a new departure in seeking these fine fish. They now sink their nets down into deeper water than usual heretofore and often make hauls of a ton or more of bass. The use of a two and one-half inch mesh net is common, as is the persistent practice of fishing on Sundays. This is a double violation of the law; there is not a Sunday but what arrests could be

made, not only at Tiburon, a place easy of access, but also at numerous other places. The apathy of the Fish Commission in these respects is open to much criticism.

It is claimed that the fish are so plentiful in our waters that the supply will stand the present heavy and increasing draft upon the resources of our fishing ground—it will it is true; but for how long? Those commercially interested in this staple food fish care not for the present, else the fishing boats almost without exception would not devote their time to the fish that pays the net men the highest price. There should undoubtedly be a close season during one or all of the spawning months. Non provision for a close season in the new fish law, under existing circumstances has not yet ceased to be a matter of surprise to those interested in practical fish propagation and protection.

### DOINGS IN DOGDOM.

The dates set for the San Francisco Kennel Club show are April 22, 23, 24 and 25. George Raper has been invited to judge all classes. The bench show committee will be President W. C. Ralston, C. K. Harley and John Love Cunningham. Mr. Boyle of Oakland will act as Superintendent. We were informed that the superintendency had been offered to W. E. Chute who declined to act, for the reason that he contemplated a business trip away from the city and could not devote the time necessary to look after the show.

The show will be held as usual in the Mechanic's Pavilion.

George Raper sailed for England on February 25th and will decide before returning whether he will judge at San Francisco and Portland.

King Commando is now on his way to this city to be installed in the Ellegay Kennels' stud. Commando had been located at the Hedden Kennels, Wakefield, Mass., for some time past.

Mrs. Payne Shafter was presented recently by Will S. Kittle with the handsome young Llewellyn bitch Belle (Luke Jr.—Hazel C.). Belle comes from a strain of most capable working field dogs and should give a good account of herself, as there is no better place in this State to develop a dog than on the Shafter estate in Marin county.

Phil Meyer still has a penchant for a good Cocker; he purchased last week from J. P. Atkins, both Sweetheart and her daughter, Sweetheart's First, a full sister to Mona II. Both Sweetheart's First and Mona II. are by Ch. Havoc out of Sweetheart, both well known bench winners. An effort to include Mona II. in the purchase was not successful, Mr. Atkins refusing to part with her.

Ch. Woodcote Wonder seems to be in demand as a stud. He was bred to two bitches within the week. Wonder's puppies all seem to do well here.

Wonder is in gallant fettle, we saw him one day recently at Baker's beach where he was having a great time going out through the surf and retrieving pieces of wood, etc., thrown into the water by Bradshaw.

The Northern Circuit opens at Victoria on April 1st. Seattle comes next and then Portland, the latter show closing April 18th. These shows will be under P. K. L. rules.

The San Francisco show dates, April 22-25th make it extremely inconvenient for a northern representation of local dogs, or in fact the taking of any California dogs for all of the northern shows. To go at all it will just about be necessary for a handler to "cut out" Portland, if he desires to get his string here on time and fresh for the Frisco show. The northern trip is a trying one, should the handler contemplate winding up at the local show here. Under the circumstances, it looks now as if there will be scant representation either way, north or south, for the few Coast shows this year, decidedly a set-back oversight on the part of somebody.

There should be an intense cordial among the promoters of Coast shows, irrespective of rules under which these shows are given, for the interest of one club is the interest of all. It comes somewhat in the nature of a surprise that the officials of the leading kennel club on the Coast will pass over an opportunity tending to the mutual interest of Coast fanciers.

The Portland Kennel Club show, P. K. L. rules, will come off April 15th, 16th, 17th and 18th. It is probable the ring will be under the judicial supervision of an expert from "across the water."

Mr. Augustin De Winton recently sold the Old English Sheep bitch Dame Marjory to Mr. Norman J. Stewart, of Charlecombe-grove, Bath, who has now sent her out to California. She sailed in the steamship Mesaba and should be in New York about the 17th inst. She is going to Mr. Harker, the proprietor of the *Fanciers' Monthly*, and she should prove a valuable addition to his kennels, as she is by Gentleman Jim out of Lady's Maid, and in whelp to Harvester. She was bred by Messrs. Tilley Bros. This is the third Bobtail Mr. Stewart has exported to California, where Bobtails have hitherto been unknown, but promise to become the "It" of Pacific Coast dogdom—English Stock-keeper.

### VISITS.

Elias Williams' Bull Terrier bitch Newmarket Jean (New market Duke-Edgewood Jean) to Woodlawn Kennels' Ch. Woodcote Wonder (Dulverton-Fan), March 6 & 8, 1903.

Glenwood Kennels sold to Naird Kennels the rough coat St. Bernard dog Le King (Ch. Le Prince—Sybil—Lola), February 24, 1903.

## The Old English Sheepdog.

In the general ignorance about the varied points which constitute the difference in the many breeds of dogs, that still prevails in this country even among fanciers, their expert knowledge being usually confined to the breed that is their own particular fancy, we would again draw attention to the danger of assimilating, as it were, the Old English Sheepdog with the rough Collie, says the *American Stock-Keeper*.

Perhaps no two breeds that have a common purpose are so dissimilar in points and appearance. Both have much hair and there the resemblance ends. The idea, therefore, that because a man is an expert Collie judge that he must necessarily be a good judge of Sheepdogs, is absurd. The very points in head, for instance, which are sought for in the Collie are shunned as altogether undesirable in the Sheepdog. This cannot be more distinctly brought to the knowledge of the reader than by a comparison of the standards of each breed as applied to the head.

In the standard for the Old English Sheepdog the head is described as follows:

**Skull.**—Capacious, and rather squarely formed, giving plenty of room for brain power. The parts over the eyes should be well arched and the whole well covered with hair. **Jaw.**—fairly long, strong, square and truncated; the stop should be defined to avoid a Deerhound face. (The attention of judges is particularly called to the above properties, as a long, narrow head is a deformity.) **Eyes.**—Vary according to the color of the dog, but in the glaucous or blue dogs a pearl, wall, or china eye, is considered typical. **Nose.**—Always large, black and capacious. **Teeth.**—Strong and large, evenly placed and level in opposition.

For the Collie the standard is again quoted:

**Head.**—Skull flat, moderately wide between the ears, and gradually tapering to the eyes. There should be but a very slight depression at the stop. The proper width of skull necessarily depends upon the combined length of skull and muzzle, for what would be a thick skull in one dog is not necessarily so in another of same girth, but better supported by length of muzzle. It must also be considered in conjunction with the size of the dog, and should incline to lightness, accompanied by cleanness of outline of cheeks and jaws. A heavy headed dog lacks the bright, alert and full-of-sense look so much to be desired. On the other hand the attenuated head is most frequently seen with small Terrier eyes, which show no character. Muzzle of fair length and tapering to the nose, which should be black; it must not show weakness nor appear snipy. Teeth of good size and even. The English standard says, "Mouth the least bit overshot," but this is by no means desirable, and if at all exaggerated should be treated as a malformation.

It will be seen from the above there is no similarity. Then in the matter of ears they are entirely at variance. In the Bobtail they are to be small and carried flat to the head, and coated moderately, while the Collie's, as we all know, are semi-prick and when erected should get as near together on the top of the skull as possible.

There are many other points of variance, but this is enough to prove the dissimilarity of the two breeds and suggest to show committees the inadvisability of giving the Collie man the Bobtail to judge just because it is a Sheepdog. It is on a par with giving "Scotties" to the Fox Terrier man and Toy Spaniels to the Sporting Spaniel judge. Unless, of course, the man is an all rounder and studies the breeds as part of his education as a professional judge, or, which is so very rarely the case, the Collie man fancies the Bobtail and vice versa.

The increasing interest taken in these quaint, but very useful dogs, not only as intelligent workers but devoted and lively companions, marks a welcome addition to the many attractions of a dog show.

The picture of Ch. Wilberforce, whose importation for Mrs. Geo. S. Thomas was exclusively told in these columns, shows a beautiful specimen of the breed and especially does it show off the peculiarity of coat, not curly nor straight like the Collie, but shaggy, no one lock having relation to the other. In Rawdon Lee's "Modern Dogs" is given a description of Sir Cavendish, noted as one of the most typical of his breed ever produced. In default of measurements of Wilberforce to give the reader some idea of the dog's length of coat and other characteristics, we quote some particulars about this dog. Sir Cavendish was a pigeon blue and white dog, with a white collar and white blaze, 23½ inches at the shoulder, 52 pounds in weight, with very small ears entirely buried in coat, which is long, thick and shaggy, free from either straightness or curl. It is 11 inches long upon his loins and hindquarters, while his face and legs are evenly and equally clothed with hair, the front of the legs carrying as much hair as the back part of the same. His tail is a very short, natural stump. . . . His sire, Sir Caradoc, is well known as a pigeon blue and white dog of large size, rather soft in coat, but showing remarkable character, both he and his son inheriting their beautiful color and Sheepdog characteristics from old Dame Margery, who was also a "natural Bob." Her strain, we are told, is remarkable, as most of the dogs and bitches bred therefrom possess double dew claws upon one or both hind legs.

Dr. Edwards-Ker was known as the greatest authority on the breed which owes so much to this energetic champion. He was a great believer in size—the bigger the better, so long as character was preserved. Dr. Ker tried for years to produce the pigeon blue by breeding blue grizzle to blue grizzle, but each litter came darker in color and the size fell off. To get back to his old bitch Dame Margery—the source of all good Bobtails—to Jockey, with a idea of color. The old bitch produced two dogs, one a beautiful pigeon blue and white, afterward known as Sir Caradoc, and an almost all white, with blue ears and tan

cheeks. Sir Caradoc was the great grandsire of Ch. Wilberforce and the sire of Ch. Mayor of Newport, that was imported by Col. Hilton or Mr. Morgan, we forget which. Ch. Wilberforce seems to have inherited the characteristics of the breed in size, compactness, strength and grand, square, deep head so plentifully clothed with hair. He was bred by Mr. Sam Woodiwiss and is by Washington out of May Blossom, Washington by Ch. Mayor of Newport out of Cotts' Bess, by Wall Eyed Bob (another noted winner) out of Little Nell; Ch. Mayor of Newport by Sir Caradoc out of Dame Ruth, Sir Caradoc by Jockey out of Dame Margery. He was whelped June 22, 1897, and has won 28 firsts and 20 championships and 13 specials. Among his scalps hangs Ch. Bouncing Lass.

The claim that the Sheepdog is of Welsh origin is pretty well silenced by records. It is entirely English and commonly found in the midland and southern countries, its principal center being Suffolk. The Old English Sheepdog is claimed to have been a much bigger dog than the average run of the dogs of the present day and claims an antiquity reaching back to the Roman invasion, being the protector of flocks long before the Collie was ever heard of.

The rest of the standard of the Old English Sheepdog is as follows:

**Ears.**—Small and carried flat to side of head, coated moderately. **Legs.**—Forelegs should be dead straight, with plenty of bone, removing the body a medium height from the ground, without approaching legginess; well coated all around. **Feet.**—Small, round, toes well arched, and pads thick and hard. **Tail.**—Puppies requiring docking must have an appendage left of from one and a half to two inches, and the operation performed when not older than four days. **Neck and shoulders.**—Neck fairly long, arched gracefully and well coated with hair; the shoulders sloping and narrow at the points, the dog standing lower at the shoulder than the loin. **Body.**—Rather short and very compact, ribs well sprung and brisket deep and capacious. **Loin** very stout and gently arched, while the hindquarters should be round and muscular, with well let down hocks, and the hams densely coated with a thick long jacket, in excess of any other part. **Coat.**—Profuse and of a good hard texture; not straight, but shaggy and free from curl. Undercoat a waterproof pile, when not removed by grooming or season. **Color.**—Any shade of grey, grizzle, blue, or blue merled, with or without white markings, or in reverse. **Height.**—Twenty-two inches and upwards for dogs, slightly less for bitches. **General appearance.**—A strong, compact looking dog, of great symmetry, absolutely free of legginess or weakness, profusely coated all over, very elastic in his gallop, but in walking or trotting he has a characteristic ambling or pacing movement, and his bark should be loud, with a peculiar pot casse ring in it. Taking him all round, he is a thick set, muscular, able-bodied dog, with a most intelligent expression, free of all Poodle or Deerhound character.

## Canine Distemper Vaccine.

The heavy mortality from distemper among young dogs has for many years occupied the attention of bacteriologists, particularly with the view of preparing a "vaccine" that would be of practical use, that is to say, harmless, but at the same time effective in protecting the dog against distemper for a sufficient length of time. The desired end, it is claimed, was accomplished by Dr. C. M. Phisalix, of Paris, and his method was described in his communication of April 7, 1901, to the French Academy of Sciences.

From May 15, 1901, to July 31, 1902, Dr. Phisalix vaccinated 298 young dogs, and the mortality from distemper was 4.3 per cent as compared with the usual mortality of from 25 to 80 per cent. From May 15, 1901, to May 15, 1902, Dr. Phisalix furnished 1250 doses of his vaccine to Veterinarians in France, Holland, Belgium, England, Germany, Switzerland and Algeria. The deaths from distemper among these dogs amounted to 36, that is to say, 2.88 per cent. Out of the 1250 dogs, 29, or 2.4 per cent, had a benign attack of the disease without evil effects. Out of 40 dogs affected with distemper at the time of vaccination, 34 recovered. A full report was presented by Dr. Phisalix to the French Academy of Sciences on May 26, 1902. This was translated into English by Henry Gray, M. R. C. V. S., and published in the *Veterinary Record* (London), August 30, 1902.

The conclusion arrived at is that canine distemper vaccine prepared by Dr. Phisalix can be depended upon in about 97 per cent of the cases in which it is used, and will protect the dog against distemper up to the age of 15 months. It certainly fills a long-felt want and will be welcomed by all veterinarians having a canine practice.

The vaccination consists in the inoculation of two lymphs of different degrees of attenuation—the second lymph being administered 12 to 15 days after the first. Dogs can be vaccinated when from six weeks to 15 months old, though experience shows that about 2 months is an advantageous age. But the dog should never be vaccinated unless it is in good health. The

vaccine remains active from 3 to 4 months, if in the meantime being kept in a cool place.

The vaccine used in this operation is obtained by cultivating the virulent microbe or *cocco-bacillus* of Lignieres and Phisalix, termed the *Pasteurella canis*, which is a very small micro-organism found in the blood and viscera of dogs, cats, guinea pigs, etc., during the early stage of distemper, so as to weaken it, that when injected under the skin it does not cause distemper, but acts as a preventive. It is of two grades of strength, one a weaker or more attenuated culture, to be used as a first vaccine, the other a stronger and less attenuated culture, to be used as a second vaccine. It reduces the liability to the disease from 90 or 100 per cent to 5 per cent, and the mortality from 90 or 50 per cent to 2 or 3 per cent.

It should be adopted as early as possible, preferably at the age of weaning or soon after, before the puppies are exposed to the risk of coming in contact with distemper-dogs or are put in infected quarters or surroundings. However, dogs of all ages can be vaccinated to advantage. It seems very harmless to dogs of all weights, of all ages and of all breeds, provided they are strong and free from disease or infection. Healthy puppies or adult dogs only should be vaccinated. It does not prevent distemper if the dog be exposed to contagion before the vaccination "takes" or is already the subject of the disease at the time of inoculation. Two inoculations are necessary, one with the very weak or first vaccine, the other, twelve or fifteen days, or even three weeks, after the first, with the stronger or second vaccine. The dose for a puppy of six to eight weeks is 2 cubic centimetres; for a puppy of two or three months, 2½ cubic centimetres; for a puppy or adult over three months, 3 cubic centimetres. It is injected under the skin of the groin, after this has been previously washed with warm water and soap, by means of a Roux antitoxin syringe, which should have a capacity of 3 to 5 cubic centimetres, and which should be thoroughly sterilized before being used. The second inoculation is made with the same quantity of second or stronger vaccine under the skin of the opposite groin after a period of 12 to 21 days following the first, the same precautions being taken. The reaction to be obtained is a swelling in the glands above the seat of injection, or even the seat itself, two or three days after the inoculation, temporary loss of appetite, slight dullness, and even stiffness of the limb. Sometimes an abscess forms at the seat of inoculation and when it does occur it should be opened. If the injections fail to produce a reaction, another inoculation should be made, using this time freshly prepared second vaccine. Unless the vaccination "takes," no immunity is likely to be conferred. The vaccine should be fresh, and the contents of the bottle used up at once, as soon as the bottle is opened. It should be kept in the cool in a dark place. The bottle should be shaken up before the contents are used, when it produces a slight turbidity. It has been used with great success by veterinary surgeons in large kennels, including Foxhounds, as well as other breeds, such as Toy Pomeranians or Toy Griffons, etc., both in England and on the Continent.

## The California Meadow Lark.

With black cravat, and yellow vest,  
And suit of brown complete,  
He struts about with merry call,  
And whistles clear and sweet;  
No care he knows, or any fear—  
The happiest bird about—  
For whether rain or whether shine,  
The meadow lark is out.

He perches on the roses near,  
And looks aslant at me.  
Then whistles out a merry laugh,  
That echoes back his glee.  
We hear him in the early morn  
Sing carols to the sun,  
And when the evening shadows fall  
His song is hardly done.  
He's brimming o'er with liquid joy,  
From morning until night:  
On barren hill, or grassy vale,  
He sings his sweet delight.  
Oh, meadow lark, I wish like thee,  
My heart could always sing,  
Though tears should blind my aching eyes  
Or shadows round me cling.

—Mrs. L. J. Smith in *Pacific Rural Press*.

Nine hundred kingfisher skins were recently exposed for sale in London to the hat trade. Verily, this destruction of so beautiful a creature (it matters not where they come from) is scandalous and cannot be too severely condemned. Shooting men can do their share of the much to be desired work of helping to decrease the demand for feathered hat gear in more ways than one, and we hope they will use their best endeavors to do so.—*Shooting Times*.

A bill intended for the protection of song and in sedentary birds, all non-game birds and valuable to the farmer and orchardist, is to be presented to the Legislature. This measure should have the support of every vote.

Similar legislation has been adopted by many other states and territories. A somewhat similar bill was passed at the last session of the Legislature but was never signed by Governor Gage. It is to be hoped the pending bill will not meet with the same fate.

## Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Folk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosed stamp describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A reply copy of their book on "Dogs" sent free on receipt of 3c in stamps over postage.

## How to Produce "Creamery" Butter on The Farm.

There is a great store in any town of a few more inhabitants, and you will find a country butter becoming scarce in the merchant's hands at fifteen cents per pound, while, probably, by its side is a lot of creamery butter going pretty fast at twenty-five to thirty cents. Butter at 15 cents is unprofitable to both the farmer and the merchant, and isn't of a price to the consumer. It sells at a low price because consumers cannot depend upon its being a first-class article. A very farmer's wife has her own idea of what good butter is, and she produces an article differing in color, texture, taste, flavor and cleanliness from that of her neighbors.

In this paper I shall not go deeply into details, but will enumerate a few of the most marked causes that make country butter the inferior article that it is, and give the essentials of making on the average farm butter that is fully equal to the highest priced dairy or creamery butter.

Why Country Butter is Inferior.—Country butter is of inferior quality because, first, it is churned at any temperature between 50 degrees F. in the winter and 90 degrees F. in the summer; hot and cold water being added indiscriminately to "make the butter come;" second, it is whipped and slashed by the "dasher" until the fat particles have broken down and accumulated into a soft homogeneous mass; third, the cream in rising is exposed to the odors of the kitchen; fourth, the butter is generally taken up by reaching the hand down into the churn and bringing the butter out by letting the buttermilk run between the fingers back into the churn. The hands are fine receptacles for odors that are not desirable in butter; fifth because perfect cleanliness in not followed from the cow's udder through all the processes until the finished product is delivered to the consumer. There are other factors, too numerous to mention, but these are the principal ones, and to a large extent embraces the others that might be mentioned. Failure to guard against any of these is sure to result in a product of proportionally lower quality.

First Class Butter on the Farm.—How to make butter that is highly flavored, has a good grain, color, odor, etc., as any creamery butter, begin by throwing away the dasher to your old jar churn (use the churn for a cream receptacle if it is earthen) and order the following articles from any first class creamery supply house: One five-gallon plain barrel churn, one butter-worker to match, two butter ladles, two dairy thermometers; one plain, one-pound butter printer; one thousand sheets parchment paper. Then follow the directions given below: Use perfect cleanliness from cow to consumer; collect cream until you have not more than two gallons for a five-gallon churn; churn at 58 to 60 degrees F. in summer and 63 to 64 degrees F. in winter; churn until the fat particles accumulate into globules about the size of wheat grains (which may be seen through the glass slit on the top of the churn); draw off the buttermilk by pulling the plug at the bottom of the churn; as the buttermilk is flowing from the churn let it pass through a strainer so as to save any particles of butter that may escape with the buttermilk; after the buttermilk has been drawn out, plug up the buttermilk outlet and pour on the butter two or three gallons of pure water not above 50 degrees Fahrenheit, after standing a minute or two draw off the water, the same as the buttermilk, and continue to wash it until the water comes out at the bottom clear.

It usually requires but two washings, but sometimes three are necessary, let the butter drain for several minutes before putting it in the butter printer, when all the water has been removed, empty the contents of the churn upon the butter worker, wash the churn well rinsed with pure water, make an estimate of the amount

of butter on the worker and weigh up three-quarters to one ounce of salt per hundred pounds of butter and sift salt evenly over the mass of butter; work just enough to distribute the salt throughout the butter there will be but little water to work out if it has been well drained in the churn; print into plain one-pound blocks; wrap with parchment paper, pack in wooden boxes and cover each box with two or three wet towel sacks and take to market at once.

The outfit mentioned above will cost between \$10 and \$12 is small enough for five cows and large enough for fifteen.

The increase in the butter produced will in a short while pay for the outfit, and then the increase of income will buy many necessities through the year that the farmer usually buys on time.

Butter made this way will keep longer than butter made in the "dash" churn because it is perfectly free of buttermilk; it stands up against heat better because the grain has not been destroyed by the "dasher" and by excessive working; it has a good yellow color because all the color that was in the milk goes into the butter; it is cleaner because (a) cooking vessels are not used in handling the milk, and (b) no one's hands have touched the butter anywhere in the process; it has a fine, nutty flavor because the cream has not absorbed any foreign odors, and it is entirely free of buttermilk; it brings a higher price because the demand for first class butter is many times greater than the supply.

To those who have always employed the old time "dash" churn, the better way may at first seem unhandy, but if they desire to make more money out of their butter-making and will try the plan suggested, all difficulties and inconveniences will soon be overcome, and it will be found a great deal easier and more pleasant work in addition to increase of income.—Texas Farmer.

The celebrated suit of T. F. B. Sotham of Chillicothe, Missouri, against Webber, a Kansas City butcher, for \$2432, the price of the Hereford steer Old Times, ended in a verdict for the plaintiff for the full sum. The case grew out of the rivalry between Hereford and Aberdeen Angus breeders at the Chicago stock show of 1900. When the Angus champion steer Advance was sold at auction for \$1.50 a pound after the show Mr. Sotham announced to the breeders that the Hereford champion Old Times had brought \$1.53 a pound from a Kansas City butcher, who was present and confirmed the statement. Afterward the butcher sought to lower the price.

Lilith Pauline de Kol, the world's champion Holstein-Friesian cow, died recently at Augusta, New Jersey. She was the property of Frank Roe and he had recently refused \$2500 for her. He valued her at \$5000. He sold her heifer calf soon after its birth for \$1400. The cow died from milk fever. She held the record of the world as a milk and butter producer.

There is happiness where there is a steady income and this is insured where the farmer devotes his attention to dairying and poultry raising, two of the best paying branches of farm life. There will be something to sell every single week on such a premises the whole year through, and this makes money matters easy.

F. D. Coburn, the Kansas authority on feeding, feeds alfalfa above all other feeds for brood cows and young pigs.

**SAFETY PREGNATOR & DILATOR**  
A perfect, safe, and reliable instrument for examining the female genital tract, and for dilating the cervix in cases of stenosis or obstruction. It is made of stainless steel and is completely sterilizable. It is a valuable addition to the obstetrician's or gynecologist's equipment.  
Price, \$5.00 per set, including carrying case.

## "SAVE-THE-HORSE" SPAVIN CURE

FROM A WELL-KNOWN TRAINER.

Dec 22nd 1902  
Troy Chemical Co.  
Gents  
Troy, N.Y.

I used "Save-the-Horse" all the past season. First, on a bad splint close up to knee; horse very lame after last work, could see decided improvement after a few days' use, and in a week's time lameness all disappeared. Used with equal success on a bowed tendon. At present am treating a horse that bowed a tendon three years ago; was a bad case; was fired and blistered, but still went lame. Have used a bottle and am still using "Save-the-Horse." I firmly believe the remedy has gone down almost one-half, horse going sound, and I firmly believe will race again. A friend of mine had a horse that bowed a tendon last spring; by the use of your remedy kept him racing all fall, gave him a record better than 2:05; tendon is straight and sound as ever was. Think it the greatest remedy on earth for a bad leg of any description.

Respectfully yours  
L. D. Shafer  
Farnis Trainer  
Box 209

No man in Northern New Jersey, or horseman in New York City and Long Island, can doubt this man's statement.—(Reproduced from New York Herald.)

Newark, N. J., Jan. 27, 1903  
I used one bottle of "Save-the-Horse" and completely removed a thoroughpin. Horse was not lame, but it was a bad eyesore. No blemish or sign of the growth remains.

**GEORGE STENGEL.**  
FROM A PROMINENT STOCK FARM OWNER.  
Shrub Oak, N. Y.  
This is to certify that I have used "Save-the-Horse" for splints and wind puffs with great success. In fact, it is a great remedy.  
**C. W. CARPENTER.**  
Sunnyside Farm.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb.

# Limonero=3=2:15 3=4.

Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 $\frac{1}{2}$ , bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 $\frac{1}{2}$  got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 $\frac{1}{2}$  will make the season of 1903 at the

## AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal, in care of

## ZOMBRO 2:11

The Greatest Son of the Great McKinney and Sire at 10 years of age of ZEPHYR (4) 2:11, ITALIA (3) 2:23 $\frac{1}{2}$ , LORD KITCHENER (4) 2:29 $\frac{1}{2}$  and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06 $\frac{1}{2}$ , in a race, Julia M. (5) 2:12, Italia (3) 2:15 $\frac{1}{2}$ , Zombowette (3) 2:17, Suomi (3) 2:17, Lady Zombro (3) 2:17, Lord Kitchener (3) 2:19 $\frac{1}{2}$ , Tee Dee Cee (4) 2:21 $\frac{1}{2}$ , Jerica (5) 2:25 $\frac{1}{2}$ , Gold Coin (4) 2:26 $\frac{1}{2}$ , Mabel W. (4) 2:28 $\frac{1}{2}$ , Edmond S. (5) 2:28 $\frac{1}{2}$ , Gyr Falcon (6) 2:30, Zombro C. (5) 2:29 $\frac{1}{2}$ . Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903 from February 1st until further notice at my barn near Los Angeles track.

SEE \$75 THE SEASON. Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Send for card containing pedigree and full information. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

## SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:32 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

## MONTESOL

MONTESOL, 5 years, old, stands 15 $\frac{1}{2}$  hands, weighs about 1100 pounds; is the best bred young greatest son of the great Alycane. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before breeding elsewhere.

\$40 for the Season, with return privilege.

3 years old, by McKinney, dam MOUNTAIN HARE by Young Venture. Will be permitted to serve 5 approved mares at \$100 for the season

The above Stallions will stand at the Race Track, Alameda.

P. FOLEY, Race Track, Alameda.

Pedigrees Tabulated and type written ready for framing. Write for prices. BREEDER AND SPORTSMAN, 38 GERRY STREET, SAN FRANCISCO.

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

California's Colossal

Caravansary

In the center of the hotel is the famous court and of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the whole sale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

# THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL.  
(Property of JOHN PARROTT, ESQ.)

Imp Hackney Stallion  
**GREEN'S RUFUS 63** (4291)

Will serve a limited number of Approved Mares, Season 1903

**FEE - - \$75**

Reductions made for two or more mares.

## SIR GIBBIE 2D.

No. 370

American Hackney Stud Book

**Hackney Pony Stallion**  
13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at **MENLO STOCK FARM**

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

**JAMES McDONNELL,**  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## STAM B. 2:11 1-4

(TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09 1/2, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

STAM B, by that show horse king, Stamboul 2:07 1/2, father of 47 from 2:10 1/4 to 2:30; 24 sons and daughters produced from 2:07 1/2 to 2:27. Stamboul is the only trotting bred stallion that ever sold twice for over \$40,000, and sired a daughter for whose son, Wiggins (two-year-old 2:19 1/2), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:04 1/2, for which \$50,000 was lately refused. STAM B's first dam, Belle Me, showing that men with money and brains appreciate this blood. STAM B's first dam, Belle Me, sired 2:20 (dam of 3 from 2:11 1/4 to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hambleton 10 ever produced such speed and she sold for \$40,000.

Second dam Argenta, dam of one in 2:30, by Almont Lightning, sire of dams of Zombro (five years old 2:11) and King Princeps 2:15, by Almont 33. Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15 1/2, Baron Wilkes 2:18, Patchen Wilkes 2:23. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, toppy road horse.

STAM B is a bay, two white hind ankles, 15 hands 2 1/4 inches high, weight 1090 lbs., of good stamina and muscular development.

Will Make the Season of 1903 at Pleasanton, Cal.

Terms \$40

SPOT CASH before mare is removed. I will try and take good care of mares and foals, but will not be responsible for accidents or escapes. (No agents on arrival of trains at depot.) For further particulars address

**SAMUEL GAMBLE, Pleasanton, Cal.**

Breed to Extreme Speed.

**TERMS \$25 the Season.**

**GEORGE GRAY, Haywards, Cal**

# SEARCHLIGHT 2:03 1/4

THE FASTEST STALLION BY THE RECORDS EVER OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04 1/2) and for 5-year-old (2:03 1/4).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcayone, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09 3/4

The Blood that produced Dan Patch 1:59 1/2

LECCO 2:09 3/4 is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01 1/4, that in turn is the sire of the unbeaten Dan Patch 1:59 1/2. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the **PLEASANTON RACE TRACK**, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address  
**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

# NUSHAGAK

Sire of

**ARISTO (3) 2:17 1/2** winner of Occident and Stanford Stakes, 1902

**MAJELLA B. (2) 2:29** Trial (4) 2:13 1/2

**THE BOQUET** Trial (3) 2:21 in 1902

**Brown Filly** Trial 2:20 1/4 as a 4-yr-old in 1902

**Reg. No. 25939**

Black Horse 15-2 1/4 hands. Foaled 1890.  
BRED BY WM. CORBEET.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/2, Sabina 2:15 1/2, Sabledale (at 2 years) 2:18 1/2, Buflington (at 2 years) 2:30, and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28 1/2, dam of Mary Celeste (at 2 years) 2:17 1/2 by Director, sire of Director 2:05 1/2, Direct 2:05 1/2, Nathan Struts 2:05 1/2, Direction 2:08 1/2, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H 2:12 1/2, etc. Third dam by Lancel, son of McCracken's Blackhawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05 1/2, Nathan Straus 2:05 1/2, Ozanam 2:08, Dollade Wilkes 2:10 1/2, Oro Wilkes 2:11, Evangeline 2:11 1/2, Mary Celeste (at 2 years) 2:17 1/2, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, twenty foals older than yearlings, of that number only three have ever had a full season's training, namely, Aristo (3) 2:17 1/2, Majella B. (2) 2:29 (trial at 4 years 2:13 1/2), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:30 1/4 with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35 1/2, last quarter in 35 1/2 seconds. His son Aristo (at 3 years) 2:17 1/2 took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17 1/2 was equal to 2:13 1/2 or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

TROTTER TRACKS—How to build and manage them, with plates showing how to lay out a half mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

THE SECRETARY. His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest, there is nothing for him here but advice.

THE SANDPIPER. How the Dutchman did not believe his bill for gravel while the little marten brown stood pat and those who had the real one thing—well they lost, as usual.

A STRANGE LAND. How a shipwrecked buckeye made a stir in another racing world. Utopian, anyone and if you do not believe it, you can say it is untrue.

MR. DOEL. How the best grand horse in Missouri broke into turf history. How the Transylvanian was that is enough. If you were there you know why.

STRANGLER. A lightning-pole racer of North Carolina, whose history has a pinch of romance hooked on to it.

ANDY AND I. What the well known pair learned in France and England after the hotel clerk cracked the shell language. They could not parlez-vous.

RUDE OF A LIFETIME. How Frying Jim put a certain boss trotter on the speed drive in Waukegan.

PAT SHANK. Someone said he was a cold breaker but he broke the wise when the three team combination and those won at Detroit.

We will send this valuable book free as a premium to anyone sending two new subscriptions for The Breeder and Sportsman at \$3 each, or for \$5 each, etc. Send your order on receipt of

## BONNIE DIRECT 2:05 1-4

Winner of fastest 5 heat race paced in 1900. Winner of Chamber of Commerce Stake at Detroit; Blue Hill Stake at Readville, and three other great races. Biggest money winner of "New" Pacers of 1900, having \$7575 to his credit the first year out.

Sired by Direct 2:05 1/2, sire of Directly 2:03 1/4, Hal Direct 2:04 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, etc.

Dam BON BON 2:36 (dam of Bonsilene 2:14 1/4, by Simmons 2:28, sire of Helen Simmons 2:14 1/4, New York Central 2:13, etc. Also sire of dams of Pereno 2:07 1/4, Tomboy 2:10 1/4, Owyhee 2:11, etc.  
Second Dam BONNIE WILKES 2:29 (dam of 3 in list) by George Wilkes 2:22.  
Third Dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

is a black stallion, 15 1/2 hands high, weighs 1200 lbs. Is a good individual, has best of feet and legs. And is absolutely sound in every way.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates. Address

C. L. GRIFFITH,  
Pleasanton, Cal.

## Books for Stallion Owners.

## 1. HOOVER'S STALLION SERVICE RECORD.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding description, dates of service, dates of foaling, with a page for tabulating pedigree of stallion in use, etc., etc., with index complete; size 10x7 1/2. Each book is handsomely and substantially bound. Can be used for any kind of pedigreed stock.....\$2.00

## 2. THE STANDARD STALLION SERVICE BOOK.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, dates of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. Can be used for any kind of pedigreed stock.....\$1.00

## 3. BREEDER'S NOTE AND CERTIFICATE BOOK AND STALLION SERVICE BOOK COMBINED.

This book contains 75 blank certificates to be given to owners of mares certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. Can be used for any kind of pedigreed stock.....\$1.00

Sent by mail prepaid on receipt of price.

San Francisco, Cal.

## THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

## THE BENJAMIN RACING WAGON

## ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. Wheels. We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle. They have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from brace bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a beautiful appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as unreliable. Send for prices and catalogue.

## GIBBS' CELEBRATED PROCESS OF RAPID TAXIDERMY

In Practical Use Over Twenty-Five Years.

Used Everywhere in America. Hundreds of Testimonials. Try and Be Convinced.  
Start a Class. Money in It. Be Your Own Taxidermist.

Naturalists, Collectors, Gunners, Anglers, Outers, Boys, Girls, and all others interested in nature  
and anxious to preserve the specimens taken in wood and field, have all felt the need of a simple  
method of preservation, which is free from intricacies and inexpensive.

There is a method of rapid taxidermy now in extensive use, which meets the requirements of all  
amateurs who wish a practical and inexpensive method of preserving the trophies of the outing and  
collecting trip. This is not the old system of so-called stuffing, so expensive, laborious and disap-  
pointing, but is a rapid system, which anyone can learn at once and which is guaranteed to give  
satisfaction.

By this process you may preserve the beautiful plumage of the grouse and woodcock, or the pike's  
or buck's head, or the showy feathers of the tanager. Boys, girls and all others can do good work and  
may make money, as mounted heads and birds find a ready sale, and besides you may teach your  
friends and decorate the school-room, office and dining-room with native birds and other attractions.  
If you are in doubt, then get your friends to go in with you and start a class, for when several work  
together there is an advantage and the expense is next to nothing.

On the receipt of \$1, cash or stamps, I will send full printed instructions for mounting birds,  
heads, mammals, etc., and all materials for mounting and preserving specimens—including prepared  
compound, together with full directions for dressing skins with the hair on for rugs and robes, so that  
you will not be to the expense of one cent.

Remember, I Guarantee Satisfaction or Money Refunded.

**OAK GROVE COLLIE KENNELS—THE**  
finest kennel of Scotch Collies on the Pacific  
Coast. At stud—Ch. Ormskirk Emerald Jr. and  
imported Cheviot Construction. 17 handsome  
sable and white pups, ready to ship, and half-  
grown bitches for sale. No postal cards an-  
swered. Catalogue free. Western agent for  
Standard Oil of Tar, sure death to fleas and  
mange. O. J. ALBEE, Lawrence, Cal.

### AT STUD.

**CH. WOODCOTE WONDER—THE WORLD'S**  
Champion Bull Terrier. Bulldog, END-  
CLIFFE FORCEPS, Boston Terriers, Irish  
Terrier, ENDCLEIFE PADLAR, Fox Ter-  
riers (wire and smooth), CAIRNSMUIR GEN-  
ERAL and RABY ELVET (winner of 7 firsts in  
England before he was 18 months old). Brood  
bitches, bitches in whelp, and puppies by above  
dogs always for sale. Apply to **WOODLAWN**  
**KENNELS**, Geary St. and Central Ave., San  
Francisco. Telephone: Baker 333.

### COCKER SPANIELS.

**NAIROD KENNELS—A FEW SPECIAL BAR-**  
gains in puppies, young bitches, and bitches  
in whelp, to make room. Finely bred stock. The  
prize-winning Cocker, Plumeria Beau II, at stud.  
Also Glenwood Kennels' famous black Cocker,  
Champion Havoc. Fee \$20. 123 Third Avenue,  
San Francisco.

**FOR SALE—COCKER SPANIEL PUPPIES**  
by Ch. Hampton Goldie. Apply at junction  
old county and Redwood roads, Fruitvale, Alameda

**PLUMERIA COCKER KENNELS—AT STUD,**  
Champion Hampton Goldie 53,100 (Champion  
Red Mack-Hampton Queen Reade). Goldie has  
sired more winners than all of our Coast dogs  
combined. See any bench show catalogue. Fee  
\$20. Plumeria Tweediepunch (Champion Ham-  
pton Goldie-Omo Girl). Fee \$15. Young and ma-  
ture stock for sale. Our motto, "The Best."  
E. C. PLUME, 415 Third Ave., San Francisco.

### ST. BERNARDS.

**NAIROD KENNELS—A SINGLE BARGAIN**  
in royally bred St. Bernard puppy. At stud,  
the noted Grand Master II, winner of many prizes  
and admittedly the best on the Coast. 123 Third  
Avenue, San Francisco.

### GREAT DANES.

**GREAT DANE PUPPIES FOR SALE—BY**  
Blue Beard out of Maud S. Both sire and dam  
bench show winners. Apply to or address O.  
BERGSTEN, Center-street Station, Oakland, Cal.

SNAP SHOTS AT HAYWARDS HORSE SHOW.

# GOOD HORSES Are All Headed for the BLUE RIBBON SALE CLEVELAND, OHIO. MAY 11, 12, 13, 14, 15, 16, 1903.

THE MOST POPULAR OF AMERICA'S HORSE AUCTIONS.

There is a **THREE-FOLD REASON** for the increasing popularity of this old established fixed annual sale event, viz:---

## I. LOCATION { Most Convenient for Sellers and Buyers.

CLEVELAND is central to the principal horse-breeding sections, and within easy reach of all the Eastern and Western cities with matinee and driving clubs. Our sales mart could not be better located. It is within five minutes walk of the Glenville freight yards, and opposite the main entrance of the Cleveland Driving Park. The St. Clair street trolleys pass the door.

## II. SEASON { When the Demand is Most Active.

The "BLUE RIBBON" comes at the right time, when training begins in earnest and pleasure driving is opening into full swing. The season being advanced, and this being the last big sale, the demand is most active, and consequently prices are at their highest.

## III. METHOD { Speed Under the Watch.

The method is unique in one feature, that of showing speed over the Cleveland track. A day is set apart for these speed exhibitions, and bidders can time the speed and satisfy themselves. A record is kept and the trial announced from the auction stand, when the horse is brought up for sale.

**The Trotter's Earning Capacity Never So Large Before.**

A TROTTER		in the	2:24	class	can win	\$75,000	of stakes	in 6	Grand	Circuit	races	this	year
		"	2:14	"	"	65,000	"	"	5	"	"	"	"
		"	2:12	"	"	55,000	"	"	4	"	"	"	"

**WINNING SPEED** was never in such demand. If coupled with "class" and good manners, there is no limit to the price "Blue Ribbon" buyers will pay, if you show them the "real thing." You have the opportunity to do this over the Cleveland track, before the best buyers in the world. The matinee and driving club members are out for the "crack-a-jacks"—so are the racing men, and the rivalry to own a "Top-sawyer" is sharp and keen.

The "Blue Ribbon" is the sale { **GREEN** TROTTER or PACER { Because bidders are not buying "a pig in to get full value for a" a poke" or taking anybody's "say-so."

FUTURITY PROSPECTS are selling high, as evidenced by our New York auctions. The good ones are sure to bring big money at Cleveland, where buyers can test them and see them **STEP**.

**You furnish the SPEED---We guarantee the BUYER.**

Sensational consignments from California and elsewhere are now pledged, and later on we will have

**SOME STARTLING ANNOUNCEMENTS TO MAKE.**

Horses of the highest class are the only ones solicited. For entry blanks and particulars address

This year we propose making the "Blue Ribbon"

**THE BEST SALE EVER HELD IN CLEVELAND.**

Consult the Records and see how many famous winners have passed through our May sales. Then you may judge how GOOD a sale we expect this next one to be.

THE DISTRICT FAIR APPROPRIATIONS, which at the present time are in the General Appropriation Bill in about the same amounts as passed at the last session of the Legislature, and have gone to the Governor in that shape, are causing a very large amount of talk from the city and country press. In the majority of cases the writers who are discussing this measure know so little of the subject that their alleged arguments are most amusing to those acquainted with the facts. For instance, there is an almost unanimous condemnation of the management of the fairs because but fifty per cent of the \$80,000 expended on them last year went for premiums. If this is the proportion paid out for that purpose the showing is a good one—better than could be expected. A district agricultural fair that pays for premiums half the amount received from the State is doing very well. It costs something to run a district fair. Suppose, for instance, a district has the sum of \$2000 appropriated for its maintenance. This appropriation is made for two years and two fairs are given, \$1000 being spent each year. The legitimate expenses of a fair include the salary of a secretary, rent of a pavilion, printing of premium lists, advertising, pay of help, etc., etc., and \$500 will not cover it. We do not take into consideration the racing or anything that pertains to it. The racing accounts should not be mixed up with the fair. There have no business there. The racing pays its own way in most instances and helps make the fair a success but it should be a separate account. Without the racing the agricultural exhibits would not draw one-half the attendance. The money appropriated for fairs is for the encouragement of agriculture, horticulture, manufactures and other State industries, and it was so intended from the start. If it has aided in building up better breeds of horses, cattle and other animals, better fruits and grains and other products of the farms it has accomplished the purpose for which it was appropriated. That it has done this there is not a particle of doubt. Our dairies and beef herds, the flocks of sheep and fowl, the breeding ranks of standard bred, draft and thoroughbred horses have been built up and brought to their present high state by the aid of sires and dams that

have won blue ribbons at the State and district fairs. Every man that knows anything at all of the subject knows that the money spent for the fairs has brought big returns to the State in property values. The beef and dairy interests of California, growing as they are to enormous proportions, would be twenty years behind their present status had it not been for the emulation excited by the annual exhibits. The trotting bred horses sold from California every year exceed in value the entire amount appropriated for all the fairs. Before the election the friends of Governor Pardee sent out the statement by authority of the Republican State Central Committee that he favored liberal appropriations for the district fairs. Since his election the Governor has not said anything that would warrant anyone in claiming that he has changed his mind. The Legislature will adjourn to-day and the Governor will have ten days to affirm or veto the fair appropriations. There is every reason to believe that he looks upon them with favor and that he will not draw his pen through any portion of them.

THE BLUE RIBBON SALE to be held by the Fasig-Tipton Company at Cleveland, May 11th to 16th, is the talk of the country. The Fasig-Tipton Company has held some sensational sales, but this one promises to break the record. California alone will send horses that will attract buyers from all parts of the country, and there will be quite a contest over the future ownership of such mares as Anzella 2:06 1/4, Dolly Dillon 2:07 and Lou Dillon, trial 2:03 1/4. Dolly Dillon was the champion mare of 1901, Anzella of 1902 and Lou Dillon is confidently expected to wear the crown of 1903. Then there is that great pacer, Sir Albert S. 2:03 1/4, that Millard Sanders is confident will pace in two minutes this year. This quartette alone is enough to make the Blue Ribbon Sale a sensational one, but there will be others and it will be the greatest sale ever held at Cleveland. There is no better chance for owners to get good prices for horses that can do the Missouri act, that is, show fast under the watch. This is the great "show me" sale of America. The Cleveland track is one of the best in the world and horses will be driven quarters and halves over it during a few days immediately preceding the sale, with timers in the stand who will hang out the time made. This is the sale where speed shown brings the money every time. Those who have fast green horses that can show well in May can get prices worth while if they consign them to the Blue Ribbon. Owners are requested to read the page advertisement in this issue and consider the three-fold reason there set forth for the increasing popularity of this old established fixed annual event. If you want to sell a good horse this is the opportunity. The management aptly says: "You furnish the speed, we guarantee the buyer."

KENTUCKY'S GREAT FUTURITY, which has been raised to \$22,000 for foals of this year, should receive the patronage of every breeder in America. It is a reasonable supposition that every person who is engaged in breeding trotting stock is interested in seeing the demand for it kept up, and colt values maintained. Every staked colt cannot be sold for \$1000, but every one that is sold for that amount helps to sell the others and prevents values from depreciating to less than the cost of production. Colt stakes are the very life of the trotting horse breeding industry, and it is therefore the duty of every breeder to do what he can to make them successful. The small amount required to enter a mare in this, the greatest of all trotting stakes, is so ridiculously small that every person that can afford to breed one can afford to name her and thus make the prospective foal eligible. Of course you will not pay the service fee to a stallion owner this year unless you expect to get a colt that at maturity will show some speed. If your hopes are realized and if the youngster in the spring of his three year old form trots up to expectations you will want to race him. If he is not entered in some of the big stakes he will not sell for half the price he would bring were he eligible to start in them, and he can't be raced in any purses that will pay for his cost even if he wins them. There are few purses of value for three year olds, but there are several big stakes and the Kentucky Futurity is the biggest of them all.

## The San Jose Track.

The following letter received just before going to press explains itself:  
BREEDER AND SPORTSMAN:—There has been a hitch in the program and I am not going to get the San Jose Race Track. Please let it appear in your next issue, as I don't want my friends to come here thinking I am in charge and get disappointed. The parties now in charge say there shall be a first class track kept and I hope there will. As ever,  
T. W. BARSTOW.

ANOTHER GREAT OPPORTUNITY is to be offered the horse breeders of California. On Thursday, March 26th, William G. Layng of the Occidental Horse Exchange will sell at that place twenty-five head of horses from the renowned Oakwood Park Stock Farm, where so many champions have been bred. Farmers and others who own a few broodmares should remember that the big breeding farms are being rapidly dispersed at just the time when the standard bred horse is coming into general demand. The supply will have to be maintained by the small breeders and these sales are their opportunities to get the blood that is popular and will bring the greatest returns in the future. The youngsters to be sold at this sale are mostly three year old fillies out of great producing mares. They are all thoroughly broken and many show racing speed. There are several colts and geldings, and are undoubtedly the best lot ever sent from this farm to a sale. Remember that the demand for horses is rapidly getting ahead of the supply and the sales from breeding farms are growing fewer and fewer. All these young horses are to be shown by the side of a saddle horse that buyers may see their gait and action. It will be a great opportunity to get good goods at your own price.

WE REGRET TO ANNOUNCE that the well known and popular livestock auctioneer, Wm. G. Layng, for so many years the editor of this journal, has been very seriously ill at his hotel in this city during the past week. He has suffered from hemorrhages of the lungs and has been very low, but at this writing we are pleased to state is considerably improved, and there is every prospect that he will be up and about within a week. Mr. Layng's friends are legion from California to New York and they will sincerely hope for his early recovery. No person in California has been so thoroughly identified with the trotting horse industry and there is probably no man in America who has the knowledge of pedigrees of Pacific Coast horses that he possesses. He has been a student of blood lines since his boyhood and has the proud distinction of having bred a faster horse (Sir Albert S. 2:03 1/4) than any other editor or turf writer. May he live to breed a still faster one.

THE OFFICIAL YEAR BOOK of the League of Amateur Driving Clubs has reached this office. It is bound in the same style and printed on the same plan as the Year Book heretofore issued by the Gentlemen's Driving Club of Cleveland and is a very handsome publication. It contains full summaries of all trotting and pacing events at matinees of 1901 and 1902, also summaries of amateur events at public meetings, a list of officers and members of the clubs in membership in the league, and alphabetical lists of the various clubs and the trotters and pacers started during year. It is replete with interesting tables and handsome illustrations and is compiled and edited by George A. Schneider, of Cleveland. The clubs in membership are those of Boston, Chicago, Cleveland, Columbus, Memphis, New York, Pittsburg and Syracuse.

## Great Work of Joe Patchen.

W. K. Dickinson, of Parkway farm, Goshen, N. Y., has found time to tabulate the results of the great "Iron Horse," Joe Patchen's career, which is now a closed book. The black pacer's legion of admirers will doubtless peruse the stallion's record with interest and file it away in the scrap books. It is as follows:  
Times started in races and against time..... 100  
Times first..... 53  
Times second..... 39  
Times third..... 1  
Times fourth..... 4  
Times unplaced..... 3

## Mill Creek Farm.

Spohn Medical Co. CYNTHIANA, KY., Sept. 6, 1902.  
Dear Sirs:—I am well pleased with Spohn's Distemper Compound, and keep a supply in my stable. It is a great remedy for colts. I am satisfied it has prevented my colts taking distemper, when they were exposed to the disease. I find it a fine thing for driving and work horses and mules. If Spohn's Cure is given when they have gone so far in the disease as to commence coughing, it will soon get them back, and on their feed. I am  
Respy,  
A. S. ASHBROOK, Prop.

Sober up on Jackson's Napa Soda.

## JOTTINGS.

A SUCCESSFUL HORSE SHOW was the one held at Haywards last Saturday, especially in regard to the number of horses shown and the large attendance. There must have been two thousand visitors from outside points, those from San Francisco and Oakland crowding the team and electric cars that ply between the latter city and Haywards. The weather was propitious, a marked contrast to the rain that fell nearly all the day during the first Haywards Horse Show held last year. There were nearly two hundred horses in the parade, which formed at 1:30 P. M. and marched through the principal streets. All breeds except the thoroughbred were represented, from the ponderous Percheron to the diminutive Shetland. The trotting bred horses were quite numerous, although there were a number of stallions absent that should have been shown. Quite a number of sales were made during the day. After the parade the horses were led to the reviewing stand, where Samuel Gamble announced the name of each, giving pedigree and ownership. Mr. Gamble was assisted by William McDonald of Livermore, who made the announcements for the draft stock. No prizes were awarded nor was any judging done as to the relative merits of the horses except by the spectators, who often evinced by hand clapping their admiration of some of the horses. The success of the show was due to the following gentlemen, who are officers and directors of the Haywards Horse Show Association: Geo. Gray, President; M. Henry, Vice-President; Geo. A. Oakes, Secretary; J. E. Geary, Treasurer; and Directors Geo. Grindell, C. Branin, D. G. Frantz, G. S. Langan, W. J. Ramage, A. Ramage, C. W. Heyer, D. Chisholm and A. Allen.

No less than 27 trotting bred stallions were entered in the show, but not more than half of these "showed up," the rain of Thursday doubtless causing many owners to keep their horses at home. Those in line made a fine showing, however, and were carefully looked over by the horsemen present. Stam B. 2:11½, in the pink of condition, drew lots of attention and was greatly admired. Monterey 2:09½ had lots of friends. He looked strong and rugged although no extra grooming had been done on his coat. He is a horse of grand muscular development and is siring size, style and speed with great uniformity. Welcome 2:10½ and William Harold 2:13½ were shown with a number of their get, besides several mares from the Meek Farm. The great broodmare Cricket 2:10, dam of four in the list, was in the Meek division and was much admired. M. Henry had his black stallion Educator most gorgeously arrayed in a white rawhide harness, and with a wealth of pink and blue ribbons braided in his mane and tail. Educator was followed by several of his get and they were a credit to their sire. Ed Kavanagh came all the way down from Vallejo with his horse Gaff Topsail 2:16 and two of his colts. The two year old, which is a pacer, is an extra good looker.

There were ten driving teams in line, several of which would be considered good in any company. Miss Gray, daughter of Superintendent Gray of the Meek Farm, drove Hopper 2:16½ and Lady Fair 2:17½, one of the best matched pair of roadsters in this country. Mr. C. Brannin, of San Lorenzo, drove a pair by Chas. Derby 2:20 that were greatly admired. J. D. Cunningham's mares Milula and Lady Meg by Direct 2:05½ out of Mabel by Naubuc, were a handsome pair of blacks. They are one sisters to Directly 2:03½. Mr. A. O. Gott, of Alameda, was among those in this division. He drove his pair, Lydia and Mephisto by Diablo 2:09½.

A large number of colts and fillies of standard breeding were led to halter and among them was noticed a sorrel filly by Clipper 2:06 out of Daisy by Antee Jr. This filly is owned by Geo. Petermann, of Mount Eden, who bred Clipper and kept him entire until after he was two years old.

The draft stallions made a good showing, there being a dozen of all breeds in line and the showing of ponies was very creditable. The parade and the announcing occupied all the afternoon and the crowd did not get away from town until sundown. The management propose to make a number of improvements in future shows that will make the displays more interesting and enjoyable for those who attend. Among other things it is proposed to close the entries several days prior to the show and to print a catalogue for distribution among the spectators. By giving each horse a number in the catalogue and attaching to him a corresponding number, the spectators will be enabled to recognize every one in line. As it is possible for

only a very few to hear the announcer, the parade is not so enjoyable to those who are interested in horse matters as it would be were a good program furnished.

"Mush," the big pacer by Lottery Ticket that Monroe Salisbury has in his string at Pleasanton, broke the track record for this year last Saturday by pacing a mile in 2:11½ with Ben Walker driving him. It has been known by all the trainers at Pleasanton that the big gelding is fast as he made several trips to the half mile post around 1:03, but no one expected he would pace a mile below 2:12 the first week in March. But he did it and finished strong. They say Mr. Salisbury thought it was a little too fast a clip for this early in the year and would rather the mile had been no better than 2:15, but "Mush" came out of it all right and showed no evil effects of the speed. Mush is only the stable name of this pacer and when he is entered he will doubtless have a name more suited to a good horse. There is a full brother to Mush that Fred Chadbourne worked a mile in 2:18 last year and it may be that Mr. Salisbury will add him to his string.

Millard Sanders worked the two year old colt Gayzote by Nazote a quarter in 34½ seconds last Saturday and set all the rail birds talking about the bargain he secured for Mr. Gray of Santa Rosa when he purchased the colt of James Thompson for \$1700. There has seldom been a nicer gaited two year old seen at Pleasanton than this handsome big brown fellow.

S. K. Trefry, the veteran trainer, not to be outdone on Saturday, when speed was the order of the day, permitted the wind to whistle through his gray beard at a 2:25 gait while he drove Geo. Johnson's big gray gelding by Rockaby a mile. This is a good mile for the month of March and Mr. Trefry was congratulated on the performance of the gelding.

Among the mares sent to be bred to Zombro this year is Le Belle, whose two year old record of 2:16 was made at San Jose in 1894. La Belle is by Sidney and her dam is Anna Belle 2:27½ (dam of Robert I. 2:10) by Dawn 2:18½, son of Nutwood; second dam the thoroughbred mare Pacheco by Hubbard. La Belle is owned by Arrowhead Stock Farm, and her foal by Zombro should be a Futurity winner, as both sire and dam were great colt trotters. As a three year old La Belle won the Occident Stake in three straight heats, beating Iran Alto, Silver King, Our Seth and Nordica, but did not have to trot to her limit, the fastest heat being 2:19½. If there is anything in heredity La Belle's foal of 1904 should be worth entering in all the stakes for foals of that year.

Zombro is doing quite a large business in the stud at Los Angeles, eighteen mares having already been bred to him. Mr. J. H. Bohon of Redlands recently sent his mare Cleon by Happy Prince to his court. Mr. Jos. Kelly of San Bernardino raced this mare for one season, but did not give her a record, although she showed him a trial of 2:13½. Mr. Kelly is the man who campaigned Conn 2:15½ and others on the California circuit several years ago.

There is considerable talk at Pleasanton about a show day to be held at the famous track just prior to the departure for the eastern meetings and salesrings of the horses now being prepared for them. It is proposed to have a parade of all the horses now at Pleasanton together with any others that may be brought there, this parade to be followed by a regular work out day, during which all the horses in training will be sent fast quarters and halves, and perhaps some of them driven miles. There is no doubt but a program of this sort would draw a large crowd to the horse centre and that the exhibition of equine beauty and speed would be worth going to see. The Santa Rosa Stock Farm and the Griffith strings, which are to be sold at the Blue Ribbon sale, would in themselves be big drawing cards, but in addition there are the strings of Monroe Salisbury, James Thompson and others who contemplate racing over on the big ring this year. I would suggest to the Pleasanton folks that if such an exhibition is arranged that a neatly printed program be gotten up containing the name of every horse that is to be paraded or worked and that each horse be given a number and his pedigree and record, if any, be stated. Then by affixing corresponding numbers to the horses the spectators will more thoroughly enjoy seeing them driven or paraded. It would not cost much in time or money and would add greatly to the enjoyment of the occasion.

The Pacific Coast Trotting Horse Breeders Association is negotiating for a track on which to hold its meeting this year. The two year old divisions of the first Pacific Breeders Futurity are to be decided this year, and the association desires to have the time and place of the meeting fixed that the announcement may be made as early as possible. Those who send

starting their two year olds this year are anxiously looking for the date of the meeting, so they will know when to begin active training of their colts. This Futurity is one of the most popular stakes ever inaugurated on the Coast, and Treasurer N. T. Smith of the association has on deposit in a couple of San Francisco banks somewhere in the neighborhood of \$12,000 to the credit of the three stakes that have been opened. The stakes are each guaranteed to be worth \$6000. The two year old trotters will have \$1250 divided among them this year and the amount set aside for the two year old pacers is \$750. Here are two good races to be held this year, whether fairs or regular race meetings are held or not. The Breeders propose offering one of the best and most liberal programs of purses this year that has ever been given in California and its meeting, wherever held, will be a good one. During all the hard times the P. C. T. H. B. A. kept the interest alive in harness horse matters and its meetings of the past two or three years have been very successful.

## Well Bred Stallion at Hollister.

Airlie W., the four year old son of Prince Airlie owned by Mr. R. P. Lathrop of Hollister, will be in service at the race track there this season in charge of J. Sanchez. Mr. Lathrop has received notice from Chicago that Airlie W. has been duly registered with the American Trotting Register Association and that his number is 37325. This young horse stands over sixteen hands high and weighs 1130 pounds. He is a

Airlie W. 37325.

beautiful dark brown horse, level headed, grand style and action and a natural square gaited trotter. He was bred by the late William Corbitt and is by Prince Airlie, son of Guy Wilkes and Chantilly, the great broodmare by Nutwood. The dam of Airlie W. is Susie Hunter, a producing mare by Arthurton; his second dam is by Skenandoah and third dam said to be by Langford, son of Williamson's Belmont. Airlie W. will be permitted to serve not over 25 mares this year at a fee of \$35.

## Warning to Breeders.

Breeders of the light harness horse should bear in mind that nominations to Kentucky's Futurity for foals of 1903 will close on Monday, March 16th.

This event has been very properly called the "Derby" of all harness races, and unless a youngster is eligible suspicion is at once aroused that something is wrong, or at least the breeder has been most negligent of his own interests.

The small sum of \$5 (one forty-fifth of one per cent) is required to nominate a mare and make her produce eligible to this, the richest and most liberal stake ever offered, future payments are light and scattered over such a period of time that will enable the owner to thoroughly try out his youngsters and drop out such as do not give sufficient promise of development to justify additional expense.

If the nomination of part of one's mares is a good proposition, then the nomination of all is a better one, for the mares left out often produce the best foals of that particular year.

Every foal is enhanced very materially in value by being eligible to this race, and many buyers of racing prospects refuse to purchase at any price unless the colt or filly is entered.

As the only race for as much as \$22,000, and the only race where \$10,000 goes to the first horse. The conditions are given in full in the advertising columns of this issue, and no breeder, whether upon a large or small scale, can afford not to be represented by the nomination of every mare upon his farm when entries close on March 16th.

California favorite hot weather drink—Jackson's Napa Soda.

# State Fair Finances.

[Sacramento Bee.]

The expert accountant employed by the Senate Committee on Finance to investigate the books of the State Agricultural Society has finished its work.

It will be recalled that the total debt of the society, as estimated by several of the directors and former secretary, Peter J. Shields, ran all the way from \$61,000, in round numbers, to \$83,000.

The expert raises even this last named figure and places the total liabilities of the society at the large sum of \$86,892.43.

In this he includes \$12,615.31 entrance dues unpaid, which the society carried as an asset, and which, according to the opinion of the expert, are absolutely worthless.

This view is shared by others who are familiar with the situation.

The accountant also points out that since 1891 nothing has been charged to the Profit and Loss account, although debts become outlawed in two years.

The assets of the society he estimates at \$90,066.08, \$90,000 of which represents the estimated value of Agricultural Park, and the \$66.08, cash on hand, the only other asset of the Association.

But it must be borne in mind that many who are in a position to know do not think Agricultural Park is worth anywhere near the sum the expert uses, based, by the way, upon a bond required in a suit brought in October 1898. Estimates of the value of this property run as low as \$55,500.

At the \$90,000 estimate, only \$3173.65 would be left to the society if its property could be sold for such a sum, which is improbable under the circumstances, regardless of its value.

In other words, the State Agricultural Society practically is bankrupt.

In 1902, as the subjoined statement will show, not a dollar of the \$3270 entrance dues was collected.

It will be noticed that the expert contents himself with merely stating, without explanation or comment, the losses sustained by the fairs of 1900, 1901 and 1902, respectively, as follows: \$12,964.64, \$11,607.49, \$12,720.72.

In 1899, the fair made a profit of \$1859.28. Some good reason should be given for the heavy losses in the three succeeding years. The mere fact that the gate receipts in these years fell from \$6000 to \$10,000 under those of 1899, is anything but a satisfactory explanation, though the expert seems to put it forward as such.

In other words, the expert accountant has succeeded in showing in detail the financial straits the society finds itself in, but he advances no sufficient reason therefor.

That, probably, was not his duty, but it certainly is the duty of someone, and the public will await with impatience a full and complete explanation.

## STATEMENT.

The society on February 1, 1899, had, according to its books, a deficiency of.....	\$35,505 13
Profit State Fair, 1899.....	1,859 28
Reducing deficiency.....	\$33,645 85
Loss State Fair, 1900.....	12,964 64
Increasing deficiency to.....	\$46,610 49
Loss 1901.....	11,607 49
Increased deficiency.....	\$58,217 98
Loss 1902.....	12,720 72
Deficiency as per profit and loss account.....	\$70,938 70

But this, says the report, must be increased by nearly all of the \$12,615.31 of entrance dues which are reported by the acting secretary to be uncollectable, besides other small losses.

The expert then gives figures showing the gate receipts during the past four years, and says the table shows that as the fair business is of a highly speculative nature, the gate money must amount to \$40,000 a season to prevent loss.

The society, therefore, having begun the year 1900 with a deficiency of \$23,645.00, continues the report and having lost during the years 1900, 1901 and 1902 the further sum of \$37,293.00, and having, further, failed to collect entrance dues amounting to \$12,616.00, and further minor expenses and losses of \$1243.00, making a total deficiency of \$74,797.00—has suspended payments, and ought as a natural and necessary consequence to refrain from further speculative business, realize upon the existing assets to pay the existing debts, and then re-organize on a healthier financial basis.

"All this," proceeds the report, "is in our opinion practicable, as we will now endeavor to show:"

Liabilities, February 28, 1903, as shown on books, \$74,863.99, of which \$25,000 is secured by a lien on the real estate of the society.

Further, a note given by society to secure a piece of ground to increase the area of the cattle show, \$7110. Total liabilities, \$81,973.99.

As interest runs during liquidation, at 6 per cent, following allowed, \$4918.44.

Total, if liquidated in one year, \$86,892.43.

The assets as shown by the books are as follows: In coin, \$66.08; in tags for over-drafts \$851.54. Balance as per books, \$917.62.

"But of this," says the report, "we only admit as of real value the coin, \$66.08."

Bank account overdrawn—blank.

In arbitration with other associations, \$165.50.

Entrance dues unpaid, \$12,616.31.

To the report an analysis is annexed, showing, as it claims, that items as old as 1891 have to be included to reach this total. On February 1, 1898, \$2273.33 was written off to Profit and Loss, since which time nothing of the sort has been done, although such debts become outlawed in two years.

"We desire," continues the report, "to call attention to a still more extraordinary fact shown in the same analysis, namely, that while the entrance dues were practically paid in full in 1900 and 1901 (with a little to the good to pay arrears), in 1902 not a single dollar of the \$3270 entrance dues has been paid up to the date of this report. The society should investigate whether this branch is efficiently conducted."

The report then continues: "Real value for liquidation of assets as shown in the books, \$66.08."

To this amount the expert adds the estimated value of the Agricultural Park, \$90,000, based upon a bond required by Judge Matt F. Johnson in a suit of the society on October 19, 1898, making the total assets of the association \$90,066.08. Deducting the total liabilities, as shown above, of \$86,892.43, from the assets and "\$3173.65 surplus for expenses" is left.

In conclusion, the report says: "You will note from the foregoing that we have not attempted a thorough verification of all the details of the books. To do this exhaustively would require at least two weeks longer."

Annexed to the report are a trial balance, Judge Johnson's decision in the suit of October 19, 1898, upon which the estimated value of the society's property is made, and two pages and a half (typewritten) showing in detail who owe for entrance dues unpaid.

The trial balance may prove of some interest. It is dated February 28, 1903, and is as follows:

DR.		
Cash.....	\$	917.62
Other Associations.....		165.50
Entrance dues.....		12,616.31
Profit and Loss.....		60,938.70

		\$74,863.99

## News From the North.

[Portland Rural Spirit]

Chas D. Jeffries has been re-elected racing manager and will have full control of the speed department of the Spokane Inter-State Fair.

R. Britts, of La Grande, has bought from Cris Simpson Tribly S. by Bonner N. B. out of Lady Memo by Memo, son of Sidney 2:19½, second dam by Rockwood, at \$250. This filly is a three year old and is a good gaited trotter.

J. A. Richardson, of Boise, has purchased from F. A. French the pacing mare Maid of Del Norte 2:08 out of Little Maid 2:18 and will likely race her this season. She is now in Casto's stable, at the State Fair grounds, Salem, Oregon.

Senator Helman has a bunch grass colt in his stable that he calls Mustard Plaster. He should stick well and be hot stuff in the bargain.

Cris Simpson reports the sale of his team of pacers by Benton Boy, to J. L. Smiley, of Blaine, Wash., at \$400. Mr. Smiley is well pleased with his bargain, and thinks Cris a poor judge of speed, to dispose of the fast side of this team and remain in the race business.

E. Vesteg, mayor of Albina, has bought the promising three year old filly Bonner Belle by Bonner N. B. 2:17, dam Oregon Belle (dam of Oregon Sunshine 2:19½) by Caution 2:25½; second dam Eugene Eddy (dam of John Edison 2:16½, Santiam 2:24½) by Jerome Eddy 2:16½. This filly is a full sister to the three year old Oregon Sunshine 2:16½, and is even more promising. Mayor Vesteg intends to ride in fast company this season, and paid Cris Simpson \$350 for the privilege.

Professor Eaton, of this city, is certainly a true lover of a fine horse. While his time is mostly taken up with his profession, he can be seen almost any morning driving a spanking team of bays up Goose Hollow Boulevard as an appetizer for breakfast. The professor is the proud owner of a half-brother to the world's champion, Cresceus, and also a very promising colt by Erect, full brother to Direct 2:05½, out of a mare by Algona, sire of Flying Jib 2:04.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

## Had Enough of Ice Racing.

A. J. Keating was present at the Ottawa meet in the capacity of presiding judge, and on his return to New York gave publicity to his opinion. He was satisfied with his first experience at judging such races, but not so infatuated with the job that he would lose any sleep if he never attended another meeting of the kind. He says that cold weather and ice does not strike him as belonging to the racing sport. The crowd enjoyed the races, but he says they are used to that kind of weather and could enjoy it without feeling as if they were going to freeze stiff every minute.

"I have heard folks talk about the thermometer being so many degrees below zero at this or that place, without a shiver," he said, "but I never realized what it meant before. Why, some of the mornings I thought my very eyes would freeze out before I could reach a fire. There were stoves and big fires all about the ice track, and we could keep fairly warm after we got there; but it was torture to me to get there."

Mr. Keating had something to say about the people, and it was in this wise:

"We had anything but a happy time with a lot of the rough element among the Canadians. Oh, they have them up there all right. One day, that horse Johnny P. was in a race. He had been in the habit of winning any way he wanted to, and some of the crowd thought he could beat anything on the ice that ever happened, not barring Cresceus. Well, he could when he was allowed to run about all the way, and his driver was not backward about running him. He had got away with that sort of work all the time, and he had an idea that we would be just as easy to hoodwink."

"A lot of money was placed on him; at least some of the fellows over there that put up a couple of dollars think they are plunging." In the first heat Johnny P. ran almost half way around the track and got under the wire first. We set him to second place for running, and would have set him further back if the third horse had not been so far back that he could hardly have been in the race. A great howl went up from the rabble, and all sorts of things were shouted at us. They kept on betting on Johnny P., however, thinking his driver would get away with it as usual.

"He ran all the way around, or almost all the way, in the second heat, and dashed by the finish on a run, under the whip. We set him back to last place. Then we did get it, good and plenty. 'The American thieves are in with the poolsellers.' 'They are robbing us' and pretty things like that were shouted at us, and then some of them, to make it more pleasant, began to hurl chunks of ice at the judges' stand. It was just lovely. I must say, however, that they were far from being the best class of Canadians."

## New Amateur Year Book.

The first Year Book of the League of Amateur Driving Clubs will make its appearance in a few days. Advance pages show that members of the New York Driving Club, which has headquarters at the Empire City track, are credited with 90 per cent of all the world's amateur records. Most important of them is the 2:05½ by Lord Derby, driven by E. E. Smathers, which is the fastest mile ever trotted in an amateur race. The fastest two heat race and the fastest three heat race is held by the same horse. Ida Highwood holds the record for mares.

Among the pacers Dr. Monical is credited with the fastest mile by stallions, 2:07; Edith W. is credited with the fastest mile for mares, 2:05½; J. H. Lesh drove Greenline a mile in 2:08 at Syracuse, being the fastest third heat. Greenline also went the fastest mile for geldings, 2:07½.

The records show that John A. McKerron holds the world's trotting record against time driven by an amateur, 2:05½; while to Little Boy is credited the fastest pacing mile against time, 2:01½, driven by C. K. G. Billings, an amateur. The Monk and Louise Jefferson are credited with the best mile for trotting teams over a mile track, 2:12½.

The Year Book will contain a complete record of all the amateur races of last year.

## Cause of Scratches.

Too frequent washing of horses' legs without incomplete drying, and the use of soap and warm water in the winter time cause most of the cases of "scratches," and the surest way to start their cure is to abandon washing. The dry mud is easily brushed and combed out; but it is quite a difficult matter to dry the skin after using soap and water on long-haired legs. This also applies to the legs of light horses from November to May, and especially as regards horses having white "stockings," for such legs are more tender than those of dark color and prone to troublesome irritation and scratches, or "mud fever."

## OAKWOOD PARK SALE.

Twenty-five of the Best Young Horses Ever  
Consigned by This Farm.

At the Occidental Horse Exchange, 246 Third street, this city, Mr. William G. Layng, the live stock auctioneer, will sell on Thursday, March 26th, a consignment of 25 head from the celebrated Oakwood Park Stock Farm. This is beyond any doubt one of the finest lots of young horses ever sent to a salesring by any California stock farm and the well known reliability of this great breeding farm is assurance that every one will be just as represented in the catalogue and at the ring sale. The list of horses to be sold is as follows:

Three year old colt by Oxyhee 2:11, dam Inex by Sweepstakes 2:38, second dam by Kentucky Bertrand. Inex is the dam of Alamo 2:29 and Our Jack 2:13.

Two year old colt, full brother to above.

Two year old filly by Direct 2:05½, dam Bella 2d by Nutwood 600, second dam by Dietz's St. Clair. Bella 2d is the dam of Dr. Hammond 2:14.

Two year old filly by Direct 2:05½, dam Steinola by Steinway, second dam Phacola by Silverthreads. Steinola is the dam of Lela May 2:23 and Lena Holly 2:17.

Two year old filly by Direct 2:05½, dam Amazon by Chas. Derby 2:20, second dam Ramona by Anteco 2:16½. Amazon is a young mare. Her dam Ramona is the dam of W. Wood 2:07 and her second dam produced Crescent 2:23.

Three year old filly by James Madison 2:17½, dam Amazon as above.

Three year old filly by McKinney 2:11, dam Electioneer (own sister to Klatawah (3) 2:05½, Chas. Derby 2:20, etc.) by Steinway, second dam the great Katy G. by Electioneer.

Four year old filly by James Madison 2:17½, dam Babe Marion 2:17½ by Steinway, second dam Ida Wood (dam of Owyhee 2:11) by Simmons.

Three year old filly, full sister to above.

Four year old filly by Steinway 2:25½, dam Idol Belle by Idol Wilkes 512, second dam by Belle Morgan 61. Idol Belle is the dam of Walter D. 2:19½.

Four year old filly by Chas. Derby 2:20, dam Ada F. by Antevolo, second dam Calypso by Steinway. Calypso, the second dam of this filly, is the dam of Pussy Willow 2:10½, Allie Sloper 2:28 and Best Way 2:29½. The next dam Alla by Almont produced Spartan 2:24 and Cresco, sire of three in the list.

Four year old filly by Steinway 2:25½, dam Katy G. by Electioneer. This filly is an own sister to Klatawah 2:05½, the champion three year old, Chas. Derby 2:20, the great sire, H. R. Covey 2:25, Sunlight 2:25 and Steineer 2:29½. Katy G. is one of the greatest broodmares and this daughter should be very valuable as a matron when she has finished racing.

Four year old filly by James Madison 2:17½, dam Lurline by Steinway, second dam Maggie McGregor by Robert McGregor, sire of the champion Cresceus 2:02½. Maggie McGregor is one of the best broodmares on this great farm. She has produced Algregor 2:11, W. W. Foote 2:15½, Tyana 2:16½, Madcap 2:20½ and the dams of four in the list.

Four year old filly by James Madison 2:17½, dam Waywood by Steinway, second dam Woodline by Woodnut 2:16½. Waywood is a young mare and none of her produce have been raced.

Four year old gelding by Charles Derby 2:20, dam Oonalska by Prince Red, second dam Neva 2:27 by Steinway, third dam Princess by Administrator. Princess is the dam of Derby Princess 2:08½, Prince Away 2:19½ and Neva 2:27.

Five year old gelding by Steinway, dam Empress 2:29½ by Flaxtail; second dam Lady Narley by Marion, son of Mambrino Chief. This gelding is an own brother to King Cadenza 2:15.

Five year old gelding by Charles Derby, dam Edon by Gen. Benton; second dam Emma Robson by Woodburn, third dam Lady Bell by Williamson's Belmont. Emma Robson was a thoroughbred mare and the dam of three standard trotters, among them the mare Rowena, that held the two year record of 2:17.

Three year old gelding by James Madison, dam Lurline, sister to Algregor 2:11, etc., by Steinway; second dam Maggie McGregor by Robert McGregor.

Three year old filly by Charles Derby, dam Caroline by Yosemite 1906; second dam Phacola by Silverthreads, third dam the great Minnehaha, dam of the still greater Beautiful Belle.

Three year old gelding by Charles Derby, dam Cecelia by Del Sur 1908; second dam Cecelia Clark by Clark Chief. Cecelia is the dam of Electification 2:25.

Three year old gelding by Charles Derby 2:20, dam Idol Belle by Idol Wilkes; second dam Belle by Bell Morgan. Idol Belle is the dam of Walter D. 2:23.

Three year old gelding by Charles Derby, dam Peronella by Prince Red; second dam Caroline by Yosemite,

third dam Phacola by Silverthreads, fourth day Minnehaha, dam of Beautiful Belle.

Three year old filly by Steinway, dam Essie Farley by Mountain Boy 4841, second dam Madonna by Cassius M. Clay. Madonna is the dam of Alcona Jr. 2:24 (sire of Silas Skinner 2:17), Del Rey 2:24½ and Madonna Russell 2:25½.

Three year old filly by Charles Derby, dam Economy 2:30, by Echo, second dam Lady Berkey by Muldoon, son of Geo. M. Patchen, Jr. 31.

This is a grandly bred lot of young horses and as they will all be shown at the side of a saddle horse, buyers will have an opportunity to see their style and gait.

They are all thoroughly broken, single and double, and nearly all are heavily entered in large stakes, not only in California but in the Eastern States.

It will be one of the greatest opportunities ever offered in California to get choice animals that are great prospects for the track. Don't miss this sale.

## Looked Four Months For a Trotter.

Ira Ryerson, formerly of Goshen, N. Y., but of late years one of the most successful American horsemen in Europe, ended a four months' search for a good trotting stallion last week by buying Prosperity Bill 2:12½ at the Daugherty Wabash, Ind., sale.

Mr. Ryerson's story of his hunt for a well bred and likely young trotting stallion is interesting and shows how very scarce horses of this class are. He arrived in this country in midsummer and followed the horses through the Grand Circuit and down to Lexington and Memphis, and always had his eye out for something to take back across the water. Only a few were found to fill his requirements and every one of these was priced where only an oil or coal magnate could reach them. After the "big ring" closed he began to cast about for the good ones on the Western Circuit and the half-mile tracks and here again he encountered prohibitive prices. When I say prohibitive, I don't mean that he was out bargain hunting and wanted a marked down price. One instance of the many he related best indicates the price put upon anything that had made even a moderate showing. Down in Ohio he heard of a stallion with a record of 2:22½, whose best performance was a second place in 2:14½. In response to a wire asking for a price the owner wanted \$5000. Another telegram was sent saying that he would go see the horse if the owner would come down a little, and the answer was: "Unless you will pay \$5000, don't come." Mr. Ryerson went to \$10,000 on Idolita 2:09½, but failed to reach. Ryerson was about discouraged when he heard of that awfully named horse, Prosperity Bill 2:12½. Bill was one of the most talked of horses in the West last season. He has sensational speed and is fairly good headed, and, in the opinion of many good horsemen, a change of drivers will make him a great race horse. I timed him at Terre Haute a half in 1:02, trotted after he had made a mistake. His best mile was in the same race, where he beat A. J. D. 2:09½ for the place in the second heat and finished second to Monte Carlo 2:09½, trotting, himself, in flat 2:10. Bill is a six year old chestnut horse standing 16 hands and built to order. He is a very stout horse, but nicely finished and has a wonderful set of legs, having not even a puff on them, despite his three years' hard racing.

Mr. Ryerson paid \$3700 for him and was willing to go much higher had it been necessary. The price, all things considered, was certainly low, and it would not surprise me if the horse does extremely well on the other side. He will be started in the European championship race at Baden and, with his known speed and the handicap he will get, will, likely, be a strong factor in the old world classic events.—*Marque in Horse Review.*

## Driving Club Member Argues for Wagon.

There is good reason to believe that the wagon as a racing machine will supersede the sulky and this season will see more wagons on the tracks than ever before. One of the strongest arguments in favor of the wagon is that once in a while a horse put to four wheels can play havoc with any record he made pulling a sulky. A prominent member of the New York Driving Club, who was one of the first to discard the sulky for the wagon, in explaining its advantages the other day, said: "In the first place, the horse can be more loosely harnessed, and not strapped up so tight; he escapes, when in motion, the motion of the driver and most of that from the vehicle. Again, the driver seated in a wagon can take a lighter hold of his horse than when balanced in a sulky. The wind resistance, especially in a low-seat skeleton wagon, is much less; the weight is more equally distributed upon four wheels than two, and better balance and more freedom for the animal means fewer boots and steadier gait; in fact, the sulky presents no advantages which the wagon does not duplicate, and the latter has many which the former cannot approach."

## Old Animals as Sires and Dams.

In an article on "The Principles of Breeding" in the last number of the *American Sportsman*, Casper L. Redfield makes some statements which he would have some difficulty in substantiating if he attempted to do so. For instance he says: "If we breed animals at a late age, we get increased toughness, power and endurance. There is also a tendency for the normal length of life to approximate twice the average at which reproduction takes place. Thus, if we should continue to breed horses at an average age of 20 years it would be only a few generations—perhaps 10 or 20—before horses would normally live to the age of 40 years. There would be a distinct advantage in this in working animals, not only because the length of useful life would be increased, but because the degree of usefulness would also be increased. This increase in the degree of usefulness would come partly from increased intelligence."

What proof can Mr. Redfield produce to show that there is a tendency for life to approximate twice the average at which reproduction takes place? If such is the case it would seem as though there ought to be a great many more 30 year old horses than there are known to be. If the learned writer's knowledge in this respect is not better founded than it is on the production of eggs by hens at different ages, it is not worthy of much consideration. He says:

"Hens lay a slightly greater number of eggs during the third year of their lives than during either the second or fourth years. It may, therefore, be presumed that if a uniform practice be made of producing chicks from the eggs of hens in their third year, the tendency will be to gradually increase the laying capacity in future generations." This is far from correct. A hen will lay more eggs during the first year of her life, or what is termed by poultrymen her pullet year, than during any year of her life after, provided she is given as good care and is fed as nearly correct then as in after years. The men who conduct egg farms keep their hens over the second year only to use them for breeding purposes, or to fill out when there is a shortage in the pullet crop. To find that this statement is true, Mr. Redfield will only have to ask any man who is in the business of producing eggs on a large scale. The theory advanced by Mr. Redfield, that the best animals come from old parents is not born out by facts as related to trotting horses, for some of the best race horses seen on the harness tracks have been the progeny of young sires and young dams.—*Horse World.*

## Another Big Swindle.

No sooner is one get-rich-quick scheme killed than another bobs up serenely to take its place. An eastern paper says:

Plans are being perfected in Philadelphia by a big syndicate in which wealthy New York gamblers are said to figure as financial backers for the formation of a corporation that is expected to put anti-pool selling laws at defiance and to carry on a general business in this and other states by which wagers can be openly laid on race horses to any amount and without fear of police interference. The men back of the movement plan to do business as an insurance company and to have the full benefit and protection of the insurance laws.

Instead of invading the field of insuring life or property or against fire, cyclones, or storms they will insure horses to win or not to win certain races in which they are entered. Regular policies are to be issued, which in effect will be pool tickets, but on the face technical writs of insurance instead of slips covering wagers. The wide scope of Lloyds, in London, which will practically take a wager on anything under the sun where chance is a possible factor, is said to have given the gamblers their idea.

It is the plan to have the corporation regularly organized and chartered in a state like Delaware or New Jersey, where a wide open charter can be secured. Once organized, agencies will be opened in all states where it is possible for the insurance company to get the requisite permission.

If this new corporation is established it will find thousands of dupes ready to invest and when the crash comes there will be the usual amount of wailing and weeping and gnashing to teeth, but no sympathy should be extended them by the public.

## Does Not Favor Two in Three.

Major P. P. Johnston, president of the National Trotting Horse Association, is not in favor of the two-in-three heat plan in all races. He favors a mixed program as a happy medium to suit all classes of pacing and trotting horses. He contends that even some of the greatest trotters of the turf are slow beginners, and are never at their best until a heat or two is trotted. If the two-in-three heat plan had been in force in years gone by, many stirring contests in races like the great Transylvania would not now be turf history. Secretary E. W. Shanklin will not be guided by any rage for two-in-three heat races in the formation of his program for the great meeting of the Kentucky Trotting Horse Breeders Association in 1903.

## Notes and News.

There is a letter at this office for C. B. Miles.

Crown Prince sire of Prince Alert 2:00, will be well patronized in the stud this year.

Henry Klemp, of Sacramento, advertises a good jack and a draft stallion for sale. See advertisement.

If Zolock 2:10½ should go East this year, which is probable, he will be in the stable of W. L. Snow.

Mr. P. H. McEvoy, of Menlo Park, wants a good, reliable, sober man to care for a stallion that he will place in the stud this year.

Entries for the Colorado Circuit races close tomorrow, March 15th. There will be \$75,000 to trot and pace for over there. Make your entries in time.

Ten years ago there were only eighteen 2:10 pacers and twelve 2:10 trotters in the entire list. Now they are so numerous that it is troublesome to count them.

Lucille, whose record of 2:07 is the fastest by a trotting mare to wagon, has been permanently retired and will be bred to the champion trotter Cresceus 2:02½.

H. M. Hanna's Mattie Patterson 2:09½ foaled a handsome and shapely chestnut filly by Cresceus 2:02½, at Ketcham Farm on February 21. She will be bred back to the champion.

The announcement comes from Lexington that Mr. A. J. Welch has leased the famous trotting stallion Charley Herr 2:07, and will place him in the stud at Charter Oak Park, Hartford.

One of the most promising colts in California is owned by Mr. I. L. Borden, of this city. He is by Nutwood Wilkes 2:16½ out of the fast pacing mare Allie Cresco 2:13½ by Cresco. The colt is a two year old and is not for sale.

Thos Smith, of Vallejo, has secured a lease of the excellent track at that place and will keep it in shape for training horses over. There will be a first class fair held at Vallejo this year if appropriations are made for the districts.

An auction sale of Percheron horses was held at Milan, Missouri, last week. Eleven stallions brought \$6810, an average of \$619.09; twenty-one mares brought \$9755 an average of \$464.52, and the average for the thirty-two head was \$517.65.

William Sinnock of Santa Ana, Cal., lost on February 11th, the very handsome filly Santa Baron by Barondale 2:11½ out of Santa 2:25½. Mr. Sinnock owns a fine filly eight months old by Neernut 2:12½ that is a very fast lot trotter.

And now the Wisconsin Legislature has taken up the cudgel against the docked horse. A bill has been introduced in the Senate making it a criminal offense to dock a horse's tail, and forbidding the bringing of docked horses into that State.

George A. Schneider, associate editor of the *American Sportsman* and secretary of the Cleveland, Ohio, Road Drivers' Association, has signed contracts to act as starting judge at the nine meetings to be held on the Newburg, Valley and Rockport half mile tracks this season, all suburban to Cleveland.

The trotter Frank McClung 2:15½, that took his record over a half-mile track last season, never saw a track until last May, and sixty days later he could beat 2:15 over a half-mile ring. He will probably be raced over the Grand Circuit tracks this year. He is a son of S. W. Bennett 2:19½, son of Pilot Medium.

Investors in the "get-rich-quick" schemes will secure cold comfort if all the judges follow the example set at St. Louis last week when the first attachment suit filed against John J. Ryan was dismissed on the ground that the companies were simply gambling schemes and that all investors are partners in the business.

The bacillus of glanders is destroyed by an exposure of five minutes to a 5 per cent solution of carbolic acid or a 1-50 per cent of corrosive sublimate. Every article used around horses having the disease should be disinfected with one of these germicides or exposed to boiling water or steam at a temperature of 212 degrees Fahrenheit for half an hour.

Ras. Eckers, who drove Monte Carlo so successfully for Monroe Salisbury last year, will train and drive for C. H. Anthony, of Muncie, Ind., this season. Mr. Anthony has just shipped to Mr. Eckers, at Indianapolis, from Walnut Hall Farm, Lexington, Anna Held 2:12½ and Sufreet (p) 2:08½. Mr. Anthony thinks Sufreet will pace in 2:05 this season.

And now an eastern writer is advocating the "new" idea of having an assistant starter for trotting races that will be mounted on a horse and bring the field in line to the wire. The late Capt. B. E. Harris of this city promulgated that idea, ten years ago and gave it a practical trial at a meeting in this city. It did not work very well and failed to meet with favor.

R. Hogeboom, of Santa Rosa, is the owner of a colt by Rose Dale Stock Farm's stallion Washington McKinney out of a mare by the champion five mile stallion Waldstein. The colt is a yearling, is a natural pacer, and is considered very promising.

Don't forget the big meeting at Detroit, which opens the Grand Circuit as usual this year. The M. & M. is \$10,000 for 2:24 class trotters and the Chamber of Commerce \$5000 for 2:24 class pacers. Read the conditions carefully in advertisement. Entries close Monday, March 23.

Grace by Buccaneer is the dam of Daedalion 2:11, Creole 2:15 (sire of Javelin 2:08½) and Eagle 2:19½. The dam of Grace is also the dam of Lettie, dam of Welcome 2:10½ and Wayland W. 2:12½. Grace will be sold at the closing out sale of Geo. Fox's Mokelumne Farm at Fred H. Chase's salesyard in this city in May. She is a regular breeder and one of the great broodmares of California.

Secretary E. W. Shanklin anticipates that the re-solving of the track now in progress by a force of twenty skilled workmen will make Lexington's famous course fully two seconds faster this year, and put it in prime condition for sensational record breaking at the big meeting in October. To date some 2000 cart loads of new soil have been put on the track, and all told between 3500 and 5000 cart loads will be utilized.

Hon. Jesse D. Carr, of Salinas, announces through the columns of the BREEDER AND SPORTSMAN that his grandly bred and handsome young horse, Boodle Jr., will be in service at the Gabilan Ranch this season at \$25 the season. Boodle Jr. is by Boodle 2:12½ out of Nina B. by Electioneer. He is not only a horse of great beauty and fine proportions, but he sires large, handsome colts and of the type that are in great demand. His get all show speed.

The above photo engraving is of the stallion Arner, own brother to Diablo 2:09½, Don Derby 2:06 and others. He was a conspicuous feature of the Haywards Horse Show last Saturday, and was much admired by the large crowd of spectators present. Arner is owned by Mr. C. Branin, of San Lorenzo, and after a short season in the stud will be trained by Barney Simpson and given a record. He will get inside 2:20 to a certainty if no accident happens him.

It has been decided that the winners of the Merchants' and Manufacturers' and Chamber of Commerce Stakes, at the Grose Pointe meeting, must win three heats, instead of two, as originally announced. Secretary Petit says: "Owing to the importance of these stakes for practically green horses we thought the owners might not like the two-in-three heat plan. Therefore, the idea of sending non-heat winners to the barn after the third heat was adopted. The other events will be two-in-three heats."

One of the best bred young stallions in California is Silver Fox, owned by Mokelumne Stock Farm. He is by Silver Bow 2:16, son of Robert McGregor, out of Kitty Fox by Pancoast (son of Woodford Mambrino and Bicara by Harold); second dam Bessie Bowne by Dictator, third dam Lady Lightfoot by Mambrino Time, fourth dam by Paddy Burns and fifth dam by Moseley's Copperhead. Silver Fox is but three years old and is a colt of great promise. Geo. Fox, his owner, intends keeping him and five broodmares, and will sell all the rest of his horses at Fred H. Chase & Co.'s salesyard in this city in May.

J. C. Bray, who has picked up a car load of good roadsters in California during the past few weeks on orders from Butte, Montana, has been delayed in shipping them by reason of a dispute over the ownership of the Director stallion A. A. Moore, which he purchased for stud purposes. This horse has been peddled around San Francisco for several years without finding a buyer, but as soon as Mr. Bray bought him, several other parties saw value in him, and the former owner put in a claim for the horse, averring that the party who consigned him to the auction sale had no authority to sell him. He waited until Mr. Bray was ready to ship his horses and then replevined the stallion, but Bray "replevined him right back," as he says and will hold the horse until the plaintiff proves his case. As the horse was advertised to be sold, was catalogued, and sold subject to a claim against him which Mr. Bray paid, it looks as if the former owner had suddenly realized that he had "let a bird go" and wanted it back.

Baron Rogers, that started for the first time last season and got a pacing record of 2:09½, is regarded as a 2:04 prospect, and will be raced in the East the coming season.

John B. Sage, secretary of the Buffalo Driving Club, says that Mr. Williams, one of the lawyers concerned in the legal troubles surrounding Kenilworth track of that city, has assured him that the club would have a week's date at the track to give a trotting meeting in August.

A. J. Welch is enthusiastic over Oakley Park as a trotting town, and is confident that, with good weather, the Grand Circuit meeting in September will be the greatest ever held there. The business men are taking a livelier interest in it than ever, and the hotel men are its strong adherents. Last year, even with bad weather, the hotels were filled, and that was sufficient to show the hotel men that a trotting meeting made business good.

The well known trotting stallion Honesty 2:25½ was injured so badly in Australia recently that he had to be destroyed. He was bred by J. H. Dodge of Stockton, California, and foaled in 1877. In 1881 he made his record at that place and was sold to go to Australia the next year. He met with fair success in his new home and sired several winners. He was by Priam 1798, out of Western Girl by Chieftain. In March, 1883, Honesty won the Australian trotting championship in 2:30½, and at the Royal shows of 1891 and three subsequent years was awarded the prize for the best trotting stallion.

The Boston Globe claims to have information that the reason Ben Kenny resigned as trainer for the Schmulbach stables was on account of the race at Brighton Beach for the \$10,000 Bonner Memorial Stake, in which Kenny drove Lady Thisbe, won two heats over Major Delmar, and got second money. At Readville, in the \$15,000 Massachusetts stake, Major Delmar beat Lady Thisbe in straight heats; although Ed. Benyon drove the mare in the later race, then, according to the Boston Globe, Schmulbach and Kenny agreed to disagree. And still the Boston Globe throws no light on the subject.

If a colt can not stand when it is foaled it should be rubbed briskly with the hand. If it stands, even though it needs help, all will be well; if too weak to stand, the dry hand-rubbing should be persisted in until it does stand alone. Of course, the colt should be kept in a warm place, as anything like a chill is liable to kill it or at least seriously interfere with its development. If, in spite of this treatment, foals die, there is some fault which should have been corrected before birth. If the successive get of any horse or foals of any mare die in this way, such horse or mare should not be used for breeding purposes.

The most important statement that can be made about a colt when it is offered for sale is that regarding his engagements. The colt has been entered in the futurities, matron stakes and various other colt stakes, will bring fully twice as much at public auction as the one with no engagements, and if possessed with anything bordering on sensational speed, the difference in values in favor of the fast colt is quadrupled. Breeders have learned that next to feeding their colts, the most essential thing is engaging them, for buyers have long since considered it as an established fact that a colt not worth entering is not worth buying.

Col. Joseph Battell, of Middlebury, Vt., is constantly receiving letters of inquiry concerning the Morgan breed of horses, and he has been in correspondence with a representative of the Japanese Government relative to securing Morgan stallions for breeding purposes in Japan. C. L. Paige, the manager of the traveling department of Thomas Lawson's stock farm, "Dreamworld," was in Middlebury last week in search of pure bred Morgans, and he purchased five at two farms. The officials of the Morgan Horse Breeders' Association of Vermont say that the demand for Morgans is at present beyond the supply.

A letter from N. D. Dutcher, of Livermore, to the BREEDER AND SPORTSMAN states that the breeders of that locality are looking for new draft blood, and that a good, first class imported draft stallion can get from eighty to one hundred mares there this year at \$20 the season. The demand for draft stallions during the past two years has resulted in the sale of nearly all the full blooded stallions in that section, but there are a large number of full blooded and grade mares there and breeders are anxious to improve their stock. Mr. Dutcher's jack that was pictured on our front page of February 28th, is five years old and will weigh close to 1000 pounds. He is for sale and a written guarantee will be given with the bill of sale.

That veteran of veterans, Dennis Gannon, who was driving trotters before a majority of the present race drivers were born, advertises in this issue that his stallion Grover Clay 2:23½ will stand for public service at Emeryville this year at the low fee of \$25. Grover Clay is a son of the great Electioneer and is out of the mare Maggie Norfolk (trotting record 2:34) by the thoroughbred Norfolk, second dam by Billy Cheat-ham, third dam by Dorsey's Goldust and fourth dam said to be by Abdallah 15. Grover Clay was not only a fast trotter himself, but he sires speed as well as size, good looks and gameness. Several of the hand-somest carriage horses in Oakland were sired by Grover Clay and he is the sire of that game race horse Clay S. 2:13½ and several others, among them the trotter Richard S that trotted a trial of 2:09 last year. Mr. Gannon has two fine stallion colts by Grover Clay for sale. They are out of a producing mare by Sidney. See advertisement.

### Horseshoeing Methods.

J. P. AUSTIN in American Sportsman

The matter of shoeing the horse for road driving, whether for speedway or carriage use, is one of very great importance to the owner and one that does not receive the intelligent consideration that its possibilities for satisfactory returns demand.

The shoeing of the most valuable horses are very often left to men who are entirely ignorant of the simplest methods and are mechanically incompetent to adjust a shoe to a perfect foot, after the foot has been properly prepared for the shoe and to remedy a defect in the form of a foot or the gait of a horse would be beyond them. Yet they, in their ignorance, would make an attempt with disastrous results. The owner finds a lame horse when he desires to drive on the boulevard or speedway, with the result that the horse is put out of use for a time and the pleasure of driving must be foregone until relief can be brought about, or the horse sold at a loss and another put in the place of the crippled one. Very many of the most incompetent shoers style themselves "scientific horseshoers," and so advertise themselves. This point was well illustrated by a friend of mine, who tells his story thus: "I heard that a fellow had started a shoeing shop in the neighboring town of —, and that he laid claims to be the most scientific horseshoer that ever blessed this earth with his presence. I just thought that I would go and see him, and perhaps learn something to my profit. I went and this is what I found: A shop about 15x15 feet square; a wagon load of dirt and scrap on the floor; an anvil that had passed through a fire and had lost all temper, the face being so cut and bruised that a chiselled piece of granite would have been smooth in comparison. His bellows had so many holes in it that when he attempted to use it, it sounded as if a young cyclone had struck the place. Two dilapidated pair of tongs and a hammer so worn and chipped that it had very little semblance to a hammer, made up his tools. All this and more I took in at a glance and wondered, but I thought that perhaps this man really did know something; so I said to him that I had heard much concerning his knowledge and ability as a horseshoer, and I had come to learn of him, as I was anxious to gain all the information relative to my business that I could. He seemed to be mighty pleased and forthwith gave me a lengthy talk about horseshoeing. Finally, I asked him how many bones there were in a horse's foot, and he very promptly said that there were four. Then I was convinced that he was a fakir, and I said to him that either he was the poorest guesser or was the worst liar that I ever saw, but his conceit was of such a kind that a little thing like that did not affect him and not until a foot was shown would he acknowledge that he did not know anything about the art of horseshoeing." The horseshoer is not the only drawback to the horse interests. In not a few instances the coachman looks for the shoer who will put up the tip for his patronage and when he has found such a man will proclaim him the best in the land. The methods used are sometimes very ingenious when a change of horseshoers is desired. The owner first hears complaints about the way the horse is shod. The horse loses a shoe just when wanted the most. He goes lame, the shoes come loose, nails fall out on one side, allowing the shoe to twist on the foot and cause the horse to injure himself. Calks come off unnecessarily. The game is kept up until in hope of relief the owner orders a change of shoers and all is serene. Again some owners think that because they can own a good horse that by driving him they soon learn how to shoe him to get the best results. They go to the shoers and give orders to him, and although that individual may be a competent man, for fear of offending a good customer, he will do as the owners desire. This is not so bad, provided, if failure is met with the owner will not place the blame on anyone not at fault, because he pays for his experience. An owner once said to me that he knew a good deal about horseshoeing for he had talked with Robert Bonner for two hours at one time.

The papers are full of "the way to shoe horses for the road or boulevard." A good deal of it is valuable, much more is worse than worthless, because no difference how impracticable the theory advanced may be, there are always some who follow and endeavor to put in practice any old theory, however foolish it may be to the practical man. Among some of the fads may be mentioned the Simpson tip theory, as advanced by Mr. Simpson, of California, twenty years ago. Another was the good-enough system, long since forgotten. Another the theory of more recent date, that of shoeing a horse according to his height, length and weight. Nothing could be more fallacious. Any man of experience knows full well that the size of a horse has nothing to do with either the length of toe, the height of heel or the weight of the shoe necessary to secure the best results. To the

experienced, practical man it would be as reasonable to attempt to shoe according to the color of the horse. I am writing from experience. I have kept a record of the length of toe, angle of foot and weight of shoes that I have used in the past two seasons and I find that very often the tall horse must wear a short foot and heavy shoe, while the very next horse shod will be a small one that requires a long foot and a light shoe. Every horse is an individual, separate and alone, just as much in the way to shoe him to get the best results as he is in disposition, temperament or color. If this theory could be established as correct, it would simplify the question as to the best way to shoe a horse. It would be resolved into a mathematical problem and soon be established along scientific lines, but the effort to establish the theory has proved its fallacy. It cannot be successfully done because it exists only in the fertile brain of some theorist who can advocate his ideas with presumption and a good use of words. No man has a monopoly of experience or knowledge, neither can a combine be formed to control it. It cannot be cornered, like wheat. Every man has an experience of his own, and it varies somewhat from every other man's experience. Every horseshoer has theories and methods of his own, based upon his practical experience, helped by the experience of others, so far as he can gather from them. A principle, to be scientific, must be established as a controlling factor, not as a theory. It must be beyond successful contradiction, and there are so few such principles in horseshoeing that there has been no scientific method developed as yet. The most satisfactory way for an owner to do is to first select a horseshoer who has a good amount of mechanical ability, a student of his business, one who keeps posted in all the advanced ideas relative to horseshoeing, including a good understanding of the anatomy of the horse's feet and legs, a man who is looking for information from any source. To such a man suggestions from the owner or driver, or anyone else, will always be welcomed, and his judgment will be good. The chances are that satisfactory results will result from the very nature of things. There must be more or less of experiment until the individual requisites of the horse are discovered, and this is one good reason why it is often best not to change from one shoer to another any more than can be helped. It is not always easy for one man to convey to another a correct idea of a method used in dressing the feet or in making and fitting the shoes on some particular horse for specific purposes. Many times the cheapest priced man is the most expensive in the end, because the high-class man who knows his ability, will think well of his work and will insist upon being paid a fair price for his experience and skill. The year's bill for first-class work will not be as great when results are considered, and results are what we are all looking for.

### How to Break Horses.

Among the many ingenious methods employed in breaking horses, the following recommended by driver Ed Geers, in his book "Ed Geers' Experience with the Trotters and Pacers" seems a very good one.

"As the twig is bent the tree will grow" is a maxim that has come down to us through the ages, and has direct application to the breaking and educating of a colt. The viciousness and worthlessness of many otherwise valuable horses can be traced directly to the want of knowledge, care and patience on the part of the trainer in giving the young animal his first lesson in harness. While in my early career I had quite a large experience in breaking colts, since being at Village Farm I have had nothing whatever to do with that important branch of the business, as that is done entirely by Mr. H. D. Freeman, a man of large experience, and the most successful colt-breaker I ever saw. Out of the great number he has broken at Village Farm he has never injured one, and when he turns them over to be handled they are thoroughly broken and ready for use. I thoroughly approve his methods, and if those desiring colts well broken will follow his instructions their desires will be gratified.

In the first place, I think it best to take plenty of time to bit a colt and have him thoroughly broken before trying to give him speed. I usually ground-break him a week or ten days; that is, let him get thoroughly accustomed to the harness, and drive him a good deal with it on and teach him to start and stop at the word. Also to turn to the right or left with ease, and above all, never exhaust him or get his mouth sore. During this time it will be well to pull a cart or sulky, or something light, with shafts, up to him as if you intended to hook him up. He will soon find that the rig is not going to hurt him, and will not be afraid, and when hooked up, he wants to be driven slowly and only a short distance, never far enough to fret and tire him. You will find in a short time he will take his work cheerfully.

"After two or three weeks of this kind of work drive

him out on the road about a mile, then turn if the road is good, let him move a hundred or two hundred yards well within himself. After getting back to the track, jog him around once, let him step the last two hundred yards at about three-fourths speed. His improvement will be astonishing after two weeks of this work. Of course, his work can be increased as he gets in condition, but I do not think it advisable to continue his fast work; two or three weeks' let-up will do him a deal of good.

"After he is taken up the second time and jogged a week, he is ready to begin to step along a little, as he has not been turned out long enough for his muscles to relax, and after he has been started up two or three times you will find he will have more speed than when turned out. I think six weeks is long enough to keep him at work this time. Turn out again from ten to thirty days. Be governed by conditions and the constitution of the colt. My experience has been that it is not advisable to jog a colt too much, as he is apt to get off his gait and does not improve as fast as he does with short, lively work. You can generally tell from the actions of the colt barefooted about the weight shoes he will need."

### Long Races Not the Rule.

Although there has been considerable hue and cry raised about the long-drawn-out races under the three-in-five system, a glance at the statistics of the races under the management of the Detroit Driving Club during the past four years would indicate that there has been a popular clamor regardless of the facts. Undoubtedly much of the demand for shorter races comes from the fact that the rules are not sharply lived up to at many of the meetings, and this state of affairs has been more prevalent at tracks not members of the Grand Circuit. The consequence is that when there is a long-drawn out race at one of the big meetings there is more comment than if the other associations had lived up to the rules. At Detroit in 1899 there were ten races decided under the three-in-five system, which took forty-seven heats, or an average of four and seven-tenths. In the following year there were nine races with forty-one heats, an average of four and six-tenths. In 1901 the average was four and one-tenth, for ten races were decided in forty-one heats. Last year eight races were got off with thirty-two heats, an average of four heats to a race. During the same period, under the two-in-three system, the result was as follows: 1899, ten races, twenty-four heats, average two and two-fifths; 1900, seven races, twenty-five heats, average three and four-sevenths; 1901, ten races, twenty-five heats, average two and one-half heats. During the four years under the three-in-five system the average was a little more than four heats, while under the two-in-three plan the average was not quite three heats to a race. The M. & M. during these four years was decided in seven heats in 1899, six in 1900, and three each in the last three years. The Chamber of Commerce stake for pacers was first inaugurated in 1896. The greatest number of heats required to determine the winner of this classic event was in its first year, when Planet won in six heats. Again in 1900 it took Bonnie Direct the same number of heats to win. Judging from these figures, there does not appear to be so great a need for the abandonment of the three-in-five system. However, as noted above, it is probable that at some of the smaller meetings this good average might not obtain. Now that a very large per cent of the races down the Grand Circuit will be decided on the shorter system of racing, the per cent being so large, indeed, as to practically make it a season of two-in-three racing, a comparison of the number of heats the horses will be required to go to each race this year as against the average at Detroit during the past four years will make interesting reading.—Chicago Horseman.

### Chicago Prices for Trotting Bred Horses.

What was probably the greatest auction sale of harness horses in Chicago was held there under the auspices of the Chicago Horse Sale Company last week. With the exception of Gentle Lady 2:16½, who brought \$3000, few horses went over the \$1000 mark, yet the 423 horses sold brought an average of close to \$225 each, which included a lot of young stock and ponies that brought from \$25 to \$50.

### Treatments Worth Knowing.

If your horse has heels cracks clean thoroughly, after which apply Campbell's Iodoform Gall Cure. A quick and permanent cure will result. If your horse has scratches, wash with warm water and castile soap. When dry, paint lightly with Campbell's Horse Foot Remedy, and in a day or so, as soon as the deep-seated germs are killed, apply Campbell's Iodoform Gall Cure. This treatment is a positive cure. If your horse is calked or out by barbed wire, or receives any other similar injury you can prevent blood poisoning and heal the wounds by using Campbell's Horse Foot Remedy or Campbell's Iodoform Gall Cure. Both are powerful antiseptic remedies, and never fail to cure such wounds.

Jackson's Napa Soda untangles the feet.

## THOROUGHBRED DEPARTMENT.

No less than 7108 mares are reported in Volume VIII. of the Stud Book. Of these 419 are imported mares; 1893 are sired by imported horses; 87 have a double parentage and 4796 are native born and bred. The Breeders Protective Association have purchased 363 mares and these are forever dead to the thoroughbred horse world. These 7108 mares were sired by 1237 stallions; 211 imported stallions being used and 185 stallions standing in foreign countries. 236 mares and 62 stallions are to be found in the obituary columns; 42 additional stallions have been imported since the publication of Volume VII; 484 thoroughbreds have exported, 404 of them going to England, 42 to France, 26 to Belgium, 5 to Germany, 3 to Ireland, 1 to Old Mexico and 2 to far off Japan, so it will readily be seen that the American thoroughbred horse is, as he well deserves, fast gaining quite an international reputation.

A list of stallions having over 40 broodmares to their credit is to be found below. That grand horse Longfellow, comes first, no less than 120 broodmares claim him as their sire. The others appear in the following order:

King Alfonso 107, Onondaga 102, Hindoo 94, Glenelg 83, Sir Modred 80, Himyar 71, Iroquois 69, Spandthrift 68, Falsetto 66, Rayon d'O 63, Enquirer 63, Great Tom 62, Virgil 61, Hanover 55, Luke Blackburn 55, Leonatus 52, Darebin 49, Deceiver 46, Mortemer 49, Ten Broeck 44, Billet 43.

The most popular foreign stallions are the following: Hampton 11 (being the only one to run into double figures), Barcalaine 5, Friar's Balsam 5, Galliard 9; Galopin 6, Hawkstone 8, Hermit 8, Kisber 5, Lowland Chief 6, Macaroon 5, Peter 6, Royal Hampton 6, Rosicrucian 5, St. Serf 5, St. Simon 7, Sir Bevis 6, Springfield 8, Sterling 7, Wisdom 5.

Plenty of the very best blood in the world is represented here and the records will show what wonderful success has attended the use of imported mares and it may be truly said that in the importation of stallions to this country, stud masters have not always exercised their best judgment, but no fault can possibly be found with the class and breeding of the mares that have come to us from across the seas.

The most extensive breeder of thoroughbred stock in the United States is, of course, Mr. J. B. Haggin. No less than 606 mares are found to be his property. Mr. Milton Young has also an exceedingly large number of broodmares, 201 being the exact number.

Then we find 1280 sires of registered foals, and now comes a fact that will bear a great deal of investigation. It has been stated that 7108 mares are to be found in the pages of the Stud Book, regardless of those mares for whom no return has been made since their appearance in Volume VII. The return of 3601 or only a little more than 50 per cent of living foals is, indeed, a matter for serious consideration. Presumably, at least half of them are fillies, and of these many will never be trained, and of the 1800 colts, how many will fall by the wayside ere the bugle calls them to the post for their maiden effort. So it appears that the stud master is feeding two mares to raise one foal and four mares to raise one colt, and eight and two-third mares to raise a colt that will face the starter.

What is the cause of this poor return of foals for 1901? During that season "slipping" was by no means prevalent and no very severe or inclement weather was experienced and as a rule, mares kept as they are in the horse raising States are healthy and vigorous. Then to what can we attribute the lamentable state of affairs? The most reasonable solution is overcrowding. Breeding establishments cut down by one-third would produce a better average of foals and in all probability the return of foals would be as large and the band of broodmares one-third less.—*Thoroughbred Record.*

Jockey Waterbury had the pleasure of winning his first race on a two year old when he piloted Annie Marie to victory on Tuesday last.

Since the higher class riders have left here for the Eastern tracks, it has been very stormy for the betting public; under the existing circumstances it is almost impossible to get a ride for one's money.

The Waterhouse Cup, with a value to winner of \$2190, and over two and one-quarter miles of ground, was competed for last Saturday and was won by the Wadsworth-Modjeska gelding, Siddons, who galloped his field into submission before a mile was covered and won in the most ridiculously easy fashion. His hollow victory in this event stamps him a sure winner of the Thornton Stakes to be run on the 21st inst. None,

which secured second money for Packy Ryan, pulled up very lame and Cunard broke down so hopelessly that he will probably never face a starter again. The fact that Cunard fell at the sixteenth pole enabled Col. Ballantyne to win third money.

A good thing was uncorked on Tuesday; Forest King was backed down from one hundred to six to eleven to win the mile and seventy yard race, which he had no difficulty in doing. It seems a very peculiar state of affairs when a horse like Forest King can hold a lead of two or three lengths from start to finish over any field of horses.

It is to be regretted that the abuse of selling race privileges is so general, and among these none is more objectionable or more directly defeats the end for which these affairs are arranged than that "friendly claim" chicanery by which the claimed "at a private sale advance" returns to the stable of the original nominator. There has been not a little of this sort of thing noticeable, and it is a practice which has not always been confined to the poor owner and the "little man." Any one who connives at it would seem a fit subject for summary discipline, and an example or two would have excellent effect upon various classes in the racing world. The selling race has never yet been allowed to work out its meed of good without drawbacks that have at times threatened its very existence. The "friendly claim" and the entering of animals far below their values for the sake of safe betting and subsequent protection are features which turn many of these races into farces so far as fair play is concerned.

The following article which appeared in the St. Louis Sportsman of March 7th seems to be a fair expression of the general opinion prevailing as to the new rule of the California Jockey Club giving discretionary powers to the officials in the placing of horses disqualified for fouls: "It is hardly possible that the senseless rule now in force on the California tracks permitting officials to 'set back' a horse a place or two for a foul, instead of disqualifying the offender altogether can ever extend to any race course outside the jurisdiction of the California Jockey Club. The rule on fouls everywhere is so plain and absolute as to admit of no misconstruction and such rulings as have been recently witnessed on the Coast in the cases of Yellow Tail and Rosa May are so absurd as to arouse the ridicule of the entire turf world.

"When a horse fouls another and the foul is officially allowed, such a horse is disqualified and so are any stable companions that may have also started in the race. So say the rules of racing, and it is rather a late day for any racing stewards or any jockey clubs to amend, or abrogate the terms of a rule that has stood the test of so many years. The only defense of this innovation in the administration of rules of racing is, that if the offending horse only interferes with one horse he has not injured the chances of those behind him. And if he interferes with only two horses he should be placed ahead of all but those two, etc.

"Such sophistry is laughable and contrary to all common sense. I wonder what the California stewards will do if they have a foul to deal with where one horse of a stable entry finishes first and the other stable companion second after fouling the horse that ran third. According to the Coast stewards the winner would be allowed the race and his 'fouling' stable companion placed third. The decisions came home with peculiar force to Green Morris, who in the eighties ran one, two, three in a two year old stake at Memphis with Freeman, Bersan and Drake Carter, two other youngsters beaten off. But Carter crossed one of the 'also rans' in the race and a foul was claimed and allowed, Morris' whole fleet being disqualified, as was right and proper. But as Morris observed in California last week, 'What was sauce for the goose at Memphis is not sauce for the gander in California.'

There is an epidemic among the thoroughbred broodmares of the Blue Grass section of Kentucky, causing them to slip their foals. Up to this time at Edward Corrigan's farm 34 of his 60 mares have slipped their foals. O. H. Chenault has lost a dozen out of 75 mares, and other breeders have suffered in proportion. Among the farms where the slipping has been the most prevalent are Beaumont, Hartland, McGrathiana, Ashland and Elmendorf.

### News From Little Rock.

LITTLE ROCK, ARK., March.—As the time for the opening of the spring meeting of the Arkansas Jockey Club draws near the trainers at Clinton Park are giving their horses all of the fast work that is possible and when they are called to the post on the opening day, March 23th, there will not be any which will not be ready. At a number of tracks this winter the trainers have been handicapped to a great extent on

account of the severe weather and frozen ground. In the Arkansas capital such has not been the case this year, for during the whole month of January the mercury hovered in the neighborhood of 70 degrees, and last month it was practically the same with the exception of one or two days.

Some of the best two year olds the West has ever had were trained and wintered at Clinton Park; Miss Bennett, probably the best filly the big Memphis bookmaker ever owned, was given her early training on the local track by Henry McDaniel. Bannockburn, winner of a number of big stakes, was taught to race here when Umbrella Bill McGuigan owned him. Ben Eder and Lady Inez were also wintered and trained here as two year olds.

Wyeth has another own brother. It arrived at Walnut Hill several days ago. Fonsie, the dam of the youngster, last year dropped by the same sire, Wadsworth, a handsome bay filly. This one is at Little Rock in the stable of Tom Stevens, the owner of both sire and dam. Nellie Cromwell is the name which has been claimed for the filly, being named for the wife of the sporting editor of the Cincinnati Enquirer, Mr. Tom Cromwell.

J. K. Hughes, the Texas horseman, is among the latest arrivals, with a stable of ten, including The Light, Nearest, Kunja, Edgardo and Porouqui Pass, the latter, Mr. Hughes predicts, will be one of the best fillies on the Western circuit this summer. All of the horses of this stable have been turned out until recently, and have had a much needed rest, for they were on the go all last year at the tracks around St. Louis. Mr. Hughes, it is reported, received in the neighborhood of \$15,000 from John A. Drake for the contract of the promising lightweight jockey, Houbré, a product of Delmar Park.

Col. Bob Rice, one of the most picturesque figures on the American turf, is one of Arkansas' few turfmen; to see Col. Rice one would take him for a Kentucky Colonel, but he owns one of the finest stock farms in the State and will, this year, race the following horses, which will be sent up from the farm in a day or so: Wax Taper, W. B. Gates, El Caney, Little Chimes, Little Hinds, Varner, Sallie Lamar, Juvenile, Banroal, Miss Dora, Master Mariner, Volary and Rose of Red. Wax Taper was one of the best horses in the country during the year of 1901. In forty starts he won eighteen times, second eleven times, third five times and unplaced only in seven starts. This horse is still troubled with his bad legs and evidence of the firing iron is still visible. He will be trained for The Montgomery Handicap and St. Louis Inaugural.

A number of stables are expected to-day from Memphis. Charles Mahoney will send his good mare Louisville over to make several starts before he sends her to the post in the Montgomery Handicap. Willie Bloss, who is now with Mahoney, will accompany the stable.

Sam Erle, the boy who won the Montgomery Handicap on the selling plater Circus last spring, is here working the horses for several owners. There are twenty-five starters left in the Arkansas Derby. Among the best are Rankin, Au Revoir, Mindora and Sigmound. Col. Cella of St. Louis will officiate at the meeting.

## AT THE TRAPS.

The San Francisco Trap Shooting Association three day blue rock tournament is now a fixture, the dates set are May 24, 25 and 26. It is proposed to make this tournament one of the most important meetings of shooters ever held on the Coast. There will be an attendance of shooters from all the Coast States and Territories and also a representation from British Columbia. Several prominent Eastern experts have already notified Manager Clarence Nauman that they will enter the tournament.

The sum of \$1500 in cash will be distributed among the shooters. The program contemplated is ten twenty-target matches daily, \$50 added money for each race. Shooters will be handicapped for the first entry. Changes in individual handicaps will be made according to scores shot. The money will go to high guns, possibly one money for each four entries. This tournament will be open to all.

The tournament program will be issued very soon.

The Union Gun Club will shoot blue rocks at Ingleside to-morrow. The club program embraces four regular events. No. 1, a 10 bird warm up, entrance named by Captain. No. 2, club race, \$15 added, 6 equal moneys, 16 yards handicap. No. 3, club handicap medal race. Scores made in preceding shoot govern handicaps. Entrance 50 cents, 16 yards distance. Handicap allowances—22, 21, 20 breaks—1 bird; 19, 18, 17—2 birds; 16, 15, 14—3 birds; 13 breaks or less—5 birds. No. 4, special medal race at 10 birds, for non-winners in medal or money event at end of the season. No. 5, all comers match, Sargeant system, entrance 50 cents. Target and handicap distance, 20 to 25 birds, 20 possible only, high guns, 3 moneys.

The officers elected for the ensuing year were: C. A. Muller, President; Martin Burnell, Vice-President; Thos. L. Lewis, Secretary-Treasurer; Harry Hoyt, Captain.

The Golden Gate Gun Club shoot was, despite the bad weather last Sunday, attended by nearly a score of enthusiasts. Five events were shot through. Good averaging scores were made notwithstanding the wind and rain handicap. In the first race, the added club purse of \$50 was distributed as follows: First money, C. C. Nauman \$12.50; second money, C. A. Haight and E. J. Forster divided \$8.75; third money, \$6.75, was divided by Otto Feudner and Captain Whitworth; fourth money, \$3.75, was divided by W. R. Murdock and G. W. Gibson. In the second race, reverse system, Nauman and J. J. Sweeney won first money, Haight took second and W. J. Golcher, W. Schemwell, the Colorado shooter, and Gibson divided third money. Event number three brought Captain Shafter, U. S. A., a soldier and sportsman well known in Illinois, out for first money, Schemwell annexed second money, Nauman and Feudner divided third money. In this race the shooters used both barrels, shooting reverse system, unknown angles.

The fourth race, under the Sargeant system, one man up, was won by Feudner and Forster, they dividing first honors. Nauman and A. M. Shields shot into second money and Captain Whitworth, Dr. McConnell, D. Daniels and Captain Shafter split fourth money. The last event of the day was at doubles, 10 pairs; Nauman accounted for seven doubles, taking first money; Daniels took second place, both the army men prevailed in the contest for third money.

The complete scores and summary of the shoot follows:

Event No. 1. Club shoot, 25 targets, — entrance, 7 moneys, distance handicap, \$50 added—

Nauman	20 yds	10101 1111 1111 1111 1111	23
Haight	18 "	11101 1101 1111 1011 1101	22

Harold J. Money, an Eastern sportsman and noted trap shot, we regret to note has been laid up seriously ill in Kansas City.

The Empire Gun Club shoot at Alameda Point, on the 1st inst. was seriously interfered with by stormy weather. A few of the club members assembled and shot some practice races over the Maugratap. The regular shoot will, in consequence, take place next Sunday.

The Davisville Gun Club will hold a big shoot to-morrow.

The annual tournament of the Northwestern Sportsmen's Association will take place at Dayton, Or., in June, under the auspices of the Dayton Gun Club. This shoot is open only to shooters from British Columbia, Oregon, Washington, Idaho, Montana and Utah. Several valuable medals and trophies are to be shot for, and the purses in various events will be liberal.

The College City Gun Club held its first shoot of the season March 1st on its grounds on the county road just out from North Berkeley. C. C. Juster, president of the club, beat the record in the Putzker cup race and was high gun for the medal with a record of 23 out of 25, besides winning two silver bars. The different events and the scores made are as follows:

Event 1—Twenty-bird handicap, for Putzker cup. Reed, twice winner of the cup, was handicapped to the twenty-yard mark, and broke his first ten straight. In the second ten he broke six. The following are the scores of the shoot: Schmidt 9, Baird 17, Ruble 9, Davis 13, Juster (winner) 18, Hutton 14, Kerrison 15, Searles 17, Leavell 13, Chick 15, Demeritt 10, Juster, by winning the race, prevented Reed from winning three straight and thereby permanently winning the cup.

A large number competed in the medal race, but no one earned the medal. Kerrison 15, Reed 22, Searles 19, Juster 23, Baird 20, Chick 20, Leavell 18, Davis 17, Hutton 16, Schmidt 13, Demeritt 15, Ruble 18, McCleave 8, Putzker 13.

The scores for the silver-bar race, fifteen birds, were: Hutton 15, Juster 13, Chick 11. Re-entries—Searles 10, Reed 14, Juster 10, Chick 11, Hutton 10. Re-entries—Kerrison 12, Searles 12, Ruble 12, Leavell 12, Hutton won one silver bar.

The scores for the gold and silver-bar race, twenty-five birds, were: Reed 23, Juster 21, Chick 20, Baird 20, Hutton 18, Knick 14. Re-entries—Reed 22, Juster 21, Chick 20, Baird 17, Hutton 12, Searles 14, Juster by winning two fifteens straight, won two silver bars.

Special Event 2—Kerrison 20, Reed 20, Davis 17, Hutton 14, Demeritt 14, Ruble 12, Juster 20, Baird 20, Schmidt 15, Leavell 21, Searles 21, Chick 19, McCleave 11, Putzker 19.

The Capital City Blue Rock Club dedicated the new trap grounds in Agricultural Park, Sacramento, last Sunday. Kimball and Upson run the grounds.

The Sargeant system has been adopted this season, which it is believed will be found more satisfactory than the five traps, as used last year.

Owing to the uncertain weather in the forenoon the management, not expecting any of the shooters, took down the tents and were preparing to leave the grounds, but found that the members would not have it that way and insisted on shooting, rain or shine.

Stevens carried off the honors of the club shoot, breaking 24, which gave him a gold bar in the first class, and put him among the champions. Fred O. Brown also shot well, breaking 22 in this event, giving him a gold bar and entitling him to a place in third class. Webber broke 22, winning a gold bar and going into second class. Hugh McWilliams received a bronze bar in the second class, with a score of 20. Smith, Scott, "Poor Bill" and Montgomery were in attendance from Davisville and shot well in the pool events, of which there were five. The scores made were as follows:

At 10 targets—Just 8, J. W. Hughes 9, Guisto 8, Shore 7, J. R. Hughes 7, F. O'Brien 4, De Merritt 5, Webber 5, McWilliams 6, Davis 6, Callahan 4, Upson 8, Neale 9, C. O'Brien 1, Mathews 6, Newbert 9, Graham 9, Smith 10, Scott 7, "Poor Bill" 9, Montgomery 8.

At 15 targets—Just 14, J. W. Hughes 13, Guisto 13,

Shore 12, J. R. Hughes 10, F. O'Brien 10, De Merritt 15, Webber 9, McWilliams 11, Davis 13, Callahan 2, Upson 8, Mathews 10, O. Stevens 13, Just 10, Graham 11, Smith 11, Scott 7, "Poor Bill" 13, Montgomery 8, Bauer 12.

At 25 targets (club shoot)—Just 20, J. W. Hughes 17, Guisto 17, Shore 17, J. R. Hughes 20, F. O'Brien 22, De Merritt 19, Webber 21, McWilliams 20, Davis 18, Callahan 5, Upson 10, Neale 9, Mathews 14, O. Stevens 24, Morgan 12, Newbert 19, Contell 14, Palm 15, Just 20, Graham 18.

At 25 targets—J. W. Hughes 22, Guisto 18, F. O'Brien 18, De Merritt 14, Morgan 21, Contell 18, Palm 18, Just 17, Smith 17, Scott 15, "Poor Bill" 12, Montgomery 8, Jay Hughes 11.

The Pastime Gun Club, of San Diego, will hold the fourth annual blue rock tournament, San Diego, on March 22d and 23d. Added money, \$300 and a lot of valuable merchandise prizes will be shot for. The schedule of events is the following:

On the 22d the first event will be at ten birds, \$1 entrance, \$9 added. Second event, fifteen birds, \$1.50 entrance, \$13.50 added. Third event, twenty birds, \$2 entrance, \$18 added. Fourth event, ten birds, \$1 entrance, \$9 added. Fifth event, fifteen birds, \$1.50 entrance, \$13.50 added. Sixth event, twenty birds, \$2 entrance, \$18 added. Seventh event, for Fano trophy, valued at \$50. This trophy is to be contested for at each annual tournament of the Pastime Gun Club; 25 birds, \$2 entrance, birds included; high gun wins. The trophy is to go to the shooter making the highest score, \$6 to the second highest, \$4 to third and \$2.50 to fourth. The winner of the trophy to receive entrance money less price of birds at next tournament. Eighth event, at ten birds, \$1 entrance, \$9 added. Ninth event, at twenty-five birds, \$2.50 entrance, \$22.50 added. Tenth event, at twenty-five birds, 75 cents entrance; prize, merchants' donations, of which there are thirty-five special prizes. Eleventh event, for the Hoegge "team" event, twenty-five birds to each man, \$6 entrance per team. The winning team is to receive the trophy and 6 per cent of the entrance money, second highest team 40 per cent of entrance money.

The team winning the trophy three consecutive times will be the owner permanently of the trophy. Three bona fide members of any club in Southern California to form a team. Two or more teams may enter from same club. This trophy will be shot for at each tournament given by the Pastime Gun Club.

In the second day's shoot the events are as follows: Ten birds, \$1 entrance, \$9 added; fifteen birds, \$1.50 entrance, \$13.50 added; twenty birds, \$2 entrance, \$18 added; fifteen birds, \$1.50 entrance, \$13.50 added; twenty birds, \$2 entrance, \$18 added. Contest for the Jenks' trophy, which is valued at \$50. For the initial contest twenty birds, \$1.50 entrance, birds included, high gun to win. First, trophy and \$7.50 added money, second 50 per cent of entrance money, third 30 per cent of entrance, fourth 20 per cent of entrance money. The holder of the trophy is to receive all of entrance money, less price of birds at next tournament. Fifteen birds, \$1.50 entrance, \$13.50 added; twenty birds, \$2 entrance, \$18 added; fifteen birds, \$1.50 entrance, \$13.50 added; twenty-five birds, \$2.50 entrance, \$25 added.

The price of the birds is included in all entries. Side pool in each event; entrance \$1; high gun to win; sixty and forty per cent.

The Pastime Gun Club will donate \$7.50 to the contestant making the highest average in the two days' shoot; \$5 to the second highest average; \$3 to the third; \$5 for the longest run of consecutive breaks; also \$5 sealed prize, to be opened after close of tournament. Contestants must compete on all regular events, except team shoot, to count on average.

Squad Shooting—Sargeant system, American Shooting Rules to govern, except in division of money, which will be divided as follows: Divide net purse by the sum of birds broken in the three high classes. For example, say 15 birds; net purse \$84. A breaks 15, B 14, C 13; total 42 \$84 divided by 42 birds is \$2. A's share is \$30; B's share \$28, and C's share, \$26.

Martinez Chick, George C. Garretson and Ed Fano are the committee of arrangements.

## San Francisco Fly-Casting Club.

The contests for the season of 1903 will take place as usual at Stow lake. The first six Saturday and Sunday meetings will be for classification of the contestants. The re-entry scores can be made up on May 23d and 24th. Following will come six class contests. The re-entry casting will take place September 26th and 27th. Ties will be cast off October 3d and 4th. There will not be any regular contests of the club during July. This will give the members a chance to do a little practical work on the streams.

The complete schedule arranged is the following:

	SATURDAY, 2:30 P. M.	SUNDAY, 10 A. M.
Classification	Feb 28	March 1
Series 1	March 14	March 15
Series 2	March 28	March 29
Series 3	April 11	April 12
Series 4	April 25	April 26
Series 5	May 9	May 10
Series 6	May 23	May 24
Series 7	June 13	June 14
Series 8	June 27	June 28
Series 9	August 1	August 2
Series 10	August 15	August 16
Series 11	August 29	August 30
Series 12	Sept. 12	Sept. 13
Series 13	Sept. 26	Sept. 27
Cast-off	Oct. 3	Oct. 4

P. J. Tormey, a prominent member of the San Francisco Fly-Casting Club, on March 2d, made a world's record, 99%, and won first prize in New York in accuracy casting. The event was open to all, no restriction on weight or rod or length of leader. Five casts were made at buoys distant 50, 55 and 60 feet.

The San Francisco Striped Bass Club will hold a tournament to-morrow on the award at the foot of Fillmore street.

## New Jersey in Line Against Live Bird Shooting.

If the proposed measure to stop the sport of trap shooting in the State of New Jersey is not defeated, it will surely be no fault of the New York and New Jersey sportsmen, who have combined to this end.

At a recent hearing of the Fish and Game Committee of the Legislature, Mr. J. W. Hamer presented the shooters' side of the question with admirable force and logic. Among other things Mr. Hamer said:

"My estimate of pigeon shooting as conducted at the clubs—and I assure you, it is a most careful one—my estimate is that about 90 per cent of the birds are painlessly killed and quickly gathered; not within the boundary, it is true, but within 100 yards of the trap—90 per cent. These birds are dead, and unless it is a crime to kill for food, domestic birds raised for that purpose, no charge of cruelty can attach to that 90 per cent. About 5 per cent of the birds are missed and fly away totally unharmed. Now, whatever may have been the intent, even the most violent of our opponents will not claim that an act of cruelty has been actually committed by the man who has shot at a pigeon which he has failed to hit. This then, disposes of 95 per cent of the birds without cruelty, and leaves still unaccounted for about 5 per cent. These are the birds which are hit, but which, being still able to fly, are not instantly gathered. Now, at all properly equipped clubs there are flocks of pigeons flying around the barns; four-fifths of this remaining 5 per cent of birds—the injured—are promptly decoyed by these flocks back to the barns, there to be instantly dispatched by attendants employed for this purpose. This accounts for 99 per cent of the birds without cruelty, and brings us, gentlemen, to the unavoidable conclusion that there is but one per cent of cruelty in trap shooting, the sport which our opponents condemn for its alleged brutality.

Now, let us turn for a moment to the subject of field shooting, which these gentlemen praise as a fair and manly, humane sport. In the field we all know that the poor shot kills and gets very few birds, but cripples and injures a large proportion. He inflicts the maximum of cruelty by reason of his lack of skill. But let us not take the poor shot—let us instance the fairly good quail shoot. The fairly good shoot will kill and gather about 50 per cent of the quail at which he shoots, he will miss about 10 per cent, but he will cripple and injure about 40 per cent. These are the birds which show little sign of injury, but which fly away to suffer and recover, or to suffer and die, as the case may be. Forty per cent, gentlemen. Forty per cent of cruelty in field shooting, which our friends describe as a fair and humane sport, 1 per cent in trap shooting, which they arraign for its brutality. Forty to one, gentlemen; but let us not stop here. The generality of men will have ten to twenty days of field shooting as against one day of trap shooting, and in order to reach a fair comparison, you must therefore multiply this forty by ten or twenty, but what's the use? There is no comparison. The one sport is humanity itself compared with the other.

Parker Bros., Meriden, Conn., have been working on an automatic ejector, and have perfected and patented one that they believe will be an addition to and worthy to be attached to the "Old Reliable," thereby adding to its efficiency. This company has been slow in adopting this feature, but now, that they have brought out one that they think has merit enough to be applied to the "Old Reliable" is good evidence that the consumer will get value received.

They are, we are informed, applying the automatic ejector to their high grade guns only, \$150, \$200, \$300 and \$400 catalogue price, at \$25 list extra.

On account of the demand for Parker guns without ejectors they cannot possibly furnish the lower grades of guns with ejectors at present.

It is said by experts that the Parker automatic ejector works easily and perfectly and one would not know from the working of the gun that it contained any additional working parts, and that it performs its duty to perfection.

## The Hero of the Hatchery.

This is a story about Pierre, of Some-Place-in-the-Woods, Canada, as it was told by William H. Boardman of the Canadian Camp Fire Club at the club dinner in Madison Square Garden recently. Pierre is not a very wonderful sort—not even as picturesque as his name suggests, and one who, following the suggestion in the name, conceived Pierre to be a guide and famous hunter would be disappointed, for Pierre is neither hunter nor guide, but just a hatchery man.

Pierre lives a very commonplace life away off there in Some-Place-in-the-Woods, and a story about him will therefore have to deal with commonplace if it is to be true to Pierre. However, there was one occasion when Pierre proved himself a hero.

It was in the month of December, when some hundreds of thousand of young trout resembling pumpkin seeds as much as anything else were in the long hatchery troughs doing their best to grow to a respectable size. Pierre thought they had souls—called them his children, and nursed them as tenderly as their large numbers and small size permitted. The troughs were fed by two pipes, one larger than the other, and were protected by strainers of cheese cloth, lest mud and other defilement should be carried in and form a deadly coating over Pierre's children.

Pierre's work was to see to it that the water was kept running and that the cheese cloth strainers were changed frequently enough so that they should not

become clogged. It was also his duty to keep a journal, and it is with the latter that this story has to do.

It happened that Pierre was a poor speller and disliked writing, so that the keeping of the journal was for him always an ungrateful task, which he protested against oftentimes as unnecessary to the proper care of young trout. In other things he was tireless and could work from morning through to morning without fatigue, but when it came to writing—well he "jist couldn't spell," that was all. Yet he struggled bravely with the journal, grasping his pen in a stubby hand, which, like that of Kipling's mariner, was rough and tarred, and with set teeth plugged away until the painful task was over and he might pass to the more congenial occupation of changing the cheese cloth strainers in the troughs where his "children" were.

This is the entry in the journal for December 21:

"Air, 49 above.

"Water, 41 above.

"Rain gauge, .06 inch.

"Remarks: Rain stiddy sence yesterday. Crick, up, mud in water. Branch will be raisin' hell if it keeps on a comin'. Supplis low this P. M. Sent Otto fur mor."

Otto was the Dutchman who tended camp and acted as general helper at the hatchery. He had to go many miles to the base of supplies, and his trip meant that if the "crick" met Pierre's expectations during the next twenty-four hours Pierre would be alone to cope with the situation.

This was the entry in the journal on Sunday morning December 22:

"Air, 50 above.

"Water, 49 above.

"Remarks: Still a comin'."

That afternoon the mercury went down to zero, and kept dropping as the evening deepened. Otto had not returned, and Pierre was now preparing to face his second night up with troughs and the uncertain "crick" which fed them, for just as on Saturday it had been necessary to see that there was not too much water, so now the problem arose of keeping in them any water at all. That night the five-inch pipe, the larger of the two, started to freeze, and Pierre built along its length a line of fires which he tended by frequent trips up and down between their head in the creek and the fishhouse. It was of no use to fuss with the smaller pipe, for that was gone anyway. Up to midnight he fought the ice with his line of fires along the five-inch pipe, but it gained upon him, do what he would. Then he started a new plan, which involved taking up the lengths and thawing them out, one by one, until the whole was in condition again, and the water could be turned on.

This operation consumed the remainder of the night, and Pierre told of it in the journal for December 23 in this fashion:

"Air, 23 below.

"Water, 29 above.

"Rain gauge, .03 inch.

"Remarks: Three inch pipe is froze. Five-inch wuz, but ain't now."

That morning he went down to the river and saw Otto, the Dutchman, on the opposite shore keeping as comfortable as possible before a big fire. Pierre shouted across the stream, now clogged with ice, and Otto answered that he had been there all night. Pierre shouted again for Otto to go up river to some place where it would be possible to cross, and went back to his pipes. The five-inch was working properly now, but so that an emergency might not find him unprepared, Pierre set to work at the three-inch taking it up in sections and cleaning it as he had the other.

When Otto came, late in the afternoon, Pierre was sitting at the table in the hatchery, his head on his arms and the worrisome pen in his mouth. Pierre had gone to sleep. But before the head dropped this entry had been made on the journal:

"Air, 21 below.

"Water, 31 above.

"Rain gauge, —

"Remarks: All pipes runnin'."

Otto put him to bed and tended him as best he might during the next day. Pierre did not need very much attention, however, excepting for his frost-bitten hands and feet, for sleep was giving him better treatment than any doctor could give.

The day after Christmas, Pierre went again to his troughs, now running properly under the ministrations of Otto, and when the morning inspection was over and the strainers changed, he made this entry in his journal:

"Air, 21 below.

"Water, 32 above.

"Remarks: Sorry I skiped yesterday."—N. Y. Times.

An eleven pound salmon and three striped bass were caught last Tuesday and a large salmon and five bass on Wednesday by Frank Carroll and a youth named Ammett. The salmon were taken in Racoon straits on a No. 6 Wilson spoon. There is now a splendid run of spring fish going up the rivers. The bass were taken along the Angel Island shores from Hospital Cove to Point Blunt. The largest fish weighed sixteen and one-half pounds—all taken on a No. 6 german silver Wilson spoon.

## San Francisco Show.

The San Francisco Kennel Club bench show committee have taken hold with a vim and are working hard for a successful show here next month. The list of splendid specials already secured is a large one and comprises a number of really valuable and handsome trophies—the bronze trophy, for the best Cocker, valued at \$110 is a fair sample of some of the good things to be distributed. Great Danes will get four silver cups and trophies. Mastiffs two silver trophies, silver cups and trophies for Pointers, Setters (Irish

and Gordon) and the Van Arsdale trophy for best in the field trial class. Cocker Spaniels are to get more valuable and a greater number than ever offered before. The Fox Terrier and Bull Terrier prizes are also many and valuable. With the good start already made the list of specials should be a liberal one. The office of the club is now open at 630 Market street with Mr. C. De Boice, Jr., of Oakland in charge. The premium lists are now being rushed by the printer and will be mailed next week.

Tommy Banks will look after the benching and feeding, the fact that this end of the show is in charge of Spratts is all that is necessary to insure satisfaction to the club and individual exhibitors.

Mr. George Raper has accepted the club's invitation and will judge here as well as in Portland. The Portland Kennel club by the way offer a silver trophy at our show for the best Irishman.

There is a sentiment among a number of local fanciers and specialty people to have one or more breeds taken in hand by home talent. Some of the Cocker fanciers have expressed their choice for a local judge over their particular breed.

## Dog Crates.

Dog crates of various kinds can be bought and at generally reasonable prices. Shipping a dog or puppy is not a very arduous matter, the exercise of judgment in arranging for the comfort and safety of the dog in transit is the main feature.

Should you decide to make your own crates remember that lightness is to be always considered, in this way the payment of expressage on useless weight will be avoided. Make your crate of any material but see to it that it is light, strong and safe. One inch mesh wire netting is a very good thing to cover a crate with. The danger of broken legs or mashed feet and injured tails from poking or protruding through the slatted crate is here done away with. Stretch the wire netting over a frame having the top so made that it will be either gable end or oval in shape. Build the bottom and ends and sides tight six or more inches up from the floor. Put suitable bedding, straw, shavings or grass on the floor which should first be sprinkled with dry sawdust. It is not a bad idea to put a bone in the crate for the dog to gnaw upon when he feels so inclined. Fasten a drinking tin or cup, in one corner, several inches from the floor. If you do not construct a locker in one end of crate, place the food—dog biscuits generally in a sack or pocket on the outside at the front end of the crate. The locker is however the more preferable. A dog in transit should be fed twice a day and allowed plenty of fresh drinking water. A card of instructions, to the express messenger, which should be concise and to the point, will generally receive the proper attention from the express people. A crated dog should be placed in a car in a position where it is always easy of access for it is necessary to remove the dog from time to time particularly if the animal is bound on a long trip. Leather will make good enough hinges for the door. Ordinarily a piece of wire can be used as a fastening for the door.

It is better, however, to have two staples and a padlock with the key hanging nearby and securely attached or the key can be secured in the locker. It is advisable to send along a chain. The express messengers who have to look after the animal appreciate every convenience which facilitates their work. It is a good idea to place a piece of canvas or sacking so that it can be drawn over one half of the crate. This will exclude the light and stop a draft. A piece of the same material hung midway inside of the crate affords a dark place for the dog to take it easy in when tired or bothered by any of the many annoyances that may crop up on the journey. This is a good scheme for a puppy's comfort. The crate should allow of plenty room for each dog, and we say again, should always be constructed strongly but light in weight.

## Kennel Registry.

### VISITS.

Plumeria Kennels' red Cocker Spaniel bitch Plumeria Flo (Ch. Hampton Goldie-Queen K) to Naird Kennels (leased from Glenwood Kennels) Ch. Havoc (Ch. Black Duke-Woodland Jude) March 9, 1903.

Abner V. Crane's English Setter bitch Rose Blade (Laddie Blade -Topsy) to Gailey Graham's Jaque ( — — — — ) February —, 1903.

W. H. McFee's (Los Angeles) Bull Terrier bitch Wonder's Evidence (Ch. Woodcote Wonder-Newmarket Queen) to Byron Erkenbrecher's Teddy Roosevelt (Woodcote Venom-Rene), February 23, 24, 1903.

Woodlawn Kennels' Fox Terrier bitch Warren Tattle (Warren Safeguard-Warren Tongs) to Walter Magee's Cairnsmuir General (Ch. Go Bang-Cairnsmuir Kismet), March 11, 12, 1903.

### SALES.

Naird Kennels sold to Mr. Benkichi Suigimoto, of Japan March 10, 1903, the red Cocker Spaniel bitch Glenwood Ruby (Champion Colorado-Redwood Vireo).

Naird Kennels sold to C. P. Schreiner March 2, 1903, a black Cocker Spaniel bitch puppy by Oakland Romance-Maid of Oakland.

Woodlawn Kennels sold to F. W. Haines (Portland, Or.) on March 7th, the Bull Terrier puppy bitch Flyaway (Ch. Woodcote Wonder-Nancy).

Woodlawn Kennels sold to W. W. Boyteaux, the Fox Terrier dog puppy Woodlawn Legend (Norfolk Trueman-Cambridge Lass), March 9, 1903.

Woodlawn Kennels sold to H. A. Moorehouse (Oakland) the Fox Terrier dog puppy Woodlawn Story (Norfolk Story-Millstream), March 9, 1903.

Woodlawn Kennels sold to Mr. Green (San Francisco) the Collie dog Winters' Griffin (Verona Battle-Maggie of Dundee), March 11, 1903.

Woodlawn Kennels sold to Walter Magee the Fox Terrier bitch Cambridge Lass (The Legend-Cambridge Wire), March 10, 1903. P. Reccord sold to Woodlawn Kennels a Bull Terrier bitch puppy by Ch. Woodcote Wonder-American Belle, March 12, 1903.

### LEASES.

Delverton Kennels leased of T. J. Blight the red Cocker bitch Baby Ora (Ch. Viscount-Black Sue) March 7, 1903.

### Kennel Suggestions.

A dog should never be washed after taking his regular food about an hour before the night feed being the best time, so that having a good meal immediately, it raises his temperature, necessarily somewhat low, and he readily goes to sleep and recuperates after what is at best a rather fatiguing ordeal. If going to a show he should always have a night's rest before traveling. On no account must a bitch showing the slightest sign of "heat," or for a week after, be given a bath. Such a procedure has frequently resulted fatally, and almost invariably caused much trouble.

Many fanciers and owners consider the matter of soap to be employed far less than they should. Any soap which gives an abundant lather is not necessarily beneficial; on the contrary, to acquire this lather much soda and other alkalis are included, most injurious to the coat in excess. Cheap scented and opaque kinds are the chief sinners in this connection, the clear or semi-transparent varieties not lending themselves well to the addition of impurities. The ideal compound for the use of dogs should be soft with a good lather, and containing ingredients soothing to the skin, stimulative to the hair and inimical to parasites. It must not be assumed that such cannot be bought, but they are not at all plentiful, and there is no reason why any dog proprietor should not make his own if not satisfied with a trial of soaps prepared by makers of experience and reliability such as Sergeant, Spratts or Dr. Glover.

The finest for all-around purposes can be manufactured as follows: Take of the very best quality soft soap one pound, of blue mercurial ointment one-half ounce, of finely powdered camphor one ounce. Thoroughly mix with the addition of a little water. Experience has shown this to be superior to any other, and it has been used for years by fanciers in the habit of thinking for themselves. The base has all the properties required for cleansing without deleterious adulterations, and is easily handled; the mercury is penetrating, stimulative and death to all uninvited guests, yet in such quantity as to be absolutely harmless to any dog, whilst the camphor soothes and softens the skin. If desired, any chemist will make it up.

Another very excellent preparation, and one which can be strongly recommended for Toy dogs is this: Take of best white curd soap four pounds, glycerine four to eight ounces. Cut up the soap into small pieces, add some water and the glycerine and reduce to a jelly, in which form it can be used when cold, though, of course, it contains nothing calculated to have any medicated effect upon the animal.

Speaking of parasites, the dog has many both inside and out. First of all comes the fruitful and frolicsome flea, who is always more troublesome in hot weather and in the neighborhood of sand, where he breeds for choice, though if he can't get sand, not being particular, he will oblige elsewhere. The best of all cures is prevention, secured by thorough cleanliness both of the animal's person and domicile. To remove fleas, however numerous, from a dog is a comparatively simple matter, but it will be at once obvious, that after doing so, if you re-introduce him to the bed, where in all probability he acquired them, or at least which is pretty certain to contain plenty, you will have your trouble for nothing, and the host will be precisely in the same condition within a day or two.

The most valuable agent for the sudden death of *Pulex canis* is, without doubt, carbolic acid, but it has been claimed many of the soaps containing it are not sufficiently strong for the purpose. Make your own by mixing half an ounce of pure (liquid) carbolic acid with one pound of soft soap as given above, but without the other additions. Lather the animal thoroughly and rinse him off as rapidly as possible to avoid absorption through the skin. Another efficient flea destroyer is an infusion of quassia chips, about a pound to two gallons of water, simmered for three hours. Soak the dog well with this when cool enough and see that he swallows none; he won't willingly.

Insect powders are only partial in their action, soon lose their strength and do not really kill the proposed victims, but merely discommode and stupefy them. However, before operating on the dog you must have his apartment in readiness. The bedding should be burnt, and all corners and interstices liberally treated with strong paraffin, the whole being well lime-washed. In long standing and obstinate cases it is even better to destroy the box. Yet should this be out of the question, then, after stopping up every outlet, fumigate the same with sulphur. This can be done by placing flowers of sulphur in a tin vessel with a dash of paraffin on top, and applying a match, carefully fastening up the doorway with a piece of old carpet. If a dog's bed be always well looked after, ordinary grooming will, as a rule, keep him clear of fleas; but frequently there appears a perfect epidemic of them in hot seasons, and he will often acquire hundreds in an hour or two if exercised on sand.

Lice, on the other hand, except under extraordinary filthy conditions, are rarely found on the adult animal, though puppies are often great sufferers. Paraffin will do their business satisfactorily, but is rather severe for youngsters, and a better plan is to make an emulsion—one-third milk, two-thirds paraffin. Bring the milk almost to a boil, place in a good sized bottle, then add the paraffin and shake vigorously for five minutes. They (the lice) will usually be found running along the back in greater quantity towards the neck. Nevertheless, saturate all over with a brush and comb out next day. Two or three applications will generally suffice.

Probably the most effective of any dressing for all external parasites is ordinary benzine, which is not suitable, however, when the skin is broken; it neither harms nor stains the skin, and is extremely penetrating besides having a stimulative action on the hair.

While the foregoing hints and suggestions are eminently practical and will be productive of good results, the matter is directed to the attention of the fancier as a breeder of more than a limited experience. For the novice we would suggest that before working on the lines suggested, in the lack of practice and experi-

ence, it would be just as well to write to either or all of the manufacturers above mentioned and procure from each manufacturer, or better still, from a nearby dealer or agent, the comprehensive and valuable book-lets printed for gratuitous distribution and containing valuable information for owners of dogs. The requisite addresses of the above firms can be found on page 15 of this issue.

### Minimum Rating of Shows for 1903.

The following list is given in compliance with the rule that the secretary shall publish in the *American Kennel Gazette* for December of each year the ratings of shows for the following year. The next show given by any of the under-mentioned clubs will have a minimum rating in accordance with this list:

	Dogs	Min.
	Ent'rd	Rating
Oakland Show.....	135	1
The Fanciers' Club.....	235	1
Rhode Island Kennel Club.....	511	3
Westminster Kennel Club.....	1678	5
Hoosier Poultry and Kennel Association.....	56	1
New Jersey Kennel Association.....	526	3
Duquesne Kennel Club.....	508	3
Chicago Kennel Club.....	666	3
St. Louis Collie Club.....	46	4
Twin City Kennel Club.....	166	1
Atlantic City Kennel Club.....	488	2
New England Kennel Club.....	801	4
San Francisco Kennel Club.....	781	5
Montreal Canine Association.....	470	2
Wissahickon Kennel Club.....	280	2
Bar Harbor Kennel Club.....	76	1
Massachusetts Kennel Club.....	125	1
Columbia Co. Agricultural Society.....	85	1
Binghamton Industrial Association.....	19	1
Middlesex East Agricultural Association.....	204	1
Orange Co. Agricultural Society.....	175	1
Haverhill Kennel Club.....	145	1
Sixth District Agricultural Association.....	95	1
Danbury Agricultural Association.....	319	2
Ladies' Kennel Association.....	1130	4
Philadelphia Dog Show Association.....	744	3
Merrimac Valley Kennel Club.....	—	1

### Mongolian Pheasants.

These grand game birds have been liberated in various parts of the State and their progress in the new locations are followed with interest by sportsmen. The Fish Commissioners have received reports from the various sections in which these beautiful game birds were set free. In some counties they have increased, especially where the sentiment of protection is developed to the extent of having a county game warden. Santa Clara county probably stands at the head of the list. On the Morrow ranch, near San Jose, the birds have increased until they number about one thousand. Favorable reports come from Fresno, Humboldt and Santa Cruz counties. Occasionally the pheasants are seen in Santa Barbara and San Luis Obispo counties. A limited number of birds were brought from Hongkong, China, about two years ago. The Commissioners were able to purchase them for seventy-five cents each, and through the courtesy of the Pacific Mail Steamship Company and the United States custom officials, landed them at San Francisco without additional expense. They were liberated in such sections as seemed best adapted to their needs. From the results of the plants already made from these experiments, the Board may determine if further experiments would be warranted.

### The Protection of Crabs and the Crab Catching Industry.

Time was when an enjoyable day's outing at crabbing could be found at innumerable places about our bay shores. Outside the heads, to the north and south, big crabs (cancer majesta) some of them measuring a foot in length, from rim to rim of the shell, could often be caught in the crab nets. They were fine in flavor, in fact our coast crabs are looked upon as being second to none found anywhere, all this is over now. A large fleet of boats and the shipment East daily for years of thousands of dozens has made the sweet flavored crustacean scarce and high priced.

In time to do some good, but far too late to enable any benefit for years is the law now in force putting in a close season for crabs during the months of September and October each year. It is now unlawful and has been for some years past, to take female crabs. The recent legislation in favor of crab protection was outlined in the last report of the Fish Commission which states:

The crab industry is an important one. During the past two years it has been apparent that the crab fishermen—who use gasoline boats in supplying our markets—have fished so extensively that we believe the time has arrived when additional restrictions are necessary.

There has been in force for four years a law prohibiting the capture and sale of the female crab. We had hoped this would be sufficient, but we find that it is not, as the supply is rapidly decreasing, especially in the vicinity of San Francisco. We believe there should be a close season, extending through the two principal months of their breeding season—September and October.

The supply of crabs here became so limited that the fishermen began to violate the only provision of the State law for their protection—the capture and sale of

female crabs. The deputies of the Board arrested and prosecuted several violators of this law. Finally, two of the principal violators and dealers in female crabs were apprehended, and were tried in the San Francisco Police Court before Judge Conlan, who found them guilty and sentenced each man to pay a fine of \$100. These heavy sentences had a very salutary effect, as it made the crab fishermen cease to attempt to traffic further in female crabs.

At certain seasons of the year the local fisherman were unable to meet the demand, and the principal source of supply was Humboldt Bay. The Board of Supervisors of Humboldt county had to pass several ordinances to protect the crabs within their territory. As crabs do not bear transportation well, thousands were lost by delay in reaching the markets.

The intelligent fishermen recognize the growing scarcity of this shell fish, and have asked us repeatedly that a close season or some additional protection be accorded them, to prevent the industry from being ruined.

The number of crab fishermen has increased so that at present there are about one hundred and twenty boats, employing about two hundred and forty men, and paying about \$600 annually into the Fish Commission Fund. These fishermen obtain an average of \$1 a dozen for their crabs, which are retailed for about twenty-five cents apiece, so it can be readily seen what an important industry crab catching and marketing is.

As the shrimp open season begins on the 1st of September, the absence of crabs from the market will be scarcely noticeable by our people. If they are unmolested during their breeding season, we hope they will become abundant again. We would therefore most respectfully recommend that Section 628 of the Penal Code be amended by prohibiting the possession and sale of crabs during the months of September and October, and by forbidding the possession and sale, at any time, of crabs measuring less than six inches across the back.

The suggestions of the Commission were acted upon and the requested measures passed.

### Keep the Good Work Going.

It is believed that San Bernardino last Arbor Day broke the country's record for one day's work in setting out trees. About 5000 shade trees and palms were planted along the city's streets and the principal thoroughfares leading to the near-by towns. The movement was started by the Woodmen of the World under the leadership of F. B. Tichenor and Walter Hubbard. The municipal organizations gave it splendid backing and the citizens generally lent a hand.

The above paragraph is somewhat foreign matter to these columns, but the importance of forestry, in its many details, is one that the sportsman will thoroughly understand and appreciate, hence, we reiterate, keep the good work going.

### Coming Events.

#### Rod.

Jan. 1-July 1—Close season for black bass.  
March 14—Saturday Contest No. 2. Classification series. Stow lake, 2:30 p. m.  
March 15—Sunday Contest No. 2. Classification series. Stow lake, 10 a. m.  
March 15—San Francisco Striped Bass Club Casting Tournament. Golden Gate Park.  
April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.

### Something for Nothing

The Polk Miller Drug Co. of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co. of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

### Dipping Cattle.

The subject of dipping cattle is comparatively new to most farmers, but it is assuming much importance in sections where pests and parasites are proving serious obstacles to the profitable handling of cattle. Among those who have devoted close study to this problem is Mr. Geo. H. Moore, Kansas City, and at the recent meeting of the Live Stock Association he discussed the subject in an interesting paper from which we quote:

"That man is not in this convention nor is he engaged in the cattle industry, who can reveal the true and substantial benefits from a financial standpoint to be derived from the proper scientific and practical plan of dipping cattle in an efficient dip. The first thing to be considered is, Why is it necessary to dip cattle? Why have hundreds of dipping plants been established and are in such successful use in various parts of the country? These questions must be answered intelligently before the cowman can be convinced of the true and lasting benefits to be gained by proper dipping in an effective cattle dip.

"Col Albert Dean, who is recognized authority on the fever tick and splenic fever, has enlightened you from time to time and warned you of the dangers imminent in your herds where the tick holds sway. The Sanitary Board of Kansas, Dr. Mayo, the State Veterinarian of Kansas, as well as veterinarians of adjoining States, have warned the cattlemen of a present evil, which, if permitted to flourish, will bring disaster and financial loss to all herds infected with mange. The mite that produces mange in cattle is of the same general family as the parasite which causes scab in sheep. Dr. Salmon, of the Bureau of Animal Industry, makes it imperative at all dipping stations that sheep infected with scab shall be put through a dip heated to 110 degrees Fahr. The same recommendation is also made by leading veterinarians everywhere. In the mange mite cattlemen have an enemy similar in many respects to the mite which causes scab in sheep, and in order to accomplish successful results in the eradication of mange from your herds, it will be necessary for you to use an efficient cattle dip which can be used at a temperature of at least 110 degrees. Another enemy of the bovine family with which you are doubtless familiar and one that is more easily disposed of than the first two named is the cattle louse.

"These enemies are preying on your herds, continuously sapping substance which should remain with the animals in order to insure healthful, contented growth, early maturity and good profit. The countless millions of lice which infest cattle can be effectively disposed of by proper dipping, and as a result thousands of dollars will be added to the profits of the stockman. According to authentic reports it is estimated that the dipping of sheep for eradication of the scab mite adds from \$2,000,000 to \$5,000,000 to the annual profits of the sheep growers of the United States. These are facts established beyond successful controversy. Therefore if this vast amount can be saved to the sheep industry by and through a proper mode of dipping in the spring and fall and any other time or season when it is absolutely necessary, when you compare the price of a cow with that of a sheep who can compute the millions of dollars which will be added to the profits of cattle owners when they fully realize the advantages of dipping their cattle at least twice each year? Allow me the phrase, the cowman is up against it, and those who are wise in their day and generation will take time by the forelock and effectively stamp out the destroyers that are preying on their herds.

"The third and last enemy is well known to all who have herds of cattle below the quarantine line, and a few above the line had a slight taste of high life during the past year by a visit of this disease. As

soon as Uncle Sam has satisfied himself that this arch fiend of enemies to the bovine family can be eradicated by a proper process of dipping, which is the only solution to the problem for the absolute destruction of the tick aid will be extended all along the line, not only from Uncle Sam, but the great railroad corporations will join hands in wiping out this evil. I believe the dippings that will be done this season will demonstrate that the tick can be banished through the united and efficient co-operation of interested parties. When this is done you can form a faint conception of the vast and never ending benefits that will accrue to generations yet unborn upon the vast plains of Texas, Indian Territory, Kansas and Oklahoma."

### "FOOL TALK"

About thirty-five years ago, a young mechanic called on old Commodore Vanderbilt, then head of the New York Central Railroad, in an effort to secure a trial on a New York Central train of a new device for stopping trains by compressed air. "Air!" the Commodore is said to have exclaimed. "Air! Stop a train with air! I've no time to listen to such 'fool talk,' young man," and he didn't. Neither would anyone else for many a long day.

George Westinghouse, for he was the man of the "fool talk," believed in himself and the utility of his invention. He kept right on in spite of Commodore Vanderbilt and others till he forced recognition.

Would a man trust himself aboard a passenger train to-day if he knew that train was not fully equipped with Westinghouse's invention—the air-brake? It is said that Vanderbilt's road had some difficulty in getting it when finally it was wanted. Many a man says "fool talk" when he reads the claims made for "Save-the-Horse" Spavin cure, but the dawn of enlightenment is as certain as the rising of the sun, and the man who says "fool talk"

after reading the facts so plain and convincing, as given by us, re-affirmed by the letters published in these columns each week and in our booklet, is repeating Commodore Vanderbilt's mistake. No man need be in doubt as to what "Save-the-Horse" Spavin Cure can, and cannot, do. If you have a case different from what are described in booklets and advertisements, send us full particulars as to the age, location, cause of the lameness or swelling, the horse's action, previous treatment and also the Veterinarian's diagnosis, if you know he is competent, and we will tell you frankly as to the possibilities of our remedy. Write for booklet and copy of guarantee and any information desired.

Heed this:

Work horse continuously if desired

"Save-the-Horse" cures without scar, blemish or loss of hair.

Contains no Arsenic, Corrosive Sublimite or other form of Mercury, or any ingredient that can injure the horse.

Chronic and seemingly incurable cases in the

advanced stage that have been fired two or three times and given up as hopeless, positively and permanently cured.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological change, absorbing all inflammatory exudate and producing a healthy, normal condition of the part.

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way.

There is no condition or arrangement we can make more binding to protect you than our guarantee.

NEED OF SECOND BOTTLE IS ALMOST IMPOSSIBLE EXCEPT IN RAREST OF CASES.

\$5.00 per bottle at all druggists' and dealers', or sent direct, express prepaid, by the manufacturers.

## TROY CHEMICAL CO., - - TROY, NEW YORK

D. E. NEWELL, PACIFIC COAST AGENT, 519 MISSION STREET, SAN FRANCISCO.

Location of Beef Cuts.

Most housewives do not understand the terms used by the butcher to describe the various cuts into which a carcass of beef is divided. Therefore, they do not always know what they are buying. Here is some information on the subject from the New York Sun.

The whole beef is split into halves, following the centre of the backbone or vertebral column from tail to neck. Each half contains a hind and a forequarter.

The forequarter is then cut from the hindquarter. These are the processes of the wholesaler. The "fores" and "hinds" as they are called, are now ready for the retailer.

The forequarter is cut into two parts—the rack, consisting of a set of ribs, and the chuck or shoulder proper up to and including the eighth rib.

The eighth-rib cut shows the blade gristle only on one side. The ninth rib is usually called a chuck roast.

The rack is cut into prime rib, standing or rolled roasts.

The chuck is a complicated piece of meat when cut into kitchen pieces by the butcher. Its anatomy yields the following pieces for cooking: Oven and pot roasts, boneless chuck steaks and chuck roasts cut free of bone and metamorphosed into top and lower Saratoga roasts. The lower cut is the more tender. It has the eye piece, which somewhat resembles the eye of a porterhouse rolled roast.

The chuck yields still more cuts to the wizard of the cleaver. There are the soup and stewing pieces, plate, navel and brisket pieces for corning, oven and pot roasts, made by removing the flesh from the shoulder bones, and chuck steaks cut from the cross rib. In the above disguises the word "chuck" loses all of its plebeian character.

The hindquarter is less complicated, but its dissection is interesting to the culinary economist. This part of the beef carcass is cut in two; the loin of the beef and the round, consisting of the leg, top and bottom round, rump and flank.

Now comes a steak rollcall. The loin of beef is cut by the butcher into top sirloin steaks and roasts short sirloins, round-bone sirloin, flatbone steaks, hipbone steaks, boneless sirloin steaks, porterhouse steaks and roasts. Then there are a la mode top round cuts, bottom round

cuts for pot roasts and corned beef. The rump goes into steaks and corning pieces, flank steaks and rolled flank pot roasts or corning pieces.

If the housekeeper is mystified by the shop vernacular, it is because she has not learned the "geography of the beef cuts," as a Boston culinary student put it. By not knowing her alphabet the purchaser is often imposed upon and made to pay a higher price for an artistically arranged piece of very cheap meat.

Poultry Notes.

It is easier to hatch the chicks than it is to raise them.

Buy a drinking fountain for your chickens. It does not pay to let them get drabbled in an old pan.

Do not feed little chickens until they are 48 or 50 hours old.

Grit and powdered charcoal should be kept before them all the time.

Nothing is better than millet seed for the first few days. Then feed steel cut oats, finely cracked wheat, cracked corn, etc., but no sloppy food.

Skim milk and pure water are necessary.

After a few weeks boiled potatoes fed occasionally are good. Green feed, after chicks are four days old, fed in small quantities at first, gradually increasing till they have all they will eat, is indispensable. Grass, clover, cabbage, etc., chopped finely, scatter the grain in chaff or straw, and see how they enjoy scratching it out.

Keep your brooders and pens as clean

as possible. Scatter lime on the floors.

Be gentle with your chicks. Do not allow them to be frightened and they will grow twice as fast as they would if allowed to grow wild.

Broilers are now quoted at \$4.50 and \$6.00. It pays to hatch your chicks early in the season. Ten to twelve weeks will produce good broilers, with proper care.

The reason for not disturbing milk after it has been strained and set away for the cream to rise is that the cooling of the milk causes currents in the fluid, the end of which is to deposit the fats in the surface. When these are disturbed in any way these currents are broken and the particles of fat go floating aimlessly about and some others never reach the top.

728 Montgomery St., S. F.

TERMS FOR THE SEASON, \$40.

## The Thoroughbred Stallion

## St. Carlo

St. Blaise..	Hermit.....	Newminster
	Fusee.....	Marayas
	Kingfisher..	Lexington
	Carita.....	Elhan Lays
Carita.....	The Ill-Used	Camilla

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$20,000 as a two year old. He is a wonderful young sire, among his get being Ruinart (winner of the Burns Handicap Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7851), Joan, February, St. Cuthbert, St. Callatine, Count of Flanders, Lord Marmion May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

**MENLO STOCK FARM, SAN MATEO COUNTY, CAL.**

TERMS FOR THE SEASON, - \$100

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

**JAMES McDONNELL, Portola, San Mateo Co., Cal.**

## MONTESOL

Sire McKINNEY 2:11½, Sire of 22 in 2:15 and 48 in the 2:30 list.  
Dam IGO (registered) by Antevolo 2:19;  
2d dam Daisy May by Nutwood 6:00; 3d dam Keston Mare by Alexander's Abdallah.

MONTESOL, 5 years, old, stands 15½ hands, weighs about 1100 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcous. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

## POLE STAR

3 years old, by McKINNEY, dam MOUNTAIN HARE by Young Venture. will be permitted to serve 5 approved mares at \$100 for the season.

The above Stallions will stand at the Race Track, Alameda.

P. FOLEY, Race Track, Alameda.

## Silver Bow Jr.

By SILVER BOW (sire of Arrow 2:14, Silver Ring 2:14½ and 6 others in 2:30 list); dam MAGENTA by Tempest (sire of Tago 2:11, etc.); second dam by Commodore Belmont

SILVER BOW JR. is 16-1 hands high, weighs 1200; bay, handsome, stylish, splendid action and has shown quarters in 30½ seconds. Has nothing older than two-year-olds and they are all big, fine-looking and show speed.

Will Make the Season at MILPITAS.

Fee \$30 FOR THE SEASON. Good pasturage \$4. Excellent care taken of mares, but no responsibility for accidents or escapes  
Ship mares and apply to

I. MOREHOUSE, Milpitas, Cal.

## \$23,000 DETROIT DRIVING CLUB \$23,000

ANNOUNCES THE FOLLOWING EARLY CLOSING EVENTS TO BE COMPETED FOR AT THE

## Great Blue Ribbon Meeting

JULY 20, 21, 22, 23. 24, 1903.

## ENTRIES CLOSE MONDAY, MARCH 23d

No. 1—\$10,000, Merchants' & Manufacturers' Stake.....	2:24 class trotting	No. 4—\$2,000, Purse.....	2:09 class pacing
No. 2—\$ 5,000, Chamber of Commerce Stake.....	2:24 class pacing	No. 5—\$2,000, Purse.....	2:20 class trotting
No. 3—\$ 2,000, Purse.....	2:12 class trotting	No. 6—\$2,000, Purse.....	2:17 class pacing

### CONDITIONS.

Entries close Monday, March 23d, when horses must be named. No nomination will be liable beyond the amount paid in, provided a written notice of withdrawal is received by the Club at the time any payment falls due. The main race of the Merchants' and Manufacturers' and of the Chamber of Commerce Stakes will be mile heats, best three in five to harness; but a horse not winning a heat, or making a dead heat in the first three, shall not start for the fourth; but horses so ruled out shall have a right to a share of the stake according to their rank at the close of their last heat. The Consolation Stakes, and all purse races, will be best two in three to harness.

The Merchants' and Manufacturers' Stake will be divided as follows: \$4500 to the first horse, \$3000 to the second, \$1500 to the third; \$2000 for a Consolation Race, open only to horses that start and win no part of the Main Race, to be trotted three days from the date of the decision of the first race, and to be divided \$1000 to the first horse, \$750 to the second, \$250 to the third. In the event of there

being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in the Main Race, the sum of \$1000; to the fifth horse \$750, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nominators therein, upon payment of 2½% additional, shall have the right up to July 6th, to substitute in the place of the horse named, any horse eligible at the date of the closing of the Stake.

The Chamber of Commerce Stake will be divided as follows: \$2250 to the first horse, \$1000 to the second and \$750 to the third; \$1000 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paced three days from the date of the decision of the first race, and divided \$500 to the first horse, \$375 to the second and \$125 to the third. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500, to the

fifth \$375, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nominators therein, upon payment of 2½% additional, shall have the right up to July 6th, to substitute in place of the horse named, any horse eligible at the date of the closing of the Stake.

Purse Races will be divided 50% to the first horse, 25% to the second, 15% to the third and 10% to the fourth.  
Entrance Fees 5% with an additional 5% from winners, excepting winners in the Consolation Races, from whom no additional fee will be charged. But should there be no Consolation Race, an additional fee of 5% will be charged to the winner of fourth money. This Club is a member of the American Trotting Association, and the rules of that Association will govern, except where otherwise provided.

Payments in Stake No. 1—\$50 March 23d; \$50 May 1st; \$150 June 1st and \$250 July 6th. Payments in Purse Nos 3, 4, 5 and 6—\$10 March 23d; \$15 May 1st; \$25 June 1st; \$50 July 6th.

In addition to the foregoing events, the Club will probably offer Purse for the following classes: 2:06, 2:08, 2:10, 2:14, 2:16, 2:18, 2:22, 2:26 Trotting; 2:04, 2:07, 2:11, 2:15, 2:19, 2:21, 2:27 Pacing. All of which will be mile heats, best two in three to harness.

**GEO. T. BECKERS, University, Los Angeles Co., Cal.**

# **SEYMOUR WILKES REG. No. 0232. Race Record 2:08 1-2**

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

**Lakeville, Sonoma Co., Cal.**

**SEYMOUR WILKES** earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

**SEYMOUR WILKES** is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

**Terms for the Season \$30.**

**\$50 TO INSURE.** Mares can be shipped direct to via steamer Gold. Pasturage \$3 per month. For particulars apply to **THOS. ROCHE, Lakeville, Sonoma Co.,** or **J. W. GREGORY, St. Stables, 408 Bush street, San Francisco.**

## THE BAYWOOD STUD

Reductions made for two or more mares.

**Breed to Extreme Speed.**

**CHAS. DERBY 4907, rec. 2:20 \$50 the Season**

Sire of MUCH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09¼, OWYHEE 2:11, LITTLE BETTER 2:11¼, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at reasonable prices. Address

**OAKWOOD PARK STOCK FARM,**  
Danville, Contra Costa Co., Cal.

## SIR GIBBIE 2D.

No. 370

American Hackney  
Stud Book

**Hackney Pony Stallion**  
**13.3 hands.**

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

**MENLO STOCK FARM**

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

**JAMES McDONNELL,**  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## STAM B. 2:11 1-4

(TROTTER.)

REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12½)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09½, 2:09)  
2-YEAR-OLD TRIAL, - - 2:26

STAM B, by that show horse king, Stamboul 2:07½, father of 47 from 2:10¼ to 2:30; 24 sons and daughters produced from 2:07½ to 2:27. Stamboul is the only trotting bred stallion that ever sold twice for over \$40,000, and sired a daughter for whose son, Wiggins (two-year-old 2:19½), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:09¼, for which \$50,000 was lately refused, showing that men with money and brains appreciate this blood. STAM B's first dam, Belle Medium 2:30 (dam of S from 2:11¼ to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hambletonian 10 ever produced such speed and she sold for \$40,000.

Second dam Argenta, dam of one in 2:20, by Almont Lightning, sire of dams of Zombro (five years old 2:11) and King Princeps 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15½, Baron Wilkes 2:18, Patchen Wilkes 2:20. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, toppy road horse.

STAM B is a bay, two white hind ankles, 15 hands 2¼ inches high, weight 1090 lbs., of good stamina and muscular development.

**Will Make the Season of 1903 at Pleasanton, Cal.**

**Terms \$40 SPOT CASH** before mare is removed. I will try and take good care of mares and foals, but will not be responsible for accidents or escapes. (No agents on arrival of trains at depot.) For further particulars address

**SAMUEL GAMBLE, Pleasanton, Cal.**

## SEARCHLIGHT 2:03¼

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03¼).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcione, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09¾

The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01¼, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help firing a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the **PLEASANTON RACE TRACK**, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$1 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15¼, Sabledale (at 2 years) 2:18½, Buthen (at 2 years) 2:20¼, and 38 others in 2:30 list. Dam, Fidella (trial 2:36 at 2 years), dam of Fidette 2:38¼, dam of Mary Celeste (at 2 years) 2:24, by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:05¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H 2:12¼, etc. Third dam by Lancet, son of McCracken's Blackhawk 787.

NUSHAGAK's sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05¼, Nathan Straus 2:05¼, Ozanam 2:08, Dollade Wilkes 2:10¼, Oro Wilkes 2:11, Evangeline 2:11¼, Mary Celeste (at 2 years) 2:17½, etc. Fidella, NUSHAGAK's dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK's second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H 2:12¼, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17¼, Majella B. (2) 2:29 (trial at 4 years 2:13¼), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:30¼ with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17¼ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17¼ was equal to 2:13¼ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morhead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.  
IT PENETRATES AND DRIES IN quickly and DOES  
NOT GUM and FILL UP THE PORES like tar and oil  
compounds. It is the GREATEST REMEDY ever used to  
remove SORENESS and FEVER from the foot, and makes it  
possible to get good services out of a horse working on hard  
and hot pavements.

It gives natural nourishment to the foot and incites a  
rapid, healthy growth--ALL DRYNESS AND BRITTLE-  
NESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly  
grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET  
and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UN-  
SOUND and GROWS A TOUGH, STRONG, ELASTIC WALL  
and HEALTHY FROG--A FOOT WHICH WILL STAND  
WORK on race courses.

Many of the best owners and trainers state that for track  
work nothing equals it. In many cases horses have reduced  
their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES  
We Guarantee That It Will Do What We Claim  
and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00;  
2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied  
free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next  
issue of this paper. It is the best and because of its merits is rapidly displacing all others.

**\$15,000 FOR \$5**

# HARTFORD FUTURITY

A THREE-HEAT RACE. FOR FOALS OF 1903, TO START AS 3-YEAR-OLDS IN 1906. NO SUBSTITUTES.

**\$13,500**

**For Trotters**

**Closes April 1st. \$5 per Mare.**

**\$1,500**

**For Pacers**

ENTIRE STARTING FEE \$35.—Less than 1-4 of 1 per cent.

Payments: \$5 April 1; \$10 Nov. 2, 1903; \$10 March 1, 1904; \$10 March 1, 1906.

CHARTER OAK PARK, Hartford, Conn., offers the above purse, the most liberal futurity ever opened, for the 1903 produce of mares nominated in same on or before April 1, 1903. To be divided as follows:

**\$13,500 for 3-year-old Trotters.** The race to be three heats, one mile each, each heat a race. National Association distance rule, in force when race is called, to apply in each heat. First horse in each heat to get \$3500, and second horse \$500. In case of a dead heat the \$3000 will be divided equally between the tied horses. The remaining \$4500 will be divided among the starters according to their standing in the summary at the end of the third heat—\$3000 to first; \$1000 to second; \$500 to third. Should there be a tie for first place, the tied horses alone shall trot it off, and the \$4500 divided according to the summary of the four heats.

**\$1500 for 3-year-old Pacers.** The race to be mile heats, 2 in 3; \$1000 to first; \$300 to second; \$200 to third. Rules of National Trotting Association (of which this association is a member), in force when races are called, to govern, with exceptions noted. Color and sex of foal must be given on date of second payment, November 2, 1903, and name and gait of entry must be given with last payment, March 1, 1906. Owners must notify Secretary, by 7 o'clock of night before race, of their intention to start, or they will be declared out of the race.

In making entries the name, color and breeding of each mare, and the name of the stallion to which she was bred in 1902, must be given.

**MAIL ENTRIES ON OR BEFORE APRIL 1st TO**

NO SUBSTITUTES IN ANY EVENT  
NO ENTRY LIABLE FOR MORE THAN AMOUNT PAID IN.

**H. W. WILSON, SECRETARY, MADISON SQUARE GARDEN,  
NEW YORK.**

## \$23,000 DETROIT DRIVING CLUB \$23,000

ANNOUNCES THE FOLLOWING EARLY CLOSING EVENTS TO BE COMPETED FOR AT THE

# Great Blue Ribbon Meeting

**JULY 20, 21, 22, 23, 24 1903.**

**ENTRIES CLOSE MONDAY, MARCH 23d**

No. 1—\$10,000, Merchants' & Manufacturers' Stake.....2:24 class trotting	No. 4—\$2,000, Purse.....2:09 class pacing
No. 2—\$ 5,000, Chamber of Commerce Stake.....2:24 class pacing	No. 5—\$2,000, Purse.....2:20 class trotting
No. 3—\$ 2,000, Purse.....2:12 class trotting	No. 6—\$2,000, Purse.....2:17 class pacing

### CONDITIONS.

Entries close Monday, March 23d, when horses must be named. No nomination will be liable beyond the amount paid in, provided a written notice of withdrawal is received by the Club at the time any payment falls due. The main race of the Merchants' and Manufacturers' and of the Chamber of Commerce Stakes will be mile heats, best three in five to harness; but a horse not winning a heat, or making a dead heat in the first three, shall not start for the fourth, but horses so ruled out shall have a right to a share of the take according to their rank at the close of their last heat. The Consolation Stakes, and all purse races, will be best two in three to harness.

The Merchants' and Manufacturers' Stake will be divided as follows: \$4500 to the first horse; \$2000 to the second; \$1500 to the third; \$3000 for a Consolation Race, open only to horses that start and a part of the Main Race, to be trotted three days from the date of the decision of the first race, and to be divided \$1000 to the first horse; \$750 to the second; \$250 to the third. In the event of there

being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in the Main Race, the sum of \$1000; to the fifth horse \$750, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nominators therein, upon payment of 25% additional, shall have the right up to July 6th, to substitute in the place of the horse named, any horse eligible at the date of the closing of the Stake.

The Chamber of Commerce Stake will be divided as follows: \$2500 to the first horse; \$1000 to the second and \$750 to the third; \$1000 for a Consolation Race, open only to horses that start and win no part of the Main Race. To be paced three days from the date of the decision of the first race, and divided \$500 to the first horse; \$375 to the second and \$125 to the third. In the event of there being less than three horses eligible to the Consolation Race, there shall be paid to the fourth horse in the Main Race the sum of \$500, to the

fifth \$375, and the remaining money divided pro rata among the first three horses. Should it amount to more than the sum mentioned, the surplus will be divided pro rata among the winners of the Main Race. Nominators therein, upon payment of 25% additional, shall have the right up to July 6th, to substitute in place of the horse named, any horse eligible at the date of the closing of the Stake.

Purse Races will be divided 50% to the first horse, 25% to the second, 15% to the third and 10% to the fourth. Entrance Fees 5%, with an additional 5% from winners, excepting winners in the Consolation Races, from whom no additional fee will be charged. But should there be no Consolation Race, an additional fee of 5% will be charged to the winner of fourth money. This Club is a member of the American Trotting Association, and the rules of that Association will govern, except where otherwise provided.

Payments in Stake No. 1—\$50 March 23d; \$50 May 1st; \$150 June 1st and \$250 July 6th. Payments in Stake No. 2—\$25 March 23d; \$25 May 1st; \$75 June 1st; \$125 July 6th. Payments in Purse Nos 3, 4, 5 and 6—\$10 March 23d; \$15 May 1st; \$25 June 1st; \$50 July 6th.

In addition to the foregoing events, the Club will probably offer Purse Races for the following classes: 2:06, 2:08, 2:10, 2:14, 2:16, 2:18, 2:22, 2:26 Trotting; 2:04, 2:07, 2:11, 2:13, 2:16, 2:19, 2:21, 2:27 Pacing. All of which will be mile heats, best two in three to harness.

**DANIEL J. CAMPAU, President.**

**J. B. PETIT, Secretary, Room 19 Campau Bldg, Detroit, Mich.**

SECOND PAYMENT of \$5 each, must be made on the mares named in the Pacific Breeders Futurity for foals of 1903. This stake closed last December with 315 mares nominated and will be worth more than the \$6000 guaranteed by the Pacific Coast Trotting Horse Breeders Association. This is stake No. 3. There is already in the banks of this city, deposited there by Treasurer N. T. Smith nearly ten thousand dollars to the credit of the three stakes inaugurated by this association. The two year old divisions of the first stake are to be trotted and paced this year and from the number of entries that have been kept in and the prompt manner in which payments are made when due, as well as the active demand for substitutions in the last stake, it is very evident that this stake is the most popular ever devised in California. The fact that the cash to pay all parts of each stake is in the bank insures every owner that he will get his money if he wins, and this is one of the reasons why its popularity is so great. Every owner who has an entry in Stake No. 3 should make this second payment as the stake will be the most valuable of all and the indications are that it will be worth seven or eight thousand dollars.

A MATCH RACE has been arranged between the two great trotters Major Delmar 2:05½ and Lord Derby 2:05½. By the terms of the agreement which was signed in New York last week by representatives of the owners, the race will be mile heats, best two in three, the owner of the winner to receive all the gate receipts or purse money in addition to the amount of the match. The race will take place July 4th or the next good day and track, under the auspices of the trotting association offering the best inducements.

THE LARGEST HANDICAP ever offered in America is the \$50,000 World's Fair Handicap advertised by the St. Louis Fair Association, together with other stakes to be run in 1904. The handicap is a sweepstakes for three year olds at one mile and a quarter and is to be run at St. Louis in 1904. Entries will close April 1st, the entrance fee being \$25. The conditions of the stake are novel and very liberal to owners. Read the advertisement in this issue.

VOLUME VIII of the American Stud Book has reached us through the courtesy of The Jockey Club, and is a great improvement over any of the previous volumes. It is better printed, better bound and in every way a superior volume. There are several new features which will be of great assistance to breeders, viz: A list of sires of registered foals, giving their color, age and breeding—that is the names of their sires and dams, which obviates the necessity of research in previous volumes for the desired information; a list of horses sent abroad; a list of mares which have not been reported since their appearance in Vol. 7 and a list of horses purchased and retired from the breeding ranks by the American Breeders Protective Association. It is suggested that breeders carefully consult the index to this volume before claiming names for their foals, thus avoiding unnecessary correspondence in regard to duplicate names. Every breeder of thoroughbreds needs this new volume of the Stud Book. The price is \$10 and it can be had through this office or from The Jockey Club, Windsor Arcade, New York.

TELL THE CONDUCTOR to put you off at Buffalo when you go East this year, and if you are an owner of horses that will race on the Grand Circuit, see that they are entered in the big stakes to be decided at the Kenilworth track at that city. There are two stakes of \$5000 each, one for pacers and the other for trotters, and both for the 2:25 class. Four others of \$2000 each are offered, all to close Saturday, March 28th, which is just one week from to-day. Nominators may name more than one horse in a class, but must notify the Secretary on or before June 10th, the date of last payment, which they intend to start. John B. Sage, one of the most popular men with horsemen on the circuit, is Secretary of the Buffalo Driving Club, under whose auspices the meeting is to be given.

THE M & M. is always the most talked about of any of the coming trotting events of the year. This is because it is the first of the big trotting races in which the green horses start, as it is held at Detroit, the first place on the Grand Circuit, and is for the 2:24 class, besides having a value of \$10,000. The Chamber of Commerce for \$5000 holds the same position in pacing events. Both these rich early closing purses, together with four others of \$2000, will close on Monday next. The full conditions and all particulars as to payments, etc., will be found in our advertising columns. This is the great Blue Ribbon Meeting, the opening of the Grand Circuit and always one of the most successful and biggest betting meetings of the seas.

A BENEFIT RUNNING MEETING is to be held at the Los Angeles track to-day, the proceeds to go to a number of running horse owners who are stranded at Agricultural Park track, and who went there with their horses when Mr. J. W. Brooks announced a meeting to begin in February and which was prevented by the passage of the ordinance against bookmaking. There are about seventy runners at the track and a good day's sport can be arranged. Admission will be charged and purses hung up, but no betting can be permitted.

THE TOOMEY NEW MODEL bike for 1903 cannot be excelled for strength, lightness and high class workmanship. If you are going to the races this year get one and you will not regret it when the heats are close and your horse needs every assistance he can get.

## The Oakwood Park Sale.

The catalogues for this sale show that there are many individuals that should find ready buyers, for a better bred lot has never been sent to this city from this famous farm. The value of Strathmore blood is mentioned in the introductory and when we consider what it is done in California through Steinway 2:25½, his sons Chas. Derby 2:20, Strathway 2:20; his grand-son Diablo 2:09½, through Sidney 2:19½ and all his descendants, we admit it is the kind that is wanted more and more everyday. There are brothers and sisters, to King Cadanza 2:11½, Klatawah 2:05½, Pussy Willow 2:10½, Agitato 2:09, Extravagant 2:18½, Algreor 2:11, Dolly Derby 2:12, Our Jack 2:13½, etc. All are thoroughly broken, single and double, and those by McKinney 2:11½, Owyhee 2:11, Direct 2:05½, etc., are the kind horsemen are looking for. There are many handsome horse and mares among them that if they never make track horses will be extremely valuable as roadsters. The sale will take place next Thursday, March 26th, at the Occidental Horse Exchange. Wm. G. Layng, the auctioneer, will mail catalogues to all sending for them. This, no doubt, will be one of the best sales to obtain standard and registered trotting horses at auction this year. They will be on exhibition next Tuesday at the salesyard.

## Santa Ana Track Items.

Mr. P. W. Hodges, the tall sycamore of the California Circuit, who has trained many high class horses and driven them to fast records, was in San Francisco this week and reports things quite lively in the harness horse line at Santa Ana, where he has quite a string in training. Mr. Hodges has three Zombros, all trotters and good ones at that, a Stam B. two year old filly out of Atherine 2:16½ by Patron that he thinks is one of the coming 2:10 trotters, as she seems about perfect in every way and has a world of speed, besides several more youngsters that are well entered in stakes and are good prospects. He has the stallion Geo. W. McKinney 2:14½, that is good enough to race and reduce his record; also the fast trotter Portrero that has been spoken of as a candidate for the 2:10 class. The filly Lady Zombro that he is training is considered a very high class trotting prospect. Mr. Hodges will breed his great race mare Hazel Kinney 2:09½ to Neernut 2:12½ again this year, as her foal by that horse is, he thinks, one of the most promising youngsters he ever handled and he wants another.

R. Garney has a string of eight or nine horses at the track, some of which are being made ready for the California Circuit and are showing up well.

Bob Thompson has quite a string from Mr. Geo. W. Ford's breeding farm, all by Neernut, and as uniform and promising a lot as one can find in a month's travel in any county.

"Santa Ana is ripe for a good harness meeting," says Mr. Hodges, and if the P. C. T. H. B. A. could be induced to come there, or any local organization could be induced to give a meeting, there is no doubt at all but it would be well patronized by the people of Orange county.

## Coal Oil to Prevent Disease.

Mr. Sterling R. Holt, owner of the Maywood Stock Farm, who has been in California on a visit for the past three weeks, was in the office of the BREEDER AND SPORTSMAN last Wednesday, when the subjects of the liability of horses to contract disease while being shipped or when put in new quarters, was up for discussion.

"Coal oil is the best preventive of all those diseases like distemper, epizootic and kindred ailments that I have ever found," said he, and turning to C. A. Durfee from whom he had just purchased a three year old McKinney stallion he said: "When you put my colt in the car to send him to Maywood Farm, take a common two-ounce syringe, fill it with coal oil, open his mouth and throw the contents of the syringe back into his throat. He will probably spit out the most of it and swallow a little, but it will reach nearly all the mucous membrane in his mouth, throat and nasal passages, and will prevent his taking cold. This should be repeated every two or three days on the trip."

Mr. Holt says that he has had this treatment administered to all the horses he has purchased at sales for the past two years and that he has not had a sick horse among any of the consignments he has received during that time. It is a simple and cheap preventive and as it cannot possibly do any harm should be tried by those having horses to ship or who place their animals in stalls that have been occupied by other horses.

## Secretary Not to be Selected Soon.

President A. B. Spreckels of the State Agricultural Society had a consultation last Wednesday with the Governor on the subject of the financial status of the society. Mr. Spreckels, when interviewed, said that he would call a meeting of the board shortly, but that the matter of electing a Secretary would not come up for some time to come. It is believed that the Governor will sign the other bills for the relief of the society, and that the meeting will be called to settle with the creditors of the society. There are about a dozen candidates for Secretary of the Society, the last to enter the ring being Assemblyman Walter Green, Talbot H. Wallis and Dr. W. P. Matthews of Sacramento.

## Another New Jockey Club.

Articles of incorporation of the Capital City Jockey Club were filed in the office of the County Clerk of Sacramento county last Wednesday. The object of the corporation is to engage in, conduct and carry on the business of a race track association, and to hold, manage and give horse races and exhibitions of racing; to encourage breeding of the highest type of thoroughbred horses, etc. The principal place of business is in Sacramento, and the directors are William J. Irvine, Joseph W. Hughes, Frank E. Wright, Thomas Fox, Charles W. Paine, Isadore Schad and Frank D. Ryan. The capital stock is \$10,000, of which \$1000 has been subscribed.

## JOTTINGS.

THE LODI TRACK has been plowed up and there will be no more horses worked over it, but a couple of rows of stalls have been left standing and the roads about Lodi are the finest for jogging and speeding horses during the rainy season that one could possibly ask. The country is level as a floor and the soil a sandy loam that makes roads that never get muddy. There are stretches of road a mile in length that are as good as any and much better than some race tracks during the winter season. After the rains are all over these roads get rather dusty, but those portions that are sprinkled keep in fine condition the year round.

Walter Trefry and Tom Holmes are the only trainers now at the watermelon centre, as Lodi is called. Mr. Trefry has five horses in his string that for good looks can equal the same number in any stable of horses in the country. The stallion Daedalion 2:11 by Diablo 2:09½ out of Grace (dam of 3 in the list) by Buccaneer heads the string and is doing a good business in the stud. The breeders around Lodi are all in love with Daedalion and are predicting great things for him as a sire. His foals are not old enough to race yet, but they are magnificent lookers without exception and full of that vim that makes race horses. Producing dams are necessary in the pedigree now-a-days to make a stallion popular and Daedalion has a big supply in his. On his sire's side are Bertha (dam of Don Derby 2:06, Diablo 2:09½, Elf 2:12½ and others), Katy G. (dam of Klatawah 2:05½, Chas. Derby 2:20 and three more), Green Mountain Maid (dam of Electioneer and 9 in 2:30), Abbess (the dam of Steinway and three others in the list and dam also of Soprano, dam of 10 in the list), Barcana (dam of Bayard Wilkes 2:11½ and others), Alma Mater (dam of 8 in 2:30 and one of the greatest broodmares that ever lived), Blandina (dam of six producing sires), besides many more of repute. On his dam's side Daedalion is also well represented by great broodmares. His first dam, Grace, is the dam also of Creole 2:15, that sired Javelin 2:08½, and she is also the dam of Eagle 2:19½. All these are by different sires. Her dam, Mary, is the only mare on record that has two daughters that have produced two 2:15 performers. She is the dam of Apex 2:26 and of Sterling, a producing sire, and her daughter Lettie is the dam of Welcome 2:10½, sire of Hilo 2:16½. Lettie is also the dam of Wayland W. 2:12½, sire of 3 in 2:15. I don't know where one can find a stallion that is better bred in producing lines than Daedalion. He paced in 2:11 twice in 1899. He won two heats and second money in a field of ten at Santa Rosa August 14th that year. Wild Nutting won the race, and Myrtha Whips 2:09½, Rey Direct 2:10, Connie 2:15½ and others were behind him. Two days later he was second to Clipper 2:06, beating Kelly Briggs, Roblet and others. In this race he paced a third heat in 2:11. At Sacramento, in September, he won a hotly contested six heat race, the opening day of the meeting, and at Stockton the following week he won in straight heats, beating Clipper and others. Daedalion is faster than his record, much faster. He has been in the stud for two years, but Walter Trefry thinks 2:05 would not top him if put in training again.

Another horse in Trefry's string is a four year old stallion by Silver Bow 2:16 out of Kitty Fox by Pancoast, second dam Bessie Bowne by Dictator, third dam Lady Lightfoot by Mambrino Time, fourth dam by Paddy Burns and fifth dam by Moseley's Copperhead. Here is a four year old of great prospect as a trotter and one of the very best bred stallions in California. He has the McGregor blood that produced Cossicus 2:02½, the Pancoast blood that produced Alix 2:03½, the Harold blood that produced Maud S. 2:08½, the Dictator blood that produced Nancy Hanks 2:04 and Directum 2:05½, all of these champions of their day. It is one of the grandest combinations of trotting blood there is in any horse in California and every horseman that sees him gets "stuck on him," as the boys say. "This colt was bred by Geo. H. Fox at the Mokelumne Stock Farm, Clements, Cal., and was intended to take Silver Bow's place when that stallion reaches the age of retirement. Mr. Fox received many requests for the services of this horse last year, but only bred him to a few of his own mares. He has not been training yet."

Another son of Silver Bow that is causing lots of talk is a five year old out of Grace, the dam of Daedalion 2:11, Creole 2:15 and Eagle 2:19½, by Buccaneer. This young stallion is one of the stoutest and most gently formed horses in California. He was worked a little as a three year old by E. J. Lafferty, who gave him a fair trial the following year. The colt showed a high rate of speed that Mr. Lafferty, who is

a half owner in the colt with Mr. Fox, sent him back to the farm, as he had no stake engagements and was considered too great a prospect to race for small purses against aged horses on the California circuit. He is the shortest backed and best muscled horse I have seen for many a day, a topky, sound, good boned, good gaited, bay trotter, and showed a mile in 2:22 early last year. He is one of the best prospects I know of to head a stock farm where size, style and speed are wanted, and as for disposition he is about perfect.

Mr. Trefry has two bay geldings both four years old by Silver Bow which he is giving work. One is out of Anticipate, a full sister to Agitato 2:09, by Steinway, and worked a quarter in 34 seconds the week before the Lodi track was plowed up. This gelding is a clean gaited trotter, requiring no boots or appliances to make him keep his gait and is a prospect for the races. The other is out of Josie Clawson, daughter of Nushagak sire of last year's Occident and Stanford stakes winner, Aristo. This gelding is not quite as large as the other, but "he is one of the fastest natural trotters I ever saw," was the remark made by Mr. Trefry as he led him out for inspection. He will do to go to the races with to a certainty as he is good gaited and good headed.

In the same row of stalls with Trefry, that genial horseman Tom Holmes has a string of six trotters and pacers. Big Jim is the name given a gelding that weighs 1300 pounds, by Alta Genoa 2:14½ out of a mare by Black Boy. Big Jim is owned by Mr. G. Peirano the well known merchant of Lodi. He is a trotter and worked a mile last year in 2:22 with Mr. Peirano up.

A bay filly three years old by Diawood, owned by Frank Rounds of Sacramento is one of the kind that will do to pay entrance money on. She is a handsome well turned filly with a nice easy very of going.

Princess, a mare ten or twelve years old by Dexter Prince out of a mare by Hero, is the property of Mr. Adolph Edelman, who resides six miles north of Lodi. This mare is a good gaited and fast trotter and will take a low record if raced.

One of the nicest big two year olds I have seen this year is a chestnut colt by Stanton Wilkes 2:10½, son of Nutwood Wilkes. This colt is owned by William J. Irvine, of Sacramento. He is a pacer and a natural smooth gaited one.

A brown gelding by Knight out of the Collins mare, owned by W. K. Cofhrin, of Sacramento, is also in Mr. Holmes' string and is a good prospect.

The last, but not the least, is H. D. B. by Arthur Holt. This is the race horse of the string. He started three times last year, was once first, once second and once third. He took a record of 2:25½, but that speed is only a jog for him. Mr. Holmes will have him out this year ready to meet any and all trotters in his class.

Both Mr. Trefry and Mr. Holmes have their horses in extra fine shape and there is not a lame or ailing one in either string. They are not worried about the track at Lodi having been put out of existence, as they say the roads there are better than most tracks.

There has been considerable speculation among the horsemen here in California, who knew that the veteran Monroe Salisbury did not purchase for his own account the four two year olds by Mendocino, that fell to his bid at the Palo Alto sale in January, as to just who is the lucky owner. James Butler, the New York millionaire grocer is the man and when Mr. Salisbury goes east he will ship his string to the Empire City track at New York and Mr. Butler will find that he has secured a bargain in the quartette of two year olds that is not picked up every day. The colt Corleon is worth more than the sum paid for the four and there is not one of the lot but will bring here in California to-day more than the price paid for him.

That prominent Indiana business man, horseman and politician, Sterling R. Holt, owner of the Maywood Stock Farm, the home of Rex Americus 2:11½, has been in California for the past three weeks and left for home last Thursday. Mr. Holt visited San Jose while here and looked at Chas. A. Durfee's handsome three year old stallion Jim Rea by McKinney 2:11½ out of the registered mare Twenty-third by Director 2:17, second dam by Nutwood 2:18½, third dam by Vick's Athan Allen and fourth dam by Williamson's Belmont. Mr. Durfee put a price of \$3000 on the colt and Mr. Holt took him. He will breed him to some of his choice fillies by Rex Americus and other horses this year. The colt will be sent over in May and Mr. Durfee says he will get a record of 2:20 or better this year if he meets with no accident, as he is one of the best youngsters as ever owned. James W. Rea of San Jose bred the colt and named him C. A. Durfee. Mr. Durfee purchased him when a year-

ling and changed the name to Jim Rea, but he is not registered and has never started under that cognomen.

I don't know of a horse picture that has attracted my admiration more than the one of Mr. Holt's stallion Rex Americus that appeared in the special number of the *Western Horseman* issued on the 6th of last February. I told Mr. Holt so and he kindly promised to send a larger one of the same picture to hang in the office of the BREEDER AND SPORTSMAN. The picture was made by Frank Whitney direct from a photograph, and is one of those striking, full-of-life portraits of a horse that is so hard to get and so satisfactory after it is obtained. Mr. Holt tells me it was the last of twenty-four photos taken one afternoon in an attempt to get one that suited. Rex Americus is by Onward, first dam by Dictator, second dam by Blackwood 74, third dam the Burch mare by Parker's Brown Pilot. The Burch mare is the great grandam of Bertha, the Oakwood Park broodmare that has produced Don Derby 2:06, Diablo 2:09½ and three more in this list, and has two or three others that will go into the list this year. Rex Americus was "bred in old Kentucky" and got his record in 1894. He has sired Battleton that took a four year old record of 2:09½, American Belle 2:12½ and others, among them John Mc 2:17½, one of the best three year olds of 1902, that has the distinction of having met the very best colts of his year and only been beaten when the time was very fast. It is said that John Mc has finished second in more heats in fast time than any three year old on the turf. He was only beaten an eyelash by The Rajah in 2:14½ when the latter three year old trotted the best mile of the year last season.

We all know that Charley Durfee is quite a joshier in his way and no man loves a good joke better than he even if it is on himself. Mr. Durfee accompanied Mr. and Mrs. Holt on a trip to Palo Alto Farm and through the University grounds. The pair of horses hitched to the rig which they engaged from among the many at the depot were pretty ordinary looking, being thin, long haired and lacking both style and speed. Mr. Durfee turned to the driver after they had gone a short distance and said, "That near horse is a Rex Americus isn't he?" The driver said he thought so but was not sure. As quick as a flash Mrs. Holt remarked quietly, "I am certain the other one is a McKinney." Mr. Durfee says "that blamed driver confirmed the lady's statement, and the joke was on me."

## Answers to Correspondents.

C. C. Pond, Arlington, Cal.—Judd Wilkes 22821 is by Ira Wilkes (son of George Wilkes and Nelly B. by Harry B. Patchen), first dam Champion Maid by Champion Messenger, second dam Kit, pedigree not traced. There was a chestnut stallion called Goldnut owned by P. J. Williams. He was by Nutwood out of a mare by Champion. We don't know whether he ever stood for service in Los Angeles. Write to P. J. Williams, San Lorenzo, Cal.

C. W. Main, Corona, Cal.—The record and breeding of Homeward as given in Volume 12 of Wallace's Year Book is as follows: "Homeward, bay horse, foaled 1891, by Strathway 13214, dam Ida May by Grosvenor 1883, grandam by Alaric, son of Hercules. Bred by R. O. Newman, Visalia, Cal. Record made at Willows, Cal., August 13th, 1896." We do not find any mare recorded in the Year Book or the Register as Lorena 2:21 by Nephew Jr., nor is the latter given credit for a performer by that name.

M. J. Weber, Rohnerville—"Thoroughbred" is applied only to running horses that have five uncontaminated crosses; Standard bred horses are those eligible to registration in the American Trotting Register. Draft horses are of several breeds, such as Percheron, Clydesdale, Shire, Belgians, etc. They are called full bloods when they are eligible to registration in the stud books of their respective families.

## Anteo.

J. J. McGrath, the well known horseman of Marysville, has purchased the good stallion Anteo by Anteo 7868 and will stand him at the low price of \$15 for the season. Anteo's dam was Emery's Queen by Hamilton Chief. She was a great road mare and Mr. Emery refused \$1000 for her. Anteo is a large, handsome, well turned horse and shows his breeding. His colts are all solid colors, good lookers and fast. Three of them that had never been trained sold recently for \$750. Mr. McGrath is to be congratulated on securing so good a horse.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 581 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

## Oregon News.

BURNS, ORE., March 8, 1903.

BREEDER AND SPORTSMAN:—A number of years ago, there were some very fine thoroughbred horses brought into this country and bred to the native mares, the progeny of which has made this country noted for short distance running horses. In 1890 and '91 there were several well bred trotting stallions and mares brought in here, but in a very short time a drop in horses caused our people to neglect breeding to a large extent until the last two or three years. During the last two years there have been a number of high bred trotting and pacing stallions brought into this country, but they have no colts at the present time older than two years. Last year I shipped in from the East a trotting stallion, Dazzler 2:26½, with a trial of 2:17½. This horse is rather more a show horse than a race horse, although he was never beaten but twice and took second place then in the race. He is the sire of Sadie S., who, as a four year old, was unbeaten in her class in the show ring in 1901.

She trotted a trial at the Missouri State Fair in 2:18½. He (Dazzler) is also the sire of Happy Jack, who was also unbeaten in the show ring as a three year old the same year and trotted a trial at the same time and place in 2:22½.

Dazzler himself is the holder of a large number of blue ribbons in Missouri and Kentucky. So you will see that the news from this place in that line would be rather meager, but if at any time anything should come up which I should consider of interest to the readers of the BREEDER AND SPORTSMAN, I would be very glad indeed to notify you of the same and will always speak a good word for the BREEDER AND SPORTSMAN and recommend it to all lovers of true sport.

Yours very truly,

J. W. BIGGS.

## From Modesto.

F. Haney of this place sold to Monroe Salisbury this week the big bay pacing gelding by Lottery Ticket out of a mare by Richard's Elector. This horse is an own brother to Mush, Mr. Salisbury's pacer that worked a mile in 2:11½ last week. The consideration was \$400.

George Woods, of Ceres, is the owner of a handsome bay colt sired by Prince Nutwood 2:12½, dam by Steinway.

Thomas Beard had the misfortune to lose a fine bay colt four days old by Prince Nutwood from his fine gray road mare.

Dr. C. W. Evans has two very promising yearling colts by the same horse. One is a pacer from a mare by Dictatus, the other is a trotter from a mare by Richard's Elector. He also has a very fine two year old colt by Richard's Elector from a Steinway dam.

N. L. Tomlinson, a large wheat grower near Turlock, is the owner of a very fine yearling colt by Prince Nutwood out of a Yosemite mare, the dam of his fast pacer, Frank Kiernan. He has refused several flattering offers for this colt.

T. F. Kiernan has recently purchased the handsome stallion Pacheco Wilkes by Guy Wilkes, dam Rose-dale by Sultan, from S. Woodworth, of San Francisco. He will make a short season here and then be trained for the races by F. Haney.

MODESTO.

## The Hartford \$15,000 Futurity.

In this issue is advertised the rich Hartford Futurity, value \$15,000, for foals of 1903. Every owner of a mare in foal should enter in it. The entire paid-up starting fee is but \$35, less than one-fourth of one per cent of the stake and the conditions are so arranged that the race will be over in three heats, and the money distributed each heat, as the colts win it.

The Hartford Futurity closes April 1st, with H. W. Wilson, Secretary, Madison Square Garden, New York. Write him for entry blanks, and name every mare in foal you own.

## Foals at Palo Alto Stock Farm.

Superintendent F. W. Covey reports the following foals for 1903 at the Palo Alto farm:

Br filly, January 26, Mendocino-Lida Wilkes.  
B c, February 14, Monbells-Manzanita.  
B filly, February 15, Nutwood Wilkes-Expressive.  
B filly, March 3, Monbells-Wildflower.  
B c, March 9, Mendocino-Mary Osborne.  
Br c, March 13, Nazote-Gertrude Russell.

## Other Remedies.

There are many remedies on the market, such as kerosene, gasoline, benzine, grease, crude oil and tar compounds, the use of which generally proves a complete failure. They either burn the hoof, making it hard, dry and brittle, or grow a hoof which will shell and not stand the horse's weight. To use them is to do worse than leave the foot uncared for. Campbell's Horse Foot Remedy contains none of these materials. It is not an oil in the sense which the term is generally understood, but is a remedy which penetrates the hoof without closing the pores, and heals soreness on the inside; oils the parts, preventing friction.

## Entry Fees too Heavy.

The following from the Kentucky Stock Farm, relating to the very heavy tax placed on owners who enter in the big early closing purses, as compared with those who enter in the futurities gives food for thought for associations giving harness race meetings throughout the country:

"One very good reason for the popularity of futurities is the low cost of entrance as well as the small percentage of the starting fee compared with the gross value of the stake itself. It has always been the custom for owners to pay five or ten per cent to start in purses and stakes, and as a consequence they have been trotting for their own money and in addition have been forced to lose the use of the money that has been paid on the original nomination. It is this custom that has made campaigning of the trotter a bad business proposition and no relief was felt until the era of futurities was reached. Then it was that owners realized what a tremendous strain it was to pay ten per cent of the gross value of the stake, especially in view of the fact that only four moneys were divided. The futurities, however, brought about a new condition, for here was an opportunity of winning many times as much as in the average purses in the stakes and for a fraction of a per cent. From their inception the futurities, matron stakes, or whatever they may be called, have become immensely popular, and for the best of reasons they are conducted on strictly business principles. The popularity of the American trotter was never more conclusively proved than by the persistence with which owners will engage their horses in events, the cost of starting in which being practically ten per cent, for this item is in itself the largest in connection with racing the light-harness horse.

Take for example the large stakes on the trotting turf, beginning with the Merchants and Manufacturers at Detroit, their gross value being approximately sixty thousand dollars, and the money winners are taxed six thousand dollars apiece. In futurities aggregating a like amount, the money winners would have paid out less than one thousand dollars. It is the heavy payments that keep alive the rich stakes; of this there is no question; in fact, under present conditions it would be impossible for associations to offer them, yet it certainly is a hardship for the owner and one that has made it almost impossible for a man of moderate means to indulge in the luxury of campaigning a trotter. When the time comes, and come it must, when the three year olds race as well as they do at maturity the futurities and colt stakes will have another value, for they will, to a very great extent, force the associations throughout the country to reduce the entrance fees to the purses and stakes. It stands to reason that an owner with a three year old engaged in fifty thousand dollars worth of stakes, in which the cost of entrance has been less than one per cent, will entirely ignore the class races, even though large sums of money are offered. There are to-day in America many extremely promising green trotters that must be kept out of the large stakes for the simple reason that their owners cannot afford to risk several thousand dollars in entrance fees paid in monthly installments, thereby depriving them of the use of it and always with the possibility of being unable to dispose of the nomination.

We have always believed that a ten thousand dollar early-closing stake would receive enough nominations at a reduced fee to equal the amount received on a ten per cent basis, for at that season of the year many men would undoubtedly be found willing to risk a moderate sum of money, even though their horses should be in a measure an unknown quantity, whereas it would be on the face of it the height of folly to engage in the stake on the present basis of ten per cent. Two hundred entries at two per cent would, of course, be equal to forty entries on the ten per cent basis, and it is not in the least unlikely that a stake of this kind would receive enough nominations to carry it through; certainly the first payments would justify the step. There are always many men to be found willing to take a flyer with their horses at a moderate expense that would hesitate if the cost were as it now is, and the same spirit that prompts breeders to nominate their foals in futurities, which spirit is backed up by the realization that it is a sound business proposition, would induce men to engage their older horses, if it could be done with as little financial risk. Something will have to be done, not only to increase the earning capacity of the trotter, but to make this earning capacity available, for as the case now stands, while a horse can win possibly twice as much money as he could ten or fifteen years ago, it will cost his owner twice as much for him to do so, and while it may be said that any man should be willing to spend five thousand dollars in entrance fees in order to win fifty thousand dollars, it must be remembered that only one man can be thus fortunate, and that all the

losers must pay a part of what he has won, and many of them fully as much as it has cost the winner. The reduction of the first payment to a nominal sum would unquestionably be of great benefit to the owner, and it seems reasonable to suppose that the entry list, would be so increased that the associations would do nothing, as small entrance fees have been in the past the strength of futurities, exorbitant entrance fees, as are now in vogue, must be the ruination of class races, and to keep abreast of the times associations will be forced to adopt a system that has made the richest stakes so popular."

## Noble to Train Anaconda.

At last it has been decided that Fred Noble, the famous trainer, will have the great pacer Anaconda 2:01½ the coming season. Mr. Noble visited New Haven to have a conference about the great side-wheeler with his new owner, Mr. Bronson, and the contract was signed. Mr. Noble will take charge of the horse on March 15th. It has not yet been decided whether he will train at Hartford or Louisville, as he expects to have some horses of other owners, and that will greatly tend to determine the track he will select. He has always had a great deal of success at the Kentucky track, and is very favorably disposed toward it. It was there that he got The Monk in shape, after he was bought by Fred Gerken, and fitted him for a race the first time he had been able to face a starter for three years.

In Mr. Noble's hands the "snake horse" will have no reason to dodge a race with any of the crack pacers of the country. In fact Mr. Noble said recently that he would like it if the trotting associations would give free-for-all purses for pacers, and get such good ones as Dan Patch and Prince Alert to meet Anaconda. That is what he would prefer. If no such events can be gotten up, Anaconda will probably be sent exhibition miles on half mile tracks and elsewhere where engagements can be made.

Anaconda is now looking better than Mr. Noble ever saw him. He says he is big and strong and weighs in the neighborhood of 1100 pounds. He has been jogged five or six miles every day all winter, and is in first class condition to take training. Mr. Noble jogged him last Saturday, Sunday and Monday, with an open bridle, passing cars, wagons, automobiles and everything that usually scares a nervous, high strung horse. That will be news to those who could not get the son of Knight to going without the blinds.

Some time ago Mr. Noble wrote to Bronson saying he thought that if the horse could be got going with an open bridle it would be a good thing. It was tried, and it is said the horse trembled like a leaf when he first looked through it; but after a bit of coaxing and experience he went along with it as gentle as could be. Mr. Noble has the privilege of taking a few outside horses, and the chances are that he will, as usual, flash up on the circuit with some winners.—*Spirit of the West*.

## Breeding of Road Mares.

Nearly every owner of a choice driving mare would like to raise a foal to perpetuate her good qualities. This is particularly the case when the mare is past her prime or incapacitated for driving purposes. Probably many owners have had no experience in breeding horses and do not know how to proceed to obtain a good foal. If the mare has never raised a foal and has been used many years on the road it may be difficult to get her to breed. Some aged mares prove barren after all the arts of the stallioner have been exhausted, even to experimenting with artificial impregnation.

Mares that have been in the harem regularly from four years old frequently throw foals until past twenty, but many mares lose their virility at sixteen. There is but little danger attending parturition and mares that have not been hampered and become over-fat generally do the best. Mares should not be emaciated but in robust condition to properly nourish a good foal.

The city fancier who wishes to raise a foal from an incapacitated mare should send her into the country where she could cool out and rejuvenate on luxuriant pastures. This will improve her chances of getting with foal. Arrangements are frequently made by the year for keeping the mare in the country and the foal removed when at age to wean. It is the proper method to improve the road horses of the country to breed good driving mares to fast trotting stallions. The Charles Kent mare by imp. Bellfounder, the queen of the road in her day, was bred to Abdallah after being incapacitated and produced Rysdyk's Hambletonian, the greatest speed progenitor of his day and practically the founder of the standard American trotter. Besides the pleasure of the enterprise there is economy in breeding foals from retired road mares.—*Exchange*.

### Horse Breeding for Farmers.

President P. P. Johnston, of the National Trotting Association recently addressed a communication under the above title to the *New York Spirit of the Times*, from which we make the following extracts and commend their careful perusal to those of our readers who are so situated that they can engage in the horse breeding business in a modest way:

The trotting horse business is comparatively new. Its most experienced followers differ as to the best methods of producing the highest results. Yet it is a fact that we are advancing, and every year thoughtful men know somewhat more about the problem than they did the year before. Though much of the wisdom experience brings often consists in the knowledge that the theories we thought infallible for a long time were only partially true, and those we thought altogether erroneous, and condemned in unmeasured terms, were much nearer right than we had supposed. A mere youth invested a few hundred dollars in what was then considered off-bred mares, and from the first mating produced Axtell and Allerton. The former he sold for one hundred and five thousand dollars; the latter he still owns, and is believed by many to be the best horse of the two.

With the proceeds of the sale he has bought mares conceded to be among the best bred in the entire country, and paid vastly more for each than he did for both the dams of Axtell and Allerton. Yet he will be exceedingly fortunate if he breeds another Axtell. He made a strike in his youth and poverty which he may not succeed in equalling with his wealth and added experience.

It is no uncommon thing for poverty and inexperience to find in this business the treasure, wealth and fancied wisdom had sought and toiled for in vain. The Hambletonian, Mambrino and Clay blood, especially in the sons and daughters of Geo. Wilkes, Mambrino Patchen and Electioneer, is deservedly popular and high-priced, while the grand and great grandsons and daughters of these great sires are comparatively inexpensive. If we are breeding intelligently they ought to be better, yet they can often be bought for prices that would be reasonable if they had no pedigree. The millionaire will buy the daughter of one of these distinguished sires for from five to ten thousand dollars, while the man of small means may buy the grand or great granddaughter for a hundred or two, and, according to our most reasonable theories, stand a better chance to get speed for her. I know personally of a granddaughter of Hambletonian out of a thoroughbred mare, selling on the streets of Lexington, in the presence of the assembled horsemen, for sixty dollars; two of her colts have brought thirty-five hundred dollars, and she, with the colts remaining, would bring from five to seven thousand more. From reading the stock papers, you can readily know which are the best, most fashionable and high-priced families; and in buying aim to keep a generation ahead of the popular fancy. As a rule, this fancy is based on the highest merit, but the prudent investor can better afford to buy something that by every known law should be as good or better for a comparatively nominal price, and wait to verify the wisdom of his eyesight. It does not require profound knowledge of pedigrees or a long purse to follow this simple rule; yet it is full of possibilities, and has often brought fortune when touched by accident, and wealth when followed with method. Such stock can be had at prices that will pay if the produce never trot better than three minutes; for as roadsters, family and work horses, they cannot be excelled. In addition to these certainties, is the chance of producing something worth a first-class farm.

High-bred young stallions can now be had so cheap that there is no excuse for breeding any kind of a mare to a common horse. The produce of mares of unknown breeding are more valuable for all purposes, when by a well-bred horse; besides, such crosses have frequently produced a high rate of speed. Stallions with trotting sires, and dams by high-bred trotting horses, second dams thoroughbred, saddle or pacing stock, are excellent for service on the general run of the mares of the country. Such stallions are not what is called standard, consequently can be had, if undeveloped, for a few hundred dollars, the young colts often selling for near a hundred. Mares of the same breeding are standard, and sell higher.

The standard is an arbitrary rule that frequently depreciates the value of a good horse, and often gives fictitious value to a mean one. Uninformed buyers attach such importance to it that they would pass a colt by Geo. Wilkes out of a mare by the great Lexington, and she out of the dam of Maud S., because it would not be standard, and take something not worth a tithe as much, because it was standard. Speed alone without pretense of good breeding will make a

horse standard, or breeding alone, without speed of individual excellence, will make him standard, though he may have spavins, curbs and ringbones, and not be able to trot a mile in six minutes, and be by a sire and out of a dam each having all the physical defects known to the veterinary. As a result of this arbitrary and misleading rule, many colts of the highest value for the improvement of the common stock of the country can be had very cheap, while others of really less value for all practical purposes are sold to a certain class of buyers for large prices. The standard is to many a delusion and a snare, without being the slightest fair advantage to others. Every pedigree and every public performance should be recorded, and they, combined with the individual excellence of the animal, should constitute the standard. He should be neither helped or hindered by arbitrary rules. I do not give my estimate of the standard for the benefit of the many worthy gentlemen who hug the delusion, and honestly believe in its merits, but to show intelligent men of small means, who have been deterred from taking the first inexpensive steps in the industry by its mysteries, that it need no longer be a trap for the unwary, aiding to keep them aloof from a business from which they can derive much pleasure and profit without a heavy expenditure, and without abandoning any other industry of the farm.

Very truly, P. P. JOHNSTON.

### New Race Track for Los Angeles.

That Los Angeles will sooner or later become the scene of winter racing is a foregone conclusion, and when it comes to the number of days on which "weather fair and track fast" can be recorded, it will have every other racing center in America "skinned to death" as the touts say. The copious winter rains which make the central and northern parts of California the most productive and most profitable farming and fruit growing section of the globe, are only sparsely distributed over Southern California and expensive irrigation is absolutely necessary to insure crops that are worth harvesting, whether of fruit or grains.

But the almost constant sunshine of the southland during the winter months is what draws the eastern people who have money to spend and are looking for enjoyment and comfort, and this combination of climate and idle people with wealth is certain to be taken advantage of by persons who are ready and able to provide amusement for these people in the shape of a race track. The *Los Angeles Times* of yesterday said:

"Los Angeles is to become a mighty racing center along lines of the very highest class. Half a million dollars is to be expended for tracks, buildings and other substantial improvements, according to rumor. The backers of the stupendous project are understood to be men of high standing in the city, more than abundantly able to carry out a scheme twice as large as that planned, and it is safe to predict that they will give Los Angeles one of the best race tracks in the world. The plan is, in short, to make of this metropolis another Latonia.

The ground has already been purchased at a cost of \$150,000. It is reported that articles of incorporation are being prepared and will be filed with the County Clerk in a few days. The promoters, in looking for a suitable site, found that two or three similar projects

were on foot. Among those "in the air" was one for Baldwin's ranch, near Arcadia, and M. Lawrence, proprietor of Baldwin's Hotel, Oakwood, has for some time had a big racing grounds in prospect for that section. Not long ago Lawrence had the tip given him that 160 acres of land south of this city had been purchased by an English syndicate, and that he might as well drop his racing scheme, since he could not compete on the stupendous scale proposed. When he came to investigate he found the so-called "English syndicate" composed of local men of the highest reputation, backed by much money. He also found that they had bought 160 acres between Central avenue and South Park avenue, just outside the city limits. It is proposed to erect improvements, it is said, that will cost more than \$300,000, including a magnificent club house, and the services of the best race track builder in America have been engaged. The syndicate is said to consider this the best winter racing climate in the world."

### Interchange of Blood.

For a long time the California breeders sent the best of their horses East, and they will probably always have to look to the country this side of the "Great Divide" for their best market. Even the best of the stallions were sent East whenever big prices tempted their owners. Nearly all of the greatest of Electioneer's sons came East, as did Guy Wilkes, Directum, Stamboul and more recently McKinney. There has never been any danger, however, that California breeding interests would go back on account of lack of stallions, for more than a few Eastern men, knowing the number of good mares owned in California, have taken stallions there. Among the horses to be taken from the East more recently are Searchlight 2:03, Lecco 2:09, Barondale 2:11, all bred in Wilkes lines, and that they will all sire speed when mated with the well bred California mares, is hardly to be doubted. This constant interchange of blood through California bred horses coming East and Eastern bred horses being taken to California, has a beneficial result, for, setting aside the theory of climatic out-cross, enough new blood is secured for each section of the country to lessen the evil which sometimes results from inbreeding for too long a period.—*Buffalo Horse World*.

### Denver and Omnibus Cab Co.

Spohn Medical Co  
Gentlemen:—We enclose draft for \$5.00 for another dozen Spohn's Cure. Hurry order, please, as we are nearly out. We get the very best of satisfaction from its use. Respy,  
DENVER OM. & CAB CO.

### FOR SALE.

### McKinney Filly

SEAL BROWN FILLY BY MCKINNEY. Dam, MISS KAISER, is by Kaiser 2200, he by George Wilkes 519. Miss Kaiser is by same sire as Grace Kaiser, who, bred to McKinney, produced Coney 2:02, McZeus 2:13, Stipulator 2:11, Grace Mc. 2:12. Miss Kaiser was selected in Kentucky by C. A. Durfee at the same time he bought McKinney, and sold as a yearling for \$800.

W. H. YOUNG,  
Room 625, Laughlin Bldg., Los Angeles.

### A. FLEISHHACKER & CO.

MANUFACTURERS AND DEALERS IN

Wrapping Paper, Paper Boxes, Twines  
ETC., ETC., ETC.

520 MARKET ST., SAN FRANCISCO.

Telephone: Exchange 109.

## Second Payment \$5.00 EACH

DUE AND MUST BE PAID BY APRIL 1, 1903, on entries in the Pacific Breeders Futurity Stakes No. 3, \$6000 for get of mares covered 1902, foals of 1903. Stake closed December 1, 1902.

### DON'T FAIL TO MAKE IT!

Remember the substitution clause: Should your mare prove barren, or have a dead foal, it will be easy to sell your nomination in case you have nothing to substitute.

### DON'T FORFEIT, BUT PAY UP.

F. W. KELLEY, Sec'y, 36 Geary St., S. F.

## Notes and News.

The Lodi track has been plowed up and will soon be planted to tree and vines.

It is said that the owner of Cresceus has been offered \$100,000 for his stallion.

George H. Ketcham last week declined the nomination (Republican) for the mayorship of Toledo.

The book of McKinney 2:11½ is full for the season of 1903, and over a hundred mares have been turned away.

The pacing gelding You Bet 2:07, by McKinney is now in the training stable of Harrie Jones, of Rushville, Ind.

During the past thirty years members of the Grand Circuit have distributed \$5,625,819 to campaigning horsemen.

A. B. Gwathmey, of New York, has recently purchased the mare Fannie F., trial 2:14½, from Pennsylvania parties.

Nettle King 2:20½, dam of The Abbot 2:03½, is heavy in foal to Chimes and will soon produce a brother or sister of the ex-king.

Dick Benson arrived at the Memphis track last week with thirteen head of race horses, including the string owned by M. E. Sturgis.

They are telling over in Pueblo, Colorado, of a yearling that paced an eighth in 17½ seconds recently. He was sired by Major Greer 2:14.

"Tales of the Turf" by William B. Fasig is the most interesting book that has been issued for many a day. It can be secured at this office for \$2.00.

W. L. Whitmore, proprietor of Mayview Farm, in Oregon, met with an accident at Portland recently while handling a young colt, by which his leg was broken.

Bob Gallegos, of Mission San Jose, has taken his two fast pacers to Pleasanton and will train them there this spring. They are Trilby by Direct and Diabla by Diabla.

Mrs. F. H. Burke has sent her three year old colt Search Me by Searchlight 2:03½ out of Wanda 2:14½ by Eros to Mills & Sanders at Pleasanton. He is a good trotting prospect.

Assembly Bill No. 584, providing for the protection of livery stable men and providing a penalty for the overdriving or malicious abuse of horses, has been signed by the Governor.

The Queens-Nassau Agricultural Society, which has a track located at Mincola, L. I., will open a 2:10 trot for a \$600 purse and a free-for-all pace for a \$500 purse and will charge no entrance.

J. E. Hubinger says he won in purses and in the betting ring \$62,000 with John Nolan 2:08 in 1898, when the son of Prodigal made his great trip down the Grand Circuit in W. O. Foote's stable.

The estate of Thos. H. Tongue, the Oregon Congressman and horse breeder who died a few months ago, will sell all the horses, colts and broodmares of the farm on April 7th at Portland, Oregon.

According to the *Rural Spirit* there was but one two year old pacer on the North Pacific Circuit last year that did not wear hoppers. This was the filly San Toy owned by Congressman Tongue.

Andy Welch denies that he has leased Charley Herr 2:07 for stud duty at Hartford. He simply negotiated with Mr. Cahill to take his horse to Hartford but the latter will manage him there on his own account.

By indulging a penchant to bebt,  
A "hossy" young man got in debt.  
He owed such a sumb  
He was forced to succumb,  
And is wearing his summer suit yebt.  
—Exchange.

Ed Benyon believes he will drive Walnut Hall 2:09½ a mile in 2:05 this season, and even if disappointed in this he is firm in the belief that he will rob Ralph Wilkes and Bingen of their five year old stallion crown.

The three year old pacer by Owyhee out of Bertha, dam of Diablo 2:09½, now owned by Mills & Sanders, showed them a mile in 2:15 one day last week. He promises to be the fastest of Bertha's celebrated family.

Martin Carter's McKinney filly Miss Georgie, that is out of George B. 2:12½ by Nutwood Wilkes, is showing more speed at Pleasanton every time she is given her head. Cecil worked her a half in 1:02½ on Wednesday of last week.

Charley Doble will go to Charter Oak, April 1st, with Frank Yokum 2:11½, Annie M. 2:16½, Susie S. 2:24½, Dorfmont 2:15½, Nellie Bly 2:19½, Orlando 2:25½, Awake 2:27½, Ozette 2:15½, Treble 2:19½, Jack D. 2:11½, and Invoice, a green pacer.

The number of Electioneer's sons that have already sired 2:10 speed is twenty-one, and the number of his grandsons that are credited with 2:10 performers is eleven.

It is said that trainer E. F. Geers has so high an opinion of Mr. James Butler's pacer King Direct that he has advised his owner to enter him in some of the big money events in the Grand Circuit this year.

Vilette, sister to Star Pointer 1:59½ and dam of Venora 2:15½, broke her neck while playing in her paddock at Ewell Farm in Tennessee, a few days ago. She was in foal to John R. Gentry 2:00½, by which horse she produced a filly last year.

There is a good demand for heavy horses—those that weigh from 1400 to 1700 pounds. Dealers find them very scarce and often go miles into the country to look at horses that are represented to be 1400 and over that are really 1300 and under.

Cicero J. Hamlin did not go to Florida this winter, as has been his custom for several seasons in the past. Mr. Hamlin is spending the winter in Buffalo and his health is reported as not of the best. The veteran breeder is in his eighty-fourth year.

The Hartford Futurity closes April 1st. The stake is \$15,000, and the winner of three heats gets \$10,500 of this amount. Every heat winner gets a stated amount for winning that heat, even though he is distanced in the next. It is the best stake ever devised.

The Chicago Horse Review received 1003 entries to its \$10,000 Futurity for foals of 1903. Palo Alto Stock Farm named fifteen mares in this stake and there were many others from California. The Review is to be congratulated on the magnificent success of its venture.

Owing to the unusually cold winter grass on the pastures has been short in California and stock has not done very well. During the past week, however, the growth of feed has been rapid and a change for the better can be seen in the appearance of all kinds of stock.

Joseph Depoister, of Fresno, Cal., writes us that he lost by death on January 25th, the stallion Harry Gear, son of Echo 462 and Clara (dam of Crown Prince 2:17½) by Chieftain 721; second dam Sally by Reynolds' Messenger. Harry Gear is the sire of the pacer Harry Logan 2:12½.

The auction sale of Rancho del Valle horses will not take place as announced. A man came to Pleasanton last week and made George Davis an offer for eleven of the twenty head. Mr. Davis accepted the offer and declared the sale off. The buyer wanted the horses for a stage route.

Mr. E. E. Smathers, the New York horse owner and amateur reinman, has been in California during the past week, reaching San Francisco last Sunday. Mr. Smathers owns Lord Derby 2:05½ and drove him to his record, which was made to a wagon. He will visit Pleasanton to-day in company with Budd Doble.

Bert Webster has a pacer in his string that is a regular "cuckoo." He is by Steinway out of Nola by Nutwood and is one of the consignment that Chas. Griffith will send East. The colt is a three year old and showed a half in 1:03, last quarter in 30½ seconds last week. He should be a good prospect for the Eastern buyers.

In the pedigrees of stallions or mares that are to be used for breeding purposes, producing sires and dams count. A dam that has produced several with fast records is worth more in a pedigree than one that traces back several generations but has failed to produce standard speed. In breeding it should be horse first and pedigree afterwards.

Ed Lafferty, who has been at Monterey for the past two or three months getting a bunch of trotters in shape for Mr. E. J. Molero, has removed the string to the San Jose track and will work them for speed during the spring. It is not Mr. Molero's intention to race his horses this year, but he may next, as there are some splendid prospects among them.

Horsemen in Japan seem inclined to test the merits of the Morgan family. If report is correct representatives of that distant country have been in correspondence with Joseph Battell, Esq., of Middlebury, Vt., in regard to specimens of this valuable family of roadsters. The Japs have already bought a number of trotting bred animals from the noted Village Farm establishment.

W. R. Johnson, the well known horseman of Humboldt county, recently visited San Joaquin county. While there he saw Mr. T. J. Drais' stallion Guy McKinney by McKinney out of Flossie D. by Guy Wilkes, second dam by Onward, and pronounces him the handsomest horse he ever put his eyes on. Flossie D. is to be bred to Zolock 2:10½ this season. Among the mares bred to Guy McKinney this year is Sadie Moor, a beautiful mare by Grand Moor, owned by Mr. Spiers of Angels Camp. Sadie Moor has a handsome filly at foot by Waldstein.

Harness racing will assume greater proportions over East this year than ever. The amount of money hung up on the Grand Circuit is greater than any previous year and the number of meetings to be given outside the big ring are more numerous than ever. Up north, the Oregon and Washington circuit has already been arranged and dates chosen and a very successful season is expected. California is the only harness horse breeding section that is behind with its announcements. Yet the owners are hopeful, as there are more horses in training than for years past.

The day Cresceus trotted in 2:15 he was driven to test his speed and endurance, not to see how much he could lower the ice record, but to trot close to 2:15, and he accomplished that task with ease. Eye witnesses stated that he could just as easily have scored 2:12, but the ice chipped out so bad that it was not thought prudent to send him anywhere near to speed.

Alta Genoa 2:14½, the chestnut son of Dexter Prince owned by G. Pierano of Lodi, is not a large horse, weighing about a thousand pounds, yet his get are uniformly large even from small mares. Several of his produce weigh 1300 and over and very few weigh less than 1100 at maturity. Alta Genoa got his record as a pacer, but the majority of his foals are square trotters.

Announcement is made that the Los Angeles Driving Club will hold its March matinee at Agricultural Park in that city, on Saturday next, the 28th inst. Races will begin at 1:30 P. M., and a large entry list is assured. The meetings of this club are the most popular of all sporting events held in Southern California, drawing sometimes as many as ten thousand spectators.

James Butler has lately added two splendid matrons to his select band at East View Farm. One of them is Bettine 2:14½, by Anteco 2:16½, out of Dairen 2:21½, by Harold. She has been bred to Direct 2:05½. The other mare is Strathbelle 2:14½, pacing, by Strathmore, out of Hope So, by Blue Bull. She has a youngster by Direct, which Mr. Butler also purchased. Strathbelle will be bred back to Direct.

There is a good prospect in training at Lodi, Cal., in the string of Walter Trefry. This is a four year old gelding by Silver Bow 2:16, out of Anticipate, own sister to Agitato 2:09. He is not only a good sized horse with style and good looks but he is a trotter having shown a quarter in 34 seconds with only two months work. He will be in the sale of the Mokelumne Stock Farm horses which takes place at Fred H. Chase & Co's yards 1732 Market street in this city during the last week in April.

Lon Maynard, of New York city, the owner of Walter Keim 2:11½, it is reported, has under consideration the shipping of his much-talked-of two year old Kentucky Futurity candidate, The Prime Minister, by Idolita 2:09½, dam Octarara, by Dictator, to Kentucky early in April to give the promising youngster the benefit of spring training. He has set his heart on winning a Futurity, and believes he has the material in this son of Idolita. If The Prime Minister goes to Kentucky it is likely he will join the string of Ben Kenney & Co.

The Haywards Journal says: There will be some fine racing at the Centerville half mile track on March 22d, when Haywards, San Leandro and Decoto will compete. There will be four contests. Two contests that great rivalry is already manifested in are between Tom Thumb, owned by F. Vagar of San Leandro, and Barney G., owned by F. Goulardt of Decoto. The other will be between John L., owned by M. Perry of Centerville, Taughy A., owned by Lorrie Caten of Haywards, and Little Topsy, owned by A. Edwards of San Leandro.

It is reported for Oregon that John Pender has sold his stallion Capt. Jones by McKinney 2:11½ out of a mare by Gossiper 2:14½ to J. A. Jones of Springbrook, Oregon. The price is not made public but is said to be a long one. Capt. Jones is a fine individual and one of the best bred of the McKinneys. His second dam is by Don Wilkes 2:24½ by Aleyone, sire of McKinney, his third dam by Mambrino Patchen and his fourth dam by Almont 33. His colts are showing up well in Oregon, a three year old filly getting a trotting record of 2:26½ there last year.

The Jeweler, a son of Athanio, is one of the stars in Ed Geers' string at Memphis. The Jeweler was the star trotter of the green division at Memphis last spring and worked several miles around 2:12. He is very fast and has the head and way of going which should make him a very useful race horse. Mr. Geers, it will be remembered, took a great liking to his sire, Athanio 2:10, when he saw him in California, and at his instance Athanio joined the Village Farm stable. The Jeweler partakes of the Tennesseean's fondness for the family, which means that nothing will be left undone to make him fit and ready. His dam is Jewel by Hamlin's Almont Jr., and he was one of the few foals got by Athanio before he was sold to Europe.

The Buffalo Driving Club announces the following early closing events to close with John B. Sage, secretary, on Saturday, March 28th, one week from to-day: Trotting, \$5000 for the 2:25 class; \$2000 for the 2:18 class and \$2000 for the 2:12 class. Pacing, \$5000 for the 2:25 class; \$2000 for the 2:14 class and \$2000 for the 2:08 class. The meeting will be held at the new Kenilworth track, Buffalo, New York. See advertisement in this issue for full particulars. The Buffalo Driving Club gives one of the best meetings on the Grand Circuit and horsemen will find there a warm welcome and fair treatment. Buffalo should not be left out of any horseman's itinerary who contemplates racing over East this year.

There is more truth than poetry in the following, clipped from an exchange, concerning the intelligence of that noble animal, the horse: "Far too many of the human family believe that the horse is only a 'brute,' to be yanked, kicked and pounded into submission at the pleasure or passion of the 'acephalous bossman,' who is trying to force his would-be faithful animal servant to perform duties which neither understand the foundation principles of, but both operating against each other and getting farther from the desired goal at every turn. It is a case of a man wanting to be a horse trainer not understanding the true principles of horsemanship; ignoring the natural laws of animal life, and the horse, not knowing what is wanted; a horse and man fight generally results with no advantage to the 'breaker' and certainly a damage to the horse."

## AGES OF FAMOUS THOROUGHBREDS.

## Norfolk Not the Oldest Stallion to Die in America.

LOS ANGELES, March 10, 1903.

LONDON BREEDER AND SPORTSMAN:—I find the following in the Thoroughbred Department of your last issue:

M. S. Gardner, owner of the Avondale Stud, who has been visiting at Hamburg Place at the invitation of John E. Madden, reports that though now twenty-eight years his great stallion Himyar, sire of the immortal Domino, is still the picture of health and will make a full season again this year. Himyar now ranks as the oldest thoroughbred stallion in active service in the country, and is one of the oldest horses ever imported into America. He is now a year older than was imp. Bonnie Scotland and Star Davis when they died, two years older than imp. Mortimer, Longfellow, imp. Sovereign and imp. Glencoe when they passed away; three years older than Pat Molloy, Asterfield, Lexington and imp. Leamington were when they died, and four years older than Spendthrift when he died. He is within one year of the age of the great Norfolk which broke the record among famous sires by living until he was twenty-nine years old.

The above is not correct. I can cite at least two cases of thoroughbred stallions in America that lived to a greater age than the famous son of Lexington and Novice, whose record at three-mile heats (made at Sacramento in September, 1865) is still unbeaten.

American Eclipse, foaled in 1814, died in Tennessee in 1846, at the ripe age of 32 years, having gotten five living foals in that year. He was 23 years old when he got Zenith, a horse that was deemed good enough to match, for \$5000 a side, against Miss Foote, a mare that had already beaten everything in the South but Reel. He was 24 when he got Counterplot, afterwards known as Brawler's Eclipse, the horse who got Nantura, dam of the famous Longfellow and grandam of Ten Broeck. The late Robert T. O'Hanlon trained Counterplot at the Lexington track; and I never laughed more heartily than I did at Colonel Sanders D. Bruce, in New York ten years ago, when he told me how Bob O'Hanlon put him up on Counterplot, one day in 1843, when he was about seventeen years old and the big sorrel horse tried to run away with him.

Imported Glenelg died at Mr. Tyree Bates' farm in Tennessee in 1899, aged 33 years. He was by Citadel (son of Stockwell and a brother to Repulse, who won the One Thousand Guineas) out of Mr. August Belmont's imp. mare Babta by English Kingston. Up to the close of 1883, you could hardly give away a Glenelg colt; and that is how Mr. Baldwin came to secure so many of his daughters for the Santa Anita stud, through the excellent judgment of his friend, Mr. Lewis R. Martin, now ten years dead. But the old story of "the stone which the builders rejected" repeated itself in the case of Glenelg. In 1884, he was premier sire of America, with \$98,682 to his credit; in 1886 with \$116,638; in 1887 with \$120,031; and for the fourth time, in 1888, with \$130,746, a value record that had only been beaten twice previously, by Bonnie Scotland in 1880 and by Leamington in 1881. There may be other instances of thoroughbred stallions having lived longer than American Eclipse and Glenelg, in this country, but I can't recall them just now. To show that Glenelg's merit, as a sire, did not rest merely upon the amounts of money won by his get, I will recall the number of races won by several of them, to wit:

Little Michel	84	Monitor	42
Glencoe	50	Strathspey	39
Pot-8-os	47	Post Guard	32
Los Angeles	47		

This makes a total of 341 races won by 7 horses, an average of over 48 each. I do not know of any other stallion in America that can show anything like this in the number of races won by his progeny.

Passing over to England, I find that Young Marske died at the ripe age of 29, as also did Alexander, Sir Oliver, Sir Hercules, Hermit and Jupiter; Dungannon, Meteor, Driver, Traveler, Waxy, Grimaldi, Comus and Alonzo, at 29; Pot-8-os, Delpini, Sir Peter, King Bladud, Diamond, Bobtail, Orville, Castrel, Dr. Syntax, Emilius, Glencoe, Birdcatcher, Orlando, Voltigeur, King Tom and Macaroni, at 27; Trumpeter, Star, Hambletonian, Stamford, Walter, Fyldener, St. Patrick, Pantaloon, Don Giovanni, Safeguard, Weatherbit, Surplice, Bold Dayrell, Rosicrucian, Syman and Tynedale, each 26; and Weazel, King Fergus, Dragon, Gohanna, Sorcerer, Waxy Pope, Tramp, Mameluke, Velocipedo, Slave, Melbourne, Marsyas, Flash in the Pan, Carbineer, The Dart, Dutch Skater, each 25. Stockwell was 21 when he died and Touchstone nearly 31.

Touchstone headed the list of stallions for five seasons, the last time at 24 years of age. Galopin, however, holds the record by heading the list, in 1898, when 26 years of age. Melbourne, then 23 years old, was premier in 1857; and Hermit, then 22, was first in 1851. But Touchstone was not only premier at 24, but

he was 26 when he got Soapstone, whose get won over \$20,000 in 1874. Newminster, who was premier for two seasons against three for Orlando, ranks above him for the reason that he got three premier sires—Hermit, Adventurer and Lord Clifden, whereas Orlando got none at all. The best showing made by any son of Orlando was in 1874, when Marsyas had £10,247 to his credit (through George Fredericks' victory in the Derby), being fourth to Adventure, Blair Athol and Thormanby. In that year Apology won the Oaks, One Thousand and St. Leger, which placed Adventurer at the top, of course. The male line of Orlando is as strong in America as it is weak in England and Australia. Is this startling difference to be ascribed to change of food and climate?

HIDALGO.

An English turf critic of some prominence in his own land not long ago had something to say of the deterioration of the American thoroughbred, and in a way which English critics of turf matters have spoke as with a voice of one in authority. As he sees it we are not breeding the kind of race horses that we ought to breed. We are sacrificing endurance to speed. Our race horses are nothing more than so many flashes in the pan—sprinters pure and simple. All this and much more have our thoroughbreds come to, but the English horse still stands on that high pedestal where he has stood for years and which the English jockey shared with him until he was cast into the dust by the superior skill of the American rider. Whatever this Englishman or other Englishmen may think about horses, it must be said that our breeders are breeding the kind of horses that we want, the kind of horses that our racing associations cater to, and so far as we may judge, the kind of horses that our public wish to see. Nor has it been demonstrated that our race horses do not possess this quality of endurance upon which so much stress is laid. We know that they have gone as far as they have been asked to go, that in private and in public they have done everything that has been demanded of them, and that they have shown speed and endurance of a quality as rare and as admirable as is to be found in the thoroughbred of any land.

If we have not been breeding the right kind of race horses in the last twenty years, what shall we say of our Salvators, our Longstreets, our Henry of Navarres, our Commandos, our Ben Holladays, our Advance Guards, our Racelands, our Banquets and the score or more of other horses that might be named? Were not these horses worthy of being classed as great thoroughbreds? Were they not capable of negotiating any route? Were they not up to any weight within reason? And speaking particularly in reference to the quality of endurance, what was it, if anything, they lacked along this line? This Englishman, with the superior knowledge which exists in his fancy if not in fact, may supply the answers to these questions. As for the critics and the horsemen on this side of the water it is safe to say that they will concur in the opinion that the horses named were worthy to measure strides with any company, in any sort of a race, no matter how fast the pace or how far the distance. We have not mentioned Ethelbert, Imp, Gold Heels, Hermis or several other tried performers whose names will readily recur to every man acquainted with American racing.

If our horses are deteriorating so rapidly and so greatly how comes it that Ethelbert in his Brighton Cup clipped seven seconds off a record that had stood for twenty years or more? This, too, with about fifty pounds more in his saddle than the previous record-holder carried when he made his mark. It is admitted that there have been improvements in the tracks, but we think it will be conceded that the man who makes a track a couple of seconds faster than it was before has done about all that it is given to man to do. In this connection it should be remembered that Ethelbert's performance was made over the regulation mile course, and that he did not have any sort of aid in the shape of a chute, such as now is to be found at some point on all of our tracks. It is a difficult if not an impossible proposition to measure the worth of the horses of one generation with the worth of the horses of another generation, unless we accept time as the standard of relative merit. And if we accept that standard we must unhesitatingly pronounce in favor of the horses of to-day. Rejecting that standard, we find in the performances of the horses of the present warrant for the belief that they are as great as if not greater than the best thoroughbreds that it was the fortune of the turfman of another generation to look upon. Nor do we see any reason to believe that our thoroughbreds, under equal conditions, are not as good as the thoroughbreds of any land—and we do not except England.

It is unfortunate for American turfmen who race in England that the handicappers of that country do not hold the American thoroughbred as lightly as does the English critic here referred to. It never has

been the custom of English handicappers to treat our horses with scant consideration. On the contrary, they prefer not to take any chances with them and, as a rule, have given them all the weight that was coming to them—and sometimes a little more. This, too, despite the fact that our highest class horses have been retained here and only the second-raters, or horses whose powers are on the wane, have been shipped abroad. We have sent some good horses to England, but not in this generation have we sent to that country a horse which demonstrated that he was the best we had. And yet some of our horses which have raced there have figured extremely high in the consideration of the handicappers, even when meeting the best horses that England could oppose to them. The most striking example of the truth of this statement is to be found in the case of Hon. W. C. Whitney's Kilmarnock, now doing duty at the La Belle stud in Kentucky. This horse shouldered his burden in most of the races in which he ran in England, and he gave a good account of himself when meeting England's best. Kilmarnock, good race horse though he once was, never was accounted a champion in his own country, and never was regarded as such. If the English handicappers held no higher opinion of the American bred race horse than the average English critic seems to entertain of him, Kilmarnock probably would have won many more races in England than he succeeded in placing to his credit while there.

Strangely enough English racing men generally seem to hold in high regard a horse to which we never gave much consideration. This horse was David Garrick, which was developed by John Madden. Mr. Madden sold him to the late Pierre Lorillard, and the latter owner shipped him to England. As a three year old David Garrick defeated Ethelbert in the Champion Stakes, run at Sheephead Bay, but that race never was regarded as anything more or less than a fluke of the most pronounced kind. Spencer, then in his prime as a rider, was in Ethelbert's saddle, and he rode the horse so badly that words must fail any man who would attempt to describe his work. Had he put up such a ride in a cheap selling race he would have to answer for it to the stewards and probably would have suffered a long term of suspension. But here was a \$25,000 stake in which there practically was no betting, for Ethelbert was a prohibitive favorite, and, look at it from any point of view, one could not find any reason why the boy should not have done his best. His best he undoubtedly did do, but in this instance he was the victim of one of those peculiar and inexplicable lapses which now and again come to every boy, no matter how great his skill or how steady his habits. Our horsemen never prized David Garrick highly, but in England he seemed to win that appreciation which was denied him here. One English critic went so far as to say that as a cup horse he was the best that America ever had sent to England.

It does not much matter whether Englishmen think our horses are improving or deteriorating. It is enough for us to know that we are breeding better horses than we ever bred before, that these horses are fleet of foot, that they are as stout of heart and that they perform more brilliantly than did the horses of twenty years ago.—Jno. Roden, Jr. in *Daily America*.

The difficulty between James Carruthers and Alexander Shields, the owners of Advance Guard, has been adjusted. Shields is now the sole owner of the famous "iron horse," having purchased Carruthers' interest for \$8750. Advance Guard will, therefore, carry Shields' colors in the big handicaps and other events for which he has been engaged. The settlement of the dispute is a source of satisfaction to turfmen and followers of racing, who thought that Advance Guard might be shut out of his engagements because of doubtful registration. With the disposal of his interest in Advance Guard, Carruthers retires from the turf temporarily. Shields is now the sole owner of a formidable stable, consisting of Advance Guard, Prince of Melbourne, Andy Williams, Hunter Raine, Zoroaster, Young Henry and a bunch of good two year olds, all of whom have been wintering well at Bound Brook, N. J.

"Horses in Training 1903" will be published April 1st. It will contain a complete list of the horses in training (including every two year old registered with the Jockey Club, nearly 4000—a new feature) in the East and West, giving name, age, sex, color and pedigree, as well as the owner, trainer and stable jockey. For reference purposes the book will be invaluable. Price \$1.00 bound in leather, postage prepaid. Send in your order at once, as only a limited edition will be published. Money must accompany the order. Address H. A. Buck, 571 Fifth Avenue, New York.

Jackson's Napa Soda untangles the feet.

## ISLAND BRED JERSEYS VS. AMERICAN.

## "Old Timer" Contrasts Their Characteristics: Giving the Strong and Weak Points of Both.

There can be no doubt in the mind of any unprejudiced judge, that in perfection and beauty of type the Island bred Jerseys, as a whole, surpass the American bred ones. It may reasonably be asked, "what is perfection of type as applied to the Jerseys?" It is the well dishd head; the large, prominent, limped eye; the very deep paunch; the wedge shape; the evidence, through the structural form, that the feed will, after supplying the necessary sustenance to the body go into the pail, and not on the carcass; above all, the large and well balanced udder, full in front and well out in rear; for I agree with Mr. Cooper when he says "no bag no cow."

No one who has made a study of the Jersey imported to this country in the past two years can deny, that as a whole, they fill the requirements of perfection of type. They are noted for their dishd and beautiful heads; for their very straight backs to tail setting; for their deep paunches and wedge shape; for their deer-like appearance, which is peculiarly characteristic of the Jersey; and above all, for their uniformly large front udders.

Some may claim the pick of the Island have been brought over. This is true. But the Island has less than one-tenth the number of Jerseys (registered and unregistered) that are registered in this country. Over two hundred head were imported last year to this country. Even with ten times the number of Jerseys here, it would be a very difficult task to pick out an equal number to those imported that would equal the imported in perfection of type. The Island breeders have bred for straight backs and full fore udders, and they have unquestionably succeeded in breeding animals possessing these characteristics. What has enabled them to do so? I believe it is largely due to their system of registry (called on the Island "qualification"). No animal is "qualified" for entry in their herd book until it has been examined by a committee appointed for that purpose, and has been passed upon by it as possessing the necessary perfection of structural form to entitle it to "qualification"; or the animal has been a prize taker at the Royal or Parish show; or has received a certificate of merit in the public milk and butter contests. Where the competition is so keen as is the case at the Island shows, the fact that an animal has been awarded a prize warrants very superior individuality. Another regulation which tends to produce very superior animals is, that by which bulls to whom prizes have been awarded at the Royal, must be kept in the country for a stated time varying up to a year, and must allow a certain number of services at a nominal fee. The Island being so small it is possible for any breeder who desires to do so, to send his females for service to the prize bulls.

Are the American bred Jerseys as perfect in type as the Island bred animals? I think not. If not, why not? In the first place Jerseys on the Island are tethered, and their exercise is limited. In this country they are allowed to roam the pasture at will, and in that way acquire a coarser bone. In the second place—the animals on the Island are not fed any grain. Their chief fodder is grass, roots, and the leaves of the cabbage, which grow to the height of six feet and more. In this country they are fed a regular grain ration. This tends to coarseness. I believe, however, that the system of registry here has more to do with the deterioration in type than any other one thing. Under our system any animal, whose sire and dam are recorded in the A. J. C. C. herd register can be registered, regardless of its individuality. What is the consequence? We have in our herd registers animals with sloping rumps, cut front udders and in other respects wholly deficient in perfection of type. I believe I am within the mark when I say, that it would have been for the betterment of the Jersey interests of this continent if one-third of the animals who have been recorded by the A. J. C. C. had been consigned to the butcher.

In the seventies we had a most excellent type of Jerseys. They were very close up to importation, and pertook largely of that type. Since 1880 we have gone through three distinct epochs. In the early eighties and for some years afterwards the demand for Jerseys was based purely on pedigree. Pedigree is a most desirable and in fact requisite essential; carrying as it does the power of reproduction, in kind; but if that kind is of the undesirable type we should not reproduce it. This was exactly what was done when breeders were "pedigree mad." When butter records began to play so important a part in the Jersey kingdom, the sons of high tested cows were eagerly sought to head herds. Butter tests of dams and female ancestors were looked upon as the only requisite. Their structural form was almost dis-

regarded. To transmit the dairy qualities of great producers is in the highest degree commendable; but the fact was apparently lost sight of, that defects in structural form would also be transmitted. As a natural sequence we find in far too many of our Jerseys sloping rumps and deficient fore udders.

A natural reaction has set in. To command the highest price on the market to-day, a Jersey cow must be very handsome in every way; and the more perfect she is in structural form, in size and shape of udder the more money she will bring her owner. In fact, in the auction ring to-day, butter tests do not influence prices to any appreciable degree. If a cow or heifer is very perfect in structural form, which of necessity carries with it evidence of dairy ability buyers bid promptly and persistently for her ownership, regardless of any past test. They are willing to bank on their own judgement.

As is usually the case there is a tendency to go to the extremes in this matter. To maintain a herd on the profit basis, it must first of all possess good dairy qualities; otherwise the cost of maintenance will eat up all profit. A good herd of Jerseys, should from the product of the udder show each year a handsome profit, apart from the sales of increase, and the more perfect the increase is in structural form, the greater will be the prices realized for it.

For years I have contended that beauty and utility should go hand in hand, and that to reap the greatest profit and pleasure, our herds must be composed of animals who are large producers and at the same time possess that beauty of type so much in demand. I am referring to breeding herds.

How do Island bred Jerseys compare with American bred as producers? The latter have to their credit far larger tests both in milk and butter than the former; yet at the Royal shows both on the Island and England some of the yields in milk and butter have been very large, surpassing any records made by Jerseys at any show in this country. One of the striking features of the yields of Jerseys on the Island at public trials is, that a greater amount of milk is required to a pound of butter than is the case with American bred Jerseys. This, I think, is due to the different systems of feeding in the two countries. On the Island no grain is fed. In this country it is the staple article.

Considering them as a whole, wherein does the Island bred Jersey excel the American bred? The answer is—in beauty, in perfection of type, especially in head, back, rump and paunch and in the shape and size of fore udder. On the other hand the American bred excels the Island Jersey in quantity of milk and butter, in apparent constitution and in ability to assimilate a goodly grain ration.

Comparing one with the other, wherein is either deficient? The Island Jerseys are deficient in apparent constitution (I use the word apparent advisedly, for it is more imaginary than real, for after acclimation this apparent lack of constitution passes away to a great extent); lack of ability to profitably assimilate as large a grain ration as our Jerseys do. This is not remedied by acclimation. The American bred Jerseys are in far too many cases coarse, lacking the beauty the Island bred have; too many have very plain heads, sloping rumps and deficient fore udders.

Can the two be crossed with advantage? I believe so. A cross of the Island bred on the American Jerseys will tend to improve the heads, back, rumps and fore udders of the latter and add very materially to their beauty, without materially decreasing the product at the pail and churn.

Three public sales of imported Jerseys will be held this spring. The first to be held will be that of Frank C. Ward, consisting of about 75 head, principally young cows and heifers. The date of sale is April 15th, at Hoboken (across ferry from New York City), N. J. This importation is a most superior one. In making the selection Mr. Ward was not unmindful of the opinion, so often expressed by American breeders, that the Island Jerseys lack in constitution. He has selected animals of splendid constitutions. Especially is this the case with the two year old heifers, of whom there will be about 25 by the date of sale. The animals composing this herd have the characteristic Island front udder, very full and broad and well rounded. A careful examination of the herd shows that, barring a couple of mature cows, every one of those in milk have very perfect front udders, and every heifer in milk has a wonderfully perfect fore udder; in fact, their uniformity in perfection of udder is truly astonishing. Even the yearling heifers not in milk show this development of front udder. The mature cows are very deep cows, some of them milking as high as 42 and 46 pounds at flush, and some of the heifers milk 35 pounds a day with first calf.

I most strongly urge all lovers of a very perfect type of Jersey not to miss this opportunity of studying the characteristics of the Island Jerseys as demonstrated in the Ward herd. They will find their time well spent and will, I am sure, return home satisfied they have enjoyed a great treat.

OLD TIMER.

## The Hartford Futurity \$15,000.

On April 1st, the now famous Hartford Futurity, opened by the Charter Oak Park will close with H. W. Wilson, Secretary, Madison Square Garden, New York, with an initial payment of \$5 per mare.

The value has been raised to \$15,000, and the entire paid-up starting fee amounts to but \$35, which makes it by far the most liberal event of the kind on record on either the running or trotting turf.

The universal demand of breeders and campaigners of colts for reform in the methods of racing youngsters has been met by making this Futurity a three-heat race,—practically three dashes, and paying each colt for what it wins, when it does the winning. A colt winning the three heats gets \$10,500—more first money than in any similar event. A colt winning first or second in any heat, and unfortunately distanced in a subsequent heat, gets the money it won, and does not have to go to the barn with a record and no money hung on to it.

Read the advertisement in this issue, which gives all details, and send to the secretary for blanks, and make your entries early and often.

## Our Front Page Picture.

On the front page of the BREEDER AND SPORTSMAN to-day is a photo engraving of Emma, a young Jersey cow imported by Frank C. Ward of White Oak Ridge Stock Farm, Melburn, New Jersey. The sire of this cow, Senator, P. 2484, is an inbred Golden Lad. Her dam is of Welcome and Farmer's Glory strains. Emma recently calved and is now milking over 18 quarts. She will be sold with the entire importation of Mr. Ward's, April 15th, near New York.

Gold Heels is missing. While deputy sheriffs have been taking possession of the horses belonging to E. J. Arnold & Co., they have been unable to lay hands on the Suburban winner of last year. The much-talked-of son of The Bard-Heel and Toe has been spirited away and is at present supposed to be hidden on a farm by one of Arnold's friends, who is ready to ship the great horse away at a moment's notice. Under the circumstances it is unlikely that Gold Heel will be seen on the turf again, at least for some time to come. In all probability some breeder will ultimately secure the horse for the stud, where he would prove of more value than on the track, in view of his uncertain condition.

Burns & Waterhouse were successful in winning the first two year old stake of the season with a filly of their own breeding. The Morris pair, Rapid Water and Precious Stone were popularly supposed to have a cinch on the race, but Precious Stone ran out at the head of the stretch and Rapid Water had all he could do to secure the place from Celebrant. The winner came from behind and ran a game, honest race, winning by half a length in a hard drive. Rowena, as she is called, is a daughter of Altamax from Picnic, the dam of Recreation.

At J. B. Haggin's Elmendorf Farm, near Lexington, the race mare Connemara by Stratford-Tara, has foaled a bay filly by imp. Bathampton. The youngster is a half-sister to Killashandra, winner of \$16,810 on the turf for W. C. Whitney. Connemara won upward of \$20,000 on the turf.

**WILL NOT SCAR OR BLEMISH.**

**GOMBAULT'S CAUSTIC BALSAM**

Is the safest and most effective lotion or blister for ailments.

**HORSES and CATTLE**

and supersedes all cauters or rings.

It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for our certificate—careful testimonials, etc. Address:

**THE LAWRENCE-WILLIAMS COMPANY** Cleveland, Ohio

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### AT THE TRAPS.

Trap shooting is going to have a big revival on the Coast this year.

At Ingleside to-morrow the live bird shooters will gather at an open-to-all shoot.

The blue rock section will be opened for a hot contest between a number of the cracks who will shoot for the Bekeart challenge cup. Nauman the present holder, G. W. Gibson, Jack Fanning, Harvey McMurchy, Otto Fuedner, C. A. Haight, W. J. Golcher and Captain Whitworth will probably be among those in the race.

The Empire Gun Club members will shoot out the regular club program to-morrow at Alameda Point. These events were postponed March 1st by reason of inclement weather.

The Union Gun Club members opened the club season at Ingleside last Sunday on blue rocks. The scores in the different events were the following:

Club shoot, 25 targets—Hoyt 19, Janssen 13, McCutchan 19, Blanchard 18, Golcher 20, Tilleson 8, "Slade" 23, Sylvester 20, Iverson 18, Fuller 19, Cooley 18, Whitworth 21, Kirsch 20, Masterson 17, Lewis 9, Daniels 19, Gordon 19, Knick 15, Burns 21, Walpert 23, Pizzani 19, Shreve 11, Gibson 20, Carroll 20, Herring 18, Muller 16, Walsh 11, Barber 11, Eggers 19, Robertson 19, Finocchio 17, Wallam 16, Westphal 11, Robertson 20, Hansen 9, Davidson 8.

Ten targets—Blanchard 8, Daniels 10, Masterson 5, Barber 3, Walsh 3, Westphal 1, Finocchio 7, Carroll 5, Gordon 6, Robertson 10, Sylvester 10, Knick 5, Burns 9, Muller 9, Hoyt 8, Iverson 8, McCutchan 9, Eggers 4, Walpert 9, Gibson 10, Hyde 4, Birkhardt 6, Saunders 1, Millard 7.

Medal handicap race—

Name.	H'd.p.	Total.
Gordon.	27	22
Cooley.	27	22
Hoyt.	27	27
Masterson.	27	15
Iverson.	27	27

Gibson.	26	22
Blanchard.	27	16
Haight.	25	22
Purdy.	25	22
Whitworth.	25	18
McConnell.	25	25

Ten targets—Whitworth 8, Golcher 7, McMurchy 6, Shafter 9, Bekeart 7, Haight 7, McCutchan 8, Iverson 8, Murdock 9, Knick 7, Walpert 6, Carroll 6, Fuller 8, Gibson 10, Purdy 10, Blanchard 10, McConnell 9, Sylvester 10, Pizzani 8, Daniels 9, Robertson 8, Harrison 6, Muller 6, Burns 8.

At the College City Gun Club shoot last Sunday, "Edwards" was high gun in the gold watch special race. Reed won the practice medal shoot. Forster made the highest score in this race, but shot as a guest of the club. A number of practice events were also made up and shot. The scores for the day were:

Event No. 1, gold watch contest, 25 targets, 50 cents entrance, 16 yards—

Schmidt	10111 10110 10001 01010 11010-14
Hutton	11011 01111 11011 11110 01110-16
Hoyt	11111 11111 11011 11110 01111-21
DeMerritt	00011 00111 11001 01011 11011-15
Just	01111 11111 11011 11111 01111-21
Barre L.	11110 11101 11001 01111 11011-17
Chick	11010 11101 11111 01110 11111-21
Edwards	11101 11111 01111 11111 11111-23
Reed, W.	10011 10110 11000 01010 01011-12
Schmidt, Ed.	10001 10111 00001 01000 10101-9
King	10001 10111 11110 11111 11011-18

Event No. 2, practice medal shoot, 25 targets—

Chick	11011 01111 11011 11111 11001-20
Schmidt	01100 11111 01110 00010 11001-14
Hutton	10100 01101 11111 11010 10101-16
Reed	11111 11111 01111 11111 11111-23
Just	00111 11111 11111 11111 01111-21
Patzker	11011 00110 00110 11001 01010-13
Schmidt, Ed.	11011 10111 11001 11001 01101-17
Edwards	00010 11010 01110 10000 10111-12
Forster	01111 11111 01111 01111 11010-20
Mott	11111 11110 11111 11111 11111-24
	01110 01100 10110 11010 01101-11

Practice shooting, 25 targets—Schmidt 16, Chick 23, Mott 12, Hutton 21, McLean 15, Newcomb 14, C. Baird 18, King 13, Just 18, Reed 21, Newcomb 15, McDaniels 10, Hutton 17, Poole 14, King 7, Newcomb 15, Foster 21, Edwards 21, Hutton 17, Rud 30, Poole 20, McLean 16, Potter 20, King 18, Hutton 12, Rud 23, Foster 21, "Edwards" 21, King 15, Rud 21, Edwards 21.

Practice 1 targets—Just 14, Hutton 17, Rud 24, Edwards 17, C. Baird 16, Newcomb 15, Just 12, Reed 13, Hutton 12, McLean 13, Edwards 11, DeMerritt 10.

At Sacramento, opening shoot of the Washington Gun Club was held on the Kimball & Upson grounds on the 15th inst. A very large attendance of shooters and visitors being present.

The following scores are only the best shot by each contestant in each event. Monte Newbert and J. W. Hughes won the club honors by breaking 22 each in the main event. Shore made a "straight" in the 15-bird event, as also did Williams in the 10-bird event. Following are the scores:

Club shoot, 25 targets—Woods 21, Rust 19, Moon 13, Carney 15, Elzohr 17, Stevens 21, Kramer 14, DeMerritt 18, Trumpler 9, Williams 21, Mathews 20, Shore 20, Hagerty 16, Reichert 17, Newbert 22, Becker 17, Perkins 15, Niran 11, Bohn 15, Hughes 22, Blair 20, Peek 21.

Ten targets—Wilson 5, Baker 6, Reichert 8, Baker

6, Trumpler 5, Newbert 9, Heilbron 8, Hagerty 9, Reichert 5, Kimball 4, Adams 3, O'Connor 1, DeMerritt 7, Moore 6, Williams 10, Woods 6, Rust 6, Baker 8, Stevens 9, Shore 9, Carrey 7, Perbins 2, Kramer 5. Fifteen targets—Baker 12, Kramer 6, O'Connor 2, Newbert 9, Adams 9, Shore 15, Mathews 10, Trumpler 7, DeMerritt 12, Kimball 4, Hagerty 11, Reichert 10, Heilbron 10, Rust 11, Woods 9, Reichert 10, Stevens 13, Shore 11.

It is announced that a live-bird shoot will be held at the Agricultural Park grounds to-morrow, under the auspices of the Sacramento Live Bird Club.

Last Sunday the Oak Park Gun Club of Sacramento held its second blue rock shoot for the season, although the day was raw and windy some excellent scores were made. Newbert and Brady carried off the honors with a score of 24 and 21, respectively. A number of the shooters left early to attend the opening shoot of the Davisville Club. The following are the scores:

Club shoot, 25 targets—Shaw 12, Vanderford 14, Woodworth 13, Fical 10, Amber 13, Ralphs 9, Newbert 24, Davis, Sr., 19, Vetter 18, Stevens 18, Gusto 18, Brady 21, Wilbur 20, Davis, Jr., 16, Kerr, Jr., 9, Treganza 17.

Ten targets—Davis, Sr., 8, Vetter 8, Newbert 8, Stevens 8, Gusto 9, Vanderford 7, Newbert 9, Vetter 6, Brady 7, Woodworth 9, Fical 4, Gusto 5.

Ten targets—Kerr, Jr., 5, Wilbur 6, Brady 8, Fical 8, Traganza 4, Woodworth 7.

Ten targets—Fical 8, Davis 9, Amber 7, Wilbur 6, Woodworth 6.

Ten targets—Woodworth 4, Brady 7, Fical 7, Kerr, Jr., 6, Davis, Sr., 6, Wilbur 7.

Ten targets—Kerr, Jr., 8, Fical 6, Amber 8, Davis, Jr., 4, Shaw 3.

Ten targets—Brady 7, Wilbur 9, Kerr, Jr., 3, Davis, Sr., 9, Shaw 4.

The blue rock shoot of the Davisville Gun Club last Sunday was interesting, and was attended by many Sacramento shooters. F. M. Newbert and J. Gusto carried off the honors as well as most of the cash, both either winning the first and second purses or dividing them. In the team shoot the Capital City blue rock team won, breaking 73 out of 90, Dixon 70 and Davisville 61. It was composed of Newbert, Vetter, Just, Stevens, Gusto and Hughes. Upson, Blair, Webber, Ruhstaller and Morgan of Sacramento were also in the running, while Guggenheimer, the crack-jack of Davisville, was lost in the woods with any goods.

### Striped Bass Club Casting Tournament.

F. E. Daverkosen and James Lynch won the prizes at the San Francisco Striped Bass Club tournament on the 15th inst. Three events, long distance with 2½ ounce sinkers, distance with 1½ ounce sinkers and accuracy, casting at plates and using 1½ ounce sinkers.

The contest took place on open ground, a lane thirty feet wide was marked off on the green sward. In the accuracy event the contestants each made five casts at six plates placed at 50, 75, 100, 125 and 150 feet distant from the scoring line.

The prize for long distance 2½ ounce sinker was won by James Lynch who scored 206 feet. The prizes in the other two contests were won by F. E. Daverkosen. The judges were: Dr. Geo. Gunn, W. A. L. Miller, Jas. S. Turner and W. S. Turner.

The scores made and total percentage were the following:

	Long Distance 2½ oz sinker	Accuracy per cent	Distance 1½ oz sinker	Total per cent
F. E. Daverkosen	163 ft	87.84	130.4	164.12
J. Lynch	206 ft	82.2	114.6	96.4
F. W. Shattuck	168 ft	88.84	50.2	65.52
C. H. Kewell	125 ft	50.4	69.6	60
N. E. Mead	135 ft	62.72	47	54.86
Geo. Walters	100 ft	71.4	35	53.2
S. A. Wells	174 ft	56.84	37	51.82

### San Francisco Fly-Casting Club.

The San Francisco Fly-Casting Club members met at Stow Lake Saturday afternoon for the second Saturday contest in the classification series. Four regular events were carried out, thirteen split bamboo artists taking part in the competition. Fair weather conditions and the southwest wind prevailing were favorable to the work, as the good averaging scores proved.

In the delicacy event, every fly-caster but one, a new member, made an excellent showing of over 83%. Col. C. G. Young was high hook with F. H. Reed very close up. In accuracy casting at buoys in the water, 40, 45 and 50 feet distant, "A. B. Carr" proved the most perfect, Col. Young being second. In long distance casting, T. W. Brotherton put out his line 116 feet, E. A. Mocker cast 101 feet and C. R. Kenniff scored an even 100 feet. The scores in the bait-casting contest shows a marked improvement all round; C. R. Kenniff again beat his world's tournament record, scoring within less than two points of perfect. Col. Young, T. W. Brotherton and "Carr" were close up to the champion's work.

On Sunday morning the club members in the contests numbered sixteen. Among the new faces this season were Chas. Huyck, G. W. Lane and J. O. Hanon. Harry Golcher was on top in long distance with 120 feet, four other anglers also went over the century mark. The delicacy scores show an improvement in the high standard set at the season's com-

mencement. Lure casting also shows a well developed improvement, five men out of seven entered scored over 90%. Nearly 50% of the class in accuracy also scored over 90%.

When it is taken into consideration that the delicacy contest, in particular, is conducted under more rigid conditions than prevailed last season, the results shown are certainly good. The general average, so far, for both the veterans and novices bids fair to bring out several record breakers before the season is much older.

The scores for both days are as follows:

SATURDAY CONTEST No. 2—Stow Lake, March 14, 1903. Wind southeast. Weather fair.

Judges—Messrs. Kierulff and Reed. Referee, Dr. F. J. Lane Clerk, Mr. Brotherton.

Events	1	2	3			4				
			a	b	c					
Young, C. G.	96	88	8-12	94	91	8-12	92	10-12	97.5

Lane, G. W.		76	8-12	86	76	8-12	81	4-12	
Golcher, H. C.	130	87	4-12	87	4-12	89	2-12	88	3-12
Mansfield, W. D.		93	4-12	94	4-12	89	2-12	91	0-12
Kierulff, T. C.	88	92	4-12	91	8-12	82	6-12	87	1-12
Lane, Dr. F. J.	88	82	8-12	82	4-12	78	4-12	80	4-12

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

### FEATHER AND FIN.

Although the close season on wild ducks, quail and other varieties of game is now on, sportsmen still find employment for the gun. Recently Tomales Bay has been frequented by thousands of wary black brant, which furnish good sport to the hunters in boats. These birds can only be brought down at long range and with heavy ten-bore guns loaded with No. 2 shot. It is not unusual to drop these black sea geese at 100 yards. The birds have not been in good flavor, however, the grass upon which they fed being covered with herring spawn, which gives the geese a decidedly fishy flavor.

Among those who have enjoyed black brant shooting were Al Wilson and a party of sportsmen.

George Evans, Tom Moltzen and Will Ryder returned last week from a three day's brant shoot on Tomales bay near Hamlet.

The boys put up at the well known Moltzen ranch and reported that there are countless flocks of these fine birds in the bay but were very hard to get at. B. B. shot and four drams of powder were the only effective load on this occasion.

English snipe shooting is much in vogue. Near Novato and Ignacio can be found some good patches for a day's shooting at the long bills. It is necessary, however, to get permission to shoot over the best places within easy access from this city.

Robins are reported to be plentiful in the Santa Clara valley, many San Jose sportsmen have bagged lots of the red breasts recently. These birds, it is claimed, have done much damage to orchards. On the contrary, may ornithologists state the birds do more good than damage in the long run.

The canvasback duck, as well as other varieties, is a knowing bird. Within a few days after the close of the shooting season the ducks seemed to understand that they were immune from the gun. On the line of the North Shore Railroad along the muddy shores of Richardson's bay, canvasback ducks could daily be seen nonchalantly preening their plumage within a stone's throw of the trains as they passed by. The same conditions practically existed on the shores of the bay off Sixteenth street and along to Emeryville, as is witnessed daily by thousands of sports who play long shots on ponies instead of ducks.

The canvasback have to a great extent gone away, but we still have many big bunches of bluebills with us. Parties on the bay in boats can get within almost reaching distance of the birds at times.

Stow lake in Golden Gate Park is the resort of mallards, spoonbills and canvasback that are surprisingly tame.

### Opening of the Trout Season.

April the first, and you can catch them, or have fun a trying. The makers of Trout Tackle have devised many new and useful articles for the anglers, which may be seen at Skinner's, 801 Market St. S. F. Information as to where to go, how to get there, and the condition of the streams cheerfully furnished. Don't wait until the last day to have your rods and tackle repaired in a hurry.

During a boat trip last Sunday about the shores of Belvedere peninsula, Angel Island and the Marin shores on the straits and near California City, a number of wounded and disabled sea gulls and scoter ducks were noticed.

These poor birds are not protected and have been the target for every one with shotgun, rifle or pistol. The wanton destruction of these non-game birds is inexcusable and a species of cruelty that should be under the ban of the law.

The San Francisco Striped Bass Club at a meeting held last week decided to appeal to the State Board of Fish Commissioners with the request that the commissioners take action to stop the pollution of the water of San Francisco and San Pablo bays by various oil refineries and oil-burning vessels.

The alleged evil complained of is the dumping and piping of waste petroleum products into the above-named waters. It is claimed that the waters and banks of the Oakland estuary, the adjacent marshes, the Alameda bay shores and the shores and waters contiguous to San Leandro bay, as well as an immense stretch of the shore and marsh land in the vicinity of San Pablo are now vast depositories of a slimy oil refuse that is destructive of fishes, crustaceans, bivalves and even vegetation, and further, that the nuisance has become so pronounced as to meet with protest from the owners of boats and vessels, the bottoms and sides of which become slimy and discolored.

The dumping of matter deleterious to fish life is a violation of the State law. It is proposed by the bass club to procure the co-operation of all of the fishing clubs, prominent anglers, yacht clubs and owners of pleasure boats and launches in the effort to abate the present custom.

This condition of affairs across the bay, it is believed, will soon be similar to that which prevails in the waters at Bergen Point, New Jersey, and about the Kill von Kull, where the many oil refineries have been blamed for the nasty condition of the waters in those parts of New York bay, where once food fishes were prolific, but are now only a tradition.

The "high hook" medal, an elegant solid gold trophy designed by "Midnight" Miller, is now the prize of contention among the members of the San Francisco Bass Club. The medal can only be won by the lucky fisherman who catches the largest striped bass. This particular honor is elusive and has an appetizing element of chance connected with it. To day a member may be the proved captor of a big fish and, after establishing his claim and having it properly recorded, receive the medal and wear it—to-morrow another and rival fisherman may yank a larger fish out of the water and relegate the first angler to obscurity for the time being. Sometimes a lucky member has worn the medal for several months before having it taken away. Sid Hall proposes to donate a high hook medal for the carp record. It is conceded that he will be able to wear the carp trophy longer than anyone else, as he is credited with being the club expert on the "Petalum creek trout."

Advices from a Portland sportsman relates that the duck shooting season on the Columbia river closed March 1. This season more than any former one has emphasized the success of baiting ponds, etc., to attract the game. Two bushels of wheat were fed daily on one preserve on the lower Columbia river, about thirty miles distant from Portland, and on these grounds it was possible for three hunters, each, to bag the lawful limit at any time during the entire season. In Oregon fifty ducks daily is the legal individual bag.

During the best month of the shooting season, which was November, probably more ducks were killed by Portland hunters than in any one month since feeding of the game was adopted. This is encouraging, sportsmen now feel that their time and money have not been wasted, and that a certain outlay will insure a moderate return of sport.

This season has proved more surely than ever that the lower Columbia is better than that portion of the river above the mouth of the Willamette. Of the total of 150,000 ducks, which it is estimated were killed by Portland hunters this season, about 75 per cent were shot below the mouth of the Willamette. On one trip of the hunters' steamboat from the lower river district, 3000 ducks were counted. Sixty-five hunters were on board.

Duck shooting is getting to be expensive sport, even for Portland sportsmen, who are regarded by their Eastern brethren as having plenty of game. In the first place it is now necessary to rent lakes, and the owners of property in good shooting locations are quick to recognize its value and to ask a price according. After that comes the necessity of sowing tons of wheat in the lakes so that the ducks will stop and feed, and then the expense of guns and ammunition, besides transportation and the pay of a caretaker of the preserve is a large one.

In a small party of sportsmen, where the expense is reduced to a minimum, it is estimated that the cost is from 60 to 75 cents a duck, and where the sportsmen have enough so that they do not care to lop off expenses the cost goes as high as \$2 a duck.

The late Charles Precht bequeathed his shooting paraphernalia and fishing tackle to several of his intimate friends; sportsmen who had been his companions for years past on many a pleasant outing in quest of fin and feather. Shortly before passing away and fully realizing that the end was near, he wrote a farewell letter to Charles F. Breidenstein, which contained, among other things, his wishes as to the disposition of his guns, rods, etc. Poor Precht knew full well that his days were numbered, for in the opening sentence of the letter he wrote: "When you read this I will be a dweller in the happy hunting grounds where mayhap the trout and bass are larger, more plentiful and sweeter flavored and where the quail and

snipe are more numerous for the shooter than they are here." In accordance with his late friend's desire, Mr. Breidenstein delivered to Frank Dolliver a fine bass rod, reels and tackle, to George Twitchell a greenheart fly rod, a well known rod that has taken many a basket of nice trout out of Sonoma creek. Louis Rondeau was remembered with Precht's favorite fly-rod and fly-hook. Charles Reynaud's memento was a Kentucky reel. Precht's daughter will keep a handsome 22-caliber rifle and the first fly-rod he ever owned. Mr. Breidenstein received a Parker hammerless shotgun, a pair of fishing boots, a rod and a hunting suit, which he will treasure for the pleasant associations of which they will always be a congenial reminder.

## DOINGS IN DOGDOM.

The California Cocker Club has invited Dr. Clarence Selfridge of Oakland to judge Cockers. There was a leaning toward Chas. Mason on the part of some members, but finally a local judge was decided upon.

The premium list for the San Francisco show will be issued next week. There will be given medals for the regular classes. The only cash prizes offered will be for kennels, of not less than four dogs. The bench show committee have already secured a large list of elegant and valuable specials—a list far too long to enumerate here.

A number of local dogs will go north from here. Wandee Kennels will send Ivel Doctor, Wandee Blizard, Wandee Revelry, Wandee Mayse and Wandee Jester. Nairod Kennels will send the young St. Bernard bitch Gypsy Lee II. and the Cocker Plumeria Beau II. Plumeria Kennels will send possibly one or two Cockers. Mrs. W. C. Ralston will put Little Dorrit and Hampton Promise in the running. They will make it warm for the northern dogs. Woodlawn Kennels will have Ch. Woodcote Wonder, American Belle, a Woodcote Wonder-American Belle bitch puppy, Miss Ethyl Hagar's Boston Terrier Nifty, the Irish Terrier Endcliffe Paddler and C. K. Harley's Bull bitch Lady Bethel.

Thos. L. Lewis purchased this week from William Wallace a good looking puppy dog Cocker Spaniel out of Nairod Audrey and sired by Plumeria Beau II. The puppy will be sent to Wm. Merchant, Marshfield, Or.

The Seattle Kennel Club announces in our kennel ads. that the eighth annual show of the club—a four day exhibition, will come off April 8, 9, 10 and 11th. George S. Thomas has been selected as the judge for all breeds. Mr. Thomas has had the ring experience and also that of years in breeding, exhibiting and dealing in certain breeds that should make his judging at Seattle satisfactory to all concerned.

Chas. McAlister, the club's secretary, can be addressed at the City Hall, Seattle, Wash., for any and full information about the show, premium lists, entry blanks, etc.

The Pacific Bull Terrier Club, we are sorry to state, is defunct if Secretary Rountree is reported correctly. This is indeed too bad. The breed has an impetus here now that should be fostered. There are many good ones here and two of the best stud Bull Terriers on this continent. The demand for good ones is amplified by the avidity with which Woodcote Wonder puppies are snapped up.

Anent Woodcote Wonder and thereby hangs a tale. He was brought out here consigned to O. O. Hydenfelt, who purchased and paid for him. When Hydenfelt sold Wonder, American Belle and several others, the dogs were lost in a shuffle of ownership that would puzzle a Philadelphia lawyer. The tangle has been straightened out however and will be an interesting story when told.

The premium list of the Victoria show is arranged for 198 classes. Cash prizes, silver cups and medals are liberal in number. The entries close to-day. T. P. McConnell, 55 Johnson street, Victoria, B. C., is the secretary.

George Thomas will probably have a string of choice ones, for exhibition only, at Seattle. This will enable an entry for competition at Portland following and then a final contest at the Frisco April show.

Twenty-eight silver cups besides special medals and trophies are offered by the Portland Kennel Club. The premium list is arranged for 259 classes. The regular awards will be silver medal to first, bronze medal to second and diploma to third. Handlers' cash prizes amount to a total of \$100—\$20 each for the largest string from California, Washington, British Columbia and Oregon outside of Portland, \$10 for the handler showing the largest string in the show.

The entry fee is \$2.00, each subsequent entry will be \$1.50. The show will be conducted under P. K. L. rules.

The officers of the club are: Dr. E. F. Tucker, president; F. B. Thorn, vice-president; W. Goldman, treasurer; W. W. Peaslee, secretary. Board of Directors—W. B. Fechheimer, W. M. Davis, F. H. Fleming. Bench Show Committee—W. B. Fechheimer, W. M. Davis, F. H. Fleming. Veterinary surgeon, S. J. Carney. Mr. Geo. Raper, of Gomersal, England, will judge all classes.

Entries will close on April 8th. For entry blanks and premium lists and any other information address, Wm. W. Peaslee, secretary, 452 Sherlock Building, Portland, Or.

"A Fancier in Distress" is the caption of a lugubrious appeal published in the current number of *Field and Fancy*. We recognize the fine Italian hand of "one of the boys," an Eastern hander at present on the Coast! and give that particular genius credit for persistent ingenuity in utilizing some of the pettifogging resources with which he is literally pregnant.

There is no doubt of the financial famine, but otherwise a sleek, healthy and fat looking foreigner with a distingue air belies the necessity of the doleful wail given in the letter above mentioned.

The individual referred to is in hard luck, it is true, but in one respect he can consider himself in the very best of luck. With but little exertion daily there can be had a good view of a certain public institution from where the "gentleman" is located. If the reiterated opinions of the Bench Show Committee of the San Francisco Kennel Club are worth anything and also the reports of various exhibitors and business men who had dealings with the last show—the "gentleman" can consider himself lucky indeed that he can look in instead of look out.

As the show days come on the minds of the fancy turn to a good front among "the boys." Our friend in distress (?) will no doubt be there, peacocked and debonnaire. "Consider the lilies how they grow; they toil not neither do they spin, yet Solomon in all his glory was not arrayed like one of these." Press the fortissimo pedal on "toil not and neither do they spin."

## The Fault Finding Exhibitor.

Why a cantankerous, grumbling—or, as it has been put, "grumpy"—man should be likened to a pig, is not clear; for a pig is a very easy-minded, contented animal, and although its natural voice is a grunt, it is by no means an ill natured cry, and, to most ears, sounds the reverse of surly. When excited and chafed the cry changes into a sort of a bark, and then it is no doubt a cry of fear rather than of anger. "Grumly" might be a better expression, meaning "muddy" or "drumly"—for the discontented are always low and continuous in their cry of wrongs inflicted, and never clear in expressing their complaints. Whatever word's the proper one to use, there is no dubiety about the individual; he is know to everyone. In forming opinions, he consults no standard; he never reckons on what he may have to compete with at a show, or takes into consideration the difference of types; in short, he thinks of no one but himself and of nobody's exhibit but his own. If the awards do not please him—and they never do—he goes about declaiming the judge, oftener than not accuses him of motives, and from a piece of yarn, dropped by some busybody more noted for garrulity than veracity, weaves a web of fiction and retails it to all who will listen to him. Sometimes he may come across an unsympathetic individual who, by force of character, may hold him at bay and give him in his own vernacular a few words of caution and advice; but, as a rule, advice is thrown away on crabbed characters, who set themselves to make everyone they come in contact with unhappy. What to do with such is a question often asked, but not very easily or satisfactorily answered. If we were to "smother" all criticism to put down grumblers, we would create a noxious state of matters that we would all deplore. Sharp and shady tricks are plentiful enough; and the grumbler, if not too annoying, may be tolerated, as he fills a place.

Judges, naturally enough, do not like to be spoken about in a disparaging way; they have been elevated to a place which puts them above their fellows, and many of them resent being spoken to about their awards. It might, perhaps, be better if some of them were spoken to oftener, just to let them know that others are equally able to place the exhibits in their proper places; not that judges do not know that, but it would prevent autocracy. To go about grumbling and fault finding at judges and their awards does no good; and to attack a judge, using bad language, is not justifiable at any time. To ask for a judge's opinion, and to differ from him, is not grumbling but rather in the way of legitimately getting information on a mooted point. Exhibitors must never forget that judges' names are announced in the schedules issued; and in submitting their animals for that judge's opinion, they have no right to cavil at his awards because they hold different opinions.

The same applies to exhibitors who complain of certain rules in schedules after the show is over. The fact that they did not read the rules is no excuse; but it is mostly those who neglect their own duty who are the first to excuse others. There is a place for all; but perhaps some might object to the places allotted them, so we will not particularize.

At the last Frisco show we remember an incident which occurred in which one exhibitor, who is quite noted for his fault finding peculiarities, figured to a somewhat laughable extent. He had unbosomed himself to another exhibitor and hastily left his hearer, possibly in search of a new victim.

As our friend with a "constitutional kick" was getting away, a mutual acquaintance who had observed the meeting of the two first mentioned doggy fellows accosted the recipient of the bad news and remarked, "Well, and what did he unload now?"

"Nothing in particular, but everything in general," was the reply. "I will give him credit for consistency however."

"What do you mean?"

"Well you see, he simply can't help it, he was sired by Growl and his dam was Bellyache, he goes the route on his breeding."

## Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

### Vaccination Against Distemper.

In the last issue of this paper the practice of vaccination as a preventive for distemper was advocated in an article responsive of the discoveries and experiments of Dr. C. M. Phisalix of Paris, who had prepared a canine distemper vaccine that it is claimed can be depended upon.

A letter from Robert A. H. Barry, of 12 Queen's Gate Terrace, S. W. London, Eng., to *Field and Fancy*, and which is here given, seems to qualify in a great measure the claims of the Pasteur Vaccine Company of Chicago in regard to the vaccine.

"There has been a good deal of correspondence in the papers for and against a modern system of vaccination to avoid distemper in dogs, introduced by Dr. Phisalix, Professor in the Natural History Museum, Paris. I think it might interest your readers if I state my experience as a friend of the dog as to the utility of this vaccine on puppies of my own.

During the past fourteen or fifteen months I have submitted many puppies at various times to Mr. Henry Gray, M. R. C. V. S., to put to the crucial test; that is, after my puppies had been vaccinated by Mr. Gray, they were kept in constant contact from one to several months with relays of distempered dogs, and in only one instance have I had puppies contract distemper and then because it came in contact with the infection too soon after the last vaccination. On the other hand, the majority of the non-vaccinated contracted distemper and died, although they had every attention and care. I had two other puppies vaccinated that had been in contact with a distempered dog just before and after their first and only vaccination, but Mr. Gray pointed out at the time of the vaccination, the uselessness of it under these circumstances. Both these dogs contracted the disease, and one of them, as well as another suffering from the actual disease at the time these were vaccinated, died. I keep other breeds of dogs besides Dachshunds, viz., Griffon, Pomeranians and Irish Water Spaniels. Those puppies from two pounds and upwards were vaccinated without any detriment to them, and I trust all owners of valuable puppies will keep this in mind and let their veterinary surgeon perform the operation on their different breeds, especially at the age of two months, with Dr. Phisalix's vaccine. To ensure success, one should keep the puppies housed in a warm, dry and well ventilated place, and feed them carefully during the time of the vaccination, and take care that they are not allowed to come in contact with distempered dogs before, during and some time after. I understand there are three different strengths of vaccine—first, or mild; second, or medium; third, or strongest, the last only being used in case of a malignant outbreak being anticipated, then only after the two former ones have been used. Under ordinary circumstances, the first two, it is stated, are sufficient to prevent ordinary distemper. It is said that the method of vaccination acts on the same principle as the vaccination of poultry against fowl cholera, introduced as far back as 1880, by the late M. Pasteur. The inoculation with calf lymph, a modified form of small pox virus, is useless, as was proved more than a century ago. There is no analogy between small pox or its modified form, cow pox and distemper, and I cannot see why it is recommended.

If one vaccinates puppies with calf lymph, and then brings them into contact with distempered dogs, one would soon learn of its uselessness as a preventative."

### A String of Fish Stories.

Strange things happen to fishermen and when fishermen are around. They are so many and are backed by such evidence that most anglers of long experience stand ready to believe almost anything that may be told them of the funny doings of fish. The tyro may always be recognized by his unfeeling hoot at anything beyond his own limited knowledge.

Quite recently Prof. V. A. Pinkley, of the Cincinnati College of Music, and a friend were fishing from a boat on Lake Mendota in Central Wisconsin. They were after bass.

The friend had a violent strike, hooked his fish with an exclamation and began to reel in. A moment afterward the line went limp in the water and he said regretfully: "He's got away." Bringing in his line he remarked further: "He's got my hook and minnow."

Meanwhile, Pinkley, having a strong strike on his own hook, was paying little attention. He reeled and fought and fought and reeled and finally worked his fish, exhausted, near the boat's side and the guide lifted it out with a dipnet. Attempting to unfasten the fish he turned to Pinkley and said:

"You are the only man around here who ever caught a fish without stealing a hook in him."

Examination showed that the friend's line had parted just above the swivel. The bass darted away. The swivel eye of the swivel caught on the point of Pinkley's hook and stuck.

The bass was thus landed on the hook with which it was first struck transferred under the water to another line.

Fishing with a hand line below Mount Carmel, Ill., last fall, Bob Dunn, a boy 11 years old, felt a bite and hooked his fish and began to haul in. When the line was half in he felt a mighty surge and was pulled nearly to the river's edge.

He hung on desperately and, being unable to land the fish, called to a negro boy fishing some yards away. Together they tugged at the line and finally got the fish into the tank.

They pulled the fish up until its head and shoulders

rested on the ground, but could get it no further. The negro held to the line, while Dunn smashed the fish's head with a brick.

On the big hook was a drumfish about a foot long and eight inches wide, weighing possibly three pounds. When this fish was half way in it had been struck by an enormous gar, of the round head variety. It was too big for the gar, to swallow and had stuck in the big fish's throat, its fins fastened in the gills. The gar weighed more than a hundred pounds. Thus two fish were taken on one hook.

Conversely, Edward Kimball, of Chicago, whipping a Michigan stream last month, fastened a trout and fought it to a finish. When he got the fish into the net he found that it was hooked upon both the upper and lower fins.

The lower fly was very far in. The only explanation is that the trout rose to the lower fly, took it, did not feel the pain and struck immediately at the upper fly, grabbing them both. This was an instance of one fish caught on two hooks.

On Channel Lake, Ill., not long ago Dr. W. D. Blackman of Geneva and his friend, Dr. Greene, were fishing for bass. They fished from early morn to dewy eve and got mosquito bites.

At dewy eve, however, having decided to return to the hotel in disgust, they reeled in their lines, laid the rods in the bottom of the boat and lit their pipes. Then a minnow came leaping frantically from the water, going up six inches from the surface. It dived under the boat.

Just then a three-pound bass rose behind it two feet high in the air, described a beautiful curve and landed in the boat, where it flapped in a vain effort to get out. Blackman looked at Greene; Greene looked at Blackman; Blackman stooped, grabbed the fish and threw it back into the lake.

George R. Silsbee went fishing on Pewaukee Lake, Wis., with W. S. Smythe. Luck was poor. Late in the afternoon Silsbee yelled that he had a strike; a moment after Smythe yelled, "Me too!"

They reeled in hard, their fishes making little fight. Their lines ended simultaneously and tautly. In the water near the boat was a bass weighing half a pound.

Silsbee's spoon was in one side of his jaw Smythe's minnow and single hook were in the other side. This bass had struck the two baits together or so nearly together that there was no appreciable difference of time. It was one fish caught on two lines.

Feeling a slight tug, not much more than a nibble, Frank Harris, on Long Lake, Price county, Wis., in June last, struck hard, then reeled in a fish which made little resistance. He found a handsome bass attached which had been hooked through the tail about half an inch from its end. The fish had run into the hook while swimming by it.

On the south fork of the Flambeau River, Wis., last fall Ed. Reich and some friends were trolling for muskallonge. The guide had a pair of short oars, copper tipped and made of soft white pine.

A muskallonge of fifteen pounds struck the end of one oar and hung on, either because its teeth were fastened in the soft wood, or because it was stunned by the shock. One of the men shot it with a small pistol.

A singular phenomenon in the Yellowstone Park has thus far escaped those who are fond of telling big fish yarns, mainly for the reason that the locality lies outside the beaten track of travel and visitors, and can only be reached after considerable difficulty. At the point in question a stream of clear, cold water flows through the park, receiving in its course the scalding hot waters of one of the numerous boiling springs of that region. This boiling water as it reaches the cold stream flows, for a considerable distance, along one bank, before the waters finally mingle and become one in temperature.

Into this spring of boiling water insects, bugs, toads, grasshoppers and the like are continually dropping and thus losing their lives, and all such insects are, as a matter of course, swept into the cold water stream. Now, in the cold water of this stream a number of hungry trout are continually skirmishing along the edge of the hot water, taking good care not to venture too close, for the purpose of snapping up and devouring the insects brought down by the hot water, and which happen to float over into the cold water, or near enough the border for the trout to pick them up, so that it is possible for a fisherman, sitting on the bank, to catch a trout with hook and line, draw him two feet from where he took the hook, and boil him good and done, all in the same stream and without ever lifting the fish from the water. The fisherman would, of course, have to have a scoop net to remove the boiled trout from the water, for otherwise the head would pull off, leaving the body in the water. But, barring this, it is within the bounds of truth for one to say that the Yellowstone is the only place on earth where it is possible to catch and cook a fish in the same stream.

Mr. L. B. Spencer, who has charge of the aquarium in Battery Park, New York, says: "One day I was asked if fishes ever sleep. I had thought about that, but somehow I had not given the thought the attention it deserved. I shut myself up one entire night in the aquarium. I went around as quietly as if I had been in a nursery. Right at the start I knew that fishes could not sleep, as we understand that word, because they have no eyelashes. So far as we can see, and so far as we know, fishes never sleep. That they have some sort of rest which takes the place of sleep there is no question. They couldn't live if they didn't. Some of the fishes I saw on the night of my watch were in their usual motion. They may have had their nap before I began my rounds, or they may have taken it while I was in some other part of the building. I suppose it is the same with fishes as with people and animals—some require more sleep than others.

"But I certainly saw some of the fishes 'asleep' that night. I noticed that some went almost to the surface of the water and remained as long as I looked at them almost motionless in a horizontal position. The only evidence of life I saw was the motion of the fins. The fins of all fishes, like the song about white wings, never

grow weary. And the eyes were wide open. In another instance, however, I noticed that trout went to the bottom of the tank instead of rising. There was a bunch of rock in this tank, and I noticed that the trout stuck their heads in the hiding places. They were evidently 'asleep.' They were motionless except for a slight wiggle of their tails occasionally. Other species were perpendicular in their rest. Fishes do sleep—that is, they rest."

Mr. Spencer was asked which of his exhibits held the place of "the oldest inhabitant." He replied:

"The tank of striped bass. They came here eight years ago from Gravesend Bay, L. I. When we got them they measured about 10 inches in length and weighed a pound and a half each. The largest now weigh about 25 pounds. Fishes are like men, they grow on good living if they will feed. Take that sturgeon. He is from Bayside, N. J. He weighed 300 pounds when we got him. He won't weigh that now, but it is his own fault. He won't eat. He has eaten very little since we got him a year ago. I don't know why he won't eat."

"The strangest fishes I ever saw," continued Mr. Spencer, "is that pair of morays from Bermuda. They have attracted more attention than anything we ever had. When we first got them some of the newspapers called them sea serpents. I never saw a sea serpent, but I wouldn't say that the moray is of that species. They were caught by hook. I have not yet made up my mind as to what they are good for. They have no fins and they are the only fishes I ever saw that had none. They very rarely leave the bottom of their tank."

Very few aquarium fish have died. The attention they get would tend to longevity. The water in each tank is kept at the exact temperature of the habitat.

### Italy in San Francisco.

If you want to behold a bit of the bay of Naples, go some misty morning down to Fishermen's wharf at the foot of Mason street, San Francisco. Never was likeness more complete. For a background on the one hand, the steep slopes of Russian Hill and Black Point, silhouetted against an amber sky; on the other, the bay's broad expanse, oily, silent, with the coconut shells slowly floating seaward. On the calm waters a ship lies anchored, her sails drying, rose colored with the faint sunlight; while far beyond looms the dim outline of Lime Point, crowned with its cloud-swept batteries. And near us, in a basin shut in by spindly wharves, lie the fishing boats, striped in red and green or blue and orange just as one sees them on the Mergellina. The water laps the russet sails that overhang their sides; their herring cargoes in the hatches gleam and glisten in the sunshine; their occupants, clothed in bright sweaters, in red sashes, gum boots and beretti, sit in groups, laughing and joking as they cook the polenta or spaghetti. Listening to the singing cadence of their voices and watching the emphasis of their gestures, you will be transported to the Marina at Capri or Sorrento or to some fishing hamlet on the Genoese Riviera.—E. C. Peizotto in *Sunset Magazine* for March.

### Coming Events.

#### Rod.

Jan. 1-July 1—Close season for black bass.  
March 28—Saturday Contest No. 3. Classification series. Stow lake, 2:30 p. m.  
March 29—Sunday Contest No. 3. Classification series. Stow lake 10 a. m.  
April 1-Aug 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10, Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

#### Gun

March 29—Millwood Gun Club. Blue rocks. Manzanita Station.  
April 5—California Wing Club. Live birds. Ingleside.  
April 5—College City Gun Club. Blue rocks. Berkeley.  
April 12—Golden Gate Gun Club. Blue rocks. Ingleside.  
April 19—Union Gun Club. Blue rocks. Ingleside.  
April 19—College City Gun Club. Special blue rock events. Berkeley.  
May 24, 25, 26—S. F. Trap Shooting Association. Blue rock tournament. Ingleside.  
July 1-Feb. 15—Dove season open.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

#### Bench Shows.

March 17, 18, 19, 20—Twin City Kennel Club. Uhrichsville, Ohio. C. S. Walker, Secretary.  
March 25, 26, 27, 28—Chicago Kennel Club. Annual show. Mrs. John H. Naylor Secretary.  
March 31, 31—St. Louis Collie Club. 5th annual show. St. Louis, Mo. John A. Long, Secretary.  
March 31, April 1, 2, 3—Buffalo Kennel Club. Inaugural show. Buffalo, N. Y. Edw. P. Sharp, Secretary.  
April 1, 2, 3, 4—Victoria City Kennel Club. 2d annual show. P. K. L. rules. Victoria, B. C. T. P. McConnell, Secretary.  
April 1, 2, 3, 4—Southwestern Kennel Club. Inaugural show. New Orleans, La. John Dewhurst, Superintendent.  
April 8, 9, 10, 11—Atlantic City Kennel Club. Atlantic City, N. J. Thos. H. Terry, Secretary.  
April 8, 9, 10, 11—Seattle Kennel Club. 8th annual show. P. K. L. rules. Chas. McArthur, Secretary. Seattle.  
April 15, 16, 17, 18—Portland Kennel Club. P. K. L. rules. Portland, Or.  
May 23, 24—Ladies Kennel Association of America. Open-air show. Hempstead, L. I., on grounds of Mrs. J. L. Kernochan. Mrs. A. G. Evans, Secretary, Westbury, L. I.  
Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.  
Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

### Advice to Creamery Patrons.

The following from the Iowa Agriculturist is good advice to creamery patrons: "At this season of the year many farmers are debating in their own mind, whether they should stop selling milk to the creamery, or make their own butter. The cows are no longer giving large quantities of milk and many decide not to bother with sending the small amount of milk to the creamery. The housewife says the cost of butter necessary for the home use is as great, or greater, than what we get for our milk, and when we look for our milk check we are anxious to find out whether we are in debt to the creamery or not. For some unexplained reason, most housewives have more confidence in themselves than they have in the buttermaker, when it comes to making butter enough to supply the family use from the same amount of milk. But the fact is settled forever, that no one can make more good butter from a certain amount of milk than an up-to-date creamery buttermaker. If the housewife succeeds in making butter enough to supply the family from the same amount of milk, which, when sold to the creamery would do so, would simply be because she makes a quality of butter which suggests thin spreading on the bread. If delivering milk to an up-to-date creamery, do not stop selling milk because the quantity of milk is decreasing. It is well to bear in mind that with a decreasing quantity there is usually an increase in the quality and an increase in the price, and the skimmed milk usually comes back to the farm in better condition. The milk cows pay especially well in the winter time when there isn't much of anything to be done on the farm. It is a good idea to have one-half of the cows to come in with calves in the spring and the other half in the fall of the year, then a good supply of milk can be kept up all the year round, and when spring opens up and the cows get on g ass the flush or flow of all the cows will be renewed and in that way more milk can be obtained from a certain cow and the question as to whether milk hauling should be stopped on account of shortage of milk has been settled."

Strike!—if they don't give you Jackson's Napa Soda.

### 3 FEEDS FOR ONE CENT

"INTERNATIONAL STOCK FOOD" is a 3 FEEDS FOR ONE CENT. It is Prepared from Roots, Herbs, Seeds and Barks and won the Highest Medal at Paris Exposition in 1900 as a High-Class vegetable, medicinal preparation to be fed to stock in small amounts as an addition to the regular feed. It is a Great Aid in Growing or Fattening stock because it increases the appetite and aids Digestion and Assimilation so that each animal obtains more nutrition from the grain eaten. We positively guarantee that its use will make you extra money over the usual Plan of growing and Fattening stock. "International Stock Food" can be fed in safety to Horses, Cattle, Sheep, Goats, Hogs, Colts, Calves, Lambs or Pigs. It is Absolutely Harmless even if taken into the Human System. You insist on eating medicinal ingredients with your Own Food at every meal. Salt is a stomach tonic and worm medicine. Pepper is a powerful stimulating tonic. Mustard is a remedy for dyspepsia. Vinegar is a diuretic. You eat these medicinal ingredients almost with every mouthful of your food, and it is proven that these condiments promote health and strength for people and improve their digestion. "International Stock Food" contains pure vegetable medicinal ingredients that are just as safe and as necessary an addition to the regular feed of your stock if you desire to keep them in the best possible condition. "International Stock Food" is endorsed by Every High Class Farm Paper. It purifies the blood, stimulates and permanently strengthens the entire system so that disease is prevented or cured. "International Stock Food" is sold on a "Spot Cash Guarantee" by Fifty Thousand Dealers throughout the World. If Your Money will be Promptly Refunded in any case of failure. It will make your Pigs or Hogs grow Amazingly and has the largest sale in the World for curing or preventing Hog Disease. Beware of the many Cheap and Inferior Imitations! No Chemist can separate all the Different powdered Roots, Herbs, Barks and Seeds that we use. Any One claiming to do so Must be an Ignoramus or Falsehood.

## ENGLISH STOCKMEN LIKE 3 FEEDS FOR ONE CENT

WESTON COYNEY HALL,  
Nr. Longton.

International Stock Food Co.,  
Minneapolis, Minn.

STAFFORDSHIRE, ENGLAND.

DEAR SIRS:—I have pleasure in handing you remittance to cover your invoice for "International Stock Food." I have given it a thorough trial on my horses, both drivers and draft, and I find it justifies all you claim for it in every way. All my stock are in exceptional condition this year and this I attribute to the use of "International Stock Food." I tender you my sympathy for the loss you have sustained by the death of Online 2:04, a loss which will be felt by the whole of your district. I had great success in my experiment of crossing the French Coach Horse with the American Trotter, the result being a fine heavy harness horse. I am, sirs, Yours faithfully,

F. J. RIDGWAY.

We will Pay you \$1,000 CASH to Prove that our Testimonials are not Genuine.

## A \$3000.00 STOCK BOOK FREE

IT CONTAINS 183 LARGE ENGRAVINGS OF HORSES, CATTLE, SHEEP, POULTRY, ETC.

The Cover of this Book is a Beautiful Live Stock Picture. Printed in Six Brilliant Colors. Book is 6 1/2 by 9 1/2. See engraving for greatly reduced design of cover. It cost us \$3000.00 to have our Artists and Engravers make these life Engravings. This Book contains a Fully Illustrated Veterinary Department that will Save You Hundreds of Dollars. It describes common Diseases, and I tell how to treat them. It also gives Description, History and Illustrations of the Different Breeds of Horses, Cattle, Sheep, Goats, Hogs and Poultry. It contains testimonials, and Life Engravings of many very noted Animals. The Editor of This Paper Will Tell You That You Ought to Have This Book in Your Library for Reference.

## "SAVE-THE-HORSE" TRADE MARK SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone, Curbs, Splint, Capped Hock, Windpuff, Weak and Sprained Tendons, and all Lameness.

### "FOOL TALK."

About thirty-five years ago, a young mechanic called on old Commodore Vanderbilt, then head of the New York Central Railroad, in an effort to secure a trial on a New York Central train of a new device for stopping trains by compressed air. "Air!" the Commodore is said to have exclaimed. "Air! Stop a train with air! I've no time to listen to such 'fool talk,' young man," and he didn't. Neither would anyone else for many a long day. George Westinghouse, for he was the man of the "fool talk," believed in himself and the utility of his invention. He kept right on in spite of Commodore Vanderbilt and others till he forced recognition.

Would a man trust himself aboard a passenger train to-day if he knew that train was not fully equipped with Westinghouse's invention—the air-brake? It is said that Vanderbilt's road had some difficulty in getting it when finally it was wanted. Many a man says "fool talk" when he reads the claims made for "Save-the-Horse" Spavin cure but the dawn of enlightenment is as certain as the rising of the sun, and the man who says "fool talk" after reading the facts so plain and convincing, as given by us re-affirmed by the letters published in these columns each week and in our booklet, is repeating Commodore Vanderbilt's mistake. No man need be in doubt as to what "Save-the-Horse" Spavin Cure can, and cannot, do. If you have a case different from what are described in booklets and advertisements, send us full particulars as to the age, location, cause of the lameness or swelling, the horse's action, previous treatment and also the Veterinarian's diagnosis, if you know he is competent, and we will tell you frankly as to the possibilities of our remedy. Write for booklet and copy of guarantee and any information desired.

Heed this:  
Work horse continuously if desired  
"Save-the-Horse" cures without scar, blemish or loss of hair.  
Contains no Arsenic, Corrosive Sublimate or other form of Mercury, or any ingredient that can injure the horse.  
Chronic and seemingly incurable cases in the

advanced stage that have been tried two or three times and given up as hopeless, positively and permanently cured.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological change, absorbing all inflammatory exudate and producing a healthy, normal condition of the parts.

### \$5.00 PER BOTTLE.

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. There is no condition or arrangement we can make more binding to protect you than our guarantee.

NEED OF SECOND BOTTLE IS ALMOST IMPROBABLE EXCEPT IN RAREST OF CASES.

# ARNER 31300

Sire CHAS. DERBY 2:20 (sire of Don Derby 2:06, Much Better 2:07 1/4, Derby Princess 2:08 1/2, Diablo 2:09 1/4, 11 in 2:15 list, 23 in 2:30 list.  
Dam BERTHA by Alcantara 729.

Season of 1903, to close June 1st,

AT SAN LORENZO, CAL.

Fee \$25 FOR THE SEASON. Usual return privileges. Good pasturage \$3 per month, and best of care taken of mares. For further particulars address

C. BRANIN, San Lorenzo, Cal.

# Iran Alto 2:12 1/4

By PALO ALTO 2:08 1/4 (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12 1/4, Pasote (4) 2:13, Palito 2:16, Rio Alto 2:16 1/2, Palatine 2:18, and 11 others in 2:30 list.  
Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31 1/2, and of 3 in 2:30 list, and the dams of 6 in 2:30 list  
Second Dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12 1/4 is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal

# Alta Vela 22449

RECORD 2:11 1/4

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07 1/4, Sunol 2:08 1/4, Palo Alto 2:08 1/4, Alta Vela 2:11 1/4, and 9 more in the 2:15 list, etc)  
Dam LORITA 2:18 1/2 by Piedmont 934; second dam Lady Lowell (dam of Ladywell 2:16 1/4, Loris 2:18 1/4, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16 1/4.

Will Make the Season, 1903---Fee \$50---Race Track, San Jose.

Limited to 10 mares, as he will be trained and raced again this year.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,  
Race Track, San Jose, Cal.

# Guy McKinney

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

FEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:20 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

# BAYSWATER WILKES 2:25 1

Sable Wilkes 2:18  
and  
Fanny Bayswater  
Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks soundness and gamesness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12. Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. Excellent pasturage for mares \$2.50 per month. For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Futurity Winning Family.

Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903 from February 1st until further notice at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Send for card containing pedigree and full information. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

# SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1500 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

son of the Great Electioneer.

# GROVER CLAY 2:23 1/4

Season of 1903, March 1st to June 1st,

At D. Gannon's Stables, Watts St., near Race Track, Emeryville, Alameda Co., Cal.

Fee \$25, payable at time of service.

FOR SALE—Two fine Stallions  
Colts by GROVER CLAY;  
dam, a producing mare by Sidney.

For further particulars address

DENNIS GANNON, Emeryville, Cal.

# MONTEREY 2:09 1-4 Reg. No. 31706

Will Make the Season of 1903 at

SAN LORENZO SATURDAYS, SUNDAYS,  
MONDAYS, TUESDAYS.

MILPITAS WEDNESDAYS, THURS-  
DAYS AND FRIDAYS

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. Send for card containing pedigree and full particulars. Address P. J. WILLIAMS, San Lorenzo, Cal.

# THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL  
(Property of JOHN PARBOTT, ESQ.)

## Imp. Hackney Stallion

### GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1903

**FEE - - \$75**

Reductions made for two or more mares.

**Breed to Extreme Speed.**

## CHAS. DERBY 4907, rec. 2:20 \$50 the Season

See of MUCH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09½, OWYHEE 2:11, LITTLE BETTER 2:11½, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at moderate prices. Address

### OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

## STAM B. 2:11 1-4

(TROTTER, REG. NO. 23444.)

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed second in 2:12½)

4-YEAR-OLD RECORD, 2:11 1-4  
(Timed second in 2:09½, 2:09)

2-YEAR-OLD TRIAL, - - 2:26

STAM B., by that show horse king, Stamboul 2:07½, father of 47 from 2:10½ to 2:30; 24 sons and daughters produced from 2:07½ to 2:37. Stamboul is the only trotting bred stallion that ever sold for over \$10,000, and sired a daughter for whose son, Wilkins (two-year-old 2:19½), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:09½, for which \$50,000 was lately refused, showing that men with money and brains appreciate this blood. STAM B.'s first dam, Belle Mediana 2:20 (dam of 3 from 2:11½ to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hambletonian 10 ever produced such speed and she sold for \$40,000.

Second dam Arcadia, dam of one in 2:30, by Almont Lightening, sire of dams of Zombro (five years old) and King Princess 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15½, Baron Wilkes 2:18, Patchen Wilkes 2:29. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Onward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, happy road horse.

STAM B. is a bay, two white hind ankles, 15 hands 2½ inches high, weight 1090 lbs., of good stamina and muscular development.

**Will Make the Season of 1903 at Pleasanton, Cal.**

**Terms \$40** SPOT CASH before mare is removed. I will try and take good care of mares and foals, but will not be responsible for accidents or escapes. (No agents on arrival of trains at depot.) For further particulars address

**SAMUEL GAMBLE, Pleasanton, Cal.**

## SIR GIBBIE 2D.

No. 370 American Hackney Stud Book

### Hackney Pony Stallion

13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

### MENLO STOCK FARM

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

**JAMES McDONNELL,**  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

# SEARCHLIGHT 2:03½

THE FASTEST STALLION BY THE RECORDS EVER OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03½).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 38 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcyone, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09¾

The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01½, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

**EDW. MILLS, Rose Hotel, Pleasanton, Cal.**

# NUSHAGAK

Sire of

**ARISTO (3) 2:17½** winner of Occident and Stanford Stakes, 1902

**MAJELLA B. (2) 2:29** Trial (4) 2:13½

**THE BOQUET** Trial (3) 2:21 in 1902

**Brown Filly** Trial 2:20½ as a 4-yr-old in 1902

**Reg. No. 25939**

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:20½ and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17½ by Director, sire of Directum 2:28½, Direct 2:08½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lanet, son of McCracken's Blackhawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:05½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12½, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:30½ with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17½ was equal to 2:13½ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. FOR BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore. Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is the GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the fetlocks which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

## \$15,000 FOR \$5

# HARTFORD FUTURITY

A THREE-HEAT RACE. FOR FOALS OF 1903, TO START AS 3-YEAR-OLDS IN 1906. NO SUBSTITUTES.

**\$13,500**

**For Trotters**

**Closes April 1st. \$5 per Mare.**

**\$1,500**

**For Pacers**

ENTIRE STARTING FEE \$35.—Less than 1-4 of 1 per cent.

Payments: \$5 April 1; \$10 Nov. 2, 1903; \$10 March 1, 1904; \$10 March 1, 1906.

CHARTER OAK PARK, Hartford, Conn., offers the above purse, the most liberal futurity ever opened, for the 1903 produce of mares nominated in same on or before April 1, 1903. To be divided as follows:

**\$13,500 for 3-year-old Trotters.** The race to be three heats, one mile each, each heat a race. National Association distance rule, in force when race is called, to apply in each heat. First horse in each heat to get \$2500, and second horse \$500. In case of a dead heat the \$3000 will be divided equally between the tied horses. The place, the tied horses alone shall trot it off, and the \$1500 divided according to the summary of the four heats.

**\$1500 for 3-year-old Pacers.** The race to be mile heats, 2 in 3: \$1000 to first; \$300 to second; \$200 to third. Rules of National Trotting Association (of which this association is a member), in force when races are called, to govern, with exceptions noted. Color and sex of foal must be given on date of second payment, November 2, 1903, and name and gait of entry must be given with last payment, March 1, 1906. Owners must notify Secretary, by 7 o'clock of night before race, of their intention to start, or they will be declared out of the race.

In making entries the name, color and breeding of each mare, and the name of the stallion to which she was bred in 1902, must be given.

**MAIL ENTRIES ON OR BEFORE APRIL 1st TO**

NO SUBSTITUTES IN ANY EVENT  
NO ENTRY LIABLE FOR MORE THAN AMOUNT PAID IN.

**H. W. WILSON, SECRETARY, MADISON SQUARE GARDEN, NEW YORK.**

THE APPROPRIATIONS for district fairs has been vetoed by Governor Pardee. For reasons best known to himself the Governor has seen fit to draw his pen through all the appropriations made by the Legislature for these institutions, although prior to his election his political managers and friends were very profuse in their promises and emphatic in their statements that he favored "liberal appropriations for the district fairs." The Republican State Central Committee with its endorsement sent to nearly every trotting horse breeder and trainer in California a circular letter, signed by a trainer who was a friend of Dr. Pardee, in which the recipient's vote was asked for the Doctor on the particular ground that he favored these appropriations. The circular stated that its author had interviewed the Doctor and had been assured of this fact. The Governor probably has his reasons for cutting out these district appropriations, but what they are has at this writing not been made public. The fact that there will be no State aid to district fairs this year confronts us. Of course, it will not be possible for the districts to hold fairs under the circumstances. The farmers, stock raisers and others will be the greatest sufferers. The harness horse men by the exercise of a little energy and vim can take care of themselves. There is plenty of racing to be held over east, and up north. Oregon and Washington, with commendable enterprise have made very liberal appropriations for State and district fairs and good purses are being offered for harness races. The Pacific Coast Trotting Horse Breeders Association will give at least one meeting in California where the purses will range from \$2500 to \$500, and at this meeting the first divisions of its rich Futurity will be trotted and paced. It may be possible for this association to step into the breach as it did when a former Governor vetoed these district appropriations, and give several meetings at different points. There are seven or eight cities where first class harness meetings can be made to pay this year and the associations should take immediate steps to arrange a circuit. Santa Rosa, Napa, Vallejo, Woodland, Stockton, Pleasanton, San Jose, Fresno and Los An-

geles by united action could arrange a circuit that would not only draw big entry lists, but attract large crowds to see the racing and be made to pay a profit. The light harness horse is more valuable and in greater demand than for years past, and it is the regular and matinee racing that is doing most to create this demand and keep up the values. Governor Budd cut out the district fair appropriations when the horse breeding business was suffering from a panic. Governor Pardee has done the same thing when horse values are good and have an upward tendency. The horse breeding industry can stand the blow now better than it could during Budd's time, but steps should be taken to organize against such action by future Governors. The district fairs have done more to build up the herds of cattle, horses and other live stock in this State than all other causes combined. They have added many times more to the taxes collected by the State than they have cost, and have been a public benefit. If those most interested will organize and agree to oppose for election any candidate who will not pledge himself to vote for the district appropriations there will be no trouble about them in the future. Had the Central Committee sent out a circular to the effect that Dr. Pardee opposed appropriations for fairs and would veto them, he would have been beaten. His political managers knew this or they would not have made such a personal appeal to every horse breeder, owner and trainer in the State to vote for him on the ground that he was "in favor of liberal appropriations. But the main question now before the horsemen is not "What will the State do for us?" but "What can we do for ourselves?"

THE SECOND PAYMENT of \$5 is due and payable next Wednesday on every entry in the Pacific Breeders Futurity, No. 3, which is for foals of mares bred last year. This Futurity is the most popular stake ever inaugurated on this Coast, and each and every one gives promise of being worth more than the \$6000 guaranteed. The first divisions of Stake No. 1 will be trotted and paced by the two year olds this year and are already exciting much interest. Some of the mares entered in Stake No. 3 have already foaled, but many will not foal until later, while several are known to be barren. In case a mare is not with foal her owner should not miss making this payment, as there are a number of applications for substitutions and by making this second payment an owner can transfer his nomination and get all his money back. There were 315 original nominations and the second payments should equal that number.

ANOTHER OF THE OLD GUARD of pioneer horsemen of California has crossed the great divide. On March 12th, Josiah Sessions, known to all old timers in this State as "Yank" Sessions, departed this life at the home of his daughter in San Diego, where he has resided for some time since the death of his wife about six years ago. Mr. Sessions came to California in 1851, and was identified with the breeding and racing of trotting horses for many years thereafter. He was one of San Francisco's earliest road drivers and his good trotter Stevedore is well remembered by all the old time horsemen. Mr. Sessions imported the stallion Ulster Chief from the East and bred among others the good mare Oakland Maid. He also owned the stallion Hamilton Chief and many others. Mr. Sessions possessed those qualities that brought him many firm friends, and his death will be sincerely regretted by all who knew him.

## The Horse Show Brought Results.

LIVERMORE, March 25, 1903.

EDITOR BREEDER AND SPORTSMAN:—I have sold my good looking jack to John G. Chase, the liveryman at Antioch "for a long price."

Mr. John Martin has sold his stallion Oregon Jr. to Mr. Jack Coates of Lake county. The Lake county breeders may congratulate themselves on getting so good a Norman horse as Oregon Jr.

We credit the sales to the BREEDER AND SPORTSMAN, as your illustrated cover page and article of March 7th gave us the necessary send-off. I am positive the picture of the jack helped very much to sell him.

Do you know of any two year old Shire or Norman stud colts for sale?

Yours truly,

N. D. DUTCHER.

Governor Pardee has approved the appropriation of \$30,000 for the State Fair, which is the same amount that it has received for some time past, making \$15,000 available each year. The bill appropriating \$45,000 to pay some of the back indebtedness of the association was pocketed by the Governor, as he refused to sign it unless the Directors would deed the property of the association to the State. As this would leave the Directors personally liable for about \$25,000 more, they naturally declined to make the deed. The bill appropriating \$6133.75 to reimburse the State Agricultural Society for its loss caused by closing the fair down on the day of President McKinley's funeral was signed by the Governor.

## OAKWOOD PARK SALE.

Good Prices Obtained for Horses Bred at This Celebrated Farm.

Twenty-six young horses bred at Oakwood Park Stock Farm were sold by William G. Layng, the well known live stock auctioneer, at the Occidental Horse Exchange in this city, on Thursday of this week. The twenty-six head brought \$7035, an average of \$270.57, which shows that the market for standard bred horses is good in San Francisco. None of them were over five years old and a large majority were but three. The highest price of the sale was \$600, received for the last animal sold, a two year old fast natural pacing filly by Direct 2:05 1/2 out of a well bred mare by Chas. Derby 2:20. This filly is entered in the Pacific Breeders Futurity for foals of 1901.

There was a McKinney filly in the consignment. She is a three year old and out of Electway, own sister to Klatawah 2:05 1/2 and Chas. Derby 2:20. While the filly is a royally bred one, she was a rather light, delicate looking animal and brought but \$425. She should be worth twice that amount on her breeding alone, but it is the big boned, muscular horses that are in demand now.

The bargain of the sale was the three year old stallion by Owyhee out of Inex, dam of Our Jack 2:13 1/2 and Alamo 2:29, by Sweepstakes 298. This colt is a handsome fellow, well boned and muscled, and quite a trotter. He went to the bid of P. W. Hodges, the well known Santa Ana trainer, for \$575 and was a bargain. He is entered in both the Occident and Stanford Stakes of this year.

Mr. Layng had all the arrangements for the sale in excellent shape, and a large crowd was present and bidding was lively. The young horses sold were an average lot and \$120 was the lowest price paid. The record of the sale is as follows:

Chestnut gelding, foaled March 20, 1898, by Steinway, dam Empress by Flaxtail; H. Schoettler, \$325.

Chestnut gelding, foaled April 5, 1899, by Chas. Derby, dam Edon by Gen. Benton; S. J. Lank, \$170.

Alossa, b m, foaled April 24, 1899, by James Madison, dam Lurline by Steinway; Mr. Guerin, \$175.

Glazenwood, b m, foaled March 31, 1899, by James Madison, dam Waywood by Steinway; Mr. Valentine, \$210.

Susie Steinway, b m, foaled April 6, 1900, by Steinway, dam Susie Mambrino by Mambrino Boy; S. C. Jefferson, \$150.

Lanoline, b m, foaled April 11, 1900, by Chas. Derby, dam Caroline by Yosemite; Dr. Fitzgerald, \$230.

Babe Madison, b m, foaled May 13, 1899, by James Madison, dam Babe Marion by Steinway; G. F. Ames, \$130.

Brown gelding, foaled April 11, 1899, by Chas. Derby, dam Onalaska by Prince Red; A. Pastene, \$300.

Bay gelding, foaled April 10, 1900, by James Madison, dam Lurline by Steinway; T. P. Sherman, \$120.

Dark brown gelding, foaled April 6, 1900, by Chas. Derby, dam Peronella by Prince Red; W. A. Sayre, \$130.

Dark bay gelding, foaled March 11, 1900, by Chas. Derby, dam Cecelia by Del Sur; E. J. Delehanty, \$140.

Sibyl Derby, ch m, foaled June 11, 1899, by Chas. Derby, dam Ada F. by Antevolo; W. W. Van Arsdale, \$330.

Piadaway, ch m, foaled March 31, 1899, by Steinway, dam Idol Belle by Idol Wilkes; W. W. Van Arsdale, \$330.

Infection, b m, foaled March 18, 1900, by Steinway, dam Tone by Ferguson; C. J. Lercari, \$150.

Shelagh, br m, foaled April 22, 1900, by McKinney, dam Electway by Steinway; Thos. Kinney, \$425.

Economizer, b m, foaled April 9, 1900, by Chas. Derby, dam Economy by Echo; J. F. Silva \$400.

Maggie Derby, ch m, foaled January 15, 1900, by Owyhee, dam Maggie McGregor by Robert McGregor; Wallace Clark, \$200.

Amazonian, br m, foaled April 1, 1900, by James Madison, dam Amazon by Chas. Derby; H. Busing, \$220.

Explosion, b m, foaled April 19, 1900, by Steinway, dam Flash by Egmont; H. Dunlap, \$425.

Bay gelding, foaled 1900, by Chas. Derby, dam Idol Belle by Idol Wilkes; A. M. Hayes, \$150.

Bay stallion, foaled January 18, 1900, by Owyhee, dam Inex by Sweepstakes; P. W. Hodges, \$575.

Presumption, b m, foaled January 15, 1900, by Steinway, dam Essie Farley by Mountain Boy; M. W. Joost, \$380.

Welladay, br m, foaled June 30, 1899, by Steinway, dam Katie G. by Electioneer; Thos. Kinney, \$400.

Roan gelding, foaled April 8, 1900, by James Madison, dam Steirola by Steinway; J. H. McDonald, \$160.

Directzon, blk f, foaled May 12, 1901, by Direct, dam Amazon by Chas. Derby; Dan Meek, \$210.

Directshine, dk br f, foaled April 5, 1901, by Direct, dam Brilliantshine by Chas. Derby; J. F. Silva, \$600.

## JOTTINGS.

MARE SHED WAS SHOWN at Pleasanton track last Saturday than was ever exhibited before on any harness horse training track in America in March. Two minute speed at this time of the year is out of the ordinary, even at Pleasanton, yet four or five horses covered eighths at that rate and left the impression in the minds of those who saw them do it that they had something in reserve. It was a great day. The weather was perfect. Although the sky was overcast a portion of the day, there was no wind and the air was balmy and warm enough to make overcoats a burden. The crowd was large and a *laughic* one. Mr. E. E. Smathers, of New York, owner of Lord Derby 2:05½ and many other good ones; in company with Mr. Fred Deitz, another New York gentleman of wealth and owner of many high class matinee and road horses, were there as the guests of Mr. Budd Doble, and at least twenty prominent horsemen from San Francisco were also in attendance. There must have been a hundred people there to see the horses worked and never was a crowd more royally entertained.

The track was perfection and Manager Geo. A. Kelly was complimented personally by nearly every owner and trainer present. Mr. Kelly is not sparing any water, but puts it on in liberal quantities. He also sees that the harrows and the scrapers do not lie idle when needed and he is making the Pleasanton track more popular than ever.

Millard Sanders stepped a few of his trotters for the visitors. Dolly Dillon 2:07 was brought out and showed big and strong. She had her first pair of shoes for 1903 put on a week previous. Her hair looked a little rough, as she has not entirely shed her winter coat, but she seemed to know that there were many eyes on her, as she manifested a desire to show some of her old timespeed. After a jog of a mile or two, Mr. Sanders gave her her head at the three-quarter pole and she came to the wire in just 31½ seconds by several watches. That was the time I got, but two or three made it a quarter of a second faster.

That was great speed for March for a mare that has not been worked at all to speak of this year, but when he turned the green mare Lou Dillon loose, there was a quick comparison of watches as nearly everyone thought he had made a mistake, the time was so fast. He gave the handsome dark chestnut mare a couple of slow miles. At the half on the second mile she began moving fast, but Millard did not call on her until the three-quarter pole was reached. And then she began showing that wonderful speed flight of hers. She skims the ground like a bird, and it seemed to us at the wire as if she were flying. I stood alongside Mr. C. A. Durfee and our watches were just alike—29.3.5 seconds. We could hardly believe we were right. C. A. Bunch and C. Crippen, two well known drivers and careful timers, stood within twenty feet of us. Their watches stopped at 29½ seconds, while Mr. Smathers' watch showed 29½. Monroe Salisbury stood a hundred feet from the wire and his watch recorded 30 seconds flat as the time. It was a great quarter by a great mare. Millard Sanders came up after dismounting and said that he got the quarter in 29½ seconds and that he confidently believed the mare would sell for more money at Cleveland than any mare ever sold at auction. It would not surprise me if the prediction came true. Lou Dillon is a beautiful mare and one of the best gaited ones that ever stepped a track. She has some of the blood in her veins that Nancy Hanks carried as her dam was by Milton Medium a son of Happy Medium.

Robizola another green mare in Sanders' string looks like "the goods." She stepped a half Saturday in 1:05 last quarter in 32 seconds and did it very handily.

Ben Walker, who is doing the driving for the veteran Monroe Salisbury, had a little speed to show also. He brought out Monte Carlo 2:09½, who aroused the admiration of everyone by his magnificent appearance. He is just right for this time of the year. Plenty of flesh but the most of it muscle. He is the best gaited horse that appeared on the Grand Circuit last year and is tagged by the easterners as the very best prospect in the 2:10 class for 1903. After a warning up heat Mr. Walker let him step the last quarter and he covered the distance in 30½ seconds. He is a wonder and there is positively nothing the matter with him. When Major Delmar beat him in 2:05½ last year it was only by an eyelash and none but the judges could tell which had won.

One of the greatest green trotters ever seen in California is the big gelding by Seymour Wilkes that Salisbury purchased from Fred Talbot a few months ago.

I understand he will call him Col. Talbot. The Colonel wears no boots to speak of and is as clean gaited as any trotter at Pleasanton. He is a big fellow, like all the get of Seymour Wilkes, and a trotter that would bring almost any price one might ask for him if he were driven down the New York speedway some Saturday when the top notchers were out. He has such a commanding style and is strictly business all the time. His quarter was a surprise to me as it was in 31½ seconds, and although I had heard that he was a crackerjack I had no idea he could march that fast. He is out of a mare by Geo. M. Patchen Jr.

Just before the arrival of the train which the visitors were to take to San Francisco Walker brought out Mr. Salisbury's big pacer Mush and let him step a quarter. He rattled it off as slick as grease in 29 seconds flat, Messrs. Smathers, Deitz, Doble and three or four others all getting the time in that notch. As they left the track to take the train Mr. Doble remarked: "This was a great feast of speed to-day, with Mush for dessert."

Mr. Salisbury did not give this pacer the name "Mush" because he thought he was "soft." This veteran has spent two seasons in the Alaskan mining country, and learned that the Alaskan Indians use the word "mush" to their dogs the same as Americans use the term "get up" or "go on" when they want their horses to start, and when he began driving the pacer he thought Mush was an appropriate stable name for the horse. When he bought a full brother to Mush, the other day, the boys at the track gave it the name of "Milk," and Mush and Milk are the two most talked of horses at Pleasanton.

The Sanders and Salisbury strings are not the only ones that are showing speed at Pleasanton, however. There are others, and the fast ones are getting more numerous every day. Dr. Boucher worked Harry Gear 2:12½ a half in 1:05½ on Saturday; James Thompson drove S. Christensen's two-year-old pacer by Altivo a half in 1:06, and sent Thornway an eighth in 14½ seconds. One day last week Cecil drove Tidal Wave, the three-year-old by Nutwood Wilkes out of a sister to Coney 2:02½, a half in 1:05, and Henry Sanders stepped the pacer Osmont by Altamont a half in 1:03½ and has a sure racehorse in him. Osmont belongs to Under Sheriff Daly of Napa. The three-year-old trotter Search Me by Searchlight 2:03½ from Wanda 2:14½, that Mrs. Frank Burke of La Siesta Farm sent to Mills & Sanders to have trained, is being much talked about at the track. Henry Sanders received him but a few weeks ago, and has had but little chance with the colt, but is certain he has one of the best prospects in California. He told me that Search Me trotted an eighth for him one day last week in 16½ seconds, and did it so nicely and with such little effort that he confidently believes he will be able to beat the record of his half brother, The Roman 2:09½, when he reaches the same age. A 2:12 gait is a high rate of speed for a big growthy colt that is as green as a seaweed.

Bert Webster has a colt in the Griffith string, to be sent to the Blue Ribbon sale at Cleveland, that is a speed marvel. This is the colt by Steinway 2:25½ out of Nola by Nutwood, the mare that produced that fast pacer Sharkey which could pace three-quarters in 1:31, but had an affected throat that would swell up and choke him after going that distance. This Steinway colt has nothing the matter with him, however, and his neck and throat are as clean as those of a four-mile racehorse. Bert says Bonnie Direct 2:05½ was a mighty fast three-year-old, but he wasn't in it with this fellow. Last week he worked him a half in 1:03½, last quarter in 29½ seconds and last eighth in 14½ seconds. He is one of the handsomest three-year-old colts I ever saw, and is nearly 16 hands high, I should judge. His legs are as clean as a hound's tooth, and the length from point of hip to hock gives him a speedy look that is not belied when he moves. He is one of the best-gaited ones anybody ever saw, and if he don't create enthusiasm at Cleveland it will be because he is sick-a-bed or got into a railroad smash-up going over. He could pace a mile in 2:10 right now, if they asked him to.

Sitting in the office of the BREEDER AND SPORTSMAN last Monday, Mr. Fred Dietz, one of the leading business men and prominent road drivers of New York, who has been spending a few weeks on the Coast said: "I never enjoyed two pleasant days that the one I spent at Palo Alto Stock Farm last week with Superintendent F. W. Covey, and Saturday last when I went to Pleasanton with Mr. Smathers and Budd Doble. What a great stable of horses Monroe Salisbury has got together, and what a wonderful man he is. I think the very best thing the trotting horse breeders of America could do, one that would bring them better results than almost anything else, would be the establishment of a school for trainers with the grand old man at the head. He does as much thinking in a day as the average man does in a

week and he has original ideas and many of them. He has a reason for every change he makes in the rigging or training of a horse and does not adopt a new fad just because some other man does.

I have noticed that most of our great trainers are that way. Geers always uses a full set of harness, and refuses to eschew the breeching or to cinch the girth so tight that the breeching is not necessary. I think, to use a slang expression, that Mr. Salisbury 'has it on all of them' when it comes to caring for a horse's feet. I had a long talk with him yesterday on this subject. The veteran said 'there are too many trainers making their horses trot up hill all the time by giving them a very long toe.'

I had never looked at the long toe idea in that way, but Mr. Salisbury is about right. The long toe is a fad with many horsemen and if one horse shows a little better after letting his toes grow out, they put long toes on all the rest. I own the mare Miss Overton 2:26½ by Wilton, having purchased her at a sale after seeing her show well when led alongside a saddle horse. She had made her record about two years previous and shown a trial of 2:19 soon afterwards but had done nothing since. I took her out on the roads where no one could see me and tried her out. She could not trot fast enough to speak of, and I was told that she must have a long toe and weights before she would extend herself but I was afraid her ankles would not stand the strain. I drove her on the road that summer to and from the trains, and had her feet shortened. I had her shod with a square toe and pads. She did so well with them that I concluded I would take her up to the speedway some Sunday to try her speed. I intended to have her reshod for the occasion but neglected it and when the Sunday came drove her as she was. I brushed her that day against Mr. Strans' great horse Cobwebs and he could not beat her. That mare can trot better with a short hoof and pads under the shoes than she can shod any other way."

Mr. Dietz is a practical man and believes that many of the horses that are fired and blistered would be all right if rested sufficiently. He told of us a horse he owned that had a badly bowed tendon. A trainer friend told him not to blister or fire it, but to bandage the leg with alcohol and cotton and give the horse a long rest. He did so and within a few months the tendon was as straight as the other and no swelling or bow was visible to the eye and could only be noticed by running the fingers down on it, when the slight thickening could be felt. Mr. Dietz says that the Empire track is one of the grandest trotting tracks in the world and he is in hopes the stockholders in that enterprise will get everything in smooth running order before long, as some great meetings can be given if everything is harmonious. Mr. Dietz formerly owned that great pacing mare, Bessie Bonehill 2:05½ by Empire Wilkes. He will return home next Tuesday.

## Searchlight Will Have a Fine List.

Below we give the list of mares being bred and those that are booked to Searchlight to date.

Oakwood Park Stock Farm are breeding Bertha dam of Don Derby 2:06, Diablo 2:09½ and three others in the list and a number more of their best mares.

Lou Crellin, former owner of Searchlight, is breeding five as follows: Ramona by Director 2:17, Ruth C. by Guide 2:16½, Anna by Director 2:17, Quita trial 2:16½ by Diablo 2:09½, dam Ruth C.; La Moscovita by Guy Wilkes 2:15½.

Nutwood Stock Farm's Lida W. 2:18½, dam of Nutwood Wilkes 2:16½ has been bred and Mr. Carter will breed two others.

The following are mares owned by individual owners: Miss Logan 2:06½, Much Better 2:07½, Cricket 2:10, Edith 2:10, Geraldine 2:14, Kitty H. 2:15½, Bessie Rankin 2:16½, Cri Cri 2:20, Irene 2:25, Mano by Piedmont 2:17 (dam of Mendocino 2:19½, sire of Monte Carlo 2:09½) Nelly Bly by Wapsie, dam of Vic Schiller 2:11½, Our Boy 2:12½ and two others in the list; Bee by Sterling, dam of Monroe B. 2:15½; Lildine by Boodle 2:12½; Nina B. by Electioneer 125. Lady Dwyer by Mento 2:21 out of the dam of Marin Jr. 2:13; Hattie F. 2:18, Glorioso by Wildnut son of Woodnut 2:16½ and Wildflower 2:21, dam Morning Glory dam of two by Electioneer 125; Princess Dawn by Dawn 2:18½, dam Edith 2:10 by Dexter Prince; Alta Dawn by Iran Alto 2:12½, dam Princess Dawn; Belle by Baron Wilkes 2:18, dam by Onward 2:25, Brown mare by Steinway 2:25½, dam Ramona by Anteeo 2:16½, dam of W. Wood 2:07; Brown mare by Steinway, dam by Woodford Mambrino 2:21, next dam by Abdallah 15, Saturn by San Diego, dam of Osmont 2:29½ trial 2:12; Winnie Wilkes 2:17½ by Mambrino Wilkes; Edna by Diablo 2:09½, dam by Director 2:17; Babe by Hamlet Jr. by Hamlet son of Volunteer, dam by Nutwood 2:18½.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Neernut 2:12 1-4.

The card of that good race horse Neernut 2:12½, owned by Geo. W. Ford, Esq., of Santa Ana, appears in this issue. Neernut was foaled in 1891, and is a worthy representative of the Electioneer-Nutwood cross which produced the great two year old Arion. Neernut's sire, Albert W., is one of the four best sons of Electioneer as measured by the 2:20 list, and his get are not only fast but game race horses—his son, Little Albert, is a conspicuous example of grit and determination.

Neernut is 15½ hands; blood bay with black points, weighs 1100 pounds, and trots without boots, weights or hoppers. He is a strong finisher, his last quarters the best of his miles, and his record mile of 2:12½ was pronounced by competent observers to be as good as 2:08, he starting five lengths behind, trotting around the first turn in fourth position and going the entire mile well out from the pole on account of footing. His individuality, breeding and speed guarantee his success as a sire. His oldest colts are now coming eight year olds, and they all show speed, her daughter Neeretta taking a record of 2:16½ at three years old at Santa Rosa five months after broken to harness. In 1899 she started six times, winning five first moneys and one second, getting a record at Los Angeles of 2:11½, which is the world's record for four year old fillies for 1899. During the season of 1900, Neeretta had to compete with the fastest horses of the East. She started nine times, winning five first moneys, two seconds and two thirds, getting a record at Galesburg, Illinois, of 2:09½, which was the record for five year old fillies for 1900. She is the only one of his colts ever campaigned, although all of them show great speed—twelve of which, within a few weeks' work, showed miles over the Santa Ana track from 2:17 to 2:19. He never sired a colt but that could out-trot its dam before it was weaned.

Outside of Neeretta 2:09½, twelve others have at public workouts and matinees made records as follows: Neernut Maid 2:12½, Jim 2:14, Toughnut 2:18, Dido 2:17, Neerbells 2:15, Neerdell 2:20, Cocoonut 2:19, Neerleen 2:24, Morgan 2:19, Burrnut 2:17½, Pete 2:20, Neerella 2:28.

Driving Club at Suisun.

[Suisun Republican, March 20th.]

A number of horseowners and others interested in horses met in the Town hall last Saturday afternoon to discuss the building of a track somewhere in this vicinity, and to organize an association if suitable grounds could be secured. Those present at the meeting were: B. F. Rush, Lewis Pierce, Frank Gurnette, John A. Wilson, Grant Chadbourne, John W. Harper, John W. Haile, M. J. Reams, Arthur Hilborn, Edward Dinkelspiel, Clint Peyton, W. B. Connelly, Lea W. Taylor and Robert Sparks. Grant Chadbourne was elected temporary chairman and John W. Harper temporary secretary.

The general sentiment of the gentlemen named was to secure sufficient land for the building of a good mile-track, and if enough funds could be secured, to equip the grounds with box-stalls, a grand stand, and also to lay out grounds for baseball playing and other out-door sports.

Lewis Pierce said that if the field southwest of town, which was formerly used for baseball grounds, would answer the purpose, he would entertain any reasonable proposition for renting it to the association.

After a general discussion the following committees were selected: Grant Chadbourne, Lewis Pierce and John W. Harper, to report on land suitable for a track, and Frank Gurnette, Edward Dinkelspiel and John A. Wilson to secure a membership list and also to act with the other committee named.

An investigation of the Pierce property was made Wednesday of this week. The committees also secured a proposition from Clint Peyton for the half-mile track on his property south of Fairfield. There will be another meeting Saturday afternoon of this week.

The Hartford Futurity.

The advertisement of the fifth renewal of the great Hartford Futurity appears on another page of this issue and we commend its perusal to every owner of a mare in foal. It has been raised in value to \$15,000 and closes April 1st, with a payment of \$5.

The entire starting fee is only \$35, less than one-quarter of 1%. Nothing equalling the liberality of this stake has ever been known in the history of either the trotting or running turf. It places a small fortune within the reach of the poorest trainer, and the colt that wins three heats in the race gets \$10,500, the largest first money in any trotting stake in the country. It is a three-heat race, each heat a race, and the money goes as they finish each heat. Write H. W. Wilson, Secretary Charter Oak Park, Madison Square Garden, New York, for entry blanks and enter every mare you have in foal.

Preparing for Oregon's State Fair.

The Oregon State Board of Agriculture met in Salem last week and took the initial steps towards the arrangements for Oregon's Blue Ribbon State Fair this year.

After making all necessary arrangements for improving the grounds, such as putting in a new water system, remodeling the grand stand, building more cattle sheds and horse stalls and making new walks the board got down to work on the premium list. The board expects to spend about \$10,000 in premiums, for which they had no trouble in securing funds.

The premium list was thoroughly revised in every department, and will soon be in the hands of the printer. A sweepstake of \$50 is for standard bred trotting stallion and five of his get, the get to be two year olds and under, and without restrictions to the breeding of their dams. The same premium is offered on pure bred draft stallions.

The board increased the premium on county exhibits from \$1000 to \$1300, divided into eight prizes, as follows: \$300, \$250, \$200, \$150, \$100, \$100, \$100, \$100. A committee consisting of W. H. Wehrung, George Chandler and M. D. Wisdom was appointed to confer with the state commission of the Lewis and Clark fair board to induce them to assist in getting these different exhibits, with the understanding that they be shown at St. Louis in 1904. The committee met with the Lewis and Clark fair board, and they passed the following resolution endorsing and encouraging the action of the state fair board in getting up these county exhibits:

"Resolved, That the Lewis and Clark Commission, in formal meeting, recommends that the State Board of Agriculture use its best efforts in promoting the special growth of exhibits for display at the State Fair, and expresses its intention to purchase the best class of such exhibits for the purpose of display at the St. Louis Fair when this board becomes legally organized and the act creating it takes effect."

The county of Marion also appropriated \$200 to defray the expense of gathering a Marion county exhibit, which, no doubt, will be followed by other counties in the State.

The board authorized the speed committee to offer a \$2000 stake for 2:17 pacers, to be known as The Greater Salem Stake, and the race to come off on Salem day, and a stake of \$2000 for 2:20 trotters, to be known as The Lewis and Clark Stake, the race to be pulled off on Portland day.

Also a \$500 stake for three year old trotters and \$500 for three year old pacers. Liberal donations have been secured in Salem and Portland towards the two big stakes, which encouraged the board to offer them.

Following are the superintendents secured for the different departments:

Superintendent of Pavilion—C. A. Murphy of Salem.

Superintendent of Art Department—Miss Mae Boese, of Salem.

Superintendent of Creamery—Prof. F. L. Kent, of Corvallis.

Superintendent of Poultry—C. D. Minton, of Salem.

Superintendent of Live Stock—George Gammie, of Portland.—*Rural Spirit*.

Holds to Dan Patch.

M. W. Savage has refused an offer of \$70,000 for Dan Patch. The famous pacer cost Mr. Savage \$60,000 about three months ago. He bought the stallion in New York City, and now Eastern men are so anxious to get him back that they telegraphed the offer.

Horsemen doubt whether Mr. Savage would entertain any proposition for the pet of his stock farm. At any rate the strong increase of \$10,000 in the market price within the short space of 100 days was not too great a temptation.

Tuesday morning Dan Patch will be removed from the Savage private stable on Portland avenue to the International Stock Food Farm on the Minnesota river. An arrival of interest yesterday at the farm from Pleasanton, Kan., was the first Dan Patch colt to be brought to Minnesota. Mr. Savage has bought a half interest in the stud colt and he will live at the farm. The colt was foaled January 6th, and \$1000 was offered for him before he finished his first day. The colt is named "Young Dan." His first dam was Cedar Belle and his grandmother Oleta.

Henceforth "Savage" will be a station on the Omaha road. The officials have notified Mr. Savage that they will call the farm station Savage hereafter instead of Hamilton.—*From Minneapolis Journal, March 14, 1903.*

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

Jackson's Napa Soda untangles the feet.

Grand Circuit History.

Over \$5,600,000 has been won by harness horses on the Grand Circuit since 1873, when track managers at Cleveland, Buffalo, Utica and Springfield first united and organized this now celebrated chain of trotting meetings, says W. H. Gocher, secretary of the National Trotting Association. The first circuit race meeting was held at Cleveland, July 29th to August 1st that year, and the first race on the Cleveland track was for a \$500 purse by horses that had never beat three minutes. It was a best three-in-five heat race and was won in straight heats by William Stewart's gray gelding, Silversides. The time was 2:37½, 2:35 and 2:38½. For two years the circuit remained unchanged, but in 1875 Rochester and Poughkeepsie were admitted. Hartford joined in 1876, and the circuit continued with seven tracks until 1878, when Springfield and Poughkeepsie dropped out. Buffalo fell out in 1879 and was re-admitted the following year, which, with the admission of Utica and Pittsburg in 1881, brought the circuit membership up to seven tracks. Since then, barring the year 1892, there have been annual changes in membership, and in all, twenty-four cities have been represented, only one of which, Cleveland, has enjoyed membership without a lapse. Buffalo, another of the original four, has three times dropped out, only to seek re-admission. New York is now in for the fourth time and Hartford for the third time.

In the thirty years of its existence the circuit has distributed to campaigning horsemen the sum of \$5,625,819, this being an average of \$27,947 per track annually. By virtue of its unbroken membership the Cleveland track is credited with distributing the greatest sum \$767,399, but there are ten other tracks that show a better average. The greatest average sum is credited to Brighton Beach, which in its single year of membership distributed purses amounting to \$57,500. Readville's six-year average of \$44,983 is the next best, while among the cities that have been in the circuit ten years or longer, the best average is Detroit's \$42,236. The circuit has extended into nine states, New York, Ohio, Connecticut, Massachusetts, Michigan, Pennsylvania, Rhode Island, Indiana and Maine. New York has had nine tracks as members, Ohio and Indiana three, Massachusetts, Michigan and Pennsylvania two, and Connecticut, Rhode Island and Maine one each.

The records of these states, in the matter of memberships and the years of each, is as follows:

New York—Buffalo, 25 years, Rochester 21, Utica 14, New York 10, Poughkeepsie 7, Albany 6, Glens Falls 5, Syracuse 2, Brighton Beach 1.  
Ohio—Cleveland 30 years, Columbus 7, Cincinnati 2.  
Connecticut—Hartford, 24 years.  
Massachusetts—Springfield, 18 years; Readville, 6.  
Michigan—Detroit, 11 years; Saginaw, 3.  
Pennsylvania—Pittsburg, 7 years; Philadelphia, 5.  
Rhode Island—Providence, 7 years.  
Indiana—Fort Wayne, 3 years; Terre Haute, 3; Indianapolis, 1.  
Maine—Portland, 1 year.

The following test shows the total value of purses distributed by each track:

Cleveland, \$767,300; Buffalo, \$760,410; Hartford, \$718,939; Rochester, \$450,295; Springfield, \$357,525; Utica, \$272,800; Detroit, \$464,400; New York, \$314,425; Columbus, \$211,525; Providence, \$191,140; Poughkeepsie, \$131,760; Pittsburg, \$117,350; Readville, \$264,500; Albany, \$64,350; Glens Falls, \$91,000; Philadelphia, \$67,950; Fort Wayne, \$74,000; Terre Haute, \$59,850; Saginaw, \$40,000; Cincinnati, \$69,650; Syracuse, \$39,000; Brighton Beach, \$57,500; Portland, Me., \$26,000; Indianapolis, \$13,600.—*From statistics in the new book "Tales of the Turf," published by W. H. Gocher.*

Other Remedies.

There are many remedies on the market such as kerosene, gasoline, benzine, grease, crude oil and tar compounds, the use of which generally proves a complete failure. They either burn the hoof, making it hard, dry and brittle, or grow a hoof which will shell and not stand the horse's weight. To use them is to do worse than to leave the feet uncared for. Campbell's Horse Foot Remedy contains none of these materials. It is not an oil in the sense which the term is generally understood, but is a remedy which penetrates the hoof without closing the pores, and heals soreness on the inside; oils the parts, preventing friction.

A very peculiar case is that of a colt foaled about a week ago by a mare owned by Ernest Winters, living near Toledo, O. The dam of this youngster was two years to a day when the colt was foaled. The sire is three months older and a half brother of the mare, the two running together in a pasture last summer.

Walnut Hall Farm.

Spohn Medical Co. LEXINGTON, KY., Sept. 24, 1902.  
Gentlemen:—We have used Spohn's Distemper Cure on this farm and in the racing stables three years. Since we are using it we have not had any cases developed of distemper, and prior to the time we began using your remedy we were much troubled with this disease. We have the best success with Spohn's Cure of all this class of remedies, and it is the best treatment we know of.  
Truly yours,  
H. BERGOYNE, Sup't.  
ED. BENYON, Trainer.

### Old-Time Record-Breakers.

While glancing over some old papers recently I was interested in the accounts given by an observer of the progress of the trotters, which has been wonderful indeed, and the end is not yet.

Racing horses has been the favorite pastime of the American people for many years. But harness racing has not been in the lead more than thirty years, and possibly not that long. But, at any rate, to-day the favorite sport of the American people is harness racing, and the wonderful advancement in this line is surely phenomenal, for in less than sixty years the record has been reduced thirty seconds.

At Hoboken, N. J., October 18, 1845, the grey mare Lady Suffolk started the world by trotting a mile in harness in 2:20. She was foaled in 1833 by Engineer, dam by Don Quixote. This was the world's record until July 2, 1849, when Pelham (a converted pacer), foaled in 1837, trotted a mile in 2:28, at Centerville, N. Y. At the same place on June 15, 1853, the bay mare Highland Maid, also a converted pacer, covered the distance in 2:27. She was foaled in 1847 by Saltzman, dam Roseana by Hickory. These three it appears, never lowered their records after once becoming champion.

Next to achieve greatness in this line was the well known and once famous mare Flora Temple, who was not satisfied with snatching the laurels from Highland Maid, who held the record for more than three years, but repeatedly lowered her own record, which she made final on September 2, 1856, at Union Course, East New York, which was 2:24. At Centerville, N. Y., August 9, 1859, she trotted in 2:22; at Cincinnati, O., October 7th the same year, she knocked off one-half second, and again at Kalamazoo, Michigan, October 15th, only one week later, she surprised the whole world by covering the distance in the remarkably fast time of 2:19. Putting herself in 2:20 list alone, where she remained solitary for nearly eight years. Recognized by all as the champion harness performer, she held the world's record longer than any other horse without interruption. She met all comers and goers and gallantly defeated them all, until the great Dexter took her measure, at Riverside Park, Boston, Mass., July 30, 1867, beating her time three-quarters of a second. At Buffalo, N. Y., August 14th, of the same year, driven by Budd Doble, he accomplished the feat in 2:17. Under this mark he held the championship until September 6, 1871, when the truly great daughter of Abdallah 15, Goldsmith Maid took a small slice off, and set the mark at 2:17 flat, at Mystic Park, Boston, Mass. On June 9, 1872, she reduced the record to 2:16. For about two years she held the title of queen of the turf, until, on September 17, 1873, at Sacramento, Cal., the brown gelding Occident divided honors with her by equalling her record.

This condition lasted only until the mare could be gotten into form, and at East Saginaw, Mich., on July 1, 1874, she again regained her name and placed the mark at 2:16, and on August 7th she trotted in 2:15 at Buffalo, N. Y., and from there she went to Rochester, N. Y., August 12th, where she performed in 2:14, and again Budd Doble cut her loose at Mystic Park, Boston, Mass., on September 2d of the same year, when she cut the fraction of a second and placed the mark at 2:14, which remained the world's record for nearly four years. John Splan was the next driver to successfully make a trial at reducing this mark, and with the fast and game gelding, Rarus, on August 9, 1878, at Buffalo, N. Y., drove him a mile in 2:13. St. Julien was the next in order, and on October 25, 1879, at Oakland, Cal., Orrin Hickok sent him over the distance in 2:12.

Then came the game daughter of Harold and Miss Russell, Maud S., who, on August 12, 1880, at Rochester, N. Y., driven by W. W. Blair, she trotted the mile in 2:11. St. Julien had been kept in racing form, and at Hartford, Conn., on August 27th beat this mark by one-half second, which made 2:11. He did not hold this honor long, for Mr. Bain had the chestnut mare on edge, and at Chicago, September 18th, she won the mile in 2:10. The next year, she again showed good and at Pittsburg, Pa., July 13th, trotted a mile in 2:10, and in August of this year at Rochester, N. Y., set the mark at 2:10. For three years this mark was not disturbed, but in August, 1884, Edwin Bither steered the black son of Dictator, Jay-Eye-See, at Providence, R. I., a mile in 2:10.

The very next day, however, Mr. Bain landed Maud S. a winner at Cleveland, O., in 2:09, and at Lexington, Ky., November 11th, same year, she made the mile in 2:09. At Cleveland, O., July 30, 1885, she made a record which, to the present time, stands unbeaten, going the mile to high wheel sulky in 2:08. At Stockton, Cal., October 20, 1891, the bay mare, Samol, went over that track in 2:08, and since that time we have had the bike sulky to race with, and the great difference between the two has never been

agreed upon. But for a number of years Mr. Bonner offered a nice stake for any horse that would pull a high wheel sulky over the Cleveland track as fast as Maud S., and although it was attempted several times by some of the fastest trotters, they were never successful. The performance of the trotters since this date is well known to all who have paid any attention to the sport, and consequently would hardly bear repeating. However, I cannot stop without saying a word about the present champion, Cresceus, who carries a record of 2:02, and is still in his prime and ready to defend himself at any time. He recently went on the ice in Canada, and also holds the world's record of 2:15 on the ice, which plainly shows that he is made of the proper stuff, and, barring accidents, may be able, under favorable conditions, to still lower his mark. And as he is an Ohio bred horse, and still belongs to the Buckeye State, I would be very glad to write Cresceus 2:00, champion of the world.—C. W. S. in *American Sportsman*.

### Favor State Regulation of Racing.

The Pennsylvania State Veterinary Medical Association has come out boldly in favor of the establishment of a state racing commission to regulate and control horse racing in Pennsylvania. The matter was taken up at the second day's session of the association at Odd Fellows' Temple, and the following resolution, introduced by Dr. Leonard Pearson, dean of the veterinary school of the University of Pennsylvania, was adopted:

"Whereas, Clean and honest trials of speed are of great value as a means of developing the quality of horses, and are most interesting and instructive as exhibits; and,

"Whereas, Horse racing receives its best development in the direction of wholesome sport, and is most advantageous to breeders in countries and states where it is under proper governmental supervision and control; while, on the other hand, it is not conducted in the interest of pure sport nor in the interest of horse breeders in states where there is not some oversight from a high and impartial tribunal; be it

"Resolved, That we, the Pennsylvania State Veterinary Medical Association, recommend the establishment of a state racing commission, to be composed of men interested in the improvement of horses, to be selected by the governor, and to be empowered to license and supervise race courses and race meetings to the end that horse racing may not be merely tolerated, without legal status, but shall be honestly conducted, free from gambling. In this way horse breeding and the improvement of horses may have fixed standing and definite support."

### \$15,000 Hartford Futurity.

In this issue we print the advertisement of the Hartford Futurity, opened by Charter Oak Park for foals of this year, to close with Secretary H. W. Wilson, Madison Square Garden, New York on April 1st, with a fee of \$5 per mare.

Though for more money than other similar events, barring the Kentucky Futurity the entire starting fee is but the nominal sum of \$35, less than one-fourth of one per cent. It is by long odds the most liberal event in the history of both the running and trotting turf.

In obedience to the growing demand for shorter races for colts, the Futurity has been made a three-heat contest, each heat a race, and the conditions are such that a colt is paid exactly what he wins, when he wins it.

It is next to certain that there will be at least three colt races trotted in New England in 1906, and breeders expecting to market their youngsters in the east—where the money is—cannot overlook the value of this engagement, for a colt not staked, is not worth much except for steak.

John Beresford, the New York turf writer, tells this story:

James Howard, secretary and practical manager of the great Washington Park Club of Chicago, is something of a wit as well as an old time racing man. He sold pools in the Lick House in San Francisco when True Blue, Grinstead, Rutherford, Joe Daniels and all those great equine lights were contesting four-mile struggles at the old track, now partially immersed in sand, near the Pacific Ocean. Mr. Howard believes there is a limit to even newspaper criticism, and while improvements were being made at Washington Park some one inquired: "Where shall we put the newspaper boys?" "If I had my way," solemnly answered the Nestor of Chicago racing, "I'd dig a deep cellar for them. And I'd keep the cover close down on them all the time."

Sober up on Jackson's Napa Soda.

### Lord Derby and Major Delmar.

Another of the big annual matches has been arranged. This time it is Major Delmar 2:05 and Lord Derby 2:05. Speculation from now on will be brisk as to which of the two has the better chance of winning, and every race and move either of the two has ever made will be gone over. The pages of the dope books will be well worn, and it is evident now that opinion will be about evenly divided on the outcome. Both horses have qualities that would win the race. Delmar gets away fast, and it cannot surely be said that he cannot finish fast as well. Still, it is far different to have a horse following that can trot the last half of a mile close to one minute, than to have one that cannot go the last four furlongs better than a 2:07 or 2:08 gait. The public never knows just why a horse will perform inconsistently. It takes very little to turn the tide of battle when horses are trotting around 2:06 all the time, and so one unfamiliar with the exact conditions would not be justified in saying that the performances of Major Delmar at Cincinnati and Lexington last fall were not in keeping with a great horse. Certain it is that he showed championship form at Memphis, and it is a question if there was a trotter on the ground that day that could have taken his measure if Cresceus be excepted. Admitting that one swallow does not make a summer, it must be admitted, however, that Major Delmar has shown form enough to give any trotter that ever lived an argument. No experiments will have to be tried with him. Alta McDonald and the Major nick perfectly, and this will be a factor that must not slip one's mind when making calculations on the result of his race with Lord Derby. Now what of Lord Derby? He has been before the public for three seasons and has been sensationally fast from the start, and still holds the championship for three consecutive heats as a green trotter. The serious question to be considered is, "Will he stay and trot?" He cannot make any mistakes and be at the Delmar gelding's head, and it is more than likely that the backers and friends of the last mentioned horse are banking on this proposition more than any other to win. If Major Delmar should race with him some day when he displayed the form that he showed at the Grand Circuit meeting at Cleveland, he (Derby) would be beaten; but, what about him if he comes to the wire in the condition he did when he beat The Monk 2:05 in the three fastest heats ever trotted, when one of them was in 2:06, and not one of them as slow as 2:07? As much respect and esteem as one may have for the gallant son of Delmar, it must be admitted that Derby would win. In Derby's favor it may be said that he has been many more miles at the clip the race will be trotted at, than has the Major, and it is likely that the balance of the conditions are in favor of the son of Mambrino King, with both geldings in perfect racing condition. George Spear's ability to get Derby to the post fit and right is unquestioned, and anyone at all familiar with Alta McDonald knows he will do his part and do it well, and here's hoping both are on edge when the bell rings, and that the race will not prove a farce, as so many of the matches of the past few years have proven to be.—*Horse World*.

### To Improve Breed of Polo Ponies.

Mr. Bennett, manager of one of the largest hackney studs in the country, while visiting New York recently, said that the experiment of Mr. John Gubbins would be watched by hackney breeders of both countries with great interest. Mr. Gubbins is the Tipperary gentleman who won the Derby with Galtee More and Ard Patrick, both colts of his own breeding. He spent last winter in Egypt, and while there purchased two beautiful high caste Arab ponies. Both are stallions and barely 14 hands high. So docile are they that, although never broken to harness, Mr. Gubbins had himself photographed while driving them. It is his belief that mated with the right kind of mares nice, good polo ponies can be produced, and that an agreeable relief or outcross from the hackney blood can be obtained. With the sport of polo so popular among horsemen of the wealthier classes, like Foxhall Keene in this country and many others both here and abroad, Mr. Gubbins' experiment will be watched with interest.

### Answers to Correspondents.

L. B. Ayer, Marysville.—High Tariff is a bay stallion, foaled 1894. He is by Silver Bow 2:16, dam Libretto, own sister to Hattie (the dam of Monterey 2:09) and Montana 2:16) by Commodore Belmont 4:30; second dam Barona by Woodford Mambrino 3:44, third dam Miss Gratz by Norman 2:55.

Delphi 2:12 is a black horse by Director 2:17, dam Ettie by Dexter Prince 1:36, second dam by Priam. He has one in the list—Topsy 2:10.

# Notes and News.

A whole day will be devoted to the California horses at the Cleveland sale.

The Governor has knocked out the entire appropriation for district fairs.

Budd Doble has named Kinney Lou in the \$5000 trot at Brighton Beach for horses of the 2:20 class.

The Los Angeles Driving Club will hold a matinee at Agricultural Park in that city this afternoon.

During Cresceus' stay in Canada both Lord Minto, the governor general, and his wife, Lady Minto, rode behind the trotting king.

Major Ban, a thoroughbred horse that has been in the stud at Oakwood Park Stock Farm for many years past, died last Sunday.

The prophets are already predicting that when Lou Dillon is sold at Cleveland next May she will sell for more than \$10,000.—*Horse Review*.

A pair of high stepping, chestnut colored horses sold for \$7000 in New York city last week. Dealers say that prices for this class are higher than ever before.

Eva Wilkes by Adrian Wilkes, a fine mare owned by Mr. Owen McAllister of Los Angeles, foaled a very handsome black colt by Coronado 2:17, son of McKinney, on March 21st.

The green mare Woodtella, by Axtell 2:12, dam Alice Black 2:29½, by Jersey Wilkes that trotted a trial last year in 2:12, will probably try for the M. M. for T. W. Price.

Pay up, on or before Wednesday next, April 1st, on your entry in the Breeders Futurity for foals of mares bred in 1902. Nothing helps sell a good colt like eligibility to a good stake.

Primrose 2:13 by Falrose is now owned by Jos. Barnett, and Shecam 2:12½ by Duffee is owned by F. E. Sturges, both gentlemen being residents of Albuquerque, New Mexico.

Dr. Boucher is in bad luck with his great pacing mare Miss Logan 2:06½. She lost her foal by Barondale 2:11½ this week. The foal never showed any signs of life after being born.

Tidal Wave, Mr. G. W. Gardner's very handsome and fast colt by Nutwood Wilkes out of Miracle, sister to Coney 2:02, has been shipped to Los Angeles and is in Walter Maben's string.

Walter Maben, who met with a severe accident at Los Angeles recently, is improving fast and was out last Tuesday for the first time on crutches. He will soon be back in the sulky again.

Ed Sewell of Santa Paula is the owner of a yearling colt that he thinks is about the finest youngster in the State. It is by Geo. W. McKinney 2:14½ out of Ella J., a full sister to Waldo J. 2:08.

Bessie Hal, the dam of Direct Hal 2:04½, dropped a very rugged and strong filly foal on March 1st at Columbia, Tenn. The filly is a coal black and by Direct 2:05½, thus being own sister to Direct Hal.

The services of an experienced and competent foreman for a cattle or sheep ranch or for general farming can be secured by an owner or company. For further particulars address the editor of this journal.

Geo. T. Beckers may campaign a string of four trotters on the North Pacific circuit this year. He has some Zombro colts that are the genuine goods. Zombro's list will be largely augmented this year.

John Ott of Pacheco, Cal., is the owner of a filly that will open the eyes of the natives one of these days. She is by Sidmore out of Belle, the dam of Enoch 2:12½ and Gaff Topsail 2:16. The filly is an own sister to Enoch.

Next Wednesday, April 1st, your second payment of \$5 on your entry in the Breeders Futurity for foals of mares bred in 1902, must be paid. Don't fail to make this payment as the stake will be worth more than the \$6000 guaranteed.

M. L. Lusk of Sacramento, who nominated his mare Sallie Brooks by Doc Button 2:31 in the Breeders Futurity for mares bred in 1902, had bad luck with her. She foaled a bay colt by Zombro 2:11 on March 21st, but it died the next day.

R. Niles of Witter Springs, Lake county, Cal., owns a nine months old colt, full brother to Lady Waldstein 2:15, that is growing into a counterpart of his sire. Mr. Niles intends training this colt a little next year and starting him as a three year old.

It matters not how slow a record a right good trotting-bred horse may have if he is good looking, thoroughly educated, well-mannered, and has plenty of style and action. Such an animal, with a record of 2:40, will outsell a "sheep" of a horse with 2:20 speed.

Don't overlook the stallion Barondale 2:11½ when booking your mares this year. There is not a better bred stallion in America, and fillies by him will be especially valuable within a few years.

Does any reader of the BREEDER AND SPORTSMAN know the sire of the dam of Little Miss 2:17½. It was given in a sale catalogue a few years ago as a son of Electioneer, but the name of the son was not stated. Can any of our readers give us any information of this horse?

Peter Brandow, one of the old-time trainers and horsemen of California, is seriously ill at his home in this city. Mr. Brandow is close to 80 years of age, but his many friends hope that his iron constitution may pull him through this illness and that he may yet enjoy many years of good health.

The Bonner Memorial \$20,000 purse for 2:12 trotters received sixteen nominations. Those who made them are David Bonner, W. A. Dickinson, East View Farm, E. E. Eckers, W. O. Foote, E. F. Geers, A. B. Gwathmey, Scott Hudson, H. J. Keenan, A. C. Maynard, J. M. McCready, Nutbourne Farm, Parkway Farm, Patchen Wilkes Stock Farm, T. W. Price and Henry Schmulbach.

A statistician who has studied the tables states that the sons of George Wilkes have sired ninety-eight performers with records from 2:01½ to 2:10. His daughters have produced ten with records from 2:06 to 2:10, and his sons have sired the dams of fifty-one with records from 2:02 to 2:10. His grandsons bid fair to prove even more successful as perpetrators of 2:10 speed than his sons have been.

Mrs. Z. E. Simmons, widow of the late turfman, Z. E. Simmons, has decided to continue her husband's breeding establishment with the assistance of her brother, Henry Burnstein, who for years has been connected with her husband in the breeding and training of high class trotters. They have rented part of the Ashland Park Farm and have a small but select band of broodmares quartered there.

There is a horse in Havana, Cuba, which probably has saved the lives of 1800 human beings. This equine philanthropist is kept in Havana's bacteriological laboratory, which, like the Pasteur institute, of Baltimore, was founded by a newspaper. This horse was given to that institute in 1895. From that year up to date it is said to have furnished 74,000 cubic centimeters of anti-diphtheria serum, with a record of 1800 cures.

Colonel Higby of Hollister has sold his fine young pacing stallion Dictatus Medium to Mr. Lathrop, the Hollister hay dealer. The price paid was \$1000. Dictatus Medium is by Dictatus out of Belle Medium, the dam of Stam B. 2:11½. This young horse is a fast pacer and is said to be very speedy this year. Two years ago, as a four-year-old, he showed his ability to go in 2:15 or better. He will probably get a low mark this year.—*Salinas Journal*.

Vi Direct 2:18, Captain Matson's big bay gelding by Direct that was on the California circuit last year, has been consigned to the Blue Ribbon sale at Cleveland. He is now in Al McDonald's care at Pleasanton and worked a mile last week in 2:18, last quarter in 31½ seconds. Vi Direct won four heats in better than 2:20 last year and has shown a trial of 2:12½. He is a nice read horse, being an easy driver and not afraid of anything. He should be a good horse in his class on any circuit.

The racing management of the Pennsylvania State Fair Association has announced four guaranteed stake races of \$1000 each to be decided at the annual fair to be held at Bethlehem September 8 to 11, in conjunction with sixteen open classes to be announced later for big purses. The stake events are for 2:40 and 2:20 trotters and 2:35 and 2:18 pacers, nominations to close on April 20 and horses to be named on June 20. National Trotting Association rules are to govern, hoppers no bar, and best three out of five heats.

Mr. Gerhard Wempe, of the well known firm of Wempe Bros. of this city, has just returned from a ten months' trip to Europe. He visited Italy, Holland, Germany, Switzerland, Austria, France and England, and enjoyed himself immensely. Mr. Wempe is a great admirer of the American trotter and owns a few good ones, and he states that the only disappointment of his trip was that he did not see any harness racing while abroad. He says that he saw many American horses in use on the roads, however, and that in some sections the horses are driven very fast and in a reckless manner.

Det Bigelow was down from Woodland this week and reports things quite lively at the track there. He is training about eighteen head of trotters and pacers, Walter Masten has about the same number, R. Nason of Dixon has eight or ten head, and A. B. Rodman, William Murray and others are working a few. Mr. Bigelow has a green mare by Diablo that showed him a mile in 2:15 last year that he thinks a great deal of, and says that Diablo is highly thought of and will make another heavy season in Yolo. Falrose, Walter Masten's stallion will have a full book and is siring large, handsome and fast horses with great uniformity. Mr. Masten owns a two year old trotter by Don Marvin that is one of the best prospects in California. The Woodland track is in good shape and all the horses stabled there are doing well. Secretary Thomas of the Woodland Association has been consulting with the Board of Directors in regard to offering a \$2000 stake this year for trotters of one of the slower classes, also a good stake for green pacers. They would be popular stakes and receive big entry lists.

Joseph Battell, Middlebury, Vt., author of "The Morgan Horse and Register," is as strong an advocate of temperance as Carrie Nation, but his methods of dealing with the saloon question are much more rational than those of the celebrated female hatchet wielder. A fire in Middlebury recently destroyed buildings valued at \$125,000. It is reported that Mr. Battell has offered to replace those that were burned with new buildings at his own expense if the inhabitants of the town will guarantee that a saloon shall never be located in that town.

In the British House of Commons recently a query was propounded to the Government as to the actual number of horses that had been lost by death in the Boer rebellion. The reply was that according to the figures furnished by the Quartermaster-General 349,728 horses and 53,339 mules and donkeys had perished in the field, while 15,960 died on board ship on the way to South Africa from the different ports of embarkation. The chief loss was from using horses not acclimated, as hard and constant work was required of them when they had not the strength to do it.

Tom Benton, sire of Mary Lou 2:17 and Shylack 2:15½ and Ned Winslow 2:12½, died at Sacramento recently. He was a sire of grand race horses and good individuals. Mr. Nichols of Sacramento owns a young horse by him that is now without a record but could doubtless be the fastest of Tom Benton's get were he raced. Vet Tryon worked this horse for four months last year and at the Woodland track he paced a mile in 2:12½, the last quarter of which was in 31 seconds. Mr. Tryon has the horse again this year and everyone is predicting great things for him.

The following warm item comes from Hot Springs, Arkansas: "Mart Demarest, the trainer of that reliable pacer Prince Alert, is more than anxious to take on the unbeaten Dan Patch for a race, with a big bundle of money as a side bet. Demarest is very sweet on the Prince, and thinks that there is no pacer in the world as game as his. What makes it look as if the Prince had a chance to beat the pacing marvel is that the Demarest horse paced a mile with ease at Memphis in 2:00 directly after Dan Patch had gone in 2:00½, in an effort to beat the world's record."

J. L. McCarthy & Sons, of Portland, Oregon, will hold a combination sale of trotters and pacers at Irvington Park, Portland on Tuesday, Wednesday and Thursday, April 7th, 8th and 9th. Among the horses to be sold are Ned Thorne 2:11½, Pathmark 2:11½, Bill Frazier 2:14, Mack Mack 2:15½, Bonner N. B. 2:17, Ben Bolt 2:18, Tickets 2:20½, Harry Hurst 2:23, Della Norte 2:24½, Mark Hanna 2:24½, Nellie Coover 2:26½ and a large number of yearlings, two and three year olds, besides roadsters and green horses that are good prospects for the track. Send to them for catalogues. See advertisement.

Down at Mr. Spreckels' Aptos Stock Farm, Sandy Smith has been busy during the past month entertaining Eastern visitors and showing them the fast young two-year-olds by Dexter Prince, Cupid and Aptos Wilkes that he is handling. Among the visitors have been Mr. Ed. Tipton, the well-known manager of the Fasig-Tipton Company of New York; Messrs. A. and S. Worthington of the same city, H. S. Deming, the banker, of Santa Cruz, and others. They all unite in saying that the two-year-old by Dexter Prince out of Gallata by Stamboul is one of the finest specimens of horseflesh in the country.

In a recent issue of the *Trotting World*, published in London, England, appears, among other advertisements, one of "the black gelding Uncle Will, American record 2:08 P., price 70 pounds (\$350)." The Year Book fails to show any trotter or pacer by that name credited with a record of 2:08½, or any other record. Another advertisement in the same column offers "the trotting stallion Woodlands, a winner of two first prizes, Wembley Park; a good stud horse, best blood in America, by Hambletonian 10." As Hambletonian 10 died in 1876, this English son is certainly nothing short of a wonder." The *Trotting World* needs a new editor.

"A horse that is looked upon as a coming sensation as a high stepping show horse is The Jester, the own brother to Lord Derby 2:05½, that was in Ed Geers' stable at Memphis last winter. Unlike his speedy brother, The Jester is really a handsome horse, standing sixteen hands high and with regular show horse action in front and behind. He has not a great deal of speed, a mile in 2:22 being the best performance Geers was able to get out of him, and he was sent to the sale ring last fall. C. K. G. Billings saw him and bought him on purpose to add him to his string of heavy harness show horses, and the son of Mambrino King will soon make his debut as a high stepper."

C. C. Christie, president of the new Kansas City Jockey Club, has decided to sell all his pacers and trotters, and it is said will purchase a stable of runners. He says: "I may do this before the opening of the summer season and I may wait until next year. Eventually, however, I will sell all of my trotters and pacers and purchase a stable of runners. Fourteen of my horses are now in Memphis in training. These include The Roman, Sable Kid, Nat Gordon, Bob Gratin, Lucifer's grandson; Miss Johnson, and a number of green colts. Yes, The Roman is in excellent condition and I expect a great season with him. He undoubtedly is a great horse. I believe he has not a superior in the country. In my opinion, he can trot as fast any horse in the world. Of course, when I sell my harness horses The Roman will have to go, too, but I don't intend to let him go for a mere song."

## THOROUGHbred DEPARTMENT.

The greatest obstacle to the permanent prosperity of the turf is the dearth of good jockeys, and the insubordination shown by the few who have some natural talent. This insubordination is largely fostered by artificial surroundings, and the uncalled for temptations even only fairly successful jockeys are exposed to. These temptations could easily be minimized by judicious managers of tracks, conducted as they should be in this country.

For the good of the sport from which they derive their sustenance it is absolutely necessary jockeys should be taught their proper status, not only when actually in harness, but in their private life also. They are simply grooms, and when treated as such in olden days furnished a far better supply of reliable riders than is available in the present era of valets and huge retainers. It is the growing popularity of the turf that enables these imps to earn such munificent wages, so surely the turf may with justice demand something in return.

For the good of that institution it is now imperatively necessary for even the steadiest of jockeys to consent to a curtailment of their liberties. Without asking them to submit to the stern discipline they would be subject to in the army, for a less monthly wage than they earn at a race course in a single afternoon, the jockey clubs should make it obligatory for jockeys to remain permanently at the tracks they expect to ride on, and should have a rule forbidding those to ride who had not reported to some designated authority at a reasonable hour on the previous night, or had left the confines of the track in the interim, without permission from the same official.

Such a rule would prevent riders spending their time downtown, a practice which is the real source of most of the mischief. It would also teach them that instead of being omnipotent they are only paid servants, earning big wages it is true, and sometimes taking big risks to earn them, but subject to regulations for their own welfare far less stringent than the discipline they would have to submit to in order to gain a tithe of the amount in any other calling.

To render this departure practicable it would be necessary to provide recreation rooms and Turkish baths at every reputable racecourse, else the old excuse—"I must go downtown to the bath to night, or I cannot do my weight to-morrow"—would always be forthcoming.

Establishing such necessary adjuncts need be no drain, however, on the resources of any track. If space within the enclosures were provided private enterprise would do the rest and furnish the boys with every accommodation necessary at less than half the cost of a trip downtown. In case of married men a slight, but a very slight, relaxation of this rule might occasionally be necessary, but the existence of reasonably comfortable living quarters at nearly every track usually obviates this difficulty.—*Exchange.*

T. Magee will shortly ship two or three of his mares that have been racing at New Orleans to Lexington to be bred at Mr. Corrigan's farm. Among them will also go a mare belonging to Durnell & Herz and the famous mare Lennep.

There promises to be a lively dispute over Noble Lewis. This jockey was taken East by J. A. Bennett, a well known New York owner, who is to pay the lad \$100 a month and allow him all he can make by taking outside mounts. J. Ellard, who has the boy under contract, claims that Bennett was to have given him \$2000 for the release of the boy, but has failed to do so. The matter will doubtless be inquired into by the New York Jockey Club.

The Thornton Stake at four miles was won by Rio Shannon, an added starter; the race furnished no semblance of a contest and was but little better than a farce. The day for long distance racing has passed and the money offered for the Thornton Stake might in future be used to better advantage in races of less distance and more class.

Jockey Minder has been re-instated by the California Jockey Club officials; Connell's ban has also been removed and he has commenced taking mounts again.

The clockers are too unpleasantly numerous to suit owners and these touts are becoming such a nuisance that the management has been importuned to exclude them from the track.

During the whole of last year the horses of one of the turf investment companies won but \$15,400 in stakes and purses. Figuring up the expenses of the stable at about \$20,000, there was a loss of nearly \$5000,

which shows the fallacy of the statement that investors would receive big profits from the earnings of its string.

In the nineteen years between 1882 and 1902 there were sold 498 yearlings at auction that made over \$5000 apiece. Sceptre was the highest priced yearling ever sold in the world, having been sold at auction for \$10,000 guineas, or over \$50,000.

The list of backers of the new racing project designed to make Los Angeles a second Latonia in importance in racing circles shows the men composing the syndicate to be of the most solid character. The list comprises Epes Randolph, vice-president and general manager of the Pacific Electric Railway Company; John A. Muir, general manager of the Los Angeles Railway Company; W. A. Kerckhoff, president of the Kerckhoff-Cuzner Lumber Company; William Garland, president of the Gila Valley, Globe and Northern Railway of Arizona; Captain W. M. Banning, of the Wilmington Transportation Company; W. E. Dunn, of the law firm of Dunn & Crutcher, and J. W. Brooks, manager of last season's racing at Agricultural Park. The interest of Randolph and Muir is said to be purely personal. It is denied that the railroads they represent are at all interested in the project.

Goldsmith, W. C. Whitney's four year old, is reported to be a much improved horse this season, and Trainer Rogers believes that he will be the best horse in training. As a two year old, Goldsmith ranked with the best and was never beaten until the finish was passed. He won many big stakes, among them the first Saratoga Special. Last year he ran only a few times, being completely out of form. It is thought that he never really recovered from his sickness of the previous winter. This season he has filled out very much and Mr. Rogers says that he is 200 pounds heavier. If Goldsmith returns to his two year old form and Gunfire is the filly John Madden thinks she is, the Whitney colors will be first in many of the big events for three year olds and upward this season. Leonora Loring and Blue Girl, the crack fillies, are also said to be doing nicely, so that everything points to a banner year for the Whitney stable.

H. A. Buck, compiler of the valuable work "Horses in Training," now beginning to be sought, explains one of the unavoidable delays which he has to contend with, and for which no one is to blame. Owners and breeders are given until March 1st as the limit of time in which they can claim names for their two year olds. But, unwittingly, many duplicate names are sent in, the first of which received have right of priority. For the others, however, there is the delay of correspondence and selection of another name. One feature Mr. Buck is adding to the book this year will make it vastly more valuable than ever before. Every two year old registered will be found in its pages, either with the trainers' lots to which they may belong, and indexed, or else alphabetically arranged at the end of the compendium.

### The New Track at Los Angeles.

LOS ANGELES, March 25.—Epes Randolph, manager of the Pacific Electric Railway Company, is to be president of the association which is to establish the race track south of the city and J. A. Muir, manager of the Los Angeles Railway Company, is to be a director in the same organization. Both of these officials will be interested financially in the "Ascot Park" project.

The new racing organization filed its articles of incorporation this afternoon. The club is capitalized for \$500,000, with \$700 subscribed, \$100 each, by the following directors: Epes Randolph, J. A. Muir, W. G. Kerckhoff, John J. Fay, Jr., J. W. Brooks and William E. Dunn. The incorporation is for fifty years, and the articles say the organization is formed for "the purpose of holding horse races and athletic exhibitions for which purses will be offered."

"I have been asked to accept the presidency of the association and will accept," said Randolph to-day. "I believe that the racing course, as planned, will be of great benefit to Los Angeles, where a racing course, first-class in every respect, will be made. The track will be conducted along the same lines that obtain on reputable courses of the East or Europe. We will conduct running and trotting races. It will be a driving club. There will be two tracks, a training course, magnificent stables and other accessories. A ditch now runs through the grounds and an artificial lake will be constructed in the center of the course.

"Auction pools will be the method through which the betting will be allowed. It is to be a high class race track and a credit to Los Angeles. As for betting, there is no successful race track in the country run without this feature."

### Herod Blood Wanted in England.

According to tradition the first Arabian ever brought to England was the Markham, imported by a Turkish merchant of that name, and sold to King James I. for 500 guineas. There is some reason to credit this, as Gervase Markham, who wrote a treatise on the horse in the previous reign, makes no mention of Arabians.

A Duke of Newcastle, who wrote a book on horsemanship shortly after the death of James I., states that he had frequently seen the horse, which he describes as an undersized and by no means well shaped bay. He won several plates at Newmarket for the king, who was passionately fond of racing, but there is no record of his having sired anything of note.

Straddling, sometimes called the Lister Turk, was brought over in the reign of James II. by the Duke of Berwick, who captured him at the Battle of Buda in Hungary. He was the sire of Snake, whose name appears in some pedigrees, but the first to appear in England of the three famous Eastern horses that founded the modern thoroughbred was the Byerly Turk, about the year 1699.

Though this horse was bred to very few mares, he got racers which distinguished themselves in Sprite, Black Hearty and Barto, and also sired Jigg, described in the old annals as a very indifferent race-horse, but destined to make his sire live forever in breeding archives.

The Darley Arabian was brought over by the brother of a Yorkshire squire who had been traveling in Turkey. He was bred to very few mares besides those of his owner and neighbor, Mr. Childers. For Mr. Darley he sired Almaraz (1713), a champion race-horse, and his full brother, Aleppo, for which the Duke of Somerset paid a high price, as values went in those days.

But the Darley sire did much better for Mr. Childers than for his owner, as mated with Betty Leedes he got Flying Childers, foaled in 1715. This horse is supposed to have been the champion race horse of the eighteenth century, not even excepting his relative, Eclipse, for when six years old he gave twelve pounds to Fox, considered up to then the best horse in England, and beat him a quarter of a mile over the four miles Beacon course at Newmarket.

As a sire Bartlett's Childers, whose title to be the full brother of his flying namesake is disputed, but who was undoubtedly a son of the Darley Arabian, far outshone his relative, as he was the great grandfather of Eclipse.

The last of the great trio was the Godolphin Arabian, a brown bay with one white heel, of whom an authentic portraits hangs in the library at Gog Magog, the Cambridgeshire seat of the Godolphin family, in the park near which his grave is shown, the inscription stating he died in his twenty-ninth year, 1753.

At one time a strain of the blood of this horse was considered absolutely necessary in the pedigree of every good race horse, but of late years it has almost died out, not only in England, but in all other countries where race horses are extensively bred. As far as England is concerned the Byerly Turk blood seems destined to share the same fate, but it is strongly represented in this country by descendants of Herod, and also in Australia.

This great colt, which was known during his racing days as King Herod, was bred by the Duke of Cumberland in 1758, and lived until the end of the covering season of 1780. His dam Cypron, foaled in 1750, had some Darley Arabian blood in her veins, and was a wonderful producer. Put to the stud as a four year old, she produced no less than sixteen living foals, being barren in 1767 and dying in the summer of 1771. More remarkable still, thirteen of these foals, though most of them were by different sires, ultimately proved themselves great race horses.

An agitation has recently been started among English breeders looking to a revival of the Herod blood. This has led to the importation of a number of Australian sires, though none of them are so rich in the desired strain, as many that could be purchased for the same or even less money in this country. If the craze for Herod blood continues, as seems more than probable, England should afford a really good market for some of our strongly native bred sires. These do not seem to be very popular in their native land, imported blood now being all the rage here. Probably owners of horses tracing strongly to Herod, whose most famous descendant in this country was, of course, his grandson Diomed, might find a good market in England.—*Daily America.*

It is said that Prince of Endurance by Prince of Monaco may run the Tennessee Derby in E. E. Smathers' colors. The colt's work has been so impressive that a transfer may be made to Mr. Smathers by the owners, Durnell and Herz. He is also entered in the American and Kentucky Derbys.

## A Good Talk on Breeding Dairy Cattle.

The following summary of the address of Rev. J. D. Detrich before the recent meeting of Pennsylvania Dairy Union on "The Sire, the Dam and the Calf" was reported by Mr. W. F. McSparran for the Ohio Farmer.

Before our readers peruse it we wish to say that Mr. Detrich is one of the best dairy farmers in Pennsylvania and is a very close observer, as well as reasoner on what he observes. He said:

"The breeding of the thoroughbred animal is a most difficult task. The breeding of the milkman's cattle is an easy task; therefore, we will take up the easy task at first. One of the most remarkable books written in the last century was Darwin's Origin of Species. It has changed our thinking in theology and nature to such an extent that no man wants to trust to opinions, but every man builds his experience on facts founded on information. The science of breeding is no exception to this, and we are becoming much more intelligent with nature and her laws every day by deducing the laws and rules from actual facts. This brings us into contact with nature in a very different way from that of individual, haphazard thinking.

"Darwin speaks of 'Natural Selection.' In the breeding of thoroughbred animals we find that the only difference is that the brain of man, being intelligent, sees and knows the points and qualities of animals, and imparts these from one generation to another according to the laws of breeding. The squirrel is the same to-day as in Solomon's time. The quail is just the same size, and with these there is inbreeding year after year. When persons say animals should not be inbred, we know that it is a matter of opinion. Turning to the field and the forest, we find that that is just what is being done.

"When we remember that on the islands of Jersey and Guernsey and up in that little country of Denmark, there is nothing but inbreeding, we would conclude, according to the people who oppose inbreeding, that the animals there would be weak and their fine qualities completely vitiated. Instead of that, when a man wants to improve his stock he goes to those sources for the carefully inbred, thoroughbred animal.

"It is not an easy thing to raise a 2:10 trotter. It is not an easy thing to raise a cow which will produce 35 pounds of butter a week. Some persons cast discredit on all these things by saying, 'I don't believe it.' We have improved speed in the trotter by inbreeding, and in dairy herds we find more 14-lb cows in America than ever before. This is because of the wisdom and care of those breeders who have invested their money in superior animals and have reproduced good qualities.

## THE SIRE.

"A good sire should be selected. The man who mixes thoroughbreds is not wise. Pure water or pure milk is good; by putting them together you have swill. In selecting a bull, get a long liver, a good breeder, a prize winner. The head of the dairy bull should be bony rather than meaty. The head should be wide between the eyes. The upper lip should project well out over the lower one.

"The jaw should be neat and clean. The skin under the chin should be loose and thin; the neck fine and sloping; the shoulders strong. There should be splendid muscle. The dewlap should hang down to his knee at least. The back should be level, and strong across the hips, and the ribs well sprung. The whole barrel of the animal should round out and hang down deep at four years old. The scutcheon is a matter of fancy. The rudimentary I like to see. The tail should be long and shapely, and, above all, the bull should have a soldierly walk.

"Inside of the bull there is something we cannot see and which makes a wonderful difference. This we call temperament, a moral force or a sort of intellect. The bull should have a good pedigree. In most good pedigrees of dairy animals one will find an immense amount of inbreeding, at home and abroad, but there is often a misapprehension of the blood transmitted after a few generations. Taking the sire or dam of the sixth generation, what do we get? If you put 512 numbers into a hat and let a man take one out, he is simply picking out one of the possibilities of prepotency which a sire brings to a calf six generations away. If you go back to the twelfth generation it is surprising how those component parts diminish.

## THE DAM.

"The dairyman's herd should be bred for a good flow of milk and for the production of healthy calves. Motherhood seems to be the nature of the dairy families and we should encourage it. The choosing and breeding of the dam should be looked after as carefully as has been recommended for the bull.

## THE CALF.

"The care of the calf should begin as soon as the

mother has been bred. Just as a colt is broken to a trot, so the heifer should be manipulated for the production of milk. We have succeeded in developing the heifer's udders by a simple method. An old broom worn off to the sticks is rubbed from the front legs of the animal back to the udder. I do not approve of handling the teats on account of inducing milk secretion. The time of breeding the heifers should be regulated by the owner's knowledge of the animal, for the owner who says he breeds his heifer at eighteen months is all at sea. When she is big and strong enough she should be bred, otherwise there is a tendency for her to begin to put on fat and develop beef. This matter should be governed and regulated by the watchful eye of the master."

Mr. Detrich alludes in but a single sentence to that inside something in the bull which we call "temperament," and which determines very largely so far as he is concerned, whether he breeds toward milk production, or toward meat production. Hence we often speak of the bull as having a decided "dairy temperament." The force and logic of this principle can be well seen where all consider the action of the dual purpose people who select a bull of the most pronounced beef form and temperament and then tell us he is of a "milking strain" and the embodiment of very desirable dairy qualities. If these men are right, there is no such thing as science or well defined principles of dairy breeding. The breeders of Holsteins, Jerseys, Guernsey or Ayrshire cattle would never have developed their cattle to the present pitch of milk capacity, had they adhered to any such mixed doctrine. Prof. Thos. H. Shaw says the doctrine of special purpose breeding has cost this country tens of millions of dollars by crossing dual purpose cattle with "dairy blood."

This merely conjectural statement may be offset by another to the effect that the country has lost more millions of dollars in loss of milk by farmers accepting the dual-purpose heresy and crossing good dairy cows with beef blood bulls. We once knew of a herd of cows which a farmer in this country had brought up to 275 pounds of butter per cow by wise breeding toward special dairy qualities. His son wanted more meat and bought a "dual-purpose Short horn bull of undoubted milking strains," he said. In eight years the cows in that herd were the daughters of that bull, and their average butter production was 160 lbs. per cow. Great is dual-purpose. What a vista of improvement in the dairy capacity of our cattle it opens up to us.

## The "Jersey Lily" and Cresceus.

TOLEDO, O., March 12—"What a magnificent animal he is! He looks a champion, every inch of him," said Mrs. Lillian Langtry yesterday afternoon when Cresceus was brought out of his stall for her inspection at the city stables of George H. Ketcham.

The distinguished actress some time ago expressed a wish to see the "King of the Trotting World" upon her visit to Toledo. It had been intended to entertain her at the farm, but she did not arrive in time to go to the farm, and arrangements were made to bring the horse into the city. He was hitched to a road wagon and driven through mud that was knee-deep the seven miles from his home to Toledo. It was not proposed to disappoint the great actress simply because it meant wet feet and a muddy coat for the great horse. As soon as he reached the stables, the best groom that could be found was put to work on Cresceus and inside of an hour the world-beating legs were as clean as ever, his mane and tail had been crimped and curled, and his glossy coat was polished until it looked like burnished gold. He was in every way thoroughly fit for the reception of the distinguished guest.

Mrs. Langtry is an enthusiastic automobilist, owning several machines of her own. The party were at once taken into the barn and the horse was uncovered. Before he had been brought out on the main floor Mrs. Langtry walked into his stall and looked him over pretty thoroughly. It was evident that she was right at home with a horse. Cresceus was inclined to be a trifle playful, and this fact did not tend to assure the male visitors that he might not cause some trouble in case he felt inclined to do so. They sidestepped pretty lively, but Mrs. Langtry stood her ground. She was apparently the least concerned.

"I do not know that I ever saw such wonderful muscular development in a horse," she said when her attention was called to the remarkable hind and fore quarters of the animal. "That is characteristic of the thoroughbred. I should think that there was a great deal of it in him."

In this she was somewhat mistaken, as it is necessary to go back several generations in order to find an ancestor of the present champion which could boast of the real blue blood of the thoroughbred.

"I think that you are entitled to almost as much

credit as the horse for his record-breaking performances," she said, turning to Mr. Ketcham.

"I have only credit that I take upon myself is that of sticking to him until we had accomplished something," said the owner.

"I notice another feature that would indicate that he is a thoroughbred, and that is small feet," remarked the actress. "He has an unusually intelligent face, and his eyes are indicative of his mental capacity. I do not wonder that you did not care to part with him. If he belonged to me, I do not think that money could buy him."

While Mr. Langtry was talking, she was stroking the neck and patting the head of the animal, and, although it has been claimed that he had a particular aversion to women, he seemed rather to enjoy the attention that was being bestowed upon him. Altogether, Mrs. Langtry did not spend more than twenty minutes at the stable, but in that brief time she showed that she knows all of the fine points of a horse.

After the visit she said: "My knowledge of harness horses is very limited. What little I do know in this respect has been gained from reading the race accounts published in the daily papers. In England, you know, we devote all our time to the thoroughbreds. The trotters and pacers are at a discount. However, in Cresceus I think that Mr. Ketcham has a truly remarkable horse. He is built for speed. This is made evident by the strength that he shows in the wonderful development of his chest and hips. The width of the front quarters shows endurance, and the muscles of his hind quarters give him the driving force. I was surprised to see how gentle he could be. Since seeing the great trotter, I am almost tempted to make a purchase for myself. I feel as though I could get on with the champion famously."

Speaking of her running stable, Mrs. Langtry said: "I have not fully decided whether I will bring the horses across this year or not. In case I do not come this season, I certainly will next. I like the manner in which the American meetings are conducted. I think that it is always the best horse to win here. I now have thirty-five horses in my stable and they are being prepared for the meets by my old trainer, Fred Webb."

Before leaving the city, Mrs. Langtry was presented with a copy of the life of Cresceus.

## Death of a Valuable Stallion.

The very widely known Sacramento stallion Tom Benton 15705, the property of Mrs. John L. McCord, has just died at her farm on the Cosumnes river, aged twenty-five years. He was very highly esteemed by critical breeders as a sire of race horses and roadsters. His fastest sons are Ned Winslow 2:12½ and Shylack 2:15½, and his best daughter was Mary Lou 2:17. These horses attracted a wide notoriety some years ago when in the hands of the late John L. McCord they were among the most successful horses in California. Mary Lou has since produced a colt Kinney Lou which showed phenomenal speed in the East last summer and is expected to beat 2:10 list season.

Tom Benton was particularly successful as a sire of road horses, his colts being uniform in type and color, very enduring, free and of good disposition.

Like all good things, Jackson's Napa Soda has a dozen counterparts.

Horse Owners Should Use

## GOMBAULT'S CAUSTIC BALSAM

The Great French Veterinary Remedy.  
A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

**SUPERSEDES ALL CAUTERY OR FIRING.**  
Impossible to produce any scar or bluish. The safest best Blisters ever used. Takes the place of all liniments for all sorts of sore throat. Removes all Bunches or Blenches from the Horse's or Calf's.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

**WE GUARANTEE** that one bottle of Gombault's Caustic Balsam will give more actual results than a dozen bottles of any liniment or pain cure must ever make.

Every bottle of Caustic Balsam is warranted to give satisfaction for \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address:

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Conducted by J. N. De WITT.

### — Amateur Sportsmen

Charles Miller, James Lynch, T. Thompson, Bill

Ashcroft and Al Hudson fished for bass in San Antonio slough on Sunday. The water was muddy and not in good condition for fishing. Nevertheless Miller returned to the city with two fish weighing eleven and eleven and a half pounds respectively.

The anglers who frequent the Angel Island fishing grounds must keep out seventy-five or a hundred yards from the shore. These sentries have no discrimination and order all boats away from close proximity to the island. This state of affairs is deplored by the anglers, who find that a number of good fishing places are now unavailable. The illicit landing of whiskey, purchasing of clothing, etc., from the soldiers and the surreptitious ferrying of soldiers to Tiburon is the reason for a guard being placed along shore.

The members of the Fly-Casting Club will be at Stow lake this afternoon and to-morrow morning when the third classification contest will be in order.

What to wear for an outing, a fishing or a hunting trip has been a perplexing problem, the attempted solution of which has given a vexatious termination to many a promising recreation or sporting jaunt. A reliance on old clothes, hats, shoes, etc., with the reflection that the junk can be thrown away afterwards is a flimsy makeshift that brings its own reward when the careless outer comes into contact with his fellows—a brief reflection satisfies him to his chagrin, that he is with them but not of them.

Outing clothes, haberdashery, etc., are made up in bewildering variety and style, the most of these duds being made simply to sell to confiding purchasers. The utilities of fit, comfort and convenience being lost sight of entirely in the desire of shoddy manufacturers to foist the shadow for the substance upon inexperienced or gullible buyers. Another objection that may be urged against some of the truck that is offered for sale, is that it is made up so fancy and gaudy, that the wearer can be certain of frightening fish and alarming game; with also a strong element of chance in favor of the wearer's reception of a rifle bullet or two from the fellow who shoots at everything conspicuous or that moves in the brush.

Canvas and leather properly made up into various garments and articles are recognized as coming nearly up to sportsmen's requirements than any other materials. For range of selection, price, workmanship and quality the goods manufactured by E. C. Cook and Brother of Chicago offer a high standard of excellence for the sportsman's choice in leather and canvas coats of all descriptions, drill and imported corduroy coats, vests and pants, hats and caps in variety, leggings, bags, belts, covers, gun cases, holsters, chamouis shirts, fishing rod and rifle covers and cases, etc., etc.

These goods are guaranteed by a house having an experience of 36 years, and with facilities second to none in the country. The goods mentioned can be had at the leading retailers in this city. A request addressed to 49-51-53 Kinzie street, Chicago, Ill., will bring by return mail a descriptive catalogue which no sportsman can afford to be without.

Fabulous stories are told of the almost incredible supply of salmon in Hudson straits and Ungava bay. A former agent of the Hudson Bay Company states that these salmon are the finest of the world, and just as superior to the Restigouche fish, or to those of any of the other rivers of the St. Lawrence basin, as these last are to those of the Pacific slope. Of course, this difference in quality will cause no surprise to those who know how the firmness of flesh of the principal fishes of the Salmonidae is improved by a low temperature of the water and a northern habitat.

It is only within comparatively modern times that any attempt has been made to take these fish in considerable quantities for export. The plan adopted for their capture was borrowed from the porpoise fishermen of Hudson bay, and it is doubtful if salmon or trout fishing is done in the same manner in any other part of the world. The coast of Hudson straits is indented by thousands of small bays and estuaries into which many rivers flow. At low tide there is little water in any of these inlets, but at a high tide the water rushes up into them for long distances.

The tides rise 25, and in some instances, as much as 50 feet. At high tide in the seasons when salmon and sea trout are running, these fish follow with the water into the bays and rivers as far as the tide goes and swarm back with it when it ebbs. The Hudson bay man already referred to states that he has seen the smaller rivers and streams, or rather the stream beds, perfectly filled from shore to shore with salmon or sea trout, for the two seldom run together, struggling upward with the tide. It is impossible to draw seines against such a mass of fish, and the fish wheels of Oregon would be impracticable. The simple trap copied from the porpoise hunters proves very successful. Immense nets are made from the largest and strongest twine, and of length and depth to suit the inlet to be fished. At low tide the nets are set at the mouths of the bays or inlets, and the top of the net is loosened and allowed to sink to the bottom in order that no obstruction may be offered to the fish as they pass up with the rising tide. Just before the tide turns the lines holding down the top of the net are raised, and the buoys instantly rise to the surface and the trap is set.

As the tide comes back men are stationed some dis-

tance above the nets, and with the aid of poles and brushwood, with which they beat the river, contrive to prevent the great mass of the fish from pressing upon the net and carrying in away. The salmon rush up stream again by thousands, and so panic-stricken do they become at the frightful disturbance of the water that tons of fish are often left on the dry beds of the inlets by the receding tides. As many as 10,000 salmon have thus been taken at a single haul. Those who have seen them say that the marvellous salmon runs of the Oregon rivers are not to be compared to the tremendous rushes of the fish in Hudson straits.

Dustproof Harry has an Eastern prototype and he never fails to howl whenever there is the ghost of a chance. Anything to go on, however shadowy, is the occasion of a tirade on game protection that is torrid in its intensity. The game protection, however, is mostly the same old game—putting a close season on the dollar and locating as large a dollar preserve as possible under the protecting shield of the main howler's bank book.

The Victoria Colonist refutes what possibly might be an imaginary case, the foundation for the "roar" is so ludicrous.

Curator John Fanning of the Provincial Museum has lately received a communication from G. O. Shields, editor of Recreation, of New York. Mr. Shields writes that he has received an indignant letter from a correspondent of his paper complaining that large shipments of deer feet were being made from British Columbia to a manufactory in Philadelphia, where they were being made into cane and umbrella handles. This correspondent further alleges that British Columbians ship the deer feet in large casks, and in order to preserve them, subject them to a pickling process. Mr. Shields in his letter to Mr. Fanning desires information on the subject. Mr. Fanning was seen yesterday and stamped the entire matter as the veriest nonsense. He finds a parallel for the present absurd story regarding the export of pickled deer feet in the claim some years back in the Eastern press that birds' eggs were being sent from this province in barrels. Mr. Fanning characterizes the alleged export of deer feet as a ridiculous fake, and is addressing a letter to Mr. Shields showing how utterly unreliable are the views of such an ill-informed personage as the particular correspondent of Recreation here referred to has proven himself to be.

### San Francisco Show.

The premium list for the seventh annual show of the San Francisco Kennel Club show came out during the week. With the exception of Bloodhounds, Newfoundland, Borzois, English Foxhounds, Chesapeake Bay dogs, Dalmatians, Poodles, French Bulldogs, Beagles, Black and Tans, Skyes, Pomeranians, Maltese, Toy Terriers, King Charles and Blenheim, Italian Greyhounds, Chows, Esquimaux and Miscellaneous, the classes for each breed are full. Deerhounds, Airedales, Irish Terriers, Bedlington and Pugs are only lacking in novice classes. The total number of classes is 285. Entries for the show close April 11th.

The list of specials is one of the best ever offered. In view of the possible competition of Eastern dogs, "these specials are to be competed for and awarded to dogs owned on the Pacific Coast." Upwards of 15 silver cups, 30 silver trophies, 15 silver and gilt medals, 25 silver and 5 bronze club medals, besides other handsome prizes are offered in connection with the regular club awards. The latter will consist of the club's silver and gilt medal for first, silver medal for second and bronze medal for third. No cash club prizes are offered nor will any cash be given as handlers' prizes. We were under the impression that cash kennel prizes would be offered. Dr. O. K. Steers will officiate as usual, as the club's veterinarian. The display of trophies and prizes in Shreve's window on Market street is a most attractive one and should influence many entries.

The office of the club is located at No. 630 Market street, where premium lists, entry blanks and any further information desired can be obtained.

George Allender, a trainer and handler who several years ago had the Thistle Glen Kennels is back in the ranks again, having recently opened the Fruitvale Kennels, at Fruitvale, where he will take dogs to board and train.

### Kennel Registry.

#### SALES.

Delvorton Kennels sold to Ed. Tobin, March 20, 1903, a red dog puppy Cocker Spaniel.

Al Myer sold to Wm. O'Conner, March 20, 1903, the white Bull Terrier dog Teddy (— — —).

#### VISITS.

Plumeria Cocker Kennels' red Cocker bitch Plumeria Flo (Ch. Hampton Goldie-Queen K.) to Glenwood Kennels' Ch. Havoc (Ch. Black Duke-Woodland Jude.) March 5, 1903.

Plumeria Cocker Kennels' black Cocker bitch Omo Girl (Ch. Omo-Ch. Gaiety Girl) to same owners' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Readie.) March 12, 1903.

Plumeria Cocker Kennels' black bitch Plumeria Portia (Ch. Hampton Goldie-Ch. Princess Flavia) to Delvorton Kennels' Ch. Woodland Duke (Ch. Black Duke-Woodland Jude) March 20, 1903.

Plumeria Cocker Kennels' Jetta (— — —) to same owners' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Readie.) March 12, 1903.

### Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today, having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

### Opening of the Trout Season.

On Wednesday next, the weather proving fair, the early dawn will find enthusiastic anglers on the banks of innumerable trout streams.

Conditions seem to be exceedingly favorable for a splendid season. Reports from many sections are encouraging for the knights of the creel.

The most accessible stream for local fishermen is the Paper Mill. Word received early this week from that worthy sportsman and good angler, Theodore Rothschild, was the following good tidings:

"Sam Wells and self prospected the Paper Mill Sunday. We had 100 strikes at a hookless spoon, the fish running in size from 6 inches to 1 foot, in a distance of 3½ miles. It almost broke our hearts to see the beautiful rises and hands off. We enjoyed it immensely and every one of these fish were ticketed for April 1st."

Reports from Santa Clara county are to the effect that the different streams are full of trout. Smiths Creek and the Santa Ysabel are fairly alive with large trout. In Saratoga creek, we are chagrined to note there is not a drop of water below Sorosis fruit farm.

### The Early History of Fly-Fishing.

It seems hardly credible that, notwithstanding the fact that fly-fishing has been in vogue more or less for two thousand years, such scant reference has been made to it in the writings of the old-world authors. With the exception of Martial, who simply says—

"Who hath not seen the scarus rise,

Decoyed and caught by craftful flies?"

there is no one to be quoted but Elian on the art amongst the ancients. In his "De Natura Animalium" this writer says—"The Macedonians, who live on the banks of the river Astreus, which flows midway between Berea and Thessalonica, are in the habit of catching a particular fish in that river by means of a fly called hippurus. A very singular insect it is; bold and troublesome, like all its kind; in size a hornet, marked like a wasp, and buzzing like a bee. The predilection of the fish for this prey, though familiarly known to all who inhabit the district, does not induce the angler to attempt their capture by impaling the living insect. Adepts in the art have contrived a taking device—*captiosu quadam machinatio*—to circumvent them, for which purpose they invest the body of the hook with purple wool, and having adjusted two wings of a waxy color, so as to form an exact imitation of the hippurus, they drop these abstruse cheats gently down the stream. The scaly pursuers, who hastily rise and expect nothing less than a dainty bait, snap the decoy and are immediately fixed to the hook." According to "Bibliotheca piscatoria," this passage was pointed out by Stephen Oliver, author of "Scenes and Recollections of Fly-Fishing;" and it is here transcribed because it is so clearly identifies the art of fly-fishing. Moreover, as will be observed, it tells of the method of using the lure, viz., "they drop these abstruse cheats gently down the stream." As the artificial fly was, from its material, evidently a floating fly, this style of procedure cannot be found fault with. It is presumable, from specimens that have been discovered that the hooks of those ancient times were made of bronze.

There can be found nothing referring to fly-fishing, beyond what is said by Elian, in the ancient writers. He seems, in addition to the above passage, to particularize our grayling as a fish readily caught with a sort of gnat of most annoying disposition. In consequence of the dearth of information, a great hiatus occurs, for, until the first book on fishing written in the English language, there is no further mention of fishing with the fly, either artificial or real. This first book, the angler hardly needs to be told, is that treatise on "fysshynge wyth an Angle," included in the "Boke of St. Albans," written by her prioressship worthy dame Juliana Berniers, "to the extent that youre age maye the more floure and the more longer to endure." This fair angler-author advises fishing for trout in "lepyng tyme" with a "dubbe"; and at the conclusion of her treatise she gives directions for the making of twelve sorts of "dubbes" for "troughte and graylyngs."

The details of one of these will be a sufficient sample for all: "The donne flye; the bodye of the donne wolle and the wynges of the pertyrche. Another donne flye; the bodye of blacke wolle, the wynges of the blackest drake and the jay, with the wynges and under taylor." It will be conceded that these details are simple enough for any purpose, except perhaps that of catching trout. Perhaps, however, these fish in Dame Juliana's time were not so civilized as they are now. Judging, indeed, from the cuts of tackle given in the famous "Boke" it is certainly permissible to think they were not. The work referred to bears on the title page of the original edition, "Emprynted at Westmestre, by Wynkyn de Worde, the vere Thynicarne of our Lorde M.C.C.C.C.L.X.X.X.X.V.I." It will be seen from this that the Boke was of the first printed in England.

The passages here quoted from Elian and Berniers are given as being the two earliest references to fly-fishing in the ken of angling bibliologists. Perhaps some of the readers of the BREEDER AND SPORTSMAN, out of the storehouse of their memory, may be able to give us references showing the estimation in which fly-fishing was held by the Greeks, or other ancient nations other than those related here. It seems strange that only one writer mentions it of the Greeks, and that there are no references extant to it at all between that time and the date of the "Boke of St. Albans."

### Goods for the Outing Season.

The Skinner Co., 801 Market street, San Francisco, have imported special goods from England for making Outing Suits for both men and women. These fabrics are dustproof, dressy and durable, are sold by the yard, or made to measure.

One of the newest and most useful novelties of the season is Skinner's Umbrella Tent. Can be put up or taken down in five minutes. Packs into a bundle 37x7 inches, and weighs 15 pounds. Just the thing for mountaineering in vacation.

### Trout Fishing on Rapid Streams.

On rapid streams, minor streamlets, cascades or rapids, the manner in which the trout takes his food is peculiar and forms almost a contrast to the manner of those in deep and sluggish streams; in them the feeding fish may be seen lying near the surface of the water watching for the passing fly quietly and calmly, and any fly alighting near him is gently propelled towards him or perhaps rises again from the water after dapping once more over his anxious eyes, to whom, silly insect as it is, it displays its beauty and calls forth, perchance, admiration from him, examining its form and symmetry and scrutinizing its every motion and plumpness of body, till now, the ephemeral beauty being within easy reach, the trout fully satisfied with his leisurely inspection, gives one stroke with his tail and secures his prey. How widely different is the course pursued by the trout on the rapid stream, for here he well knows that as soon as the fly has alighted on the water it will be instantly carried away by the current, and if missed by him in his attempt at capture will be washed into the jaws of his neighbor only a very short distance, perhaps few inches, below. He, a smaller fish, not daring or presuming to occupy the best place in the pool or eddy, but humbly and submissively contenting himself with a spot lower in locality and less propitious in feeding, pleased to partake of the chance insect his superior has allowed to pass, voluntarily or not, and never venturing beyond the precincts permitted him by his elders, well knowing that any infringement of their rights of property would be followed by instantaneous punishment, amounting in all probability even to death itself.

Thus it may be noted that the trout in their society maintain their own rights; and since the law ruling them is one solely of force, and amongst whom power holds the place of justice with men, we shall find the largest and strongest fish holding to themselves the best feeding ground and the most convenient retreats for security against foes not of their own kind—a wise provision of nature since, of course, their requirements are in proportion to their size. These strongholds and favorite spots of trout are retained by them for a long time, as they seem fond of old haunts and do not readily forsake them.

An instance has been noted where a trout of peculiar appearance has remained behind a certain stone for several months; his identity was certain, for at different times the fish was drawn from his retreat until at last basketed. No smaller fish dared, nor did any larger one, care to turn that particular fish out from his chosen retreat, and so he held his stronghold for the time being, which, after his removal, it was further noted, his quarters were speedily occupied by another wise trout.

This rule of particular retreats of trout applies of course most forcibly to the very small streams, or to such portions of the larger ones, as are from their subdivisions of the main current, allied to them; to keep in mind the rule on any river however, will be of much importance, since it will teach us to pick out, as it were, the very fish we particularly desire, rather than leave our fly to the many who may pursue it, and all of whom often from over eagerness in the chase will fail in catching it.

It may be safely asserted that when a fly, worm, grub, or no matter what attractive article of food is cast into a pool, where many trout in different parts of it are lying, all take a look at it, and if it proves sufficiently attractive to him, the largest trout will seize it; if he declines the offer, the next trout in size and power is permitted his refusal of the morsel, and so on until some young greenhorn starts off, and in case of the fly or baited hook, discovers his mistake too late. This is often seen where an angler is using the worm, artificial minnow, or spoon, the latter especially, as being more exciting—a bright piece of metal is drawn swiftly through a pool, and in an instant all of the fish seem in movement, and if the master of the pool is inclined to take so large a mouthful, he at once mingles in the race and immediately the small fish, in fear apparently, will be noticed rapidly swimming off in a contrary direction. Should however, the big one not take it, at the same time the lesser ones be not too much frightened, some of them will dart away at the spoon or minnow and try to gobble a body often half as large as themselves.

The rapacity of the trout is truly astonishing. Often a trout's gullet and stomach will contain a fish one-fourth or one-sixth as large as his whole body. In large streams where the trout are reputed to prey much on their smaller brothers, we may conceive this gorging tendency a further reason for their being less constantly on the food, than those trout are which are here more directly alluded to. A trout has frequently been taken with the fly, the gullet of which has contained a fish large enough to have apparently satisfy his hunger for a whole day, and yet he could not resist the temptation the artificial fly afforded him. If their labor is constant, their digestion is very rapid, and the whole amount of food a trout would consume in a day if he could obtain it, would be something enormous.

It would indeed be interesting could we have the opportunity of making the experiment, in the natural habitat, as to the amount of food embraced in the daily consumption of a healthy and fair sized trout. A general idea of the extent and amount of their eating may be formed by opening the stomachs of trout feeding presently on flies, at such times as they are most abundant on the water, when though every one seems disinterested with food, yet all are busily engaged in eating flies as fast as they can.

Sometimes if we watch a number of trout on the water and in a place where the food abounds, we may

see that one fish will refuse some particular fly, or perhaps several successively, and yet another presenting itself within reach is swallowed with avidity.

This remark applies to large streams, and its practical application to them is limited, as we shall see by and by that on the little streams we do not work on the principle of temptation by inherent qualities of attraction.

No doubt some taste or appreciation of difference of flies as food is possessed by the trout, and perhaps a memory of some peculiar fly before familiar to him may induce him to take a similar one subsequently when able, but assuredly the trout is not guided in his feeding by judgment of what is more delightful to his palate; he seems rather to be stimulated to eat by the presence of food, acting as a direct and general force, and excited by what presents itself, in proportion to its power of acting on his habits and natural qualities of rapacity and tyranny. The desire or requirement of food prompts trout to eat, but often their tyrannical disposition will direct them in their object of prey. We may see a number of minnows swimming quietly and peacefully about in enjoyment of sportive play, close by the haunts of a large trout, who takes but little notice of them, on which account they are not afraid of his presence; now catch one of those minnows so familiar to the eyes of the trout, put him on a hook and make him spin through the water, make him an object amongst the others pre-eminently conspicuous, and the large trout will not brook such insolence from an inferior, he will immediately dart at the presumptuous little fish and if he can, kill him.

Again catch one of a number of flies playing over some quiet pool, put him on a hook and dap with him, make him more gay and sportive, more conspicuous, and more audacious than his brethren, and the trout will select this inviting one in preference to all others. It would seem that the trout think of such an unusually taunting insect:

"Little rascal, what do you mean by insulting me with such boldness? I'll punish you for your insolence," and sure enough poor foolish fly speedily pays the penalty of his hazardous proceedings.

And thus it will be seen that the most conspicuous object is often the most attractive, even so with artificial baits, provided the trout has not the means of discovering such proffered bait to be unlike what he naturally is accustomed to, or believes what is presented to him to be edible.

Now, the trout are fierce, bold, rapacious, and tyrannical over all their own kind smaller than themselves, and all other smaller fish and insects; but they are excessively timid of the presence of other animals. An otter, by natural instinct, they shun, so also water rats, and even birds; cows, 'tis true, they will come close to, if they are in the water, being attracted by the grubs washing down from the dung of the animals, but these they come up to by slow degrees, and the sudden approach of a cow will intimidate them. But of man particularly, and beyond all other animals, do they dread their presence. Generally as soon as they discover one they rush off, but this is not always the case; they may remain stationary, watching him, if he be quiet, but the slightest movement on his part will make them retreat hastily; and though, after having seen a man they may remain stationary, they nevertheless seem awed by his presence; they cease feeding—or should they feed, they are yet evidently discomposed, shy and timid—impressed, as it were, with fear, they are doubtful in all their movements and appear instinctively to feel the need of caution. Sometimes when so affected, the sudden appearance of an insect within their reach will so arouse them for a moment, that, in their eagerness for prey, they may have their attention so far absorbed as to forget the presence of a stranger, and make a start as if to capture the insect; whilst on their course, however, they are reminded that an enemy is near, and instead of capturing the insect, turn short of it, refusing, indeed, to feed. We believe this is often the case, that they are either so terrified by the presence of man that they rush off to a hiding place, or frightened as to remain quite stationary, even food presenting; or just alarmed enough as to make an attempt at the capture of a prey, and ultimately to decline taking it at all. This is a subject of great moment to the fisherman, and the young piscator will employ some time very profitably in trying for himself some experiments in proof of what we have stated respecting the voracity of the trout, and the influence any strange object, or even any unaccustomed movement of a familiar object will have on his natural boldness in seizing prey.

### Loons and Their Traits on Land and Water.

Mr. E. E. Drake, the manager of the Union Metallic Cartridge Co. and the Remington Arms Co., on a recent trip north secured in Seattle, we believe, a handsome stuffed specimen of a great northern diver or loon. The bird is in beautiful plumage and occupies a conspicuous position in the fine collection arranged about Mr. Drake's offices.

The loon has been regarded as a bird of wierd mystery. It is quite common in some parts of this State, notably so in the Clear lake region. An Eastern writer, Ernest Harold Baynes, gives the following account of the loon and its ways.

No one who has tried to get within gunshot of a great northern diver when the latter floated free upon the water will ever believe there is any sense in the expression "as crazy as a loon." No other bird, save the grebe, perhaps, is more aquatic than this, and not even the grebe is his superior at diving and swimming. His powerful legs, set far back, almost at the extremity of his body, are as highly favorable to movement in the water as they are unfavorable to movement on the land.

In the water the loon is a bird, a fish and an otter in

one; on the land—where he is very seldom seen, by the way—his movements are almost painful in their clumsiness. At least this is usually the case; we can hardly consider it invariably so, in view of Audubon's statement concerning a wounded and terrified loon, which says it ran 100 yards on dry land and another hundred yards through ankle deep water, stumbling now and then, but still traveling so fast that his son, J. W. Audubon, an active young man, could not overtake it before it reached deep water, where it suddenly expired.

Concerning the position of the legs of the loon, there is an ancient legend. When the Maker of the universe was making this bird, he forgot all about the legs, but as it flew away he remembered the omission, and threw the legs after it. Naturally they struck the hind part of the body, and there they stuck.

But, however they got there, they answer the loon's purpose very well, as anyone who has pursued him in a boat will tell you. The usual experience is this: The loon swims along with head, neck and an inch or so of his back above the surface of the water until the boat comes almost within gunshot. Then, if no sudden movement has been made, he is likely to sink gently out of sight, and come to the surface again well out of range.

At a sudden movement, or the slightest sound, like the "cocking" of a gun, it will dive with incredible speed and swim under water to a great distance, repeating the trick as often as the pursuer has patience to renew the chase.

As a rule, the northern diver, when pursued, will endeavor to keep to the open water, where he trusts to his diving powers to save him from his enemies; taking wing only in very exceptional cases. If he be cornered or driven toward the shore, he will dive like a flash, and, swimming rapidly under the boat, arise far out of gunshot on the other side.

But experienced gunners seldom hunt loons in this way, unless for the fun of watching his skill as a waterman. They usually wait until autumn, when the birds are migrating, and shoot them from a boat as they pass high overhead. Often, while lying in wait for birds on the wing, these gunners see other loons riding among the white caps. Now and then a great, crested wave will come rolling along, threatening to bury some intrepid diver in the flood, but the plucky bird at the last moment will turn upon the monster, and, diving through its liquid base, will quickly reappear in the quiet water on the other side.

Loons often fall victims to their curiosity. Gunners who know their weakness will lie concealed in the reeds with gun at the "ready." On seeing a loon swimming at a distance, they will wave a hat or a handkerchief for an instant, and then withdraw it. The loon will be sure to see this, and the chances are that he will start toward it, swimming and diving alternately. If he pauses, up will go the signal again, and again the bird will advance. When well within gunshot, a trigger is pulled, and the modern breech-loader at short range is one too many even for the lightning dive of a loon.

The cry of the northern diver is one of the strangest, weirdest sounds in nature; those who have heard it can scarcely wonder that it has so often been woven into song and legend.

A blood-red ring hung round the moon,  
Hung round the moon. Ah, me! Ah, me!  
I heard the piping of the loon,  
A wounded loon. Ah, me!  
And yet the eagle feathers rare,  
I, trembling, wore in my brave's hair.

Almost all writers who have attempted to describe the cry of this bird have likened it to unmeaning laughter. Thus, Mr. Vernon Bailey, speaking of the sound describes it as follows:

"Only on the lonely lake in the heart of the woods do you get the startling thrill of the loon's wild cry—one clear-piercing note or a long, quavering, demoniacal laugh that to the timid suggests a herd of screaming panthers."

The nesting habits of the great northern diver are in perfect keeping with its general aquatic habits. The nest is always within a few feet of the water, generally close to it, and often completely surrounded by it. A slight depression in the damp ground on the shore of a lake or on the shore of an island in a lake, a mass of decaying reeds close to the water or floating in it, or a flattened space on the roof of a muskrat house—such is the home of the great loon.

Here are laid the eggs, usually two, but sometimes only one. They are about 3½ inches long, dark brown, thinly marked with blackish spots. The sitting bird is not easily disturbed, but as a rule will allow an intruder to approach quite near before leaving her charge. Then she will jump suddenly from the nest, and, with much scrambling and sliding, get back into the water.

When the young loons are hatched, they are covered with black down, and in a day or two take to the water. On land they are clumsy, fat little things, but once in the lake, they can swim and dive with remarkable skill. For a short time they are fed by regurgitation, and later their parents give them parts of fish, aquatic insects and other food, until they can fish for themselves.

Not long ago, a naturalist, rowing on a northern lake, came upon a mother loon and one little one. The mother easily escaped and from a distance watched the progress of her child. The little fellow could not swim fast enough to distance the boat, which was fast gaining upon him. As it came alongside, however, the mother uttered a call, and instantly the youngster dived, coming to the surface a short distance away. Again, as the boat drew near the little loon, the call of the old bird was repeated, and again the infant responded by diving. It is my recollection that the naturalist was so touched by this exhibition of devotion on one hand and obedience on the other, that he turned his boat about and left the birds in peace.

Loons live chiefly on fish, frogs and other batrachians, leeches, aquatic insects and sometimes the roots of aquatic plants. Shellfish also form a portion of their diet. It is said that, barring the shellfish, most of the food is swallowed while the birds are below the water.

### The Dairy Herd.

In October, 1896, Nebraska Experiment Station purchased 10 grade Jersey heifers, all to come fresh in the late fall or early winter. This small herd was to be used for investigations along the line of dairy husbandry, and therefore all records were kept as to the feed and production of the animals. During the five years that the herd was on test they gave an average butter production as follows: In 1897, 340.98 pounds of butter per cow; in 1898, 368.89 pounds; in 1899, 247.03 pounds; in 1900, 279.35 pounds; in 1901, 353.43 pounds. During the five years, fifty-two yearly records showed an average of 315.82 pounds of butter. The variations from year to year were caused by various changes in the herd and to some extent by the feed given. It was found that certain cows gave excellent records during the five years and such cows were shown to possess a marked dairy type and conformation. The poorest record in the herd was made by a cow lacking in depth and possessing a steer-like form.

The best heifer calves are none too good, and the dairy farmer can as a rule, raise better cows than he can buy in the markets. If cows are in milk from September on, during the four succeeding months, it offers good opportunity to raise fall and winter calves that will be able to care for themselves nicely by the time the pastures are ready for them in the spring.

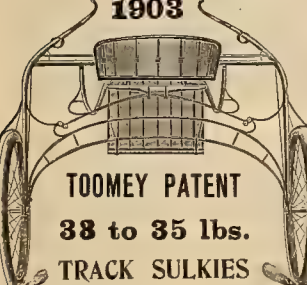

California farmers have a very bright prospect for 1903. The rains have been copious and widely distributed this year, even the southern portion of the State being well moistened.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone, Curb, Splint, Capped Hock, Windpuff, Weak and Sprained Tendons, and all Lameness.

### "FOOL TALK."

About thirty-five years ago, a young mechanic called on old Commodore Vanderbilt, then head of the New York Central Railroad, in an effort to secure a trial on a New York Central train of a new device for stopping trains by compressed air. "Air!" the Commodore is said to have exclaimed. "Air! Stop a train with air! I've no time to listen to such 'fool talk,' young man," and he didn't. Neither would anyone else for many a long day. George Westinghouse, for he was the man of the "fool talk," believed in himself and the utility of his invention. He kept right on in spite of Commodore Vanderbilt and others till he forced recognition. Would a man trust himself aboard a passenger train to-day if he knew that train was not fully equipped with Westinghouse's invention—the air brake? It is said that Vanderbilt's road had some difficulty in getting it when finally it was wanted. Many a man says "fool talk" when he reads the claims made for "Save-the-Horse" Spavin cure, but the dawn of enlightenment is as certain as the rising of the sun, and the man who says "fool talk" after reading the facts so plain and convincing, as given by us, re-affirmed by the letters published in these columns each week and in our booklet, is repeating Commodore Vanderbilt's mistake. No man need be in doubt as to what "Save-the-Horse" Spavin Cure can, and cannot, do. If you have a case different from what are described in booklets and advertisements, send us full particulars as to the age, location, cause of the lameness or swelling, the horse's action, previous treatment and also the Veterinarian's diagnosis, if you know he is competent, and we will tell you frankly as to the possibilities of our remedy. Write for booklet and copy of guarantee and any information desired.

Heed this:  
Work horse continuously if desired.  
"Save-the-Horse" cures without scar, blemish or loss of hair.  
Contains no Arsenic, Corrosive Sublimates or other form of Mercury, or any ingredient that can injure the horse.  
Chronic and seemingly incurable cases in the

advanced stage that have been tried two or three times and given up as hopeless, positively and permanently cured.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological change, absorbing all inflammatory exudate and producing a healthy, normal condition of the parts

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way.

There is no condition or arrangement we can make more binding to protect you than our guarantee. NEED OF SECOND BOTTLE IS ALMOST IMPROBABLE EXCEPT IN RAREST OF CASES.

\$5.00 per bottle at all druggists' and dealers', or sent direct, express prepaid, by the manufacturers.

### A Common Error.

Keeping cows so that they can be fed properly is one of the most common errors in farming. A writer in the *California Farmer* very often the feed which goes to nine cows could be fed to six with better results. In fact six will in many instances give as much as the nine. We have a neighbor who is a good manager, but every summer his pastures get short and his cows give little more than half what they should. During the summer months he committed more cows than he could handle and would have needed to keep several more in order to get as much milk as we did, while no doubt his cows are as good as his. I have noticed that when cows are well and regularly fed they do not dry so long as otherwise. Sent feeding for a few weeks even is a great mistake, for it can be only partially made up when feed is flush. Then many farmers pay no attention to a balanced ration, feeding most of that which they have in abundance; and hence results are not always satisfactory. Clover, either as pasture or hay, is among the best all-around feeds. Also nicely cured corn fodder and millet hay are good. For a grain ration corn and oats ground and mixed with wheat bran and oil meal in proper proportions give excellent results. Most farmers prefer to feed only what they have on hand. This is frequently a mistake.

Colonel John H. Davis, of Orchard, Idaho, is quoted as saying: "My investigations in the west give me full confidence in higher prices for wool, but considerable lower prices for mutton the present year. This may seem a little incongruous to some, but it must be remembered that the stocks of sheep of marketable age are very heavy in all sections of the west. Many sheep were turned back on the ranges last season, in some cases because cars could not be secured in time to send them to market in good condition and in other cases for the reason that prices did not reach a level that was attractive to many owners who were in less urgent need of money last year than ever before. For this reason heavy marketing of mutton sheep seems certain the coming season and with the native producing sections better stocked than the year before, it will be strange if many sheep do not have to be sold at lower prices than during the last year."

The remarkable increase in the production of milk and butter in the United States in the last decade was due far more to increased yield per cow than to increase in the number of cows. There is plenty of opportunity for an equally great increase in the production per cow during the present decade. As farmers become more careful and accurate in determining the relative production of their cows, the culling of their herds becomes more rigorous. This immediately raises the average standard of production and tends, by aid of the laws of heredity, to increase the producing capacity of the descendants of cows retained for dairy purposes.

Dairy cows require some bulky food with their grain; but care must be taken not to go to either extreme. If too bulky the animal must eat too much in order to secure sufficient nourishment. If not bulky enough the animal will consume more nutritive material than it can digest in order to produce the proper sense of fullness. This deranges the stomach and causes waste.

It is one of the most difficult of all the essential necessities of the dairy management to secure cleanly conditions of the cow stables. Ninety-nine out of every hundred cow stables visited cannot be called clean and sweet. The offensive odors of the cow stable contaminate the breath, blood, the excretions and secretions, and thus all of the animal's tissues.

### Reliable Recipe for Hams.

A reliable recipe for putting up hams is as follows: Rub the hams with dry salt and drain for twenty-four hours. Mix four quarts of salt, three pounds of brown sugar, one pound of saltpeter, four ounces of sal prunella and four ounces of bruised juniper berries together and boil in six quarts of water. Cool and skim the brine, then take the hams from the salt and wipe dry. Pour the cold pickle over them and rub well into the meat. There should be enough brine to cover the meat. Turn the hams every second day for three weeks, after which take out, wipe dry and rub a mixture of pepper, salt and bran thoroughly into the meat. Paint with liquid extract of smoke or place in a regular smokehouse. Hams shrink about ten per cent in weight in smoking, while pickled or salted pork gains about ten per cent.

Bulk is necessary, but a ration should not contain more than thirty-five pounds of dry matter and seventy pounds of water. Palatability and digestibility are two factors that are worthy of much attention when formulating a ration. Many of the rations compounded by the wise men in the East do not work well in practice in this country because they are lacking in palatability and consequently a cow will not consume sufficient quantity of the food to give results. Some are also lacking in digestibility and unsatisfactory results follow their use. A ration can be made from over-ripe timothy, whole corn and whole oats, but it will not give as good results as hay, cut when in prime condition, corn meal and chopped oats, because the first combination would be both slow of digestion and less digestible than the second ration.

The dairy cow is not large, because it would require more feed to maintain a large carcass. The beef cow is large because she is sold by the pound. The dairy cow has a prominent large back bone, because she must be possessed of strong constitution and great nerve power. She is light in the hind quarter, because heavy quarters would be useless, expensive to maintain and interfere with the location of the udder. The udder is large, because she produces large quantities of milk, and the udder is a part of the necessary milk making machinery. The line of connection, where the udder joins the body, is as long in a good cow as the distance from the udder to the fore legs.

A Denver man with a bunch of 300 cattle went into partnership some time ago with a granger in Washington county who had a nice big haystack. By the terms of the agreement the cattle were to be hay-fed through the winter and then the stock was to be divided equally. The other day the Denver man received a letter from his country partner in which it was reported that all the hay is eaten up and every hoof on the place is dead and ready for the skinners. This is a case where capital and experience both fell down with no one to blame for it.

At a recent sale of Duroc-Jersey brood sows in Nebraska the world's record of prices for this breed was broken. Fifty head were sold at an average of \$76.80. The highest price for any one animal was \$300 for the two year old sow Roberts' Profit.

Are your best cows boarding your poorer ones, then there never was a better time than now to turn off your boarders, and replace them with better ones. You cannot expect to reap the full reward for your food and labor as long as you keep a lot of scrub cows.

### FOR SALE.

A VERY HANDSOME THREE-YEAR-OLD Colt by Nearest 35562, sire of Alone (4) 2091, and full brother to John A. McKerron 2054, out of an Antelope. Absolutely sound, well broken and can show a 40 clip. ## SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07½, Sunol 2:08½, Palo Alto 2:08½, Alta Vela 2:11½, and 9 more in the 2:15 list, etc.)  
Dam LORITA 2:18½ by Piedmont 804; second dam Lady Lowell (dam of Ladywell 2:16½, Lorita 2:18½, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16½.

Will Make the Season, 1903---Fee \$50---Race Track, San Jose.

Limited to 10 mares, as he will be trained and raced again this year.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FREELSON,  
Race Track, San Jose, Cal.

# Guy McKinney

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

Fee \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:30 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

## SPEED AND ABILITY TO REPRODUCE IT.

# DIABLO 2:09 1-4

—SIRE OF—

SIR ALBERT S. 2:03 3-4  
CLIPPER 2:06

and others.

# BAYSWATER WILKES 2:25½

Son of Sable Wilkes 2:18  
and Fanny Bayswater  
Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10½

WILL MAKE THE SEASON OF 1903 AT

## WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, dam of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the sire of Sogor L., holder of the champion four-mile trotting record of 10:12.  
Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.  
Excellent pasturage for mares \$2.50 per month.  
For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Futurity Winning Family.

# BARONDALE 2:11½ Reg. No. 20,184.

SIRE OF

Oakdale Baron (p) 2:19½  
Baronoid (4) 2:24½  
Baron May (4) 2:20½  
Lady Dale (3) (p) 2:21½  
Janie M. (p) close up in race in 2:13  
Caprus (3) Timed sep 2:25½  
Banco Trial on ½ mile track 2:20½

Son of the Great BARON WILKES 2:18, greatest living Sire of 2:10 performers (sire 9 in 2:10 list).

1st dam NATHALIE (by Nutwood 600), dam of Grand Baron 2:12½ and BARONDALE 2:11½.  
2d dam BEATRICE (by Cuyler 100), dam of Patron 2:14½, Prodgal 2:16, Pangloss and Patronage, all great sires.  
3d dam MARY MAMBRINO (by Mambrino Patchen 58), dam of Elvira 2:18½, Dunravin (sire) and dams of Ponce de Leon 2:13 and four others.

Where Can You Beat This Breeding?

Season 1903 San Jose Track.

TERMS \$50 SEASON, with usual return privileges.

TOM JAMES,  
1120 Alameda Ave., San Jose, Cal.

# ZOMBRO 2:11

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

ZEPHYR (4) 2:11  
ITALIA (3) 2:23½  
LORD KITCHENER (4) 2:29½

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06½ in a race, Julia M. (5) 2:12, Italia (3) 2:15½, Zombowette (3) 2:17, Suomi (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19½, Tee Dee Cee (4) 2:21½, Zericia (5) 2:25½, Gold Coin (4) 2:26½, Mabel W. (4) 2:28½, Edmond S. (5) 2:28½, Gyr Falcon (5) 2:30, Zombro C. (5) 2:29. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes.

Send for card containing pedigree and full information. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

# SEYMOUR WILKES REG. No. 0232.

Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

## Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Evison (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 787. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

Son of the Great Electioneer.

# GROVER CLAY 2:23½

Sire of

CLAY S. 2:13½  
IRA 2:16½  
RICHARD S. (Trial) 2:09  
Pacing Filly 2:15

Season of 1903, March 1st to June 1st,

At D. Gannon's Stables, Watts St., near Race Track, Emeryville, Alameda Co., Cal.

Fee \$25, payable at time of service.

FOR SALE—Two fine Stallion Colts by GROVER CLAY; dam, a producing mare by Sidney.

For further particulars address

DENNIS GANNON, Emeryville, Cal.

# MONTEREY 2:09 1-4 Reg. No. 31706

Will Make the Season of 1903 at

SAN LORENZO SATURDAYS, SUNDAYS, MONDAYS, TUESDAYS, MILPITAS WEDNESDAYS, THURSDAYS AND FRIDAYS.

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility for accidents or escapes. Send for card containing pedigree and full particulars. Address

P. J. WILLIAMS, San Lorenzo, Cal.

BREED FOR SIZE, STYLE, SPEED, GAMENESS.

# HAMBLETONIAN WILKES 1679

The Only Son of the Great Geo. Wilkes in California, . . .

SIRE OF

Phoebe Wilkes 2:08½ Tommy Mac 2:11½ New Era 2:13 Saville 2:17½  
Robert L. 2:10 Vic Schiller 2:11½ Aeroplane 2:16½ Grand George 2:18½  
Phoebe W. 2:10½ Arlene Wilkes 2:11½ Sybil S. 2:16½ J. F. Hanson 2:18½  
Rocker 2:11 Sunbeam 2:12½ and 12 more in 2:30

Will Make the Season of 1903 at

## GREEN MEADOW FARM

Brokaw Road, 1-4 mile from Santa Clara.

Terms for the Season, \$40.

Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences. Address

R. I. MOORHEAD,  
SANTA CLARA, CAL.

TELEPHONE: Suburban 15.

## THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL.  
(Property of JOHN PARROTT, ESQ.)

### Imp. Hackney Stallion GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1903

**FEE - - - \$75**

Reductions made for two or more mares.

Manager, WALTER SEALY.

Breed to Extreme Speed.

### CHAS. DERBY 4907, rec. 2:20 \$50 the Season

STAM B. MUCH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09½, OWYHEE 2:11½, LITTLE BETTER 2:11½, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at reasonable prices. Address

### OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

### STAM B. 2:11 1-4 (TROTTERING) REG. NO. 23444.

3-YEAR-OLD RECORD, 2:15 1-2 (Timed second in 2:12½)  
4-YEAR-OLD RECORD, 2:11 1-4 (Timed second in 2:09½, 2:09)  
2-YEAR-OLD TRIAL, - - - 2:26

STAM B. by that show horse king, Stamboul 2:07½, father of 47 from 2:10¼ to 2:30; 24 sons and daughters produced from 2:07½ to 2:37. Stamboul is the only trotting bred stallion that ever sold twice for over \$10,000, and sired a daughter for whose son, Wilkins (two-year-old 2:19½), \$40,000 was offered. Stamboul's dam is the granddam of Oakland Baron 2:08½, for which \$50,000 was later refused, showing that men with money and brains appreciate this blood. STAM B.'s first dam, Belle Medium 2:31 (dam of 3 from 2:11½ to 2:30) by Happy Medium sire of Nancy Hanks 2:04. No son of Hamblet man ever produced such speed and she sold for \$10,000.

Second dam Argenta, dam of one in 2:20, by Almont Lightning, sire of dams of Zombro (five years old 2:11) and King Princess 2:15, by Almont 33.

Third dam Mary Adams by Mambrino Patchen, sire of dams of Guy Wilkes 2:15½, Baron Wilkes 2:18, Patchen Wilkes 2:20. Fourth dam Mambrino Belle by Mambrino Chief, sire of Lady Thorn and dam of Director and Oatward. Fifth dam by Mason Whip, a thoroughbred. No stallion now doing public service ever represented such champions of the turf, show ring and top notchers at private and public sales. He is a handsome horse (a typical Morgan in form), and tried race horse, and game, topy road horse.

STAM B. is a bay, two white hind ankles, 15 hands 2¼ inches high, weight 1090 lbs., of good stamina and muscular development.

Will Make the Season of 1903 at Pleasanton, Cal.

Terms \$40 SPOT CASH before mare is removed. I will try and take good care of mares and foals, but will not be responsible for accidents or escapes. (No agents on arrival of trains at depot.) For further particulars address

SAMUEL GAMBLE, Pleasanton, Cal.

## SIR GIBBIE 2D, No. 370

American Hackney  
Stud Book

### Hackney Pony Stallion 13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

### MENLO STOCK FARM

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

JAMES McDONNELL,  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SEARCHLIGHT 2:03½

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03½).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcyon, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his granddam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

Terms for the Season, \$75.

## LECCO 2:09¾ The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01¼, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

\$50 for the Season.

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2¼ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buftington (at 2 years) 2:30½, and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidette 2:28½, dam of Mary Celeste (at 2 years) 2:17½, by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancel, son of McCracken's Blackhawk 7:07.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:05½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12½, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20½ with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twentieth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17½ was equal to 2:13½ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

### WALNUT GROVE STOCK FARM, Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET. IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE for THRESH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

A 2:00 TROTTER WILL BE Sired BY

**DIRECTUM 2:05 $\frac{1}{4}$** YOU HAVE AS GOOD A CHANCE  
AS ANY BREEDER ON EARTH

A FORTUNE AWAITS THE OWNER YOUR MARE MAY MAKE JUST THE RIGHT CROSS.

DIRECTUM 2:05 $\frac{1}{4}$  HAS BEEN THE CHAMPION, 4-YEAR-OLD, TROTTING STALLION FOR 9 YEARS.  
 DIRECTUM 2:05 $\frac{1}{4}$  HAS BEEN THE CHAMPION, 3-YEAR-OLD, TROTTING STALLION FOR 10 YEARS.  
 DIRECTUM 2:05 $\frac{1}{4}$  WAS CHAMPION TROTTING STALLION, OF ANY AGE, FOR 7 YEARS.  
 DIRECTUM IS FROM A FAMILY FAMOUS AS PRODUCING WORLD CHAMPIONS FROM THE GREAT DEXTER 2:17 $\frac{1}{4}$  DOWN TO HIS OWN TIME. DEXTER WAS FULL BROTHER TO THE GRANDSIRE OF DIRECTUM.

**DIRECTUM Sired THE CHAMPION, 4-YEAR-OLD, TROTTING STALLION OF 1902.**THIS COLT IS DIRECTUM SPIER 2:11 $\frac{1}{2}$  AND IS EXPECTED TO TROT IN 2:05 IN 1903.

Directum has many very promising speed prospects in view for the races of 1903. Directum has 15 in the list and is a leading sire when age and number of foals are considered. Directum is kind, beautiful, strong and vigorous and is given regular jog work every day, winter and summer, and this insures a high class of foals. His colts are good size, extra level headed and are all foaled with extreme speed. You do not have to train them to trot because they are trotters when you first hitch them. Our books prove 85 per cent. of foals, which shows that his new Minnesota Home agrees with him perfectly. Three and four month old colts sired by Directum and with well bred dams are held at \$1,000 to \$2,000 and cannot be bought for less.

If you desire to raise a World's Champion Trotter you cannot afford to overlook the World-Famous Trotting Stallion Directum 2:05 $\frac{1}{4}$ . All correspondence answered promptly.

**FINEST STALLION CATALOGUE EVER PUBLISHED.**

We have gotten out for 1903 what we believe to be the Finest Stallion Catalogue Ever Published. It contains 9 late Photo-Engravings of Directum. It contains a History of all his races. It contains fine Photo-Engravings of Hambletonian 10, Dictator and Director. It contains a large number of Photo-Engravings of Directum colts. It contains a Photo-Engraving of Directum 2:05 $\frac{1}{4}$  and Roy Wilkes 2:06 $\frac{1}{2}$  speeding together on October 16, 1902. We also have just gotten out a new and beautiful large colored Lithograph of Directum. This lithograph is 21 by 25 inches and Does Not Contain Any Advertising. It is the finest picture ever made of Directum and shows him hitched to sulky.

This Beautiful Catalogue and Large Lithograph will be Mailed Free to You if you will

## SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

Bone Splint, and Bog Spavin, Thoroughpin, Ringbone, Curb, Splint, Capped Hock, Windpuff, Weak and Sprained Tendons, and all Lameness.

**"FOOL TALK."**

About thirty-five years ago, a young mechanic called on old Commodore Vanderbilt, then head of the New York Central Railroad, in an effort to secure a trial on a New York Central train of a new device for stopping trains by compressed air.

"Alr! the Commodore is said to have exclaimed. "Alr! Stop a train with air! I've no time to listen to such 'fool talk,' young man," and he didn't. Neither would anyone else for many a long day.

George Westinghouse, for he was the man of the "fool talk," believed in himself and the utility of his invention. He kept right on in spite of Commodore Vanderbilt and others till he forced recognition.

Would a man trust himself aboard a passenger train to-day if he knew that train was not fully equipped with Westinghouse's invention—the air-brake? It is said that Vanderbilt's road had some difficulty in getting it when finally it was wanted.

Many a man says "fool talk" when he reads the claims made for "Save-the-Horse" Spavin cure, but the dawn of enlightenment is as certain as the rising of the sun, and the man who says "fool talk"

after reading the facts so plain and convincing, as given by us, re-affirmed by the letters published in these columns each week and in our booklet, is repeating Commodore Vanderbilt's mistake. No man need be in doubt as to what "Save-the-Horse" Spavin Cure can, and cannot, do. If you have a case different from what are described in booklets and advertisements, send us full particulars as to the age, location, cause of the lameness or swelling, the horse's action, previous treatment and also the Veterinarian's diagnosis, if you know he is competent, and we will tell you frankly as to the possibilities of our remedy. Write for booklet and copy of guarantee and any information desired.

Heed this:  
 Work horse continuously if desired.  
 "Save-the-Horse" cures without scar, blemish or loss of hair.  
 Contains no Arsenic, Corrosive Sublimite or other form of Mercury, or any ingredient that can injure the horse.  
 Chronic and seemingly incurable cases in the

advanced stage that have been tried two or three times and given up as hopeless, positively and permanently cured.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological change, absorbing all inflammatory exudate and producing a healthy, normal condition of the parts.

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way.

There is no condition or arrangement we can make more binding to protect you than our guarantee.

NEED OF SECOND BOTTLE IS ALMOST IMPROBABLE EXCEPT IN RAREST OF CASES.

\$5.00 per bottle at all druggists' and dealers', or sent direct, express prepaid, by the manufacturers.

CALIFORNIA WILL HAVE A CIRCUIT of harness racing this year. Those interested in the light harness horse do not propose to sit down and whine over the unwise and unreasonable act of the Governor in cutting off all appropriations for district fairs, but propose to get in and do something for themselves. From every point in the State where there is a good trotting track come reports of the most flattering kind that a well conducted trotting meeting will be well patronized by the people. The Trotting Horse Breeders Association announces six early closing stakes in this issue, and there is good money for both trotters and pacers. These stakes will be contested for at its principal meeting, but the association may give two or three meetings beside. The Directors would rather the local associations would give their own meetings, and there seems to be a pretty general opinion among horsemen that all harness meetings will be well patronized and successful this year. The fact that the light harness horse has a good value at the present time has aroused the interest of the public as well as the breeders. Hundreds of people are buying trotters and pacers now, and paying good prices, that would not have had them at any price a few years ago. Nothing succeeds like success and this applies to harness racing as to everything else. Vallejo will give a meeting this year, Santa Rosa is anxious to get in line, Napa has not been heard from, but a successful meeting can be held there; Woodland, that has the reputation of holding the best races of any district in the State, will not drop out just because the State withholds its aid; Stockton, San Jose, Fresno and Los Angeles will hold meetings and Pleasanton proposes to have a harness meeting annually, henceforth, whether appropriations are made or not. It will be a good year for the harness horses in California and the circuit will be as large as usual. The Breeders have led off and other associations will soon follow suit. There may be grounds for a little kicking, but there is no reason for despondency.

VOLUME THREE of the American Jack Stud Book has been received at this office from the publishers, the American Breeders Association of Jacks and Jennets, Columbia, Tenn. Those wanting the whole set can get Volumes 1, 2 and 3 for \$4. The price of the last volume alone is \$1.50.

BREED YOUR MARES this year if you desire to sell their produce at the very top prices. Every section of the country is reporting a shortage of horses of every breed except the thoroughbred. All the harness breeds are in demand and increasing in value. Of course this demand is for horses of class. The well bred scrub is not wanted at any price except his actual cash value. A well broke horse will sell readily even though he has neither size nor good looks, but he will not bring a fancy price. There is a demand for good looking and good sized horses for the road, the carriage and the dray that it is almost impossible to supply. This demand will not decrease inside of five years. The mares are not numerous enough to supply it, even though they should all be bred this year. Therefore we say if you have a good mare don't fail to breed her to a good horse. It will pay.

REMITTING SUSPENSIONS is a very generous and a very nice thing for associations to do. Many have been remitted in the past and many more will doubtless be in the future, but there are many associations that can ill afford to remit these sums. It is very often the case that a meeting does not pay and the directors are compelled to go down into their pockets to pay the purses. If the money is not on hand to pay them there is a storm of indignant protest immediately. It takes money to make the association horse go as well as it does the trainer's mare. No blame can be attached to any person for making an effort to have all suspensions against himself and horse remitted, and on the other hand associations should not be condemned for declining to remit them unless it is a clear case of charity or injustice.

THE LOS ANGELES PEOPLE who are arranging to build a race track and establish a jockey club are going ahead and will doubtless be ready to give a meeting next winter. There is no reason why they should not make a great success of it. The winter climate of Los Angeles is ideal for racing and that city is the greatest winter resort on the continent. A first class racing organization will doubtless make money.

THE NEW VOLUME of the Year Book is out. It is on the same plan as last year's book and is a voluminous document. It contains information that is absolutely necessary to the compiler of pedigrees and to those who desire to keep posted on harness horse history. It can be had from this office. Price \$4.

## Another Veteran Dies.

Peter Brandow is dead. After an illness of one week, he died in this city on Monday last, aged about 75 years, and was laid away in the National Cemetery at the Presidio on Thursday of this week. There was not a large funeral, but many of his old time friends called at the undertaking parlors where his body was embalmed and placed in a casket, to take a last look at the features of an old man who had led an honest life and never intentionally inflicted harm on anyone.

Peter Brandow was a native of New York. When a young man he enlisted in the United States Army and served as a cavalryman throughout the war with Mexico, getting an honorable discharge and receiving in his old days a pension from a grateful Government.

Years ago Peter Brandow was a fisherman and plied his vocation on the water of San Francisco bay and the rivers flowing into it, with success, making and saving money.

Hereafterwards took up the training of harness horses and was successful at that. Few men were better judges of a horse, or could drive one better in a race. He was the very soul of honesty and fairness in all contests in which he took part and not a man that ever held the reins had more friends among his fellows.

Some years ago he had a long spell of sickness which incapacitated him from all work and the money he had saved was spent for doctors' bills and maintenance. About five or six years ago the Commissioners of Golden Gate Park appointed him to the position of watchman on the drive. He occupied a little cottage at The Tanks, where the road drivers stopped to water their horses and there he lived until taken ill two weeks ago, when he was brought to town and given the best medical attendance.

The road drivers will miss the sight of the always good natured and pleasant old man whose pipe was his constant companion and the memory of Peter Brandow will live long with all who knew him.

The Lathrop Hay Co., of Hollister, shipped two carloads of hay to Chicago last Tuesday. An order for a carload was received Wednesday from Saratoga Springs, N. Y. These shipments are made quite often, and indicate the high favor in which hay from California is held in the East.

## P. C. T. H. B. A. Directors Meet.

The Directors of the Breeders Association held an important meeting at the office of Secretary F. W. Kelley on Wednesday of this week.

Those present when the meeting opened were E. P. Heald, President, R. S. Brown, C. A. Hug, J. C. Kirkpatrick, A. B. Spreckels, Martin Carter and T. J. Crowley.

On convening Director Crowley spoke of the death of Director and Second Vice-President A. G. Gurnett, and on Mr. Crowley's motion resolutions of regret were drawn and the Secretary instructed to send a copy thereof to the family of deceased and to also spread them upon the minutes of the meeting.

Mr. Frank H. Burke was thereupon elected to fill the vacancy on the Board caused by the death of Mr. Gurnett and on motion Mr. Burke was elected to the second vice-presidency.

The President then appointed Director Kirkpatrick as a member of the Executive committee and Director Burke on the Speed committee.

The Speed committee was authorized to arrange a list of early closing stakes and the Executive committee to select a place and date for the regular annual race meeting. The Board then adjourned.

Immediately thereafter the Speed Committee, consisting of President Heald, and Directors Burke and Crowley, arranged the following stakes, to close June 1st:

### TROTTING.

The California, 2:24 class.....\$2000  
The 2:15 class.....1000  
Three year olds.....600

### PACING.

The Pacific Slope, 2:20 class.....\$1500  
The 2:13 class.....1000  
Three year olds.....500

Other stakes for trotters and pacers will be announced June 6th.

Communications were read from several towns that desire the Breeders meeting to be held on their tracks and the Secretary was instructed to communicate with the different parties to see what arrangements could be made.

The meeting, which was the most enthusiastic and interesting held by the Directors for some time past, then adjourned. The outlook is that the race meeting given this year will be one of the best ever held by the association.

## Draft Horses Take the Place of Oxen.

[Hollister Free Lance, March 27.]

Four carloads of draft horses were shipped from this place last Tuesday consigned to the McCloud River Lumber Co., Shasta county. The lot included some of the finest animals ever taken from this county, their weights ranging from 1600 to 2000 pounds, each animal being perfectly sound and answered all the requirements for the purpose for which it is to be used. The horses were purchased by C. B. Neal, representing the company, and were critically examined by Dr. A. Moore, veterinary, who passed upon each animal. Mr. Neal had been here for some weeks past and during that time he secured sixty head at an average cost of \$225. The four carloads which left here Tuesday were the nucleus of a train of thirteen cars with Redding as its destination. The additional animals are similar to the ones purchased in this county. The McCloud River Lumber Co. is using horses exclusively in the logging camps having discarded the use of oxen altogether. The consignment of this week to the company's headquarters in Shasta county included ninety spans of the finest draft horses in the State. Messrs. Ladd and Orr assisted in the selection of the animals from this vicinity and it was through their efforts that the sales were affected. The amount realized from the sales in this county aggregated about \$12,000.

Many owners of trotting or pacing youngsters seem to think that unless they place them in the hands of famous race drivers early in life they are handicapped, says the *Horse World*. Nothing could be further from the truth. Few of the successful race drivers care to fuss with undeveloped youngsters, and even if they did, it is only an occasional man of that class who would be as successful in bringing a colt along in his first speed lessons as a trainer would be who has given his attention principally to the education of youngsters, instead of to campaigning race horses. There are a few, very few, trainers who have shown the ability to succeed both as colt trainers and as campaigners of aged horses. Some have started on the road to success by developing youngsters, but the greater number of those, even, abandoned the training of colts after experiencing the fascination of a campaign through the Grand Circuit. A first class man to develop the speed of youngsters is as essential as a first class man to drive them in their races later on, but in very few instances will the same man be found capable of filling both branches of training satisfactorily.

## JOTTINGS.

WILL WE HAVE A CIRCUIT? is the question asked by nearly every person interested in harness horses that I have met during the past week. Now that Governor Pardee has taken from the agricultural districts the money necessary to enable them to hold fairs, there is much speculation as to whether the many trotters and pacers now in training in California will get a chance to race. It is a forgone conclusion that live stock shows and agricultural exhibits will not be made without State aid, but breeders and owners of harness horses should be able to get several weeks of good racing here, fairs or no fairs. While there has been some very contemptible work done in this district appropriation business by "the political push" and others who are opposed to every appropriation in which there is no "graft" or does not provide a fat office for some of the party's kept politicians, there is no need of the horsemen sitting down and wasting all their energies in "cussing." They had an experience of this kind during Governor Budd's term, and if they had put one-half the energy into getting up harness meetings that they did in anathematizing the wild and woolly buckboard rider from San Joaquin, they would have accomplished much more for themselves and the horse breeding business.

In this connection the following from the Winters *Express*, a Yolo county paper, edited by a former director of the local district agricultural association is pretty good advice:

Governor Pardee has vetoed the agricultural bills and there is much disappointment in certain circles. While the fair in Yolo county has been a good thing for the agricultural and stock interests and one of the few that have fully complied with the laws and received no adverse criticism, we are not going to find fault with the Governor's veto. This district is simply being punished for being in bad company that could not be avoided. It is true that in some districts the money was spent more in the interests of horse racing than for an industrial or agricultural exhibit. But because there will be no State money is no reason why we should not have a fair. Yolo county is rich enough to have her own fairs. And we could have plenty of good honest horse racing, too. The people of Woodland should take the initiative and raise a fund to which the county might be asked to contribute and then let everybody get out and rustle for exhibits. Past experience has shown that the pavilion can be made to pay its own way and there is no reason why the stock department should not do it also. By cutting down the purses offered and omitting some of the cash premiums, giving diplomas instead, a sufficient retrenchment could be made to offset the loss of the State money and still suitably reward every meritorious exhibitor. The *Express* believes that not only would we have as good or better fairs but that they would be more creditable to our manliness and public spirit. Why not try it?

There are at least ten tracks in California where harness racing can be given this year with profit to all concerned. These tracks are at Vallejo, Santa Rosa, Napa, Woodland, Stockton, San Jose, Oakland, Pleasanton, Fresno and Los Angeles, and there are doubtless several other places in the State that can afford to give a few days' harness racing for small purses. Mr. Tom Smith, the well known horseman of Vallejo, has secured a lease of the Vallejo track and when in this city last Tuesday gave out the information that Vallejo would give a good harness meeting this summer and will be ready to announce its program very soon. The Pacific Coast Trotting Horse Breeders Association has a big announcement out this week and while it is only preliminary, it shows that there will be some purses worth trotting and pacing for in California this year even though the district fairs have been cut out. The Breeders will doubtless give two and possibly three meetings this year if proper arrangements can be made with track owners. Pleasanton could give a two or three days meeting that would equal in attendance any place on the circuit.

The State Fair people received their appropriation of \$30,000 for the two years, which gives them the usual \$15,000 for a fair this year. If they would stop giving so much money away to the runners and devote more of their program to trotters and pacers, I think they would do better. The program of four running races costs the association \$1000 a day, and these purses are free—no entrance being charged. This is too heavy a drain and the attendance at Sacramento does not justify it. If the Society would get back to the old plan of six days racing, with the largest part of the program devoted to the harness horses, it would, in the opinion of many close observers, come nearer paying its way than it does now.

A three-days program is sufficient for most of the towns in California. I was talking with an Eastern

horseman a few days since, who visited this State last month for the first time, and he was surprised to learn that here in California meetings of six days, with purses ranging from \$500 to \$700 are given in towns of but four or five thousand inhabitants. One of the greatest drawbacks to the majority of the district fairs in California has been extravagance in the way of purses. In the old days, when ten per cent entrance was charged and the pool and bar privileges brought large sums, it was easy to give purses of \$1000 that were received but eight or ten entries. It is different now. Eight paid up entries to a race is a fair average. At five per cent a \$1000 purse this will bring in \$400. Five per cent additional from the four money winners amounts to \$200 more, a total of \$600 received. A purse of \$1000 will, therefore, cost an association \$400 net on the average. If three such purses are given each day the cost would be \$1200, and when it is taken into consideration that at every town on the circuit, except Sacramento and Los Angeles, \$600 is a big sum to take in at the gate on any one day, it will not take much figuring to show that \$1000 purses are "a little too rich for the blood" of most California associations.

Nearly every association that makes any pretension to being on the main circuit can, however, give one good sized purse, say \$1000, for the slow class trotters and one for the slow pacers. These slow classes will fill well and the race will not cost the association much. The Breeders Association gave a \$2000 purse last year, and the net cost was but \$200, with two or three suspended parties yet to pay up, which will make the purse self supporting. If the Breeders had given five or six such purses however, it would have been bankrupt, as there are not enough horses of all classes in California to fill an entire program of such races. If the managers of the different trotting tracks in California will get up programs for this year in which they cut the garment according to their cloth and put a little more ginger and life into soliciting entries and securing attendance, they can make a little money.

Speaking about the difference in the amounts received for privileges last year and during the good times twelve years ago, I know of one place where the figures are about like this: In 1890, betting privilege \$1868; bar privilege \$850; wheel of fortune \$825. Last year the same association received \$1000 for its betting privilege and \$300 for its bar. The State law prohibited the wheel of fortune so there was no revenue from that source. It will be seen that the difference on privileges alone between the revenue of 1890 and 1902 was \$2243, and this sum would provide for several good sized purses. The gate receipts for the two years, I am told, was just about the same—only a few dollars difference. So it cannot be said that the people are losing their love for harness races, but there is not a particle of doubt but Californians drink and gamble less than they used to.

It is a genuine pleasure to be able to announce that Bonnie Direct 2:05½, the handsomest and best bred of all the Director tribe in California, is to remain in this State and will not be sold at auction at Cleveland next month. Bonnie has been the property of the estate of the late Capt. Millen Griffith, but the executors of the estate have sold him and his two colts, both under one year of age, to the Captain's son, Charles L. Griffith, and he will keep the horse at Pleasanton. I believe that Dr. E. G. McConnell of this city is associated with Mr. Griffith in the purchase. The Doctor owns that fast pacer Phoenix 2:15½, formerly known as Tom Sharkey, by Direct out of Nola by Nutwood. The fact that Bonnie Direct will remain in this State will be welcome news to breeders as he is held in very high esteem and his colts, although none are over a year old, are the sort that take the eyes of horsemen and are looked upon as great prospects. Mr. Charles Griffith has, since his father's death, managed the horses owned by the estate and his love for Bonnie led to his making an offer for the horse.

The way in which a price was agreed upon was this: Several well posted horsemen were selected to appraise the horse, among them being Monroe Salisbury. It is well known that Mr. Salisbury has always held a high opinion of Bonnie, and I remember some four years ago when Mr. Griffith was bewailing the fact that Direct was lost to this State, Mr. Salisbury said to him: "I don't see why you should care much; you have a colt by him that is not only a handsomer, larger horse, but a better bred one, and one that has done more at the same age than Direct did. Why shouldn't he be a better sire than his daddy?" So it happened that when the appraisers set down the sum which they thought Bonnie Direct would bring at Cleveland next month Mr. Salisbury's figures were the highest. So Mr. Griffith deducted from this figure the amount that would go for commissions, also the freight bill across the mountains, and paid the re-

mainder to the estate for the son of Direct and Bon Bon. So Bonnie Direct 2:05½ will remain here in California.

Had the Millen Griffith Co. not sold their mares last November they would have had, with a single exception, more foals this year than any year since they purchased their stock. They bred seven mares to Bonnie Direct. One, Vida Wilkes, has not been heard from lately, but as she has only produced two foals in ten years, and from last accounts did not look to be, she can probably be classed as a miss. Mr. Molero, who bought Nola, said at the Palo Alto sale that there seemed to be no doubt about her being safely in foal. All the others bred to Bonnie are absolutely in foal. The remaining two mares were bred to outside stallions and both missed.

Budd Doble will go East in a week or so to take charge of Kinney Lou and prepare him for his races this year. He has already entered the son of McKinney in the Hiram Woodruff \$5000 trot for horses of the 2:20 class at Brighton Beach and also in The Blue Hill \$5000 stake for 2:30 trotters at Readville. Mr. Doble tells me that he will probably start the horse first at Cleveland. The Eastern papers have been saying that Kinney Lou would start in the M. & M. at Detroit, but Doble says that will be too early for him. The last issue of the *American Horse Breeder* gives away the secret of Kinney Lou's ownership. Mr. John Shepard of Boston is the man who owns him, and I think Doble made a pretty good turn on the sale. He bought Kinney Lou from Douglas Cone of Red Bluff, who purchased him at the sale of the late John McCord's horses. Kinney Lou has a record of 2:40 obtained at Redding or Yreka up in the northern part of the State two or three years ago. He raced under the name of Kinney Mac, but the meeting was one of those "bush" affairs that was not reported to either the National or the American associations. There is an Oregon stallion registered as Kinney Mac however, and so Doble selected the name of Kinney Lou for this horse when sending his registration papers back to Secretary Steiner this week, and has entered him in the stakes as Kinney Lou, formerly Kinney Mac. Doble will probably train him at Cleveland and start him there in his first race this year. Here's hoping that he may meet every expectation and enable Mr. Doble to secure another world's record to add to those he holds with Dexter, Goldsmith Maid and Nancy Hanks.

"Where are you going with that animal?" asked a visitor to the Pleasanton track one day last week of a small boy who was leading a horse out the gate.

"Goin' to turn him out," was the reply.

"Lame?"

"Nop."

"What's the matter with him?"

"He's a bad one."

"Does he kick?"

"Naw; he's one o' dem disappointments. When de boss first-hooked him up he was a peach, and de rai birds all said: 'Dat's the most promisin' hoss in de State.' But he wouldn't perform, see! When de regular workout day came and de people all came out to see him go, he flunked. He got to de half mile post and balked. You never saw such a bad actor, nor such a disappointed crowd. Why, if it had been a race all de horsemen 'n dis section would have gore broke, see! So de boss says: 'Turn him out and don't waste no more time on him. Sell him for any old price. Don't give any guarantee wid him. Get rid of him and we'll try to forget all about him.'"

"How he bred?"

"Don't know, sah, but I think he's by Much Promise out of Pie Crust."

"What's his name?"

"Governor P."

And as the boy said it he opened the gate, turned the disappointment loose, gave him a kick in the ribs, and with a disgusted look on his face went back to work.

## The Butte Jockey Club.

Added money in liberal quantities is to be given for the stakes at the Butte meeting, which opens June 6th this year and closes August 15th. There are eleven stakes with from \$600 to \$750 added to each. None of the over-night purses will be for less than \$250, and there will be six or more races each day. H. L. Jones, Box 11, Emeryville, Cal., will receive all entries and answer all communications up to May 1st. Entries will close April 25th. See the full list of stakes in our advertising columns.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

## In Training at Portland.

[Rural Spirit, March 27th.]

Quite a number of admirers of the trotter and pacer can be seen any fine morning at Old Irvington, watching their favorites take their early morning exercise, and many "a pipe dream" is left to blush unseen, from these morning visits, by the owners of imaginary high class performers. However, good judges tell us b. a. (that means barring accidents) there will be some good actors developed from the stables in training before the circuit opens.

Senator Helman has the largest number in training, and judging from the past will bring out quite a number of stake winners. He has Ned Thorne 2:11; looking fine. He is consigned to the auction block next month, and the man that gets him will have the fastest trotter in the Northwest; next to Ned is Oro Guy, a green black trotter, by Oro Wilkes 2:11. This fellow is doing stud duty now, and will be trained after the season for the big Lewis and Clark stake of \$2000. Tobasco, another green bay trotter, is thought to be "hot stuff." He is by Benton Boy out of a mare by Anteo, and has been kept under cover during the winter season. He is the first one to be nominated in the big stake, and the Senator says he is going to keep first until the race is over. Portia Knight by Vinmont 2:21 out of Maggie, the dam of Ben Bolt 2:18, is being groomed for the big \$2000 pace at the Oregon State Fair. She is owned by E. B. Tongue, of Hillsboro, and if she wins it will not be the first from this farm, and out of this mare, to win this stake, as Ben Bolt won it in 1901. Alton B., a full brother to Chehalis 2:04, etc., is in the Senator's string, but he is also to go via the auction block. Buyers should mark him down in their catalogue and bid him up at the sale, for he is "all wool and a yard wide" and warranted perfectly sound. Hallie Hinges, a three year old pacer, by Pricemont 2:26 out of Mollie Vaughn by Antrim, sire of Anzella 2:06, is looking big and fine, and has made quite an impression on her owner, W. L. Whitmore. She is being fitted for the three year old pacing stakes and should be a hard one to head. Bessie Lovelace, a three year old trotter by Lovelace 2:20, looks like a little sure money in her classes this year. Pricelist, full brother to Bill Frazer 2:14, and Pricemark, full brother to Hallie Hinges, are both two year olds and entered in the Oregon stake of \$1000. They are listed and marked for first money in each division.

Lovely Dell, another two year old by Lovelace 2:20 out of Alta Dell 2:16, has just been added to the senator's string, and no one knows anything about her speed qualities, but if she is as fast as her owner she will do. Carrie Nation, a four year old by Captain Jones, is very promising for the short time she has been worked. She is of the kind that will do all she can and do it well.

Hazel Reed, owned by the knight of the ribbon, J. A. Dougherty, is a handsome looking three year old trotter by Pricemont out of Hazel S. by Almont Medium that can go some. Stamboul Belle 2:21, by the great Stamboul 2:07, is being jogged and will likely be a candidate in the Lewis and Clark stake. She is owned by J. Conner of Salem, Ore.

The last, if not the least, is Wild Thorn, a black two year old by Wild Nutling out of Thornetta. This fellow is entered in the Oregon stake, and the senator thinks first money is coming his way.

Right on down the line is Pender & Sanford's stable. They have L. Zimmerman's two geldings McBriar 2:14 and Louis Z., a green trotter. Both these horses are in good condition to begin active work, and everybody knows they are a pair of fast ones. Bessie Jones by Captain Jones out of the dam of Atlas 2:15 is a fine looking three year old that is likely to be troublesome in her classes this year. They also have the two year olds Raven Jones and Dr. Jones, two very promising and good looking youngsters by Captain Jones, and both entered in the Oregon stake.

Down in the red barn is located Cris Simpson, who gets in a hurry in the spring and repents at his leisure. He has the speedy stallion Bonner N. B. 2:17 that turned the Irvington track last year in 2:12, and the good stake winner last year, Mack Mack 2:15; both these good ones are listed in the McCarthy sale and should find plenty of takers. Cris has in his stable Bonner Belle, a good three year old that he recently sold to Mayor Versteeg, and she is a good one in every way. Hazel S., another three year old pacer, is looking well and going good. William C., that showed so much speed early last spring, stands high in the estimation of all who see him. He is now four years old, and sired by Bonner N. B. Cris is looking for Phil N. 2:16, and a full brother that looks like him, to be sent in from the clam fields in a few days.

John Weaver has two good looking ones. One is a green pacer by old Altamont out of a Rockwood dam that wiggles along without the straps, and shows considerable speed. The other is a Scarlet Letter trotter,

and Jim Misner says it will be a "red letter" day for the boys, who have a ticket on him when he turns around.

T. D. Condon, another new one to join the ranks of a full-fledged trainer and driver, has some good ones in his string. Lord Kitchener 2:29, by the great young sire, Zombro 2:11, is being jogged in order to go into active training when the stud season is over. Tom says everybody tells him he has a 2:15 performer in him, and he begins to believe what they say.

Alma Mack by McKinney, out of Mary A. 2:30, is another good one in Tom's string. Max O'Rell, a full-brother to Doc Sperry 2:09, and Marshall Field, by Lemont, are both green trotters that possess considerable speed—the last named is consigned to the auction block next month. Roseantha, a two year old, by Lovelace 2:20, out of Ana J. 2:16, is the rose of the stable, and the two year old that beats her in the Oregon stake, will be entitled to wear the "shamrock."

Jim Misner is looking forward to "the coming event"—the Lewis and Clark stake for 2:20 trotters. He thinks first money in this \$2000 stake just fits Lady Jones, who took a record of 2:26½ last year in her three year old form. The lady is looking fine and acts like a queen already. Jim has two other Captain Jones colts in his string; both are entered in the big Oregon stake, and listed to be sold at the McCarthy sale.

George Misner is still "sawing wood," but when he gets up behind that big black green pacer, owned by Commodore Elmore, of Astoria, he acts like a man in a hurry. Mr. Elmore calls this horse Torpedo, and believes he has wonderful destructive power to any and all black green or gray green pacers that may come in contact with him. Maggie Smith, by old Altamont, out of Maggie Arnold, is in also the silent man's stable, and he thinks she will do. Major Rudd 2:30 is also there and has his size and good looks with him.

Harry Osmond is working a mixed stable of trotters, pacers and runners. His dream is Altacora, full sister to Chehalis 2:04. Rhima, by McKinney, out of Vevo, by Altamont; Fretiof, three year old trotter by McKinney, out of Beulah, are also taking their work well. In his running string is Ed O'Brien's stake winner Marengo, by Coloma. Harry also has Mr. Deiker's Don, by Alkinney, out of Blind Kate, by Altamont 3600, that is a very promising looking fellow.

Charles Hawk is on the turf again with a number of green ones. He has a green trotter by John A. Crawford 2:17, a green pacer by Lemont, another trotter by the thoroughbred stallion Sinfax, out of a mare by Kisbar, and a good looking three year old trotter by Lovelace, out of Bridesmaid. He is also fitting up Bridesmaid for the auction sale. The last two mentioned are the property of Mr. House.

W. H. Bradford has a three year old and a two year old, both fillies, by Bonner N. B. out of Lemont Belle, that Brad looks up to when grooming. They are a nice pair of fillies, but are bigger standing up than laying down. He also has a green bay pacer by Chehalis that has a smooth way of going.

Ed McGilvray has bloomed out already with a runner. He has the three year old Sidney B. Hurlless (we don't know what the B. stands for), and he is looking like a stake winner. Bob Crawford, owned by Major Lazarus, is also in his stable and looks thicker than last year.

C. P. Sperry and John Garrison have just arrived at Irvington with the stallion Cherry Stone and Goddess of Knight, where they will take their "prep" for the season's racing.

Matt White looks like a four-year-old on Gen. Sherman in his early morning exercise. We think the General has a little the best of the game.

Outside of those being jogged at Irvington, W. A. Allison has his trotter, Monkey 2:27, and the pacer Bill Frazier 2:14—the last named will go to the McCarthy sale, and someone will get the speediest roadster in the State. Monkey will likely be worked for the big Lewis and Clark Stake, as he is a very promising candidate.

Charley Lohmire is jogging his green gray pacer on the road, but he will place him in actual training in a short time. This fellow is considered the best green pacer in the Northwest. Mr. Lohmire thinks he is good enough to tackle the big \$2000 stake at Salem, and he is not the only one of the same opinion.

Professor Eaton is spending most of his leisure hours training his two year old by Erect. The professor says some of the youngsters will have to take to the two step to beat him.

Pat Barry has registered his colors as green jacket and yellow breeches, and will be out behind his well bred stallion, Nehalem by McKinney out of a mare by Gossiper. This fellow is bred just like Zoloch 2:10, and is said to be one of the best individuals in the State and a good gaited trotter.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## How They Shoe Horses in Austria.

One morning soon after our arrival in Vienna, with a bunch of fifteen choice trotting bred American horses, the necessity of visiting a horseshoer became apparent. Asking one interpreter where we could send the horses to have them properly shod, he replied with a look of anxious inquiry, as though doubting the "Americaner's" sanity, "Why, you don't send them; I'll arrange it for you by about the day after to-morrow." (It always takes until about the "day after to-morrow" to get to a man in Vienna.)

On the morning named a man came to our stables armed with a jackknife and a pocket full of twig clippings about a foot in length. These twigs were divided up in bunches containing four each, ornamented by the smith with hieroglyphics indicating the particular horse to be measured by those particular twigs. In this manner twelve bunches of twigs were prepared. Then the horses were led out, one at a time, and the four hoofs measured, each foot having three measurements taken of it, viz., length, greatest width and width at heel. These measurements were carefully noted by notches cut in the twig and the first act was complete, the blacksmith departing with promise to return the next morning.

In this connection it is proper to say that none but common horses are taken to a blacksmith shop in Vienna, the blacksmith coming to the stable to do all the work for gentlemen's drivers, coaches and the like.

As per promise the man was on hand the next morning, bringing his outfit with him tied up in a piece of cloth. This outfit consisted of some grease for the hoofs, some putty or glue to finish off with, a paring knife, an old style buttress, a rasp and one of the most unwieldy and ungainly looking hammers I ever saw. He was accompanied by a strong man as helper, who brought the new shoes, a package of nails and a three-legged stool-like arrangement for a foot rest for the horse.

The assistant held the horse's foot while the smith nailed on the shoe, taking a position beneath the horse's belly and working in the direct opposite way to that employed by a blacksmith in the United States, while fastening on the front shoes. There was no fitting by hot irons—the shoes were made to fit, and fit they did, too. The nails driven in and clinched, the foot was then placed on the rest and held there by the helper. Here the finishing was done, the whole work being rapidly and deftly performed.

It was noticed that the shoes were nailed on and drawn much tighter than the American owners or shoers would permit. Another feature was noticeable and that the difference in prices, the Austrian charging four guilders, \$1.60, per horse for the entire job. This included one trip for himself to take measurements, four new shoes and a trip for himself and helper to nail on the shoes.—*Toledo (O.) Bee.*

## Catarrhal Fever.

This is one of the most troublesome diseases with which the owners and handlers of horses have to contend. It is so insidious that when the horse afflicted is considered safely convalescent, he may at any time have a relapse that may even cost the life of the animal. The disease is so highly contagious that the nature of it indicates that it requires a germicide, and one that may be given internally. Spohn's Disemper and Cough Cure is the only one so far before the public that has filled all the requirements of a sure cure, and also a positive preventive when the animal of any age is "exposed" or infected. For all classes of race horses this remedy stands without a rival for wherever it has been used none other can gain place thus far. It is no longer necessary to lay up horses the most of the racing season on account of this disease, for as sure as you use Spohn's Cure it will cure your sick horses and keep others from having an attack of any of these diseases. Sold by all druggists and turf goods houses, or the manufacturers, Spohn Medical Company, Goshen, Ind.

## Thought to be Incurable Cases Cured.

CLEVELAND, O., Dec. 30, 1902.  
The Lawrence-Williams Co., Cleveland, O.:  
I rely on your GOMBAULT'S CAUSTIC BALM because I have cured so many bad cases which people told me could not be cured. I have a bottle of your medicine on hand.  
W. T. STRANGWARD.

There is only one way of curing unsound feet and that is by growing a new hoof. Campbell's Horse Foot Remedy is made of ingredients natural to the foot and there is nothing in it that would do a particle of harm from using too much of it. It stimulates the growth of the hoof and makes it tough and elastic, removing all soreness and drawing the fever to the surface of the foot. This is borne out by the testimonials received from parties who have used it. When bad feet have developed it should be used as often as possible, the best results being obtained from soaking the feet in hot water and applying the remedy alternately.

A lot of McMurray carts just received. You need one right now to work your colts in this winter. Call at the Kenney Manufacturing Company, 531 Valencia street and take a look at these carts and other first-class vehicles they have for sale.

MONTICELLO, N. Y., Nov. 11, 1902.  
W. F. Young, Springfield, Mass.  
Dear Sir:—I have used your Absorbine and can say that it is all that is claimed for it. Yours truly,  
J. L. JOHNSON, M. D.

Prince Direct 2:07 is said to be a much improved horse in appearance over what he looked to be last year.

Jackson's Napa Soda untangles the feet.

## Two World's Champions.

It is stated that Klatawah," says the *American Horse Breeder*, "which holds the world's three-year-old pacing record 2:05½, now, stands 16 hands high, weighs 1200 pounds and can trot a 240 clip handily. He has a right to trot, for his sire (Steinway) lowered the world's three-year-old champion trotting record to 2:25½ in 1870. Katie G., the dam of Klatawah 2:05½, was by Electioneer. Her dam was Fanny Malone by Niagara and her second dam was the thoroughbred Fanny Wickham, which brings the thoroughbred pretty close up in Klatawah, that has held the world's champion three-year-old pacing record since 1898.

"Agitato 3:20½, that held the world's champion three-year-old pacing record for two years, and was the champion until dethroned by Klatawah (3) 2:05½, still holds the world's champion pacing record for three-year-old geldings. He was also sired by Steinway (3) 2:25½. His dam was by Ferguson. The latter was by George Wilkes 2:22, and his dam was Press Forward by Albion, he by Peter's Halcorn, a son of thoroughbred Halcorn by Virginian, son of the renowned Sir Archy. The second dam of Ferguson was Belle Martin, a thoroughbred daughter of imported Sovereign. The second dam of Agitato was by Volunteer, which makes him a very stoutly bred fellow. His sire, Steinway (3) 2:25½, was by Strathmore and out of the great brood mare Abbess by Albion, making Agitato quite closely inbred to the latter."

A full sister to Agitato is to be sold at the dispersal sale of the Mokelumne Stock Farm horses at Fred H. Chase & Co.'s salesyard, 1732 Market street, in May.

## At Fresno Track.

The race track at Fresno is being kept in fine shape this year by the Supervisors, the county owning the track.

J. W. Zibbell has the largest string in training there, having fifteen head, among them several very good prospects. He has four belonging to Prof. E. P. Heald. Tom Smith 2:16½ is the fastest of Mr. Heald's horses and is looking better than ever before. Mr. Zibbell campaigned a string very successfully through Colorado and North Pacific Circuit last season, the great young stallion "The Commonwealth," which he recently sold to N. K. West of La Grande, Oregon, for \$5200, being one of the stable. Mr. Zibbell will race some of his horses through the Colorado circuit, which ends July 4th, and then return to California to race at the meetings here. He would like to buy a few good trotters and pacers that would make good matinee material, to take to Colorado with his string.

Chas. E. Clark has eleven head in training, some of which are good enough to enter on any circuit.

J. Albertson has ten head. They are all doing well and Mr. A. thinks first money will come to him in one or two of the big purses this year.

A. Middleton is doing nicely with eight head which he is working at the track.

Dr. Horn has five or six trotters and pacers that are working all right and among them are three or four that will be ready to race on the California circuit.

## Barondale is All Right.

SAN JOSE, CAL., March 31, 1903.

BREEDER AND SPORTSMAN:—On March 27th Mr. G. W. Theuerkauf's mare Gracie Lee, by Gen. Lee (son of Geo. M. Patchen Jr. 2:27), dam Sister by Eugene Casserley, son of Gen. Taylor, foaled a bay colt by Barondale 2:11½. Mr. Theuerkauf says it is one of the grandest colts he ever bred.

Gracie Lee is out of the dam of Funston the horse that worked a mile in 2:10 or better last year.

The Californians know a good thing when they see it. The way the good people are coming and looking at Barondale and sending their good mares this spring to him, it won't be but a short time before I will be turning mares away. Why shouldn't it be so? He is one of the greatest bred horse in the world; a grand individual and a show horse. I would like to see the man that can trot one out that can out show him. These futurity gentlemen will need his colts in their business, as he is made of the stuff that gets the futurity winners. Look the futurity winners up and see the family that produced them, the great Baron Wilkes family. It takes \$200 to breed to Baron Wilkes, it takes \$200 to breed to Oakland Baron, \$100 to breed to Moko and Prince of India, sons of Baron Wilkes. You have the same blood on the Pacific Coast at San Jose, at the low fee of \$50, in Barondale, but remember it will not always remain at this low figure.

I am Yours very truly,

TOM JAMES.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

## Answers to Correspondents.

A. H., Pleasanton—There were two "McClellans." Gen. McClellan 144 was a chestnut horse, foaled 1855, by North Star (a horse whose pedigree was not known) and out of a mare of untraced pedigree. He was bred in Ohio and brought to California by Seneca Daniels in 1861. He sired three in the list, and the dams of 9, among the latter being the dams of Beauty Mac 2:14½, Dollican 2:15½ and others. This horse was called Stockton McClellan by some. The other McClellan was Gen. McClellan Jr. 17461, sometimes called Petaluma McClellan. He was a chestnut horse, foaled 1872, and was sired by Gen. McClellan 144, first dam Eliza by Geo. M. Patchen Jr. 31, grandam Eliza Runket, pedigree untraced. He was bred by J. R. Rose of Lakeville, Sonoma county. He sired Nelly R. 2:17½, Lucy L. 2:22½ and Dick Jay 2:30, and one of his daughters produced Lilith 2:22½.

M. G., Winters—The mare Charivari 2:20½ made her record at Sacramento at the State Fair in 1895. She is by Sterling 6223, dam Alice by Prompter 2305.

G. R. D., Sacramento—The stallion Woodbut owned by J. Weatherhead of San Jose was a dark bay horse foaled in 1879. He was by Nutwood 600, first dam a mare called Flora, second dam by Wilson's Lemon. This is as given in an old number of the BREEDER AND SPORTSMAN, but the horse was not registered and cannot find the breeding of his dam. The mare Mollie Brown you refer to is not registered.

F. W. P., Sacramento.—Holmdel 5290 is a bay horse, foaled 1885, by Hermes 548 (son of Harold 413 and Hermosa by Edwin Forrest 49) out of True Love by Peacemaker 260 (son of Hambletonian 10); second dam by Flying Morgan, fourth dam by Hambletonian 2. Holmdel's record is 2:18½.

## Model Track at Los Angeles.

While there are a number of minor details to be worked out in the building of the Ascot Park grounds and a number of landscape artists will be given enough work to keep them busy for months, the main features of the new race course have been worked out and the Jockey Club members have settled the most important points about laying out their land. The double track will run north and south, as does the present course at Agricultural Park. The grand stand will be set at the southwestern turn in order to have the sun in the most desirable quarter during racing hours. A lake is to be in the middle of the infield and the irrigating ditch now crossing the land will probably be retained as a convenience.

Facilities for reaching the grounds will be most convenient. There probably will be a main entrance on Slauson avenue and another on South Park avenue. There may be one cut at the Central avenue corner. The car lines will be brought into the grounds and will land passengers at the back of the grand stand. The northern part of the grounds will be made into a beautiful park with shade trees and attractive shrubbery. The clubhouse will be placed at the south of the grand stand on the turn of the first quarter.—*Los Angeles Express*.

## The Evils of Betting.

The following from the pen of "Raymond," the well known turf writer of the *Buffalo Horse World* is exactly to the point:

"Betting as an adjunct to racing is all right, in fact we would have little racing if there was no chance for speculation on it, but when betting gets to be the principal thing and racing a mere adjunct, as is the case with running races, then betting becomes a great evil. In the large cities betting on the outcome of the running races is done by thousands of people daily, who never pretend to see a race more than three or four times during the year. 'Dope' sheets are studied religiously, tips bought daily, and many seem to have gone 'betting crazy.' A gentleman who has recently been in Memphis, where 1000 running horses are in training, says that nearly everyone there speculates on the runners, and that even the school children, when out of school, talk of the various horses and their chances of winning this or that race, instead of playing marbles or ball as school children usually do. When this state of things is reached all over, betting will have become a great National evil, and it will be restricted by law. It is to be hoped that the laws which will inevitably follow such a condition will stop at restriction alone instead of abolishing betting entirely, as was done with the lotteries when they became such a crying evil. If legislation does not stop with restriction, the blame will rest with the men who have encouraged the making of betting, the principal object of conducting running meetings, instead of keeping it in the background as an adjunct to pure sport."

## Handsome Trotters.

The old idea that because very many fast trotting horses are extremely homely, beauty and speed are incompatible qualities, has been pretty well exploded, and the growing demand of the horse market for stylish, trappy, nicely turned roadsters has prompted many breeders to ask themselves the question: "How can I produce faultless conformation, style and beauty without sacrificing speed?" To solve this problem it is only necessary to turn over the pages of horse history and read of the instances wherein the two qualities were combined in the days before breeding for speed alone took possession of the minds of horsemen. It might be well to begin the research by adding the description and history of Ethan Allen, the erstwhile champion trotting stallion of the world, a horse that J. H. Wallace, the great apostle of imp. Messenger, pronounced the most beautiful animal and most perfect trotting machine it had ever been his fortune to see—a horse that began his racing career as a two year old and successfully continued in the game, meeting and defeating the best of his day, until his great beauty and popularity in the show ring caused his owner to retire him to the road and the stud for a time, where, instead of receiving a much-needed rest, his vacation in summer was devoted to leading on the speedway and racing on the ice in winter; yet in spite of all the arduous duties he had been compelled to perform, at eighteen years of age he was again brought out and matched to go with running mate against the champion trotting gelding Dexter, and, although the latter was a three to one favorite in the betting, Ethan defeated him in straight heats, in the then unprecedented time of 2:15.

Then there is the world-renowned Lady de Jarnette, whose great beauty, style and faultless action won for her many thousands of dollars until she was barred from the show ring, and then gave exhibitions at fairs and race meetings, receiving therefor as much as \$500 per week. Her unsurpassed beauty did not interfere with speed, for she not only acquired a public record below 2:30, with very limited handling in that line, but produced a son that won premiums at many of the greatest horse shows, including Madison Square Garden, New York, and he also secured a standard record.

Coming down a little later, it will be well to look up the description, history and breeding of Mambrino King, whose matchless beauty, style and action moved the believers in breeding for speed alone to dub him "The Dude." His show ring qualities did not prevent him from trotting fast, and better still, they must have come to his assistance to enable him to sire such peerless race horses as Lady of the Manor 2:04½, Heir-at-Law 2:05½, Lord Derby 2:05½, Nightingale 2:08, King Charles 2:08½, Mocking Boy 2:08½, Dare Devil 2:09, Noonstone 2:09, and five others with records better than 2:15.

We might cite scores of other instances in support of the successful results following a combination of speed and beauty. And what has been done can easily be repeated; all that is necessary is a judicious selection of material upon which to build.—*Western Horseman*.

## Good Sport at Los Angeles.

Pleasant weather and an attractive program drew about two thousand people to Agricultural Park Saturday to see the March matinee races of the Los Angeles Driving Club. The card was an interesting one, and while no fast time was made in any of the races, the sport was enjoyable.

Two spectacular accidents happened that were not advertised, and while no one was hurt, they served to attract the attention of the spectators in no uncertain manner. In the second race, the horse Wood B. reared up and fell backward, striking on the ground beside the overturned sulky. He then righted himself and won the heat. In the last race, the mare Sweetheart also tumbled back on things in the same manner, but could not win her heat.

Rita H., the McKinney mare that has paced in 2:12½ in races, was started as a trotter in the first race. She won a heat in 2:38 at the diagonal gait, but was beaten in the race.

The results were as follows:

Trotting, 2:36 class—Venus N. won second and third heats, Rita H. winning the first. Bonnie Carlotta, King John and John Madison also started. Time, 2:38, 2:31, 2:39.

Free-for-all pace—Wood B. won two straight heats, Electra second, Glen third. Sallie Mikes also started. Time, 2:21, 2:21½.

Trotting, 2:25 class—Briney K. won two straight heats, Prince Howard second. Time, 2:23½, 2:23.

Fourth race, free-for-all mixed—Col. Smith won, Sweetheart second, Belle Patchen third. Time, 2:15½, 2:19.

Sober up on Jackson's Napa Soda.

## Notes and News.

Six early closing stakes

Are offered by the Breeders.

They aggregate nearly \$7000.

Eureka horsemen are talking of building a new track near that city.

Who Is It 2:10 and Nigger Jack 2:14, are now in the stable of the seventy-four year old Worcester, Mass., road-driver, R. C. Taylor.

Palo Alto Farm recently refused a flattering offer for Mendocino 2:19, sire of Idolita 2:09, and Monte Carlo 2:09, made by Monroe Salisbury.

Bertha, dam of Don Derby 2:06, Diablo 2:09, etc., has been leased by Oakwood Park Farm this year to Mr. Lou Crellin, of Pleasanton, who will breed her to Searchlight.

One of the best looking foals on Oakwood Park Farm this year is by Hart Boswell (son of Onward and Nancy Lee, dam of Nancy Hanks) out of a Chas. Derby mare.

Directress 2:19 by Director died recently over East. She was bred by Monroe Salisbury. Her dam was an A. W. Richmond mare. Directress produced Fanella 2:23 by Arion.

Mr. Frank H. Burke of this city has been elected a Director of the Pacific Coast Trotting Horse Breeders Association to fill the vacancy caused by the death of Mr. A. G. Gurnett.

There is a two year old colt in Kentucky by the dead yearling champion Adbell 2:23, out of Bonna Allerton 2:19, that is said to have trotted a quarter as a yearling in 0:39.

Anaconda 2:01 is to try for the world's half mile track record at Brantford, Ct., July 4. The present mark is 2:04, held by Joe Patchen 2:01, which he earned at Combination Park.

Daniel Mahaney of Portsmouth, N. H., has decided to send his broodmare Peeress, by Dexter Prince, dam Peko 2:11, by Electioneer, to Maplehurst Farm to be bred to Baron Wilkes 2:18.

Oakwood Park Farm bred eight mares to Stam B. last season and every one is either in foal or has already foaled. One was shipped to Australia and word has just been received that she is heavily in foal.

In 1901 Onward Silver won both the Bonner Memorial and the Massachusetts and \$7500. The trotter duplicating this feat this season will win \$17,500, just \$10,000 more than the amount won by Onward Silver.

A yearling filly by Monterey 2:09 out of Lo Lo by Tempest, sire of Iago 2:11, etc., is offered for sale by P. J. Williams. This filly is entered in the Pacific Breeders \$6000 Futurity. Here is an opportunity to get a good one.

The three year old colt Lord Roberts, by Bingen 2:06, dam Nancy Hanks, 2:04, has improved wonderfully since last season, and promises to make a horse 15.2 hands high when matured. He is now at Readville, Mass., in charge of Henry Titer.

Vance Nuckols has 14 head in training in his stable at the Cleveland track, including the trotters Arch W. 2:11, and Miss Brock 2:18, and the pacers Rosebud 2:08, Dakota Dan 2:12, Queen of Spades 2:16, and Theron Powers 2:17. The others are green ones.

Walter Maben, who has been on crutches for a week or so was injured by a runner that bolted and ran into his sulky while he was driving on the Los Angeles track. Walter suffered a severe sprain of the hip, but hopes to be walking on both feet within a week or two.

Roy Miller, of Macon, Ga., has bought of Will Evans, of Lexington, Ky., the yearling trotting filly Flying Dotte by Bernadotte, dam Flying Artillery, paying for her \$5000, the largest price paid for a yearling trotter in Kentucky in years. The youngster has shown sensational speed.

Will C. Sharp, one of the popular young road drivers of this city, has just opened a hay, wood and coal yard on Mission street near 17th. He owns the mare Princess Irene by Coligny and she is due to foal to Falrose this week. The foal is entered in the \$6000 Breeders Futurity for foals of 1903.

F. A. Ramsey of Riverside owns a ten months old colt by Zolock 2:10 out of a mare by Happy Prince that he thinks is a sure trotter. He calls him Hylock. Mr. Ramsey has had him hooked up two or three times and says he is perfectly mannered and one of the squarest gaited youngsters he ever saw.

Hambletonian Wilkes, one of the greatest speed sires in this State, and the only son of the great George Wilkes this side the Rocky mountains, has been withdrawn from sale. He has been well patronized this season and has nearly his limit booked already. The get of this horse sell readily at good prices, and they are all of good size and fine lookers.

Monroe, the big trotter by Seymour Wilkes 2:08 out of a mare by Geo. M. Patchen Jr. that is in Monroe Salisbury's string at Pleasanton, is being entered well through the Grand Circuit by East View Farm, of which James Butler of New York is the owner. Monroe has trotted a quarter in 31 seconds and is one of the greatest prospects in California.

J. M. Nelson, formerly of Alameda, Cal., is now at Glenville track, Cleveland, with six head of horses which he will train there this spring. The following is the make-up of his stable: Vyzant Jr. 2:20 by Vyzant, Halgreta 2:23 (full sister to Chain Shot 2:06), Brash 2:14 and Deputy 2:18, China Maid by McKinney 2:11, Richard S. by Grover Clay 2:23 and Fleet Onward by Onward 2:25.

East View Farm, the property of James Butler, the millionaire grocer of New York, has entered the Salisbury pacer, Mush by Lottery Ticket, in several of the early closing stakes on the Grand Circuit. Eastern turf writers will please take notice that the name Mush means "get up" or "go on" and that it was never intended by Mr. Salisbury to signify the soft breakfast food on which the majority of us were fed in our youth.

The death occurred last week at the Brown & Brandon ranch, Hicks Valley, Sonoma county, of Benj. Bowman, who will be remembered by horsemen in this State as the trainer and driver of Mr. Robert Brown's popular little pacer Plunkett 2:13 the last year he raced under Mr. Brown's ownership. Mr. Bowman has been a sufferer from consumption for the past three or four years. He has many friends who will regret to hear of his demise. Mr. Bowman was 36 years of age.

The first Indiana foal by McKinney, a handsome and sprightly bay filly, put in an appearance at the Gentry Farm, Bloomington, Ind., last Wednesday evening. The young Miss belongs to Dr. O'Rear, of this city, and is out of Our Lady by Nearest, 2:22, son of Nutwood Wilkes, sire of John A. McKerron 2:05, next dam by Antevolo 2:19, son of Electioneer. Dr. O'Rear is stepping pretty high, but, like so many proud young mothers, he "wishes it had been a boy."—Western Horseman.

David Bonner's subscription to the \$20,000 Bonner Memorial Purse, to be trotted for at Brighton Beach in August, is generally believed to indicate that Frank Work's fast young horse, Peter Stirling 2:11, will be a starter in the race. The winner of the Kentucky Futurity of 1901 is to be trained by former Assemblyman Carl S. Burr, of Commack, L. I., it is said. Peter Stirling is one of the few trotters that never lost a race or even a heat. Mr. Work has been driving him on the road during the last year.

Green Meadow Stock Farm has sold to R. B. Moorhead, of Los Angeles, the mare Maggie N. and the two year old colt Murray M., entered in the Breeders Futurity. These are full sister and brother to Robert I. 2:10, the biggest winner of the pacers on the California Circuit last year. The only one of Anna Belle's foals left at Green Meadow Farm is Rose K., a very handsome three year old. She is the image of Phoebe Wilkes 2:08 by the same sire and is a very fine large mare, being a fast trotter and a good prospect.

An adjourned meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York, N. Y., at 11 o'clock A. M., on Tuesday, May 5, 1903, by order of the president. All communications intended for the consideration of the Board at the May meeting must be forwarded to the secretary not later than April 21st. The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

Vol. 18 of the Year Book, for 1902, has been received. It is a large volume of 1181 pages, the indexes alone occupying 280 of these. The Great Table takes up 393 pages of the space and the Great Broodmare list 185 more. Barring perhaps the Vol. 8 of the same publication, never has the task of collecting and tabulating such an enormous mass of racing statistics been attempted. No one who desires to be properly informed as to the harness turf can afford to do without this work of reference. The price of Vol. 18 is \$4, postpaid from this office.

F. W. Perkins' young stallion Athamax is doing quite a good business at the Sacramento track and is getting good mares. He has already been bred to ten, all well bred ones. Two of his colts will arrive at the track this month. Chris Jorgensen has Athamax in charge and has him looking in great shape. Walter Tryon has several fine colts in training, one by Chas. Derby 2:20, one by Direct 2:05, and another by Wildnut. They are all looking and doing well. Hi Hogo-boom has a number of good ones, all going fast. L. M. Clark has his Stamboul stallion, Ouboul 2:22, in splendid condition, and is working three three year olds.

Ed Benyon regards Walnut Hall 2:09, the most erratic horse he ever trained and still about the most brilliant. He has to be petted and pampered like a baby at certain seasons in the year, and at other times he is a perfect gentleman in his behavior. "I have found out," says Benyon, "that he never acts bad when I give him an early preparation away from other horses. So I begin by taking him way off to a secluded part of the farm, where he can see no other horse, and for weeks he does his work this way as kindly as any horse can be asked to. As he gradually gets seasoned I introduce him to the track, and he is soon mixing up with other horses in the best humor. He became perfectly steady, and, feeling his best, he is not liable to many a break under ordinary conditions."

Have you seen those new McMurtry speed carts that the Kenney Co., at 531 Valencia street are selling this year? Det Bigelow, Walter Masten, R. H. Nason, and Sam Hoy, all well known trainers, were in town this week and each took one of the carts home with him. They are just about the best carts made. And then the new 1903 racing bike. It will break records this season. Send to the Kenney Company for one of the new catalogues. It is a handsomely printed affair and you will get one if you send Kenney your address or a postal card.

Hiram Tozier is now located at Readville, Mass., with six head of young trotters, all of which were purchased from the estate of the late Frank Jones. Three of them are by Idolita 2:09; The Victor, a large handsome bay two year old, out of Peeress, by Dexter Prince; second dam Peko 2:11 by Electioneer; J. P. Morgan, a two year old, out of Queen Regent, by Ax-tell 2:12, and a yearling colt, out of Carrie Caswell, is a very attractive little fellow. Others in the stable are Golden Rule, by Silent Brook, a four year old filly, that showed a mile in 2:17, last year, and Chatty Brook, by Silent Brook, a very trim black filly, that trotted a mile in 2:15, last year as a three year old.

Partisans of the hackney and the French coacher are fond of characterizing all trotting bred carriage horses as "accidents" and reiterating the assertion that the supply is about exhausted. Sensational high steppers of all breeds are, of course, scarce, but the percentage of trotting bred horses in the show rings and in the sales stables is larger to-day than ever before. Their superiority in quality, speed, endurance and all round excellence is acknowledged. Ten years ago trotting bred carriage horses were being masqueraded as hackneys, because the imported stock was more fashionable and more valuable. The shoe is on the other foot now. If a man has a trotting bred carriage horse to sell, it pays to tell his breeding. If he has a hackney or a French or Russian coacher, it pays to forget his pedigree or to pass him off as a well bred trotter.—New York Herald.

Two yearling colts by Monterey 2:09 will be catalogued in the sale of the Mokelumne Stock Farm's horses to be sold by Fred H. Chase & Co. about May 1st, that will be worth buying and taking a chance on, as they are bred to make great trotters and great sires. One is a chestnut out of Venturers by Nushagak, sire of Aristo 2:17, winner of last year's Stanford and Occident Stakes; second dam Lady Venture, own sister to Venture 2:27, sire of the dam of Directum 2:05. The other colt is a bay out of Kitty Fox by Pancoast, sire of Patronage, sire of Alix 2:03. Pancoast's dam was the great broodmare Bicara, dam of six in the list, by Harold, sire of Maud S. 2:08. The second dam of this colt was Dictator, sire of Jay Eye See 2:06, Director 2:17, sire of Directum 2:05, and Direct 2:05. Dictator was out of Clara, dam of Dexter, and was sire of the dam of Nancy Hanks 2:04, Lockheart 2:08, and many others. Monterey is siring speed and size and is growing in popularity every year. The first of Monterey's get that are old enough to start will be seen in some of the colt stakes for two year olds this year.

The \$15,000 Massachusetts purse, to be decided during the Readville Grand Circuit meeting, received 16 nominations, the same number as the Bonner Memorial, Brighton Beach's \$20,000 purse, received. Both events are for trotters of the 2:12 class, but there are in each event nominators who are not in the other. As the horses in these events do not have to be named until a couple of weeks before the race, the make-up of the field that will face the starter in both events is a matter of conjecture only. Several well known men who expect to have a starter for the 2:12 classes seldom make nominations to the big early closing events, in which horses are not to be named until nearly time for the race, preferring to wait until they know whether or not they have a horse fit to start, and then buy a nomination from someone whose horse has failed to come up to expectations. When the time comes for naming the starters in the Bonner Memorial and Massachusetts purses, most of the much-touted horses now eligible will be found in the list, if their work during the early part of the season has proved satisfactory to their trainers.

One of the best looking and fastest big horses in California is the horse Stickle, the six year old bay trotter by Silver Bow 2:16, sire of 8 in 2:30, out of Grace, the dam of Daedalion 2:11, Creole 2:15 (sire of Javelin 2:08) and Eagle 2:19, by Buccaneer; second dam the famous old broodmare, Mary by Flaxtail, whose progeny in the standard list is a regular legion of trotters and pacers and is growing all the time. Stickle has been in Vet Tryon's charge at Sacramento for the past few months and is in fine shape. He has trotted eighths in 16 seconds time and again and has worked a mile out in 2:18. Geo. Stickle, of Angels, Calaveras county, is his owner and this week had the stallion taken home to meet quite a number of stud engagements. Mr. S. owns a number of well bred mares that he will mate with his horse this year and there are quite a number of Calaveras and San Joaquin breeders who desire to send mares to him. As will be seen by his breeding he carries in his veins the blood of Robert McGregor 2:17, that sired the champion Cresceus 2:02, as well as the blood that helped produce Sir Albert S. 2:03, Dr. Leek 2:09, Javelin 2:08, Kelly Briggs 2:10, Twinkle 2:05 and many others. He is a magnificent individual and one of the best gaited trotters in California. That he will sire speed is certain. There is a three year old filly by him, his only foal of that age, that trotted a quarter in 30 seconds as soon as it was broken as a two year old. She will be taken up by Vet Tryon and worked this year. Stickle will be trained in 1904 and given a low record. Horsemen who have seen him work say that a record of 2:10 is within his reach when he is right.

## THOROUGHBRED DEPARTMENT.

Great need is felt every day for a National Jockey Club that should be in control of horse racing in America. If this were the case one might be spared some very peculiar rulings in connection with the sport.

Very recently the California Jockey Club reinstated the Western Jockey, Coburn, with the humiliating condition that he would never again be allowed to ride in California. Yet George C. Bennett, his contract employer, seems glad to be able to utilize the young man, even with this stigma following on the heels of his restoration to the saddle.

The inference from the conditional ruling is that Coburn had done such abominable work in the saddle that the officials on the Coast were not willing to let him ride there again. Still, they were willing to permit him to go elsewhere.

Coburn is known to be one of that class of jockeys who stops at nothing when they are anxious to win. A bit of foul riding or persistent attempts to beat the barrier are known to be matters of course with him. No doubt these were some of the reasons for the jockey's disbarment on the Coast. There may have been graver causes. If so, it is not too much to ask these California officials for a full statement of the case. This is the very least that the stewards of the Western Jockey Club should exact before Coburn begins the season at Memphis or elsewhere.

It is commendable enough, no doubt, to see that a man so prominent and potential in racing affairs of the West should be an object of sympathy at the deprivation he suffered all winter on account of Coburn's enforced absence from the saddle. But it is not a pleasant thing to contemplate that a jockey declared not good enough for California is fit to ride at all other points.

If we had a National Jockey Club Coburn would receive either an unqualified license or none. There would be no half-way measures about it. The officials of such a club should be able to ascertain to their own satisfaction if a suspected person were fit or unfit to ride. They could not say that he was good enough for Chicago, but not good enough for New York. At least that is what would be expected from such a body.

No more offensive persons exist than those who think that they, and they alone, are the proper persons to pass upon the honesty of a jockey or of a trainer. It is, in fact, dangerous to the good name of every turfman to place in authority any man or set of men who are not open to reasonable arguments regarding the alleged guilt of this or that person. Too many times in the past, when punishment has been inflicted, it is any odds that in the particular instance for which the offender was disciplined he was innocent, but on "general principles" and because the defendant had often before afforded good cause for complaint, no one cared to rise up and say a good word for him.

It is, however, too great a power to confer upon any jaundiced man or men. Officials properly constituted in their mental possessions ought not to feel mortified when their judicial acts are, when reviewed, reversed. The courts of the State and county are, fortunately, constituted for the very purpose of righting wrongs. It is because of prejudice or clamor that good lawyers often ask for a change of venue.

The same principle ought to apply to the cases of Coburn and Buchanan. Both may seek license from The Jockey Club, and without doubt all that is adverse to their good reputations will be brought out. No matter how it may strike most persons, who too often condemn without knowing the facts in the case, the stewards of The Jockey Club may be trusted to elicit all the facts in the case. It should make no difference to them that some alleged expert thought these jockeys had in certain races acted as if they were not trying to win. The Jockey Club officers like to see for themselves, when they can, what grounds there may be for such charges. Very often what looks to one man a downright pull is, when explained in cold blood, merely an attempt to carry out well-meant orders. This can easily be established before a Board of Appeals whose only desire is to do justice to all.

Sometimes the zeal of the prosecutors carries them beyond all reason. In their attempts to convince the higher body that they were right when they took preliminary action the local officers betray their unfairness. It is such acts as this that the stewards very properly take keen pleasure in thwarting. They also take at its real value the intemperate charges of some licensed trainer who, to maintain his reputation, then attempts to make the unlucky jockey a target. Unless corroborated by unimpeachable evidence such

charges are placed where they belong—out of court.

It is a certainty that no Eastern turfman would desire to engage either Coburn, Buchanan or any suspended rider until they had had a hearing before the stewards of The Jockey Club. What action these officials would take it is not within the scope of this article to anticipate.—*Daily America*.

Leaders of the western turf organizations are discussing the best means to suppress the exaggerated and absurd reports of plunging on race tracks which irresponsible men ignorant of their business and merely in search of the sensational publish daily in any paper on which they can foist them. They realize that the prominence given to the betting end of racing will be harmful to the sport if allowed to go unrestricted. There were more big plungers on the turf last year than ever before, and there are prospects that the coming season may find even more.

The matter of suppressing the plunger will not be taken up by the Western Jockey Club, because the organization takes no official recognition of betting. The work of suppression will have to be done quietly and diplomatically by the racing associations themselves. Last summer, for instance, when Joe Ullman and "Kid" Weller were making too much of a stir with the "big store" at New York, they suddenly dropped out of sight for a time. They said they needed a rest. When they returned to the ring they did business as quietly as a modest bookmaker.

There was nothing official in the suppression of Ullman and Wellman. It was done by a hint. If betting should become altogether too conspicuous in the west this season there will be some hints dropped. If a local racing association cared to curb the conspicuous betting of John A. Drake, for instance, the hint would have to be most diplomatically given. Mr. Drake will have a large and attractive stable of thoroughbreds and no track would care to give him any offense.

There was a time at Washington Park last summer when John A. Drake, John W. Gates and Charles Gates, with their satellites, did so much heavy betting that the news of their transactions in the betting ring completely overshadowed the races and the news of the thoroughbreds.

There were no hints given to Messrs. Drake and Gates last year, and it can only be surmised that something of the kind may happen this year. It is at least known that the turf leaders would be glad to have the betting end of racing as small a feature as possible.

The news of the Futurity last year was a betting tale as well as the story of a great horse race. No doubt the winnings of Drake and Gates were greatly exaggerated, but the two men certainly made a killing.

C. T. Boots has a nice maiden Derby colt named Alfredo, so the Greek professor and his stable may be counted upon for Washington Park, after which he plans to race at Saratoga and other Eastern tracks. Argregor is doing well, although he ran disappointingly in the only stake in which he has started here. He probably was short for such a bruising race in good company, but, anyhow, he is overrated. In the same stable is The Giver, which has been laid up for a year, and is looking great just now. Boots has a number of good-looking two year old colts over at Tanforan, but the fillies, mostly by Brutus are not much.

Hildreth and Buchanan have evidently buried the hatchet; rather Hildreth has buried the hatchet and Buchanan has approved. They have been in each other's company considerably of late. Hildreth says he will not stand in the way of Buchanan's reinstatement, and it would occasion no surprise if he were to go to the front for the boy who, he still contends, was the indirect cause of his losing the best stable he ever got together.

He declares, though, that Buchanan, even if the ban against him is raised, shall never again wear his colors in a race.

Frank Van Ness, formerly well known as a trainer of Morello, and more recently still a member of the distinguished "has been" band, is about to resume active work once more. At one time Van Ness' seal brown colors were quite well known, and, according to report, he will again be associated with a brown jacket, as he is slated for trainer to E. E. Smathers.

The names of neither T. Reiff nor Tod Sloan appear in the list of jockeys licensed by the English Jockey Club. Indeed the only American names in it are those of D. Maher, J. H. Martin and H. Lewis. A supplementary list will be issued after the annual meeting of the Jockey Club a month hence, at which the cases of the many jockeys still under suspension will be finally disposed of.

It is reported that Francis Trevelyan, who acted as presiding judge at Hawthorne race track last year,

will not return. Trevelyan is at present in England, and he has written a friend here that he will remain abroad. In this connection it is announced that Secretary Clark of the Crescent City Jockey Club will be offered the position of associate judge at Hawthorne. The report that Ed Corrigan has secured full control of the track is looked on with some misgivings, as "Big Ed" has always kept things hot while in the saddle.

Attorneys acting for the Government seized five head of the E. J. Arnold Company's horses, stabled in J. J. Marklein's care at Memphis, and they were shipped to St. Louis to join the other assets of the defunct so called "get-rich-quick" company, and will be pro-rated amongst outstanding creditors.

The horses are Maximus, winner of the St. Louis Inaugural; Peaceful, Will Shelley and two others that were shipped from the Arnold farm in Illinois to Marklein several months ago. A bond of \$2000 was given to Marklein to insure his claim on the Arnold horses for the care and attention that have been bestowed on them.

Dr. Rice, the Brooklyn Handicap winner of 1894, arrived on his native heath again last week. Fred Forster was at the dock in Hoboken when the Pretoria was warped in. He at once arranged to take his old ideal to more comfortable quarters. The old campaigner is looking fine and stood the voyage well. In fact, he looks as well as he did when he left here four months ago. With him came the broodmare Sumuroe.

The famous race mare Imp by imp Wagner, dam Fondling by Fonso, owned by J. E. Madden, Hamburg Place, Lexington, Ky., foaled March 18th, a bay filly by imp. Top Gallant.

Out of the ninety-nine days of racing at New Orleans this winter, the track was in good shape only twenty days. The meeting was overshadowed with bad weather almost continually, yet big profits were realized.

### Gen. W. H. Jackson Dead.

NASHVILLE, Tenn., March 30.—General W. H. Jackson, a noted Confederate cavalry leader and the proprietor of the Belle Meade farm, died at his home, Belle Meade, near here, this afternoon. He was 68 years of age. General Jackson had been in failing health for more than a year and dangerously ill for several weeks past.

Since the war General Jackson has devoted himself to agriculture and the breeding of thoroughbred horses. The famous horses bred at this place were legion, among the most noted being Luke Blackburn, Bramble, Gen. Harding, Proctor Knott, Bootjack, Beatitude, Boatman, Bancroft, Swift, Maid Marian, Farandole, Glidelia, Tyrant and Miss Ford. Two children, William H. Jackson, Jr., and Mrs. Seline Ellison, survive him. General Jackson was a brother of the late Howell E. Jackson, Associate Justice of the Supreme Court of the United States.

General W. H. Jackson, the master of the Belle Meade Stock Farm, was one of the most picturesque characters who survived the early days of "reconstruction." His life was indissolubly linked with the existence of his great thoroughbred nursery.

General Jackson was a Tennessean and a typical representative of the old time Southern gentleman, both in appearance and character. He came from an old Virginia family, Dr. Alexander Jackson, having gone from that State to West Tennessee in 1828 and settled in Paris, where he became one of the leading men of that section.

General W. H. Jackson was born in Paris, Tenn., October 1, 1834. He was a West Point graduate, and in 1856 entered the regular army, serving until the outbreak of the Civil War, when he resigned his commission and united his fortunes with the Southern Confederacy. He served the entire four years with distinguished ability and gallantry. He entered the Confederate army as a captain of artillery and rose to the rank of brigadier-general, afterward taking command of General W. B. Forrest's old division with a Texas brigade added.

General Jackson cherished as one of the fondest memories of his life the period of five years on the Western frontier. During those years of thrilling adventure he was located in Texas, New Mexico and Colorado, and much of the time he was engaged in actual hostilities with the Comanche, Kiowa, Apache and Arapahoe Indians. In most of his expeditions General Jackson was accompanied by Kit Carson and the noted French guide La Rue. In 1856 he escorted a train of 80 ox wagons, each drawn by from ten to fourteen yoke of oxen, from Leavenworth to Fort Union over the old Santa Fe trail, a distance of 1500 miles. On the trip he often saw herds of buffaloes and antelopes numbering 5000 head. The Indians were especially troublesome and the soldiers frequently had brushes with them.

## Buffalo Bill on the Art of Riding.

[By Col. W. F. Cody.]

If I were asked to teach anyone how to ride I shouldn't want to do it. And yet, I guess I know as much about riding as any man. In the East, I believe, they teach people how to ride a horse; in the West you couldn't get a self-respecting broncho to stand for anything of that sort. Riding is a gift. It's born in you or it isn't, and it won't take you long to find out if you can "keep your seat." Nearly everyone thinks he can ride a horse, a belief that leads to a great deal of trouble sometimes. It is a good deal easier for some people to run an automobile. In the far West, where the glorious prairies meet the sky line, a man doesn't have to take lessons in riding.

These prairies are the great riding schools of the world. Ranches are some fifty miles apart, and every little shaver who is old enough to walk, almost, jumps on horseback and takes to it as the Eastern lad does to swimming. It's born in him. All his ancestors were horsemen, and he doesn't have to learn what's in the blood. When he gets old enough he becomes a cowboy, and then he gets his first cow outfit. A cow outfit is a string of range ponies—about fifteen or twenty of them—and he rides them, alternately, as the days come around. They don't get enough riding to take the spunk out of them, and they're always true to the bucking instinct of the broncho. The best way I know of to learn how to keep your seat is to get a variety of seats, such as the cow outfit offers the cowboy. If you've got the gift of riding you'll soon learn the knack of getting so firm a seat that horse and rider seem to be made in one piece. If you haven't got the gift the broncho will promptly prove it to you.

The greatest rider in the world is the "broncho-buster." He is the man who meets the wild horse of the west or southwest and tames him for practical service; corrals the horse, ropes him with his lariat, gets a blanket on his back, then a saddle, then a bridle, and mounts him. Then he does a bit of riding that has astonished the world. The best show-ring rider on earth would be lost on the hurricane deck of a bucking broncho. The broncho-buster is not particular about style, neither is the broncho, and it's a dead earnest fight for mastery between horse and man. Neither of them has had any lessons in riding, but they gather a whole heap of information about one another in a short acquaintance. Mr. Broncho gets pretty mad, and Mr. Broncho-Buster tells him in plain language what he thinks of him, and they snort and cuss and fight like wild ones, but neither of them has any hard and fixed rules. There's no riding master to help either of them out; it's just a triumph of Mr. Broncho-Buster's genius for riding, over Mr. Broncho's genius for bucking. They get to be great friends—sometimes. Just as soon as horse and rider establish an intelligent understanding they become as fond of each other as boon companions. The horse becomes a pet and will answer his master's whistle as faithfully as a dog.

Of course there are as many different natures among horses as there are among men. There are wicked horses, as there are wicked men, but I believe much fewer. A horse is very sensitive to the control and ability of his rider, and if he is badly managed he will take advantage any time. There's no better advice I can give to any man who wants to ride than to tell him to use as much sense as his horse. You can't have anything better than good horse sense. There's not much park riding out west, because the western pony has a style of his own, that makes a man on his back sit up, just the same. No rider in the west hangs on to the bridle reins so as to keep his balance in the saddle. No rider in the west yanks the horse's mouth to turn a corner.

All western horses are bridle-wise. The slightest pressure of the knee, or a mere tip of the bridle rein on the pony's neck, wheels him round in a flash. The curb bit is never used, except to control a horse. No one should ride with a short stirrup. The easiest position on a horse is to stand in your stirrups erect, so that you can slip the stirrup easily in case of trouble. And trouble is a thing you always want to be ready for. With a horse it is always the unexpected that happens.

I don't know anything about park riding from personal experience, but I cannot imagine anything more uncomfortable than a pigskin saddle, a short stirrup and an English trotting horse for a man who had to ride for duty or pleasure.

The United States cavalrymen have adopted the western horse and rider as representing the best kind of riding in the world. Nearly all recruits in the United States cavalry are taught to ride in one of the western cavalry posts, where the broncho and the prairies give him all the practice and all the room he wants.

I believe that I am the only man who has ever corralled in one arena the Mexican, the Cossack, the Indian and cowboy, mounted on their native ponies; and

to those who study these things it is a remarkable exhibition of one fact, that good riders adopt almost the same methods.

The Cossack and the Mexican, the Indian and the cowboy ride with equal ease and fearlessness.

It won't do to be afraid of a horse if you intend to ride him. Look him square in the eye when ready to mount, grip him with your knees when you're on him, and talk to him till he understands you. The more you talk to him the better. In the matter of getting control of a horse a great deal could be written, if writing could teach any one to ride a horse, which I don't believe for a minute. If there is one thing the riding school does not do, it is to teach you how to control a horse.

A man must be equal to or better than his horse. More brute force won't gain the esteem and respect of a horse, and these are qualities the rider must conquer before he can succeed. The only way to become expert in riding is practice. The best saddle is the army saddle, with high pommel and high back, to rest the body as much as possible in long journeys; the worst gait is a trot; horses should be broken bridle wise; the best riding school in the world is the prairie.

The American range horse, in his natural state, is the wildest of the equine tribe. The so-called wild horse of the Cossack or the Arab does not compare with him for fierceness or ingenuity. In fact, I have yet to find the horse that is his equal in resisting attempts at subjugation. He will kick, bite, strike with his fore feet, and he alone knows the possibilities of bucking. No rider in the world except the American cowboy, who has learned the art in the school of rough experience, is able to master the untamed horse of the plains.

As an instance of the ferocity of these horses under certain circumstances, the case of the horse that killed the first Indian in the Pine Ridge campaign occurs to me. This horse was a range stallion called Sullivan, and he belonged to Big Baptiste, a well known scout. Baptiste was compelled to leave the place at the outbreak of hostilities and Sullivan was left behind with a number of other horses. As is generally known, it is the custom of these horses to form themselves into bands, each one with a stallion at its head. These released horses formed themselves into such a band, with Sullivan in charge. The Indians decided that they could make use of some of the mounts and one of their number roped one of the mares under Sullivan's charge and started to remove her. The infuriated stallion pursued him, seized the Indian with his teeth, hauled him off the horse on which he was riding and trampled him to death. Thus the first fatality of the campaign was due to Sullivan. The horse was afterward retaken by his former owner and ridden by him.

It is natural to expect, that animals of such spirit as this should display a high order of intelligence when finally broken. The strong instinct remains to stand them in good stead. The scouts and hunters of the west long ago learned this, and the more successful of them were accustomed to rely upon their horses to discover Indians or game at a distance which they themselves could detect no trace of either.

The horse Buckskin Joe, which I owned years ago, was a good example of the effect of training combined with instinct. He was the most skilled buffalo horse that ever lived. He knew just how to go after a buffalo and just how to avoid a vicious charge. It was hardly necessary to guide him in a hunt, and it was largely due to his ability that I was able on one occasion to kill sixty-nine animals in a single hunt. Many of the most clever trick and trained horses have been crosses between the blood of the eastern states and the cayuse, or plains pony. The horses which formerly did the Virginia reel in the Wild West were all of this kind.

When we come to the matter of endurance, too much can be said in praise of the American horses descended from the plains animals. They are particularly valuable for use in a rough or wild country, because they are so completely self-reliant. Oats and hay are not necessities for the range horses. They have picked their living for so many generations back that it has become an instinct with them. If there is grass under the snow they know how to find it. They appreciate the sustenance that is to be found in twigs and buds and even in the bark of young trees.

In the case of our own horses that are taken from the range we find it necessary to teach them to eat oats. That may seem surprising, but it is true. Usually it is necessary to put them on short rations for a time, until they learn to like the grain, and we have had a few horses that absolutely refused to eat oats under any consideration. Such horses as these do not require pampering or fine food, and for this reason they are especially valuable for use in campaigning, as they are able to bear up under privations that would kill the ordinary horse. Moreover, they will thrive in any climate.

Another quality that makes the western horse a good campaigner is his toughness. He will endure an incredible amount of work. His capabilities in this direction were abundantly proved by the 'thousand mile race' at the time of the World's Fair in Chicago, when every horse made the journey from Chadron, Neb., to Chicago without difficulty and arrived in good condition. In contrast to this is the famous Vienna race, in which the horses were killed.

In the course of my lifetime I have had occasion many times to put my horses to more severe tests than this one and I never have found them wanting. We all know the intelligence, beauty and affection of the high bred American horse. Add to this the hardihood, endurance and adaptability of the plains animal, and we have a product that the rest of the world cannot equal. I believe that the time is rapidly approaching when all the cavalry of Europe will be mounted on American horses, or at least on horses containing an admixture of American blood."

## Horse Business Good at Ukiah.

Ukiah, the county seat of Mendocino county has had quite a boom during the past two years and the horse breeding industry in that locality has taken several steps forward. Nothing has done so much to bring this about as the Mendocino county fair, which with the aid of about \$750 State appropriation has held two fairs that were very successful and have led to the purchase of several fine stallions and a number of full blooded bulls and cows by residents of that county. The improvement in live stock alone that has been caused by the fair is worth more than the small sum of \$750 which the Governor struck out of the appropriation bill this year.

Mr. J. A. Holbrook, formerly of Lodi, has located in Ukiah and took with him a three year old stallion by Temescal. Mr. Holbrook has met with much encouragement from horse owners as a trainer and will have quite a string. He has leased the track and already begun work on quite a number of prospects.

He is now working a four year old filly by Directum 2:05½ and a three year old colt by Lynwood W. out of Maud Fowler by Anteeo, both of which are owned by Mr. Thomas Charlton.

Another in his string is a very handsome black mare by Robin dam by Redwood that belongs to Col. Abe Marks. This mare is just about the handsomest piece of horseflesh in Mendocino county and will make a trotter beyond question. The Colonel bought her of McGregor & Hockin of Santa Rosa.

Mr. Holbrook has a very promising two year old filly by Lynwood W. out of May Ayers owned by Mr. H. B. Smith that is threatened with a speed attack that will very likely develop into a record by the time she is three.

Monte Banker of this place recently became the owner of Musket, formerly known as Black Wilkes, and is making a season with him at this place. Musket is well thought of here and will get 60 or 70 mares beyond a doubt. He is a son of Oro Wilkes 2:11 one of the greatest colt trotters ever bred in California, and out of Flora Belle 2:25 by Alcona, second dam the dam of Silas Skinner 2:17. There is producing blood all through his pedigree. There is no doubt but the Ukiah track will become a very popular training ground under Mr. Holbrook's charge and as it is one of the best tracks to train horses on in the country he will get a large string before long. He is a painstaking careful man and knows how to teach horses to speed and race.

## EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBALT'S  
CAUSTIC BALSAM

Used as a Blister  
or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, a Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam is warranted to cure at least one of the following ailments: Rheumatism, Sprains, Sore Throat, etc. Price \$1.50 per bottle. Sent by express, postpaid, with full directions for use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O., U.S.A.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### Trout Fishing Notes.

The first was a great day for the fish, but one of sad tidings for the fisherman. The heavy rains put a quietus on many contemplated trips to favorable streams. As for the fish, here was the opportunity of the year to get to the headwaters of the most remote mountain brooks.

So far as the steelhead are concerned a number of observant anglers claim that whenever the freshets come on just prior to the opening of the season, the big fellows that have laid in pools all winter come down with the flood and put to sea.

Reports from many points are to the effect that the streams are running bank full and the water is as roily and muddy as can be imagined. Fly-fishing will be out of the question for possibly two weeks. The worm and spoon will be the main resource of the fisherman until the waters clear and the streams go down.

The Paper Mill and Sonoma creeks are particularly not in shape and will not be for a week, it is feared.

Pleasant news to many anglers will be the welcome tidings that the dam at Klamathon, on the Klamath river, has been washed out and that the trout are running up stream by the thousands.

Up to a couple of years or so ago there was a fish ladder at the dam, but after the lumber mill was burned down no attention was paid to repairing the broken fish ladder. Now the elements have remedied the matter, and the course of the stream is unobstructed for the fish.

Reports received from different sections of San Mateo county were to the effect that the different streams are full of trout. This is very gratifying to those who are interested in fishing. From all indications there will be an abundance of the wary fish for everybody.

It is reported that considerable illegal fishing was done in many streams of Sonoma county prior to the last.

Game Warden Reed, who has carefully looked after the streams of Santa Cruz county, is enthusiastic over the success of his labors, for the streams are filled with trout, which news will bring joy to anglers. In an interview last week he stated:

"The prospects for good trout fishing in Santa Cruz county are excellent this year. The run of steelheads into the various streams throughout the county during the past season has been phenomenal, considering the extent of the lawlessness to which they were subjected up to four years ago. Up to 1898 or 1899, there was no attention paid to the law. Steelheads were brought into various towns by the wagonload and sold for any price which they would fetch, sometimes 25 cents being accepted for a twelve or fifteen-pound fish. About that time the better class of sportsmen realized that something must be done, and that soon. Vigorous action was taken at once, and fish law violators were prosecuted without mercy. The number of spawn fish in the streams this winter shows what four years of intelligent protection will do. Not in fifteen years have there been as many fish. Waddell, Scotts, San Vicente, Sequel—in fact, all of the streams, and there are about thirty of them in the county, are teeming with trout. All of these streams may be reached from Santa Cruz in from one to three hours' drive. In the vicinity of Boulder creek there are some beautiful streams, viz: Dear, Bear, Kings, Two Bar, Boulder and Jameson creeks. The headwaters of the Pescadero and both branches of the Waddell may be reached from Boulder creek.

"The first of April has its drawbacks for the true angler, for that is the day on which the cable and sounding lead fisherman goes forth to do the sprinting act up and down the streams, frightening the life out of the fish. It is no uncommon sight to see a spirited sprinting match between two or three of these fellows down the creek and have them suddenly stop at a pool where you are casting, in breathless excitement, for a fifteen or eighteen-inch beauty which had just a moment before raised to your fly. They forthwith throw in their sounding leads with a plunk that splatters the water well to the top of the nearest tree. Of course, it's all off; such is fate. Still, in spite of these drawbacks, an angler is reasonably sure of getting his one hundred speckled beauties, which is the limit by law in Santa Cruz county."

A well known local angler lays down the following directions for success in landing trout:

"If the fish sees the angler it will not rise to the fly unless ravenously hungry. If the angler is not concealed from the view of the trout all the arts of fishing must fail. To circumvent the fish can be accomplished in various ways—for instance, by learning to cast the fly a considerable distance and always remaining as far as possible from the place from which the fish is expected to rise; also selecting the water where the surface is choppy and wavy; a riffle or just below it is generally good fishing water. Taking advantage of natural cover, brush, rocks, etc., is another way of keeping out of sight of the fish.

But the principal and never-failing method is to observe the direction of the sun, and always stand between the sun and the fish, or the place where the trout is expected to be found, for in the direction of the sun and for a radius of 45 degrees on either side of the sun, objects on shore or along the banks of the stream are absolutely invisible to the fishes.

But while the angler observes this rule he must also remember that if he casts his fly within this radius that the fly will be as invisible as he himself is. So there is a combination to be attained, and which is, to stand in such a position with reference to the sun that he will be concealed, and from that spot to cast his fly to such a place that the fish will not have to look toward the sun to see it.

Fish do not rise well to the fly when the sun shines directly down on the current where they lie. The most advantageous position and combination is to fish upstream, with the sun at the angler's back, shining so that it casts its shadow diagonally across the current. The angler should cast upstream, above the spot where a fish is supposed to lie. This rule, when it can be followed, will enable the most unskilled fisherman to catch fish.

In choosing the direction to go and the place and distance to fish for any length of time, a calculation must be made upon the change in the sun's position, and the change in the direction of the particular current where the fish are supposed to lie. Although the sun and the direction of the stream may apparently be favorable, yet if the stream be tortuous and broken into many currents the particular current that is being fished in may run so that the sun shines directly down it, which would be most unfavorable. Thus it will be seen that a clear day, not too hot, contrary to popular opinion, it is claimed is the best for fishing."

### San Francisco Fly-Casting Club.

SATURDAY CONTEST No 3—Stow Lake, March 28, 1903. Wind, southwest. Weather fair.

Judges—Messrs. Reed and Kierulff. Referee, Mr. Mocker. Clerk, Mr. Brunning.

Events	1	2	3			4					
			a	b	c						
Young, C. G.	92	89	8-12	96	90	10-12	93	5-12	93	2

"Carr, A. B."	—	85	8-12	93	4-12	84	4-12	88	10-12	96	4

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

The rain last Sunday prevented the fly-casters from meeting at Stow lake for the purpose of casting the third Sunday club contest this season.

### Bolsa Chica Gun Club Wins.

Word comes from Santa Ana that the Washington authorities have taken action in the Bolsa Chica dam matter in the case which has been in dispute between the ranchers of the district and the Bolsa Chica Land and Gun Club for several months past, and now has been settled in the gun club's favor by the refusal of the War Department to order the removal of the dam. The Farmers' Club and other interested organizations have made the contention that the dam was an illegal obstruction of navigable waters, and as such, petitioned the department to remove it. This has been refused on the ground that, inasmuch as the removal of the dam would not be for the advancement of the interests of commerce and navigation, the department has no jurisdiction in the case. It is suggested that the case belongs properly to the civil courts.

### AT THE TRAPS.

The California Wing Club shoot at live birds on the Ingleside grounds and the College City Gun Club blue rock shoot at North Berkeley are the only regular local trap events scheduled for to-morrow.

The Millwood Gun Club dedicated their new trap grounds near Mill Valley Station last Sunday. There was a large attendance of members and visiting shooters. The rain poured down unceasingly all day; despite the weather handicap some good scores were made. F. G. Newlands won the club badge and also the Feudner medal for the month. R. Van Norden was high score for the Orr trophy. The scores in the different events were:

Club badge shoot, 25 targets—Price 19, Arnold 14, Mersfelder 18, Collins 17, Van Norden 16, Patrick (guest) —, Jansen 16, Nauman (guest) 23, Reed (guest) 17, Pizani 17, Newlands 21, James 17, Forster (guest) 23, Orr 18, Pizani (guest) 18.

M. O. Feudner medal shoot, 25 targets—Collins 23, James 17, Arnold 20, Patrick (guest) —, Mersfelder 24, Price 24, Newlands 25.

Team shoot, twenty-five bird race, Team A—Patrick, Van Norden, Nauman, Pizani, Forester, Jansen and Newlands, 117 out of 175 targets.

Team B—Collins, James, Arnold, Orr, Mersfelder, Price and Reed, 108 out of 175 targets.

Ten-bird race—Collins 7, Patrick —, Van Norden 9, Jansen 5, Mersfelder 8, J. K. Orr 7.

Ten-bird race—Price 5, Arnold 7, Patrick —, Jansen 3, Orr 7, Mersfelder 8.

Twenty-five target race for the J. K. Orr trophy—

Newlands 17, Price 19, Mersfelder 17, Collins 22, Van Norden 23, Arnold 20, James 20, Nauman (guest) 25, Reed 17, Jansen 18, Patrick (guest) —, Forster 22, Pizani 20, Fransen 16, Mersfelder 19.

The Vallejo Gun Club shoot last Sunday took place during a pouring rain. Bad weather, however, did not deter a good attendance including a number of shooters from this city, among whom were Thos. L. Lewis, W. L. Seaver, Walter Cooley, C. T. Mitchell, Jack Fanning, A. W. Robertson, Harry Hoyt and others.

W. L. Seaver (Trombone) was high gun for the day with A. G. Flickinger (U. M. C.) coming next. The races were all at 25 targets except one, which was at 10 targets thrown by a hand trap, a device comparatively new to Coast shooters.

The scores made were as follows:

Shot at	25	25	25	25	25	25	25
"U. M. C."	24	20	23	22	—	—	—
Seaver	20	21	23	23	22	21	19
Magistrini	18	8	17	—	—	—	—
Irwin	9	16	11	17	—	—	—
Davidson	9	4	15	—	—	—	—
Dunphy	9	14	16	15	15	21	—
Greig	13	8	15	—	—	—	—
Flynn	12	—	—	—	—	—	—
Flood	2	—	—	—	—	—	—
Hort	13	—	—	—	—	—	—
Wood	11	10	—	—	—	—	—
Mitchell	15	12	21	—	—	—	—
Drake	14	19	18	—	—	—	—
"Remington"	10	13	4	5	—	—	—
Cooley	19	17	23	—	—	—	—
Chappell, W. N.	18	19	8	—	—	—	—
Lynn	11	—	—	—	—	—	—
Brown	16	20	16	—	—	—	—
Herbert	8	—	—	—	—	—	—
Saxon	10	—	—	—	—	—	—
Robertson	22	18	8	—	—	—	—
Chappell, T.	9	—	—	—	—	—	—
Fanning	22	22	7	—	—	—	—

Ten targets—Dunphy, 7 Greig 7, Mitchell 6, Lynn 2, Robertson 8.

The Santa Rosa Gun Club held a blue rock shoot at Recreation Park last Sunday. It was the first shoot of the season. The scores were as follows:

J. B. McCutchan, 73 birds out of 80; R. Lowery, 68 birds out of 80; F. W. Hesse Jr., 54 birds out of 90; P. Fehrman, 42 birds out of 70; G. Buckmaster, 25 birds out of 40; B. Dryden, 21 birds out of 40; W. Hopper, 21 birds out of 40; L. W. Julliard, 20 birds out of 40; C. Bertolani, 18 birds out of 40.

The Trinidad Gun Club, Humboldt county, gave a ball last Saturday evening. The following day the members held a blue rock shoot.

The old Salinas Rod and Gun Club, which has been a dead letter for some time past, was revived Sunday March 22nd. The old members as well as many new ones, assembled at James Jeffery's Riverside Hotel and spent the day at trap shooting and target practice. Quite a few old club scores were broken and many new records established. The club members anticipate some good sport the coming season. On account of the absence of some of the members in the morning a second shoot was held in the afternoon, the two scores at 25 targets were:

Morning shoot.—G. A. White 15, Dr. Chappell 12, C. Z. Hebert 18, S. Hauser 19, R. Vierra 11, Wm. Tholcke 7, Ed. Smith 8, F. Coy 11, G. Tholcke 8, James Jeffery 18.

Afternoon shoot.—Geo. Tholcke 12, Dr. Chappell 6, L. Tynan 5, Wm. Menke 9, S. Hauser 17, G. A. White 11, C. Z. Hebert 12, F. Coy 14, James Jeffery 17, Wm. Tholcke 5, E. Jeffery 5, J. J. Kelly 7, E. Smith 14, R. Vierra 16.

The newly organized Sycamore Gun Club, which is composed of the following residents of Spence Switch, Monterey county: F. Blohm, J. Riley, W. Blohm, J. Frates, D. S. Thompson and J. Brady, held their first practice shoot Sunday afternoon March 22. The club will take in a few more new members and will hereafter hold regular monthly trap shoots.

Announcement is made of the first annual Pacific Coast championship bluerock tournament of the Ocean Park Country Club, to be held on the grounds at Ocean Park, May 15, 16 and 17, Los Angeles. There will be more than \$300 added money, aside from special features, prizes and trophies for May 15 and 16. Sunday, May 17th, there will be merchandise and pool shooting, and the first of an annual series of events for the championship of the Pacific Coast. The regular program will be announced later. The Ocean Park Club is composed mainly of Los Angeles shooters.

Picturesque Livermore nestling in the Contra Costa hills, is not without a number of lovers of the shotgun among its citizens, for in the surrounding hills and valleys can be had some excellent quail shooting as also can be indulged good sport on a few snipe patches.

Among the Livermore sportsmen and in that vicinity there are a number of expert trap shooters but there has been no attempt at club organization until recently. As a result of a little canvassing a club of very respectable size has been formed with the following list of members: Chas. Brewen, Henry Buhrnd, H. R. Crane, Dewitt Dutcher, Harry Morrill, George Crane, L. McKimish, Wm. Hoffman, J. F. Collins, H. Seeband, Jos. Twobey, Chas. Hanson, Wm. Hobler and Ed Carroll. Henry Buhrnd was elected president and Chas. Brewen, secretary. The club will shoot on the grounds south of Wagoner's winery.

Following is the score of the club initial shoot at 15 targets last Sunday afternoon.

Crane, G.	11101	11011	10000	—
McKimish, L.	00100	00110	10010	5
Hoffman, W.	10111	01110	10011	10
Collins, J. F.	11111	11111	01100	12
Morrill, H.	11011	11111	01100	11
Seeband, H.	10111	01111	10011	11
Buhrnd, H.	11111	11111	01110	13
Twobey, Jos.	10111	10011	01111	10
Crane, H. R.	11111	11111	10111	14

## WANTED, A GRIZZLY.

## Ludicrous Adventure of Three Tenderfoot Bear Hunters.

The crusades of "Old Club Foot," the famous Southern Oregon grizzly bear, as well as the frequent raids of the grizzlies from the range of mountains that divide Lake and Klamath counties in the valleys below in early days made the country famous as a bear country. Hunters from many points came to the mountains on hunting expeditions, and along with the many successful hunts some humorous episodes took place, writes Paul De Laney in the *Portland Journal*. It is well known that many people do not hunt bear, and that many who do find bear, at the last moment do not enjoy the sport as much as was expected.

A party of well armed and equipped hunters once arrived from across the California line and stayed over night with an old rancher, who was a Missourian, at the foot of the mountains, requesting an early morning hunt. There were three in the party and they talked until late with the rancher and his son about bears and were anxious that they should not fail to find them. The old man informed them that his son would take the dogs along, which had long been trained as bear dogs, and that he thought there would be no trouble in finding the big game, as both dogs and men were familiar with every part of Lake county.

Two of the hunters are well-to-do merchants and had sent East and bought guns especially for the hunt, and the other member of the party had borrowed a gun from a noted hunter, and both the gun and the hunter had a wide reputation. He felt safe with a gun that had been proved, though the guns of his companions had cost larger sums of money.

They discussed the matter until late in the night, as amateur hunters do. They settled the question of who should have the first shot, who should shoot next, how they should divide the game, and one of the party especially desired to take home with him a large grizzly skin. They also settled on the point that if they should only find one bear all should share in the honor of killing it.

Notwithstanding the fact that they kept the rancher and his family awake until a late hour the hosts were up and had breakfast ready by break of day and the party composed of the young Missourian, his two dogs and the three Nimrods started out on the hunt. He escorted the three hunters into a deep gulch, along by the side of a stream in the bed of which there was a dim trail. He told them to line up by the side of this trail at convenient distances apart and that he had hopes of running a bear out by them. Thus stationing them he crossed over the hills with his dogs and took a circuitous course in search for the game.

In spite of the agreement of the previous night the hunters were inclined to dispute over the points at which they should stand. Each wanted to take the station farthest up the gulch, as that was regarded as the place where the first opportunity to shoot would come. It was argued that the "front" man would get the first chance, would kill all of the game and the two others would have to return without any honors. But the old unwritten plan of equity was resorted to and the drawing of straws settled their respective fates. Thus stationed along the side of the winding trail about 100 yards apart, with high walls in the front and rear, they impatiently awaited the bark of the dogs.

But they were not kept waiting long. The young hunter knew the country and his dogs were keen scented and knew where to find a bear. The men on the "stands" soon heard the welcome drawled-out bark of the hounds far away up towards the head of the gulch and each began to look to his rifle for action. It was now that the man at the head of the line began to think how fortunate it was to be born lucky. The men below became restless and hoped in their hearts that their companion should fail to bring down the bear and that they each might have an opportunity. On the dogs came, and the hopes of the man at the head rose higher and the men below became more anxious. The dogs were now only a quarter of a mile away and from their excited baying it was surmised that they were coming in close contact with Bruin.

The loud baying of the dogs so close at hand and the prospects of immediate appearance of the game changed the sentiment of the hunter who had won first shot. Heretofore, killing a bear had all been a theory with him. Now he was about to get an opportunity to put it into practice. What if his gun should fail fire? What if there were more than one bear? He looked behind him and the walls were too steep to climb. There were no trees. He was not afraid, but he was not foolhardy. He did not believe in men taking unnecessary chances. But it would never do now to show the "white feather." His companions would never quit teasing him, for they were jealous of his good luck in winning first place. As the dogs approached nearer his nerves became less steady. In fact, this feeling became epidemic. The men down the line began to feel their responsibility. No. 2 began to consider the matter of his responsibility should No. 1 miss the game. No. 3 likewise was thinking if both No. 1 and No. 2 should fail. Each in turn looked about him and the same condition existed. High walls on two sides, no tree, bear coming from one direction and only a rough, rocky trail leading out of the gulch. The success of the front man was prayed for by the other two. The front man wished that he had lost his luck. He began to tremble in spite of keeping the point in mind that he must not give his companions a chance to laugh.

But they were not kept in uncertainty much longer. Owing to the crookedness of the walls of the gulch the men could not see each other, but all could hear the

dogs. They were now close at hand. The front man stood trembling, nerving himself up to his "maiden" effort at killing a bear. The dogs were just around the point close at hand. He glanced down at his cartridge belt and then at his gun to see if everything was in readiness and then looked up the gulch again. The game was in sight. A large black bear appeared coming on in a sort of pace around the point. It was now only a hundred yards away. He raised his gun in readiness, but decided to wait until the animal was nearer so as to make a sure shot. But just at that moment another bear appeared, and then another. He looked up the steep walls behind him, and then looked down the crooked trail toward his companions. He then glanced up the gulch again and two more bears had appeared, and the dogs were baying at others behind the point.

When the bunch of bears discovered the hunter in front of them it seemed to madden them, and setting their eyes upon him they lunged forward with foam flecked jaws distended. He decided that it would require the assistance of his companions to kill so many bears, and he thought the quicker he gave them notice the better it would be for the enterprise. He started at a good rate of speed, the noise behind him was not of the kind that would check him. No. 2 was just around the lower point of the wall and was standing ready with gun in hand. A smile came over his face as he saw his companion round the corner. But it did not remain long. The bears had also made good time. They were close behind in the chase. No. 2 did not wait for explanations. As soon as he saw the bears pouring around the corner of the rock he frantically led the way down the gulch. No. 3 was next. He, too, was ready for the game, but he discovered his companions and the bears at the same time. A stampede is always contagious. He did not wait for explanations, either.

Abandoning their guns as the bears came closer upon their heels they ran as they had never run before. In fact, as one of them afterwards described the situation, "they were open at both ends and running freely." They reached the mouth of the gulch only a few yards ahead of the pursuing bears and the dogs barking almost at their very heels added to their alarm by warning them of the close proximity of the common enemy. A level country lay at the mouth of the gulch and when the hunters reached the point each took a different direction. The bears, however, kept on in their course. After the bears and dogs had passed by, a safe length of time intervening, the hunters reappeared and began to approach the trail cautiously. The young Missourian soon came along and saw the guns of the hunters lying along the trail. He knew what had happened. He was too disgusted even to take up one of the guns. As the hunters gathered from the different points they saw the young Missourian pass with a look of disgust on his face that they could not meet. He had taken no firearms with him, only carrying an old bowie knife at his belt. They saw him draw his knife and, clinching his teeth, start out in a run in the direction the bears and dogs had gone.

The three stampedeers met at the mouth of the gulch, each ashamed to look the others in the face. They walked up the gulch together, found their abandoned guns and hats and made their way back to the ranch house. They told the old Missourian that they had failed to kill the bear and that his son had followed his dogs. While they were preparing to leave for home the young Missourian came in for a horse and just as they were driving away the young man brought in one of the largest of the bears, which he had overtaken and killed with his knife.

He said to the disappointed hunters: "These dogs are from Missouri. You have to show them. If I hadn't got one of them bars the dogs would have been so disgusted that they would never have hunted bars again."

## FEATHER AND FIN.

Thomas. W. Lee of Sacramento and J. R. Bloom, C. R. Lee and Charles Benson of Dixon killed 247 gray geese in a few hours' shoot Sunday evening and Monday morning two weeks ago on the Charles Benson ranch, southeast of Dixon. The geese have been very numerous in that section of the country.

Pigeons are exceedingly plentiful this year on the Yuba river. This was demonstrated by two well known Grass Valley sportsmen, George Ellis and Thomas Brock, who went over to Bridgeport about two weeks ago, where they bagged thirty-five handsome wild pigeons. They reported that the birds are numerous and the sport splendid.

Two weeks ago to-day O. L., C. P. and A. P. Wakefield, who live three miles north of Lockeford, San Joaquin county, started on a hunt for the mountain lion that has been doing damage along the river. Besides their own dogs, one, the property of John Little of Merced, was sent up for the occasion. The dogs took up the trail of the beast, and for a number of hours kept hot upon his trail, but were unable to bring him to bay. Messrs. Wakefield state that the dogs crossed the river three times during the hunt. Fresh tracks, as large as a man's hand, were discerned in the mud. The hunters say that the growling and spitting of the lion was plainly audible, showing that the dogs were very close to him. The following day these gentlemen again attempted to find the beast. They started with dogs at daylight, but it was 10 o'clock before they took up the trail. This time the hunters were not as close to the quarry as on Saturday. The boys bagged five coons while on the trail of the mountain lion, making a total of thirty-two coons and three wildcats that they have shot this season.

Willis Lane of Santa Clara, one of the most ardent nimrods in the county, has recently made a survey of the conditions on Stevens creek, and he says that

something should be done to prevent the destruction of the trout.

On Cavanaugh creek, a tributary of Los Gatos creek, there are similar conditions. During the past year the fish ladder which provided a means for trout to run over a big dam in this stream has been washed out, and from reports by William Norris, an ardent sportsman, the fishing will be very poor.

At a recent meeting of the Santa Clara County Fish and Game Association the most important action taken was the appointment by President Barker of a committee of three members to draft a resolution requesting the Board of Supervisors to shorten the deer shooting season. The State law confers on the Board the authority to shorten, but not to lengthen, the shooting season. President Barker appointed A. E. Shumate, J. H. Faulk and W. H. Shelborn as the committee, and they were directed to report the proposed resolution at the next meeting. It is proposed to make the deer shooting season from July 15th to October 1st. It is also proposed to secure co-operation, if possible, of Santa Cruz and Monterey counties in fixing the same time, as the interests of the three counties are considered identical in this respect.

## DOINGS IN DOGDOM.

Entries for the S. F. K. C. show are coming thus early in an encouraging ratio.

Among the additional silver cups donated will be one from Walter Magee, Esq., one from the Stock Brokers to be awarded to the best novice Bull Terrier, one from the Grain Brokers for the best Greyhound and several other cups, the disposition of which is not yet been determined.

George Raper left England on the 1st and will make his re-appearance on the Coast at the Portland show.

Carlotta, J. L. Cunningham's Great Dane bitch, won out at the Victoria show this week, the competition is reported to have been "hot."

Ingleside Coursing Park will again be the resort of the leashmen when the gates of the park are re-opened on Sunday April 12th. A meeting of coursing men interested was to be held on Tuesday evening for the purpose of organizing a club under the auspices of which the sport will be conducted at the re-opened park.

The Ladies Kennel Club of America will offer at the coming S. F. K. C. show the following cups:

The Castlegould Challenge Cup for the best black pug.

Sporting Spaniel Plate for the best Spaniel bitch, with two of her get, conformation of the pups alone to count. To be won three times by the same kennel with different dogs before becoming the property of any one person. Open to all Spaniels, save Toys. Competition open to all.

The Ray Cup for the best brace of St. Bernards (dog and bitch).

Premierships in all breeds, and they must be judged as specials, in the ring, by the various specialty judges.

Jos. E. Terry's English Setter bitch Mary Lou was served by T. J. Watson's Starlight W. last week. This breeding means much to the Setter fancy of the Coast. Mary Lou is the dam of Kilgarif, the Pacific Coast Derby winner this year. She is a half sister to Ch. Joe Cummings, the dam of both being Picciola. Hen Crocker's Chief winner of the Coast 1900 Derby is a son of Mary Lou. But three only of this bitch's progeny have ever been trained for field trials. The third, Lou, stayed for two rounds in the 1903 Derby at Bakersfield.

Starlight W. is by Dan Gladstone (Ch. Gladstone Sue) out of Miss Alice (Doncaster-May Queen), and has sired some of the best Setters on the Coast to-day.

Great Dane dog puppies six months old can be had from O. Bergsten, Oakland. See classified advertisements.

Mr. W. C. Ralston writes us that Delverton Kennels will put Woodland Duke in the coming show for exhibition only, as many people would like to see the old dog, who is really the father of Cocker Spaniels on the Coast.

Victoria, Seattle and Portland are all P. K. L. shows. Indications point to a good circuit.

## Kennel Registry.

## VISITS.

Delverton Cocker Kennels' black Cocker bitch Ch. Princess Flirt (Ch. Black Duke) to same owner's Woodland Duke (Ch. Black Duke-Woodland Jude), March 23, 1903.

Delverton Cocker Kennels' red Cocker bitch Little Dorrit (Ch. W. Duke-Myrtille) to same owner's Hampton Promise (Black Duke II - Ch. Gaiety Girl), March 26, 1903.

Delverton Cocker Kennels' red Cocker bitch Baby Ora (Ch. Viscount-Black Sue) to same owner's Hampton Promise (Black Duke II - Ch. Gaiety Girl), March 16, 1903.

## LEASES.

Plumeria Cocker Kennels have leased the black Cocker bitch, Jetta (—) from James H. Jones.

## Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

### Pollution of Our Bay Waters.

Long continued has been the complaint against an increasing nuisance which, it is claimed, is blameable on the several municipalities of several corporations, and the legislatures have turned a deaf ear to every overture for abatement of the violation of the State law and the rights of the people.

Immediate action has been taken by a number of sportsmen and others interested against the serious import of the existing nuisance—not only as a menace to marine life but also, it is believed, involving certain sanitary problems, and Governor Pardee and the State Fish Commission have been petitioned to take measures to the abatement of the evil pointed out.

At the last session of the Legislature, the clause in the fish law, which was supposed to cover violations of the character here referred to, was changed so as to read as follows:

Section 166. Every person who places or causes to be placed in any of the waters of this State, dynamite, gunpowder, or other explosive compound, for the purpose of killing or taking fish; or who takes, procures, kills or destroys any fish of any kind by means of explosives; or who places or allows to pass, or who places where it can pass into any of the waters of this State, any lime, gas, tar, cocculus indicus, slag, sawdust, shavings, slabs, edgings, mill or factory refuse, or any substance deleterious to fish, is guilty of a misdemeanor, and is punished by a fine of not less than two hundred and fifty dollars, or by imprisonment in the county jail in the county in which the conviction is had, not less than one hundred and twenty-five days, or by both such fine and imprisonment; and all fines imposed and collected for any violation of any of the provisions of this section shall be paid into the State Treasury to the credit of the "Fish Commission Fund."

Whether the matter of relief and proper action thereon is up to the Fish Commission or the Attorney General on behalf of the people cuts no figure, notice and complaint have been served upon the proper representatives of the commonwealth and upon the alleged parties and their agents, responsible for the pollution of our waters.

The substance of the petition mentioned is set forth in a dispatch this week from Sacramento, which says: "The entire fish, crustacean and shell-fish supply of San Francisco bay and the adjacent waters are threatened with absolute destruction from the effects of waste petroleum products [generally anathematized as that 'oil smell'] that is being dumped into the bay, if the report submitted to the State Fish Commission and Governor Pardee is to be believed, and the Fish Commission is petitioned to take steps to put a stop to the practice of dumping the petroleum waste into the waters.

It appears that a committee consisting of the officers of the Pacific Striped Bass Club, the San Francisco Striped Bass Club and O. W. Jackson, as a member at large, have been making a thorough investigation of the conditions of the waters of San Francisco and San Pablo bays, and have found that this statement is in no way exaggerated.

In consequence they have addressed a petition to the State Fish Commission and the Governor, setting forth these facts and requesting that something be done to aid the fish interests and to prevent the pollution of the waters of San Francisco and San Pablo bays by the several oil refineries located thereon.

The petition states that the refinery at Point Richmond has on numerous occasions emptied its waste matter in large quantities into channels leading into San Pablo bay. The lighter portion of this waste floats on the surface of the water and has been found on the shores of Angel Island, the mainland bordering on Raccoon Straits and many other places on San Pablo bay.

This is causing destruction to fish life of all kinds, but the principal destruction is to the fry of the smelt, striped bass, perch and other like food fishes. The heavier portions of the oil waste sink to the bottom and destroys or renders unfit for food the clams, crabs and oysters.

The petition further states that the waters of the Oakland estuary are so impregnated with petroleum that at times the fish and clams taken from them are unfit for food, as the flesh is tainted with the taste of petroleum. The source of this nuisance is believed to be due to the dredgers working in the tidal canal, who use petroleum for fuel purposes, and that large quantities of petroleum escape from the leaky tanks located on lighters. [And also to the practice of slushing out oil tank ships and running the filthy oily stuff washed from the vessel into the waters of the estuary.]

In closing the petition points out that unless instant action is taken the entire food supply of fish, crustaceans and shell fish of San Francisco bay and adjacent waters will be greatly diminished, if not absolutely destroyed. The petition bears the signatures of C. M. Bouton, president of the Pacific Striped Bass Club, W. H. Ashcroft, president of the San Francisco Striped Bass Club and O. W. Jackson.

While the initial action in this matter has been taken by sportsmen the importance of relief is one that should be seriously considered by the public at large, for, it is claimed, our fairly prolific food fish supply is in dangerous proximity to destruction.

We are pleased to note further, just before going to press, that the action above outlined has borne good results and that the California Fish Commissioners will take instant action to prevent the further dumping of refuse oil into the waters of San Francisco and San Pablo bays, and their attorney, Mr. Cook, is preparing a form of injunction to be used in an action that will be begun against the oil refineries by the Attorney General of the State and Mr. Cook.

This fact is set forth in a letter addressed to the Governor by Fish Commissioner W. E. Gerber, who further states that his deputies have secured sufficient

evidence against the refinery located at Oleum and operated by the Union Oil Company and against the refinery at Point Richmond.

The board will meet this week to decide on the final action to be taken. Mr. Gerber's letter is in answer to a communication received from the Governor requesting that instant action be taken by the board to protect the fishing interests in San Francisco waters.

### The Fish of British Columbia.

The work of a painstaking scientist and most congenial sportsman Mr. John P. Babcock, who for a number of years was the Chief Deputy of the State Board of Fish Commissioners, has born fruit since his engagement with the Province of British Columbia, in the shape of a comprehensive and interestingly valuable publication issued by the British Victoria officials. The report at large, of course, embraces the subject of fish, their protection and propagation, incidentally it is of much value to the sportsmen and will be of particular interest to the many local anglers and sportsmen of our State who know John P. Babcock only to regard him for his many gentlemanly attributes and appreciate him for the inestimably good work he has accomplished in his chosen profession. A notice of the report just issued appears in the *Victoria Colonist* and here follows:

The report of the Fisheries Commissioner of British Columbia, John Pease Babcock, has just been issued from the government presses. Aside from the mass of data of the most invaluable kind which is presented, the report is one of unusual interest and attractiveness because of the extraordinary excellence of the manner in which it is presented in pamphlet form. Samples of the photo-engraver's art are interspersed within the leaves of the little volume; and, by judges of such work, they are pronounced to be the most beautiful specimens ever placed on paper in a government publication. The frontispiece is a half-tone engraving, showing the "Fishing Fleet at the Mouth of the Fraser River." Printed on the best class of book paper, the cut shows up quite as clearly as a steel engraving—light and shade blending so harmoniously and true to Nature's plan as to at once arrest the eye and engender the conviction that one is beholding an example of the engraver's best effort in this day of excellence in all matters of pictorial illustration.

The Commissioner sets forth in the pleasing little volume the conditions affecting the salmon fisheries of the province as he viewed them in 1901 and 1902. He says that it was not clear how regulations that would equally protect the fish in both the British and American waters can be brought about, and continues: "There is certainly a great necessity for equalizing the regulations affecting the sockeye salmon. A weekly close season applicable to the American waters of the Sound is much to be desired. If a 36-hour weekly close season, beginning on Thursday at 6 P. M. and extending to Saturday, 6 P. M., were adopted on that side of the line, the fish that passed through their waters during that time would be protected in our waters by the present 36-hour weekly close season, which begins at 6 A. M. on Saturday and extends to 6 P. M. on Sunday, and would solve the question and insure an increase of fish on the spawning grounds. The benefit to be derived from such joint action are so great that the wisdom of their adoption should appeal to the great interests on both sides of the Sound. During the last four years there has been a general consolidation of the canning interests in both Washington and British Columbia. The American interests are now largely centred on two or three big companies, and there is considerable unity of action between the companies operating in British Columbia. These interests are controlled and managed by men of commercial prominence, to whom the wisdom of joint action to preserve this great fishery should strongly appeal. Is there not, then, a likelihood that if this matter were presented to them by the proper official authorities it would result in the American interests taking steps to have such enactments made by the Legislature of the State of Washington as above suggested. Surely the benefits to be derived from such action are so great, and the arguments in favor so strong, as to warrant a well directed effort for their accomplishment."

On the much discussed question of the desirability of using fish traps, he says in part: "I am not, however, at this time, prepared to advocate the use of traps in any of the waters of the province that are unaffected by the use of American traps. In our channels north of Discovery island, where the fish are moving towards the gulf and where they are not liable to encounter American traps, I do not believe the use of traps is advisable. In my judgment their use, for the present at any rate, should be confined to that part of the coast of Vancouver island which lies to the south and west of Discovery island. Many people desire to place traps on the east coast of Discovery island and on the islands facing the gulf. And while it is true that the Americans have traps on the west and north sides of San Juan island, and in the channel north of that island leading to the gulf, it appears also to be true that the greater portion of the sockeye that reaches the Fraser river passes through Haro strait and its northern channels. There is sufficient evidence to show that many of the salmon that pass north from Discovery island through the Straits of Haro travel in the open channels to the west of the American islands, and by avoiding the traps placed there, reach the gulf. I believe that the placing of traps on the shore of the provincial islands bordering upon the Strait of Haro would intercept the fish that now pass to the Fraser river through the gulf without being intercepted by American traps.

"If these deductions regarding the movements and capture of the sockeye salmon after they pass north of Discovery island be conceded, it certainly follows that at this time the government would not be

warranted in permitting the placing of traps north of Discovery island for the interception of those fish which are now but slightly endangered by American traps. Would it not be wise, considering the magnitude of the interests at stake to proceed slowly, and not effect the use of traps on Vancouver island upon the run in our own and American waters? By confining the use of traps and purse nets to the waters south of Discovery island I believe the business of our fishermen, who now use gill nets in the gulf and Fraser river, will not be materially effected.

"It will take some years to demonstrate the effect and value of the use of traps in Juan de Fuca strait. If it shall be shown that traps and purse nets can be successfully used in these waters, many changes in the present conditions will be effected. By moving deliberately in these matters the fishermen and the vested interests will be better protected. Those interested will be given time thereby to study and adapt the business to the changed conditions which will follow the use of traps."

### Trout Propagation in Oregon Streams.

The Oregon Fish and Game Association has been notified by the U. S. Government Fish Commission from Washington that on account of the recent disastrous floods in the East, Oregon will probably not receive the full promised allotment of 1,000,000 trout fry for the State, and the allotments for all the States have been cut down.

The Oregon association has undertaken to plant properly and without expense to the Government all the fish fry that the commission will allot to Oregon streams. This work was carried on successfully last year at the expense of the association, which is composed of the sportsmen of the State.

According to the present program of the Government commission the apportionment of fry will be made on April 15, but actual distribution will not be begun until May 1.

The varieties which Oregon will receive will consist of Loch Leven and brook trout and grayling. Oregon has a number of varieties of native trout species, consisting of the Dolly Varden, cutthroat, rainbow, mountain and salmon trout. It has been deemed unwise to introduce into Oregon streams voracious fishes, such as pike, pickerel and black bass, on account of the State efforts being made to propagate salmon, which is an important commercial production of Oregon. It is argued that these greedy fishes, whose chief diet is minnows, would destroy the salmon fry turned out by the hatcheries and render their work without effect. Despite this, small-mouthed bass were introduced surreptitiously a few years ago and have thriven wonderfully until at the proper season it is possible to catch within easy walking distance of Portland a basket of these gamey fish.

Catfish and German carp were introduced fifteen years ago and have multiplied until they are considered a nuisance. Millions of them are caught annually from the waters of Columbia slough, near Portland, and fed to hogs. The Chinese are the only purchasers in the market.

The fishing season in Oregon opened on the 1st inst., and it is now lawful to catch all species of trout except those planted by the Fish and Game Association under the auspices of the Government. For brook trout, which were planted four years ago, the season will open one month later, but this is immaterial to the greater number of sportsmen, and the association is not worried over the possibilities of any one catching brook trout, because they are too far up the streams to be in danger this early in the season. Anglers do not reach the head waters of these streams until late in the summer when the snows have disappeared.

Grayling cannot be caught at this time, and there is no use fishing for them. The grayling is a peculiar fish, and will not bite until matured. Those now in Oregon streams will require one year more to reach maturity, when they will be angled for persistently.

The entire State of Oregon abounds in trout streams, and many of them are within easy reach of the railroad, and even of Portland. A number of Portland sportsmen make a practice of leaving the city Saturday nights on wheels during the season, fishing all day Sunday and returning in the evening. Those who are familiar with the best places have no trouble in catching fine strings, and frequently the limit, which is 125 a day per man in Oregon, is reached.

It is lawful at all times to catch salmon trout in tide-water. The Columbia river abounds with these fish, and tide-water extends to Portland. Many fish are caught at all seasons at the mouth of the Willamette river where it enters the Columbia twelve miles below Portland. Salmon trout in Oregon waters, it is claimed, will not take the fly, and salmon eggs are used as bait. The fish bite freely at the roe and average from one to three pounds.

Benjamin Martella and Joseph Enos were each fined \$20 by Justice Pitcher at Halfmoon bay early in March for having caught steelhead trout in the closed season. Deputy Fish Commissioner L. N. Kercheval apprehended Martella while the latter was taking the forbidden fish from Johnson creek and Deputy M. L. Cross arrested Enos for the same offense at Leon creek, about the same time.

That New Umbrella Tent of Skinner's (801 Market St., S. F.) has the endorsement of every sportsman who has seen it. Can be put up in five minutes, weighs only 15 lbs., and has ample room to sleep two people.

Mountain Climbers and Lovers of Outdoor Sport appreciate right footwear. Skinner has the largest and best assortment in San Francisco, and can make you comfortable even if you have tender corns and bunions.

## THE FARM.

### STABLE DISINFECTION.

#### Methods of Performing a Semi-annual Act of Cleanliness.

The disinfection of stables after a period of constant use should be a part of routine practice. Dairy stables in particular should be disinfected twice a year and oftener if the conditions demand it, says Dr. A. W. Biting of Purdue experiment station at Lafayette, Ind. It is not possible to give many stables that thorough disinfection that is possible in houses, because their construction will not admit of it, but it is possible to do very much and at little expense.

The ideal method of disinfection is by means of a gas, as that would have the power to penetrate everywhere. The effectiveness of this method depends upon securing a large volume of gas and maintaining it for some time. Unless the stable can be made tight a gas will be of little use. For all practical purposes the gas produced by burning sulphur over a pot of coals is the best if used in connection with steam. The dry sulphur fumes have little germ killing power, but when combined with the steam in the air they form a compound that is deadly. The boiling of water and burning of sulphur should go together. Formaldehyde gas is not so efficient for stable disinfection as many would have us believe. A very practical means of disinfection that may be used under almost every stable condition is by whitewashing. This is not expensive for material and is very easily applied by means of an inexpensive fruit spray pump. The lime should be thoroughly slaked and strained through cloth and made just thin enough to work well through the nozzle. One man can apply two coats of whitewash with a pump and reach all parts of side and ceiling of a room in about one-fourth the time required with the brush. Whitewash will kill or hold the germs with which it comes in contact.

It has the effect, too, of making the barn lighter and cleaner. After the first spraying one application will usually be sufficient if given regularly. As the business of supplying milk to cities and creameries is of large proportions and depends upon cleanliness this precaution of disinfection should be regularly followed.

#### Hired Help on Dairy Farm.

No more vexing question confronts the dairyman. It bothers him when awake and haunts his sleep. He does not wish to do all the manual labor in connection with the dairy himself. If he is well to do, he is educating his sons and daughters and will not keep them from school to help. His wife has all she can do to manage the household. Cows must be watered, fed and milked every day in the week, every week in the year. If he is to carry on dairying on any considerable scale, he must have help, states W. D. in *Kimball's Dairy Farmer*.

But help is hard to get. Hired men have a decided dislike to dairying. In many cases this dislike is well founded. Some dairy farmer want their men to do a full day's work every day and do the milking as an extra—to be done before work commences in the morning and after the labor of the field is over at night. Such men do not deserve to have good help. There are other troubles which the hired man objects to, but which the employer cannot well remove. The cow must be milked every day. Holidays and Sundays exist not. Barns must be cleaned, and milking utensils, too. Men hardly ever do like to wash dishes, particularly if they must go out in the cold air after working in the hot water and steam. Milking is very fatiguing and somewhat monotonous;

the men employed must be absolutely trustworthy or they will soon cost more than their wages by neglecting to do thorough milking. Hence it is all important that the dairyman should have the best of help. He must have men who are steady and trustworthy, and who are rapid and thorough milkers. It appears to us that to secure such men it is necessary to have stables and milk rooms clean and convenient; to have comfortable rooms for the men themselves; to pay liberal wages and require only reasonable hours. Don't ask a man to do a day's work and then to do the milking. Above all, have regular hours for milking and allow nothing else to interfere with that time. Finally, employ your men early in the year, and hire them for six months or a year—make a definite contract to that effect. Hire enough help to do the milking; you can use your time to better advantage in supervising things and attending to the feeding.

#### Practical Poultry Topics.

Every poultry keeper should bear well in mind that a fowlhouse should not be a "foul" house. The most stringent efforts should always be made to keep it clean; fowls appreciate all that is done to keep them clean and comfortable.

When you clean out the fowlhouse do it thoroughly, for it is no use doing things by halves. Take out everything that is movable and give a thorough good scrubbing.

Fowls are good at eating up all the scraps from the house; nothing need be wasted. The pieces from the dinner plates are greatly relished by them, while they will readily devour all the vegetable parings if well boiled and mixed with meal.

A little salt added to the soft food is very beneficial. Salt is as necessary for the health of the fowls as it is for human beings.

A little Epsom salts mixed in the soft food once a fortnight does wonders to keep both chickens and stock birds in good health; only remember that a little is recommended—not a lot.

If the hens lay soft shelled eggs give them a large heap of rubbish or earth to scratch over; soft shells indicate that the hens are too fat. Exercise and occupation will soon put them right again.

It is a good plan when fowls are kept in small runs to place some straw or hay or even wood shavings in a heap and scatter some grain over it. The birds will soon be busy scratching the heap over for the corn, and by thus working for their dinner they are getting exercise.

Grit is one of the most important items in the fowl's daily bill of fare. The birds need it—nay, they must have it—as it helps digestion and consequently tends to good health and vigor.

Chopped onions are much relished by young turkeys, ducklings, goslings and chickens, and the adult birds will never be above taking their share.

The broods of young chicks should be closely scanned and all that are decidedly faulty should be put by themselves until big enough to kill. Both the good and the bad will thrive better if separated.

#### Feeding Twice a Day.

At a recent dairymen's meeting attended by the writer one of the speakers, a very practical and successful man, advised feeding cows only twice a day, since he had seen the plan employed with results just as good as when the cattle had three meals and with a considerable saving in labor. Yet the speaker confessed that he still fed his cows three times a day, merely because he feared that a change would cause temporary shrinkage in the milk yield. But there is no need to fear such effects, says *American Cultivator*.

The writer made the change from three to only two feedings without, so far as could be observed, losing a single quart of milk. It was done gradually in about four days, making the noon meal lighter

each day and increasing the other feeds until the change was made before the cows knew what was being done. A cow's stomach is very large as compared with that of a horse or of a human being, and she can easily hold enough to last twelve hours. Water should be given in the forenoon. The two feed plan is quite a labor saver.

Strike!—if they don't give you Jackson's Napa Soda.

The Strangles.

The new throat disease in calves all over the country, which many veterinarians have called it diphtheria is nothing more or less than the strangles. It is an acute, febrile disease characterized by swelling of the glands forming between the bones of the jaw and sometimes at other points. Languor, dullness, loss of appetite, staring at and general unthriftiness precedes attacks. The glands between the jaws are swollen and extremely sensitive to the touch. There is a rise of temperature, with increased pulse rate. Saliva is shown by food and water returning through the nose or dropping from the mouth. As the disease progresses abscesses in the glands point and break. The animals should be placed in clean, warm quarters where the temperature is fairly even and sufficient covering should be applied to keep them comfortable. If the temperature runs high and the pulse is strong, give five-

drop doses of aconite with half-dram doses of fluid extract of belladonna in an ounce of sweet spirits of nitre three or four times a day. If the throat is much irritated dram doses of chlorate of potash with two drams of powdered golden seal placed on the tongue three times a day after feeding gives good results. Tonics should not be neglected.

A sport is an animal which has developed some peculiarity not usually seen in its species and also differs from its parents. A pair of hornless heifer calves were born from a pure bred registered Shorthorn sire and dam. They were sports, as they differed markedly from their breed in the absence of horns. From these calves and one or two others of similar origin have been bred what are now known as double-standard Polled Durhams. They are eligible to registry in the Shorthorn herd book because they are pure bred Shorthorns and eligible to registry in the Polled Durham herd book because they are hornless Shorthorns.

Polled Durhams originating from the cross of Shorthorn bulls on native muley cows are not eligible to record in the Shorthorn herd book no matter how many crosses of pure bred bulls have been used. Knowing how the hornless head persists in appearing generation after generation, the men seeking a hornless Shorthorn endeavored, by the use of bulls of that breed on common muley cows, to eliminate the horns in the offspring and preserve otherwise the Shorthorn form and characteristics; and they have succeeded in large measure. Every cross tends toward a fixity of Shorthorn type and serves to eliminate further the alien muley blood, but cattle thus bred cannot be recorded in the Shorthorn herd book no matter how infinitesimal the drop of alien blood may be.

The boys at the Kansas station have been experimenting to determine whether there is any advantage in cutting alfalfa into inch lengths as against the whole hay when fed to steers. The hay was dry and

brittle and broke rather than cut but was in good condition for feeding. It cost thirty cents a ton for the labor of cutting and handling, besides the use of power and machinery. The result showed that the steers fed cut hay gained on an average seven pounds a head more than those fed whole hay and ate seventeen pounds less grain and thirty-nine pounds less hay for each 100 pounds of gain. This indicates that if the feeder has the machinery it will pay to cut the hay, but for a small lot of steers it will not pay to buy cutting machinery to be used for this purpose only.

Spraying and dipping for lice is highly recommended, as it is the only safe, rational thing to do if hogs are in any way infested. There is not a breeder of hogs who has not been troubled with this pest. The remedy is to dip and dip often. It aids the very best balanced ration that can be given to a hog by enabling it to thrive and assimilate the food administered. Breeders who have begun to dip hogs find it very economical and efficient. The coal tar preparations leave the skin soft and pliable.

# THE BUTTE JOCKEY CLUB

RACE MEETING JUNE 6th TO AUGUST 15, 1903.

ST. CARLO will make the Season of 1903 at the

**MENLO STOCK FARM, SAN MATEO COUNTY, CAL.**

TERMS FOR THE SEASON, - \$100

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

JAMES McDONNELL, Portola, San Mateo Co., Cal.

## THE STANDARD-BRED TROTTING STALLION

## BOODLE Jr.

By BOODLE 2:12 1/4, sire of Ethel Downs 2:10, Thompson 2:14 1/4, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30.  
Dam NINA B. by Electioneer, sire of Arion 2:07 1/4, Sunol 2:08 1/4, Palo 2:08 1/4, and 164 more in 2:30 list.

BOODLE Jr. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal, provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$2 per month, but no responsibility assumed for accidents. Season open now, and will close August first 1903.

BOODLE Jr. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1200 pounds, is of a rich mahogany bay.

Apply to

J. D. CARR, or JOHN GARSIDE, at Gabilan Ranch.

## Silver Bow Jr.

By SILVER BOW (sire of Arrow 2:14, Silver Ring 2:14 1/4 and 6 others in 2:30 list); dam MAGENTA by Tempest (sire of Tago 2:11, etc.); second dam by Commodore Belmont

SILVER BOW Jr. is 16-1 hands high, weighs 1200; bay, handsome, stylish, splendid action and has shown quarters in 30 1/2 seconds. Has nothing older than two-year-olds and they are all big, fine-looking and show speed.

Will Make the Season at MILPITAS.

Fee \$30 FOR THE SEASON. Good pasturage \$4. Excellent care taken of mares, but no responsibility for accidents or escapes.

Ship mares and apply to

I. MOREHOUSE, Milpitas, Cal.

## MONTESOL

Sire McKINNEY 2:11 1/4, Sire of 23 in 2:15 and 48 in the 2:30 list.  
Dam IGO (registered) by Antevolo 2:19; 2d dam Daisy May by Nutwood 600; 3d dam Ralston Mare by Alexander's Abdallah.

MONTESOL, 5 years, old, stands 15 1/2 hands, weighs about 1100 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Aloyone. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

## POLE STAR

3 years old, by McKINNEY, dam MOUNTAIN HARE by Young Venture, will be permitted to serve 5 approved mares at \$100 for the season.

The above Stallions will stand at the Race Track, Alameda.

P. FOLEY, Race Track, Alameda.

## STAM B. (Reg. No. 23444)

3-YEAR-OLD RECORD, 2:15 1-2  
(Timed in a race, 2:12 1/4)  
4-YEAR-OLD RECORD, 2:11 1-4  
(Timed in a race, 2:09 1/4, 2:09)

A TROTTER, AND NO MISLEADING.

The Gamest and Best Trotting-Bred Stallion by the Records and Blood Lines.  
More World's Records in His Veins than any other Stallion  
Now Doing Duty in the State.

Terms \$40 before mare is removed. I will try and take the best of care of mares, also foals, Best of pasturage. No barbed-wire fences.  
For further particulars address

S. B. GAMBLE, Box 76, Pleasanton, Cal.

SAN JOSE, CAL.

☎ Telephone No.: Red 1431.

## Limonero=3=2:15 3=4.

Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these young-tensures to be seen at the Los Angeles track.

LIMONERO 2:15 1/4 got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/4 will make the season of 1903 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

FARRISON G. ARMS.

J. H. WILLIAMS,

Owner.

## Grease Heel, Scratches,

MUD FEVER, HOOF ROT, SPEED CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering, Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs.—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin diseases. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

**ZEPHYR (4) 2:11**  
**ITALIA (3) 2:23 1/4**  
**LORD KITCHENER (4) 2:29 1/4**

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06 1/2 in a race, Julia M (5) 2:12, Italia (3) 2:15 1/2, Zombowette (3) 2:17, Suomi (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19 1/2, Tee Dee Gee (4) 2:21 1/2, Zeric (5) 2:25 1/2, Gold Coin (4) 2:26 1/2, Mabel W. (1) 2:28 1/2, Edmond S (5) 2:28 1/2, Gyr Falcon (5) 2:30, Zombro C. (5) 2:29. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

**ZOMBRO** will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Address  
Send for card containing pedigree and full information.

**GEO. T. BECKERS, University, Los Angeles Co., Cal.**

## SEYMOUR WILKES REG. No. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

**Lakeville, Sonoma Co., Cal.**

**SEYMOUR WILKES** earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

**SEYMOUR WILKES** is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to race via steamer Gold. Pasturage \$3 per month. For further particulars apply to **THOS. ROCHE, Lakeville, Sonoma Co.,** or **J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.**

Son of the Great Electioneer.

# GROVER CLAY 2:23 1/4

Sire of

CLAY S. 2:13 1/2  
IRA 2:16 1/4  
RICHARD S. (Trial) 2:09  
Pacing Filly 2:15

1st dam Maggie Norfolk 2:34 by Norfolk (dam of Grover Clay 2:23 1/4, her only foal)  
2d dam Tilda Quill by Billy Cheatham (thor)  
3d dam by Dorsey's Goldust (sire Lucille Goldust 2:16 1/4 and many others in list)  
4th dam s. t. b. by Abdallah 15

Season of 1903, March 1st to June 1st,

At **D. Gannon's Stables, Watts St., near Race Track, Emeryville, Alameda Co., Cal.**

Fee \$25, payable at time of service.

FOR SALE—Two fine Stallion Colts by **GROVER CLAY**; dam, a producing mare by Sidney.

For further particulars address

**DENNIS GANNON, Emeryville, Cal.**

## MONTEREY 2:09 1-4

Reg. No. 31706

Will Make the Season of 1903 at

**SAN LORENZO SATURDAYS, SUNDAYS, MILPITAS WEDNESDAYS, THURS- MONDAYS, TUESDAYS. DAYS AND FRIDAYS.**

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility for accidents or escapes. Send for card containing pedigree and full particulars. Address  
**P. J. WILLIAMS, San Lorenzo, Cal.**

BREED FOR SIZE, STYLE, SPEED, GAMENESS.

# HAMBLETONIAN WILKES 1679

The Only Son of the Great Geo. Wilkes in California, . . .

SIRE OF

Phoebe Wilkes 2:08 1/4 Tommy Mac. 2:11 1/4 New Era 2:13 Saville 2:17 1/4  
Robert I 2:10 Vic Schiller 2:11 1/4 Aeroplane 2:16 1/4 Grand George 2:18 1/4  
Phoebe W. 2:10 1/4 Arlene Wilkes 2:11 1/4 Sybil S. 2:16 1/4 J. F. Hanson 2:19 1/4  
Rockner 2:11 Sunbeam 2:12 1/4 and 12 more in 2:30

Will Make the Season of 1903 at

**GREEN MEADOW FARM**

Brokaw Road, 1-4 mile from Santa Clara.

Terms for the Season, \$40.

Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences. Address

**R. I. MOORHEAD, SANTA CLARA, CAL.**

TELEPHONE: Suburban 15.

# BAYSWATER WILKES 2:25 1/4

Son of Sable Wilkes 2:18 and Fanny Bayswater

Sire of **KELLY BRIGGS 2:10 1/4**

WILL MAKE THE SEASON OF 1903 AT

**WINTERS, YOLO CO., CAL. FEE \$40.**

**BAYSWATER WILKES** is a sire of speed, size, good looks soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nubuck, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.  
Breed to **BAYSWATER WILKES** and you will get colts that will sell at good prices.  
Excellent pasturage for mares \$3.50 per month.  
For cards containing full Pedigree and all particulars address

**S. H. HOY, Winters, Cal.**

## THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL.  
(Property of JOHN PARROTT, ESQ.)

### Imp. Hackney Stallion GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1903

**FEE - - - \$75**

Reductions made for two or more mares.

Manager, WALTER SEALY.

**Breed to Extreme Speed.**

### CHAS. DERBY 4907, rec. 2:20 \$50 the Season

SIRE OF MUCH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09¼, OWYHEE 2:11, LITTLE BETTER 2:11½, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at reasonable prices. Address

### OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

ELECTIONEER

NUTWOOD

### NEERNUT Record 2:12 1-4 Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W. 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

**SANTA ANA, CAL.**

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two-year-old Aristo. He stands 15½ hands, weighs 1100 lbs.; blood bay with black points; trots without boots. He is a great race horse and his record (2:12¼) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

GEO. W. FORD, Santa Ana, Cal.

### SIR GIBBIE 2D, No. 370 American Hackney Stud Book

#### Hackney Pony Stallion 13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

**MENLO STOCK FARM**

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

JAMES McDONNELL,  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SEARCHLIGHT 2:03 1-4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03¼).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinley, a son of Alcione, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

### LECCO 2:09 3-4 The Blood that produced Dan Patch 1:59 1-2

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01¼, that in turn is the sire of the unbeaten Dan Patch 1:59¼. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigree address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15¼, Sable Dale (at 2 years) 2:18¼, Buffington (at 2 years) 2:20¼ and 36 others in 2:30 list. Dam, Fidella (trial 2:36 at 2 years), dam of Fidette 2:38½, dam of Mary Celeste (at 2 years) 2:17¼ by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:04¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12¼, etc. Third dam by Lancel, son of McCracken's Blackhawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross, as it has produced John A. McKerron 2:05¼, Nathan Straus 2:05¼, Ozanam 2:08, Dollade Wilkes 2:10¼, Oro Wilkes 2:11, Evangeline 2:11¼, Mary Celeste (at 2 years) 2:17¼, etc. Fidella, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12¼, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17¼, Majella B. (2) 2:29 (trial at 4 years 2:13¼), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20¼ with three and one-half months' work; blk g, 3 years old in 1902, with three months' handling showed mile in 2:35¼, last quarter in 35¼ seconds. His son Aristo (at 3 years) 2:17¼ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17¼ was equal to 2:13¼ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.**

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morson's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER  
SORES and SADDLE GALLS there is none  
superior.  
The horse CAN BE WORKED AS USUAL  
For BARBED WIRE CUTS, CALKS, SCRATCHES,  
BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.  
It is very adhesive and easily applied to a watery  
as well as a dry sore.

Its use will absolutely prevent BLOOD POISON-  
ING. In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1900 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
it IS THE GALL CURE OF THE 20TH CENTURY.  
It is a quick and sure cure for those troublesome  
skin cracks under the feet which injure and often  
lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

## QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Bo. Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

MUCH TIME IS WASTED by the owners of horses not eligible to registration in writing to the Registrar and the turf journals asking if some plan cannot be devised by which their horses may be recorded upon the books of the A. T. R. A. as standard. The rules are plain and must be followed, but hundreds of people make an effort every year to have them set aside or temporarily suspended for their benefit. A case in point occurred this week. A very estimable and worthy gentleman wrote to the BREEDER AND SPORTSMAN that he owns a very handsome colt sired by an unregistered horse that was eligible in 1894, before the last change in registration rules were made. He is very desirous of registering his colt, but cannot do so, of course, as the sire is not registered. He suggests that inasmuch as it was an oversight on the part of his owner that the stallion was not registered, then, it seems to him that "by a vote of the Directors of the Register Association it could be done now." Of course, the Register Association could again revise its rules and make them the same as they were in 1894, but it is not likely to do so. Due warning in the way of advertising in the papers was given of the proposed change and those who did not heed this warning must suffer the consequences. When the time comes for closing registration of voters for an election in this State, registration ceases and no person can get his name on the list thereafter in time to vote just because he overlooked the date of closing and failed to have his name recorded. He had his day according to law and failed to take advantage of it and therefore has no just complaint to make. If one person can have the rules set aside because he neglected to get his horse registered in time, why should not every other person that suffered the same lapse of memory be permitted to do the same thing? Laws and rules are supposed to be made to be obeyed. It may prove a hardship on some and often does, but that is not sufficient reason for abrogating or changing them. We advise everyone who owns an animal that is not eligible to let it go at that, unless a record or produce will make it so. If these conditions can be complied with, well and good, but it is utterly useless to try to have rules changed to accommodate any particular case. It is time wasted.

THE FIRST MEETING on the Grand Circuit will be at Detroit as usual this year and there is every reason to believe that it will be one of the best ever given by the Detroit Driving Club, of which that energetic horseman and newspaper publisher, Mr. D. J. Campau, is president. The Merchants and Manufacturers Stake of \$10,000 for 2:24 class trotters, better known as the M. & M., received fifteen entries. East View Stock Farm has named the Seymour Wilkes gelding Monroe, that is in the Salisbury string, Santa Rosa Stock Farm has named Lou Dillon and Mrs. E. I. Howard, of Los Angeles, has named the bay stallion Bonnie Russell by Conifer. The other entries are Woodtella by Axtella, Allie Jay by Jay Hawker, Princess Derby by Chas. Derby, Tregantle by Simmons, Henry G. by Henry T., Shady Beattie by Shade On, Cole Direct by Direct, Miss Jeanette by Acolyte, Johnny by Geneva, Mat M. by Americus, King Simmons by Simmons and Jay McGregor by Jay Hawker. In that field the California horses should get the largest portion of the money. The Chamber of Commerce \$5000 pacing stake for horses of the 2:24 class has the same number of entries. There is but one California horse named in this event, Mr. Salisbury's noted "Mush," but he looks like the favorite already. There are twenty entries in the 2:12 trot and no California stable is represented. The California bred mare Katrinka G., own sister to Klatawah, Chas. Derby, etc., is named in this race by her present owners, Idle Hour Stock Farm, of Macon, Georgia, and if she is as fast as reports, should be able to uphold the State's reputation. The 2:09 pace has fifteen entries and the 2:17 pace twenty-seven. In the former, Californians have not made an entry, but in the latter the Pleasanton pacer Mush is named. If he reaches Detroit in good shape, he will be pretty well tested, as he will have to meet such highly touted pacers as Dr. Madara, High Pointer, Elastic Pointer, King Direct and others that were reported to have done easy miles below 2:10 last year in their work.

TANFORAN TRACK has been leased from the California Jockey Club by Mr. A. B. Spreckels of this city. Ever since the consolidation of the three running tracks at Emeryville, Ingleside and Tanforan under one management, the last named has been of little use to the Jockey Club, and when Mr. Spreckels offered to lease it for the training and racing of harness horses, the offer was gladly accepted. There has been a movement on foot for some time, as has been heretofore stated in these columns, to organize in San Francisco a driving club on the lines of the successful clubs at Cleveland, New York and other Eastern points and Tanforan will be used by the members of the proposed club for training and matinee racing if its organization is consummated, which now seems very probable. The Golden Gate Park Driving Association will also use Tanforan for its race meetings and matinees under an agreement with Mr. Spreckels. The soil of the Tanforan track is ideal for trotting and racing harness horses over, and while it will hardly be a rival of Pleasanton as a winter track, its proximity to this city will make it very popular with city owners later in the season. The steam and electric car lines running from this city to San Mateo both have stations at the track, which is but twelve miles distant and about three-quarters of an hour's ride by either line. The roads between this city and Tanforan are very fair for driving, and at a small expense could be made most excellent. All lovers of the harness horse will hail with delight the opening of Tanforan track to the harness horses and there is every prospect of some very successful meetings as well as many popular matinees being held over it this year.

FEW ARTISTS can picture a horse as he is. The majority of them have an ideal that they draw or paint to and it looks like anything but the horse it is intended to represent. The *Western Horseman* hits the nail on the head as follows: "We often wonder if stallion owners really think that the 'water color sketches from which they sometimes have half-tones made, showing the stallion with pipe-stem limbs, black snake head and neck and flying squirrel ears, are ever accepted as true representations of the real thing.' A half-tone from a 'bum' photograph from life is far more creditable than one of these 'snaky' sketches. Only real horse artists can draw a sketch of a horse that looks like a horse, let alone a particular horse. A photographic reproduction may not always be entirely satisfactory, but it is seldom that it presents an anatomical impossibility, or a ridiculous farce on equine nature. A horse properly posed before a photographer who is a horseman and understands his camera will be more perfectly represented on the negative than he can be by any artist who ever handled a pencil brush. The improvement in equine portraiture which has followed the first use of the camera in this field has been so great that it is to be wondered why any other method should be used."

THE SALE OF GEO. H. FOX'S HORSES from the Mokelumne Stock Farm is a dispersal sale. Mr. Fox will sell every horse he has but his stallions, one mare and four Silver Bow fillies. There are about thirty head to be sold, and no better bred lot has been offered in this State. The sale will take place at Fred H. Chase & Co.'s salesyard, 1732 Market street, in this city, on Tuesday evening, May 5th, by electric light. The five-year-old stallion by Silver Bow out of the great brood mare, Grace by Buccaneer, will be in the sale. This is the best prospect in California to-day for a race horse and a stock horse. He has no record and is as sound as the day he was foaled. He beat 2:20 last year in his work and was considered too valuable a horse to race in small purses, as he had no engagements in the large ones, so he was not started. Beyond question he is one of the finest individuals in California. Ed Lafferty, who trained him, says he is a 2:10 horse sure. His dam, Grace, dam of three below 2:20, is to be sold also. She is now in foal to Mokelumne 37558, one of the best bred stallions in America. There are a number of highly bred mares, colts, fillies and geldings to be sold. The catalogue will be out next week and we will review it at greater length. Send to Fred H. Chase & Co., 1732 Market street, for one.

IT IS SAID that the Western Pacific Railway, a corporation that is to build a new overland line to this State by way of Beckwith Pass, wants the State Fair Grounds at Sacramento, and is willing to pay a good price for them—enough to get the association out of debt and leave a surplus. It is also said that the Sacramento people would be willing to trade the State Fair for another big railroad shop that would give employment to one or two thousand people the year round. There are many difficulties in the way of transferring title to the property as it was deeded to the Agricultural Society for fair purposes and may revert to the original owners or their heirs if used for anything else.

## More Fine Mares Bred to Searchlight.

In addition to the list of mares bred to Searchlight 2:03½, which was published in these columns two weeks ago, Mr. Mills writes us that the following have been received to be mated with his great horse: Amazon by Chas. Derby 2:20, dam Ramona (dam of W. Wood 2:07) by Anteeo.  
Toney B. by Hambletonian 725, dam by John Nelson.  
Spry Ruth by Boodle 2:12½, dam Nina B. by Electioneer.  
Lady Woodbine by Redwood 2:28, son of Nutwood 2:18½, dam by Haggard's Mistake, thoroughbred.  
Proserpina by Diabolo 2:09¼, dam Algerdetta by Allendorf 2:19½.  
Bessie B. by Milton Medium, dam a thoroughbred mare by Red Bill.  
Coretta by Eyraud, son of Eros 2:29, dam Cora C. 2:22½ by Whippleton.  
Nettie D. 2:22½ by Nephew.  
Chonita by Secretary, dam by Hubbard, thoroughbred.  
Rosada by McKinney, dam Chonita by Secretary.  
Little Miss 2:17½ by Sidmore 2:17.  
Rubato by Steinway 2:25¾, dam Tone, dam of Agitato 2:09, by Ferguson 8015.

## A Strong Denial.

PLEASANTON, CAL., April 8, 1903.

EDITOR BREEDER AND SPORTSMAN:—I wish to make a statement to the public through the columns of your paper in contradiction of some erroneous reports that have been circulated about my great horse Searchlight. It has been widely reported that he is a horse of vicious temper and a dangerous horse to handle in the stall and out of it; that no one but his groom can with safety approach him or do anything with him. This I absolutely deny, and state that he is of good disposition and that it is perfectly safe for anyone to enter his stall; that ten gentlemen were in his stall this morning with him, loose, at one time, all visitors and strangers; that he was led out for inspection 31 times last Saturday and that no one saw any signs of ill-temper or bad manners; that no one of the hundreds who have visited him since I brought him to Pleasanton can or will say that they ever saw anything about him that would indicate a bad disposition. It has also been reported that he is unsound. In regard to that I will say, that I will submit him to a veterinary examination and forfeit \$500 if he is not pronounced perfectly sound. I am not making this statement to obtain mares for him as he is getting all I want him to have. The breeders of California are patronizing him in excess of my expectations, but I don't want anyone to believe the stories that have been circulated about him.  
ED. MILLS.

JOTTINGS.

**O**AKWOOD PARK near the Park entrance, Colocello has established a training stable that is one of the best appointed in the city. It has fourteen roomy box stalls sheltered from wind and sun, the majority of them the sun shines all the afternoon when the doors are opened, which is a great desideratum in this climate. It is easily reached by three or four car lines and being so close to the park road and speedway is almost an ideal place for training horses on the road or track. The star of his stable in the way of speed at the present time is a gelding by Seymour Wilkes 2:08 1/2 that is probably as fast as any green pacer in California to-day, not even excepting Monroe Salisbury's now famous "Mush." That this pacer has his share of good looks is evident from the photo engraving on the front page of this issue. Mr. Colocello intends taking him to Pleasanton this month for a tryout and if he lands all right he will show the boys there that all the fast green ones have not been trained at Pleasanton this winter. This son of Seymour Wilkes belongs to Mr. Allen of this city.

Another very highly thought of member of the string is the very handsome two year old colt Cassian, that Mr. Jas. Coffin of this city purchased at the Palo Alto sale in January. He is by Mendocino (3) 2:19 1/2, dam Cressida (3) 2:15 1/2 by Palo Alto 2:08 1/2, second dam Clarabel, dam of three in the list by Abdallah Star, third dam Fairy by Hambletonian 10, fourth dam Emma Mills by American Star 14. This colt is a high class fellow in looks and in action and as he is engaged in about \$60,000 worth of stakes to be trotted next year he is pretty highly thought of.

At the Oakwood Park sale last month Mr. Coffin purchased a three year old filly by McKinney 2:11 1/2, dam Electway an own sister to Klatawah 2:05 1/2, second dam the famous Kitty G. (dam of Chas. Derby 2:20, etc.) by Electioneer. Last Sunday the colt Cassian was mated with this filly. I don't know where a better bred one than the prospective foal will be found next year, and those breeders who have been claiming to have the best bred one in America should tabulate the pedigree of this one out to the fifth crosses. There are three crosses of Electioneer within four generations, mixed up with Geo. Wilkes through McKinney and Alcyone, Strathmore through Steinway, and backed by as choice thoroughbred blood as there is to be found in the books. It is a wonderful pedigree and as "blood will tell" there will surely be a good story to relate of the prospective foal when it is of age.

Entries of foals for the Stallion Stake, inaugurated last year by the California State Agricultural Society, will close June 1st this year. This stake is for the get of trotting bred stallions that were nominated on May 1st last year. Thirty-eight stallions were nominated in all, the total amount paid in being \$1140. The stallions nominated were Sidney Arnett, Nushagak, Meridian, Zombro, Nearest, Quiboul, Kinney Lou, Exioneer, Mendocino, Monbells, Nazote, McKinney, Strathway, Zolock, Costello, Escort, Neernut, Bonnie Direct, Welcome, William Harold, Dictatus Medium, Charles Marvin, Demonio, Baywater Wilkes, Diablo, Washington McKinney, Joe Nolan, Dexter Prince, Cupid, Sidney Dillon, L. W. Russell, On Stanley, Azmoor, Stam B., Iran Alto, Erect, Mountain Direct and Monterey. The stake is to be trotted in 1905, when foals are three years old, and is, therefore, for foals of 1902. Any foal of that age, sired by any of the stallions entered, can be named in the stake, June 1st, on payment of \$5. As the State Agricultural Society is to add \$1000 to the stake, it may be said to already have a value of \$2140.

In the Breeders Futurity No. 1, for foals of mares bred in 1900, 122 colts and 1 fillies are paid upon and are eligible to start in the two year old division this year, for which \$1250 is set aside for trotters and \$750 for pacers. There has been no two year old racing in California for some time, but this stake will cause quite a proportion of the 122 eligibles to be trained, and the racing will be most interesting. In addition to the money awarded the colts for winning, the persons that originally nominated the dams of the winners of these two year old divisions will be awarded \$200 each. Consequently if the owner of the winner of the two year old trot was the original nominator of the dam, he will be paid \$275 as his share of the stake, quite a neat sum to earn with a two year old in one race. The same condition attaches to the nomination of dam of the two year old pace winner. First prize in this race is \$375 and with the \$200 added

makes \$575 for the winner of the pacing division this year.

It begins to look as if the Breeders meeting will be a great success this year, and the track that gets it will see some great trotting and pacing. All the trainers are talking of the \$2000 trot and the \$1500 pace and the list of entries in these two slow class events promises to be large. With the Futurity races and the others that will be given there will be somewhere in the neighborhood of \$12,000 at least distributed among the horsemen at this meeting.

PACIFIC BREEDERS FUTURITY NO. 3.

Second Payments are Made on 239 of the 331 Original Entries.

Second payment of \$5 each on foals of mares bred in 1902 was made on April 1st by those who made nominations in the Pacific Breeders Futurity Stake No. 3, which has a guaranteed value of \$6000. There is already \$2187 to the credit of this stake and a large proportion of the mares paid up on have not foaled yet. This is evidence of the popularity of the stake. Those on which second payment has been made are as follows:

"Any good horse has a good color." The highest priced horse of the Tranter-Kenney sale at Lexington last month was the gray stallion Re-Elected 2:11 1/2. He brought \$7000. Re-Elected was got by Re-Election 2:27 1/2, and he by Electioneer, out of Lady Russell, a full sister of the renowned Maud S. 2:08 1/2. The dam of Re-Elected was Sister, and she was by that popular and successful sire Strathmore, by Rysdyk's Hambletonian. Daughters of Strathmore have already produced ninety-four trotters and forty-five pacers that have made records in standard time. His second dam, Free Love, was by Strader's Cassius M. Clay Jr., and his third dam, First Love, was also by Strader's Cassius M. Clay Jr., giving him three crosses of old Henry Clay. It is reasonable to expect that a stallion with so rich an inheritance of speed should prove a very successful sire of race winners.

"It Has No Equal."

Mr. E. T. Baker of Eddyville, Neb., writes: "Enclosed find one dollar, for which send one bottle of Quinn's Ointment. I have removed two bog sprains with this ointment and I also find it no equal for removing corns and cuts. Please send at once as I need it badly." This is the general verdict of leading horsemen everywhere. For curbs, splints, sprains, windpuffs and all blemishes use Quinn's Ointment. Price, one dollar per bottle delivered. Satisfaction guaranteed or money refunded. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

Jackson's Napa Soda is made in every city, town and hamlet in the State.

## Early Day Drivers and Their Horses.

Among the road drivers of early days in California, those who were beating one another down the roads in the early 50's, about the youngest is Mr. Geo. Bement of Melrose, Alameda county, who still handles the ribbons nearly every day behind a good trotter and is not averse to a brush at any time. Mr. Bement owned Gen. Taylor and that famous old thirty mile champion died his property. He now drives a granddaughter of the old gray hero, and she has yet to find a road too long for her. Mr. Bement put on his thinking cap for a few minutes the other day and gave the writer the following list of names of old time San Francisco road drivers and their horses. Mr. Bement says there are probably many of those with whom he was best acquainted whose names he could not recall at the time, but the list is evidence of a remarkable memory as it is, as few men can sit down and call off such a list of old acquaintances at random. The list is as follows:

Tom Battelle, New York.  
Vi Turner, Crispin.  
Dr. Pardee, Guinea Hen.  
Charley Shear, Paddy McGee.  
Jack Harold, Fly-by-Night.  
Charley Lux, Dominick Birtrict.  
Charley Bonney, Emperor.  
Jim Blake, Neversweat.  
Geo. Bement, Ralph Dorr.  
Orrick Johnson, Reuben.  
John Lent, Little Pet.  
Sam Palmer, Jersey Maid.  
Pony Eaton, Highland Chief.  
Benj. Fish, Comet.  
Billy Shear, Lady Suffolk and Lady Shear.  
E. H. Parker, Honest Ace and Gen. Taylor.  
Andy McCreary, Lady Mack and Prairie Bird.  
Asa Nudd, Humboldt and Gen. Banks.  
Steve Whipple, Shot and Rainbow.  
Swain Brown, Kemble Jackson.  
Roe Allen, Punch and Kitty Clyde.  
Gil Fancher, Camilla and Julia Aldrich.  
W. L. Chrysler, Honest John and Flying Dutchman.  
Dr. Young, Ned McGowan.  
Abner Barker, Gopher.  
Wash Dore, Baltimore Girl.  
Eph Leonard, Henry Clay.  
Harry Talmadge, Post Boy.  
Capt. Card, Tradewind.  
Jake Wray, Ellen White.  
Yank Sessions, Stevedore.  
Jim Clark, Buck of the Mountain.  
W. M. Bent, Yellow Jack.  
W. M. Lent, Fanny Lent.  
Alex Gamble, Jennie Noyes.  
Cornelius Stagg, Hiram Woodruff.  
Bob Beatty, Bull Pup.  
Eugene Casserly, Jack Waters.  
E. W. Teackle, Fred Johnson.  
Warren Loud, Flora.  
Emery Pease, Glencoe Chief.  
Billy Chapman, Jim Burton.  
Jack McKinty, Rattler.  
Henry White, Onward.  
Major Meeker, Frank.  
Horace Webster, Columbus mare.  
Tom McGuire, Lady Utley and Abbie Woods.  
C. B. Polhemus, Dolly and Chief.  
Charley Morgan, Ice Pony and Peggy McGee.  
Michael Reese, Big Boy and Maj. Beck.  
Capt. Weeks, Pacific and Buster.  
Billy Ware, Spot and Baldy.  
Bethuel Phelps, Sorrel Ned.  
Ned Fulton, Lady Vernon.  
Geo. W. Green, D. C. Broderick.  
Wad Potter, Mat Pardue.  
Joe Leavitt, Lady Rotan.  
Bill Woodward, Eugene Casserly.  
Sam Dewey, Lady Wallace.  
I. C. Wood, Flying Dick and Cock Robin.  
J. C. Flood, Oakland Maid and Queen.  
C. W. Main, Copper and Steel.  
Cal. Kellogg, Mountain Boy.  
E. H. Winchester, Boston Boy and mate.  
Erwin Davis, May Queen.  
Billy White, Bell Ringer.  
Harry Webster, Tom and Jerry.  
C. S. Crittenden, Erwin Davis.  
Alf Ellis, Daniel Webster.  
I. N. Killip, Lou Whipple.  
Jack Gamble, Price McGraw.  
Dick Gough, Tom McGuire.  
Dr. B. Smith, Naubuc.  
Capt. Mayhew, Dick Gough.  
M. Baker, Dan Lisle.  
Geo. Congdon, Odd Fellow.  
Jake Dorr, Emigrant.  
J. J. LeCount, Kit Carson.  
Chet Lusk, Sorrel Charley.  
Capt. Van Pelt, Black Modesty.  
Charley Ellis, Rhode Island.  
Sam Bowley, Hero.  
Ad. Cannon, Whalebone.  
Dick Ogden, Black New York.  
Ned Baron, Redwood.  
Mike O'Brien, Cottontail.  
W. T. Grissam, Lady Lancaster.  
J. H. White, The Maid.  
Billy Lyle, ———.  
Wm. Hendrickson, Geo. W. Patchen.  
Jim Eoff, Longfellow.  
Capt. B. E. Harris, Regulator.  
M. J. Burke, Rose and Lilly.  
Payne Shafter, Rustic.  
Alonzo Hayward, Grandee.  
Lou Mills, Lady Livingston.  
James Van Tyne, Porksides.  
Jesse Potter, Bloomfield Maid.  
P. A. Finnegan, Santa Claus.

Jim McCue, Copperbottom.  
Dick Carrol, Marin.  
Frank Malone, Lady Hamilton.  
Sam Gamble, Graves.

And many more including C. M. Chase, Harrison Covey, Col. Dickey, Pat Farrell and others, the names of whose horses Mr. Bement could not recall.

## Breeding Carriage Horses.

The farmer who essays to breed carriage horses should make up his mind that he must look on his mares as the mothers of carriage horses from the time they are mated and on the foals as carriage horses from the time they are born until they leave his stable for that of the dealer or user. It is impossible to breed for carriage horses, raise and break the foals like common slaves and then, after a few years, suddenly turn around and sell the maturing animals for carriage horses. If that could be done the horse breeding game would be so easy that no one would care to play it. To begin with it, it is far better to rear a pair of carriage horses than one. If two suitable mares are not at hand breed the one and when she has her foal, match it by purchase as closely as may be from among the other foals got by its sire. Rear the two together day in and day out. Break them together as two year olds or preferably in the fall after they are yearlings. The lessons are easily learned then and once learned are never forgotten. The colts must have the best care; attention must be paid to them at all times. They must be well fed and kept fat from birth to sale. If the farmer is not going to have time to "bother with all this" he would far better mate his mares with drafters or something else, for he cannot get value for carriage colts in any other way.

After the colts are two years and six months old there is no reason why they should not regularly do some of the light driving. That may sound rather early, but it is not. They should not be asked to do much, but at that they will prove equal to doing quite a good deal and if they are not allowed to become fatigued, they will enjoy every moment of their work. When they are three year olds they will do to drive every day, but they should never be thoroughly tired. High action and tired legs go not together. Heavy labor they must not be asked to do, nor yet such aggravating labor as hauling hay or the like. That simply maddens the young, high spirited horse. "Get up." "Whoa." "Another step." "Back." "Get up," and so on till the young, finely organized horse does not know what to expect next and acts accordingly like a fend incarnate, when in reality he is not to blame. He is confused by the multiplicity of orders to which he is not accustomed and he does not know what to make of it all. Finally he compromises by running away and then he is a worthless brute despised of all, yet a monument to the crass idiocy of a master who set a good horse at a bad job.

The action of the feet and legs must at all times be paid strict attention to in order that faults may not be acquired. The more nearly the pair may be presented to the dealer or user in city-broken condition the better will be the offer of money forthcoming. Therefore accustom the youngsters to all the city sights and sounds possible—the steam locomotives and cars, the electric lines, the threshing machines and as many other terrorizing objects as may be met with in rural precincts. Seek out a bridge which carries the railway over the road. That is a very good imitation of the overhead structured in the city and must be well understood before urban use can be considered. Let the pair see the train go across the bridge; then let them hear it pass over their heads. A little patience will soon overcome their fears. Bridges leading the highway over streams and rail or wagon roads may likewise be utilized to the very best advantage. Finally when the buyer does come, hook the pair together with a neat harness fitting perfectly all over, invite the buyer to a seat in the rig, drive off to show how well broken the horses really are and keep them right up to their business from start to finish. The proper breaking, manning and conditioning of carriage horses must be done before they can be sold for city use and the dealer would always rather pay the breeder for having done this work than get the horses so much cheaper to start on and then pay for it later. In the one case he knows that the manners and condition, the fearless nature and good disposition have grown up with and are actually parts of the animals themselves, while in the other he knows they are in comparison merely a finishing veneer. The additional sum of money that will be so freely offered will handsomely reward the breeder for the extra time and care he has bestowed on the horses. It costs less to raise them right than wrong. A little common sense, in this case, like the old Tennesseean's steel-trap, catches them a-coming and catches them a-going. —Breeder's Gazette.

Sober up on Jackson's Napa Soda.

## Great Broodmares.

Judging the great broodmares by the same standard as the stallions, viz., their ability to produce speed and perpetuate it through their sons and daughters, Alma Mater stands at the head of the list. She was foaled in 1872. Her sire was Herr's Mambrino Patchen, and her dam, Estella, was a thoroughbred daughter of imported Australian. Alma Mater is the dam of eight trotters with records of 2:30 or better. Seven of her sons have sired 199 trotters and 64 pacers that have made standard records, and her daughters have produced two pacers with standard records, making the total number produced by herself, sired by her sons and produced by her daughters 273.

The mare that is next in rank to Alma Mater is Miss Russell, foaled in 1865. Her sire was Pilot Jr. and her dam was Sally Russell, a thoroughbred daughter of the successful race horse Boston. Among those produced by Miss Russell were the renowned world's champion trotter Maud S. 2:08½ and the wonderfully successful sire Nutwood 2:18½. Miss Russell is the dam of five trotters and two pacers that have made standard records. Six of her sons have sired 182 trotters and 51 pacers that have taken records in standard time, and her daughters have produced 11 in the standard list, making a total of 251.

The third in rank of great broodmares is Dolly. She was foaled in 1861. Her sire was Mambrino Chief 11th. Her dam, Fanny, was by Ben Franklin, a son of Hazrack, by Golden Farmer. Her second dam was Nance, by Saxe Weimer, a thoroughbred son of Sir Archy. Dolly is the dam of four trotters in the list. Four of her sons have sired 182 trotters and 57 pacers that have taken standard records, and her daughters have produced two trotters that were standard performers, a total of 243.

Next after old Dolly comes the famous Green Mountain Maid that was foaled in 1862. Her sire was Sayre's Harry Clay 2:29, he by Neave's Cassius M. Clay Jr. and out of Fan, a daughter of imp. Bell-founder. The dam of Green Mountain Maid was Shanghai Mary. There is no direct positive evidence to prove the breeding of Shanghai Mary. There is strong circumstantial evidence, however, which tends to show that she was got by Iron's Cadmus, a son of thoroughbred Cadmus, by American Eclipse, and that her dam was runningbred. Green Mountain Maid produced nine trotters with records of 2:30 or better. Four of her sons have sired 192 trotters and eight pacers that have made records in standard time, and her daughters have produced ten standard performers, a total of 219. She is really entitled to seven more than the Year Book gives her, making in all 226.

The fifth in rank is the renowned Beautiful Bells 2:27½, foaled in 1872. Her sire was The Moor, and he was by Clay Pilot out of Belle of Wabash 2:40, a registered thoroughbred, whose sire was Young Bassinger. Her dam was the great broodmare Minnehaha by Stevens' Bald Chief, and her second dam, Nettie Clay by Strader's Cassius M. Clay Jr. 22. Beautiful Bells is the dam of ten trotters with records of 2:30 or better. Eight of her sons have sired 148 trotters and 49 pacers that have made standard records, and her daughters have produced five that have taken records in standard time, four of them trotters. This makes a total of 212 for Beautiful Bells.—American Horse Breeder.

## A Fable.

A draft horse that weighed 1800 and a trotter that only weighed 1000 pounds, but which could trot a mile in 2:05, were kept in a stable together. The draft horse was kept in a common stall and given a lick and promise when it came to the currying in the morning. The trotter was kept in a padded box stall. It was carefully blanketed and rubbed down by a first-class groom. This made the draft horse sore and it complained, saying: "Now, I am called on to pull all the heavy loads, while you rest. All you ever do is to get out once in a while and trot a mile. All you are good for is to be looked at, and yet you are treated like a prince. I have heard the man who owns us say that you would sell for \$50,000, while he offered to sell me for \$150. I am of more use in a day than you are in all your life, and yet they count you worth 333 times as much as I am." "What you say is correct," said the trotter, "but among two million horses there are only three that can get over the ground as fast as your humble servant, while there are a million or more that can pull loads as well as you. If there were only three horses that could pull loads like you and a million trotters as fast as I—then you would be worth \$100,000 and trotters would sell for \$10 a head." Moral: A good thing is never appreciated if it is too common.

That popular turf writer, Will Logan, Jr. will sever his connection with the Chicago Horse Review on May 1st, and assume the business management of the New York journal, the Trotter and Pacer in which he has purchased an interest.

## Ill Luck of the Palo Alto Family.

"Volunteer" writes as follows in the *Horse Review* of last week:

I have more than once remarked on the ill-luck that seems to follow the family of Palo Alto with such remarkable persistency. The latest instance of this is the death, a week or two ago, of the young mare Carrie Caswell by Altivo 2:18½, the prematurely dead brother of Palo Alto. In the spring of 1899 Superintendent Covey, of Palo Alto Farm, brought this filly, and Juntorio, also by Altivo, east to the Cleveland auction. He then told me that they were two of the fastest colt trotters that ever left the shadow of the tail pole. Carrie Caswell was three and had shown a quarter in 52 seconds. Juntorio was two and had shown one in 33 seconds, the fastest her age had ever been trotted over the farm track. At the sale Hon. Frank Jones bought both, paying \$3000 for Carrie Caswell and \$2100 for Juntorio. Unfortunately, neither had any Futurity engagements. On account of Altivo's being half thoroughbred and by an untried sire, there has been little demand for his get, and so the mares bred to him had not been nominated.

Juntorio was started once as a three year old, in a purse race, won by Admiral Dewey, and showed that she could trot in 2:15. She was then laid over to mature. As a four year old she showed trainer Tom Marsh a mile in 2:12½. Last year she was a prominent winter candidate for the green stakes, and sold for a long price on the strength of it, but in the spring took sick with lung fever and died.

Carrie Caswell was never started. She showed 2:14 in her work and a quarter in 31½ seconds, but had a complaining leg and was let up on. At the sale of the horses of Mr. Jones' estate, two months ago, Carrie Caswell was bid off for \$875 by G. F. Leonard of Boston, and it was thought she would stand training again. But she only lived a few weeks after the sale.

I now hear that there is a sensationally fast pacing colt by Altivo working at Pleasanton, Cal. Will it be possible for him to escape the family hoo-doo?

## Answers to Correspondents.

M. S. T., San Jose—Molly Allen is a black mare, foaled 1889 by Mambrino Wilkes 6083, out of Lady Allen by Ethan Allen Jr. 2903. Her record is 2:20½, made at Oakland August 2d, 1893. She is now owned, we believe, by the Santa Rosa Stock Farm.

April is always the month of unsettled weather, during which horses should receive more than ordinary care. Many of the ailments to which they are subject, and which they contract during winter, develop with surprising rapidity, owing to the changes of the spring break-up. Any neglect at this time is quite sure to bring disease and ruin the animal for work causing loss of use and large expense. The feet are especially liable to contract and develop corns and quarter cracks. The owner who is fortunate enough to escape these troubles will, almost without exception, meet with sore and tender feet, resulting in brittle and shelly walls. Dr. O. J. Phelps, V. S., writes us "that for relieving soreness and keeping the feet in a healthy condition, Campbell's Horse Foot Remedy is a most excellent preparation. I take pleasure in recommending it."

## Gossip for Sportsmen.

The San Francisco Fly-Casting Club's contests will be resumed on the 19th inst. This will bring two postponed Sunday contests and a Saturday contest off in one day.

The spring run of salmon has reached the waters of the Sacramento in the vicinity of Vina and the fishermen are getting what they can as they come along. On Saturday last about 2000 pounds of salmon were shipped from Vina to San Francisco.

Gray geese, white geese and other varieties of the cackling solon family are now to be found in countless thousands upon the Solano plains, and excellent sport can be had shooting them from the blinds dug in the adobe ground. The two first varieties mentioned are now in splendid condition for the table. These birds will all, saving the cripples, and there are many each season, leave for the Arctic breeding grounds by April 25th.

William Paige of Kennett, Shasta county, had a terrible encounter with a wounded bear on the 5th inst. and as a result he lies badly injured at his home. Paige was hunting along Backbone creek. When near the dam up the creek a few miles from Kennett he saw a large black bear and took a shot at the animal. The bear staggered and fell in some thick brush and Paige started after his game. He was compelled to crawl in under the thick brush and when he arrived at the spot where the bear had fallen he found bruin had left.

Paige crawled along farther and suddenly found himself right on top of the animal. But the bear was not dead and there was an immediate declaration of war. With one powerful slap of his huge paw the wounded bear knocked Paige to the ground and grabbed him by the foot, its teeth sinking through the shoe leather and into the flesh. His leg was also torn and for a few moments Paige about gave up all hopes of emerging alive from the brush.

Man and beast rolled and tumbled around in the leaves and branches for some minutes, first the bear being on top and then the man. Finally Paige got in a position where he could handle his gun and, placing the muzzle close to the bear's head, fired. The bear dropped and Paige scrambled out of his uncomfortable position. He managed to crawl home and the bear was afterwards hauled to Kennett by others. The hide now adorns a room in Paige's house. The animal weighed about 600 pounds and was a beautiful specimen.

The most plentiful surface fish in the Caribbean sea is the flying fish, of which there are several varieties. Every ship that passes scares up great schools of these spry little fellows, which can fly 50 to 100 yards as swiftly and gracefully as a bird. This fish is considered a great delicacy throughout the Caribbean islands. The method of catching it is unique. The waters are baited with fish heads and fish that are not edible, ground fine like the "chum" for Eastern bluefish. When the water is alive with flying fish feeding on the "chum," the fishermen cast large circular nets with heavy lead sinkers around the edge so they spread out flat on the water. There is a draw string, and when the sinkers have carried the edge of the net three or four feet below the surface a smart pull closes it like a bag and it is hauled in and emptied. While the method is the same as that of catching mullet on the west coast of Florida, the catch is never so large. The staple fish of these tropical waters is the red-

snapper. Whether the bill of fare in a West Indian hotel offers fish, fresh fish, red-snapper or merely snapper, makes no difference. Red-snapper is what is served when the order goes to the kitchen. This really excellent fish is caught with the hook on coral reefs or banks. It is for him that the fisherman braves wind and weather. He is the codfish of the Caribbean, but he cannot be cured and must be eaten fresh.

The island fisherman have a way of informing themselves of the character of the bottom and the presence of the red-snapper by a device called the water telescope. It is merely a square tube, three or four feet long. When one end is placed in the water a person with his eye at the opposite end can clearly see the bottom, even in 20 fathoms depth. The dark tube simply cuts off the light which would otherwise be reflected from the surface and prevents it from obscuring the less brilliantly illuminated depths. The same appliance is used on the coral reefs of the Bermuda islands.

## Coming Events.

## Rod.

April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 15-Feb. 1—Open season for taking steelhead in tidewater.  
April 11—Saturday Contest No. 4. Classification series. Stow lake, 2:30 p. m.  
April 12—Sunday Contest No. 4. Classification series. Stow lake, 10 a. m.  
May 1-Sept. 1—Close season for shrimp.  
July 1-Jan. 1—Open season for black bass.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

## Gun

April 12—Golden Gate Gun Club. Blue rocks. Ingleside.  
April 19—Union Gun Club. Blue rocks. Ingleside.  
April 19—College City Gun Club. Special blue rock events. Berkeley.  
April 19—Empire Gun Club. Blue rocks. Alameda Point.  
April 26—Millwood Gun Club. Blue rocks. Mill Station.  
May 3—California Wing Club. Live birds. Ingleside.  
May 3—College City Gun Club. Blue rocks. Berkeley.  
May 24, 25, 26—S. F. Trap Shooting Association. Blue rock tournament. Ingleside.  
July 1-Feb. 15—Dove season open.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

## Bench Shows.

March 25, 26, 27, 28—Chicago Kennel Club. Annual show. Mrs. John H. Naylor Secretary.  
March 30, 31—St. Louis Collie Club. 5th annual show. St. Louis, Mo. John A. Long, Secretary.  
March 31, April 1, 2, 3—Buffalo Kennel Club. Inaugural show. Buffalo, N. Y. Edw. P. Sharp, Secretary.  
April 1, 2, 3, 4—Victoria City Kennel Club. 2d annual show. P. K. L. rules. Victoria, B. C. T. P. McConnell, Secretary.  
April 1, 2, 3, 4—Southwestern Kennel Club. Inaugural show. New Orleans, La. John Dewhurst, Superintendent.  
April 8, 9, 10, 11—Atlantic City Kennel Club. Atlantic City N. J. Thos. H. Terry, Secretary.  
April 8, 9, 10, 11—Seattle Kennel Club. 8th annual show. P. K. L. rules. Chas. McAllister, Secretary. Seattle.  
April 15, 16, 17, 18—Portland Kennel Club. P. K. L. rules. Portland, Or.  
May 29, 30—Ladies Kennel Association of America. Open-air show. Hempstead, L. I., on grounds of Mrs. J. L. Kernochan. Mrs. A. G. Evans, Secretary, Westbury, L. I.  
Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

**TROTTER TRACKS.**—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

**THE SECRETARY.**—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest, there is nothing for him here but advice.

**THE SANDPIPER.**—How the Dutchman did not balance his bill for gravel while the little man in brown stood pat, and those who had the real sure thing well, they lost, as usual.

**A STRANGE LAND.**—How a shipwrecked Buckeye made a stir in another racing world. Eloquent, unique and if you do not believe it, verify it by the contrary.

**M. DUEL.**—How the best green horse in Missouri came into turf history. He won the "Truist" cup. That is enough. If you were there you know why.

**STRAVANTER.**—A pretty going piece of North Carolina, where a story is a pinch of romance and a dash of truth.

**ANDY AND ME.**—How a well-known pair learned in France, at the Hotel de la Paix, that the clerk checked the entry at the hotel. They could not part without.

**RIDE OF A LIFETIME.**—How F. J. J. put a spring in the back of the horse, the best driver in Wade Park.

**PAP SHANK.**—How a horse and his owner, some remuneration and Eliza went to court.

We will send this valuable book to you free on receipt of a check for \$2.00. Send to THE BREEDER AND SPORTSMAN, 30 George Street, San Francisco, Cal. Send the book at once postpaid on receipt of price \$2.00.

## THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

## THE BENJAMIN RACING WAGON

## ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. **Wheels.** We make our own wood and wire wheels complete. **Our Ball Bearings** are the best made and are water and dust proof. **The Shafts** are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. **The Whiffletree** is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. **Our Truss Poles** are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

T. H. SPEDDY, 23 DAVIS STREET, SAN FRANCISCO,  
Sole Agent for the Pacific Coast.

## Notes and News.

Chancellor & Canfield of Los Angeles have a nomination in the Bonner Memorial.

The Bonner Memorial has eighteen nominations instead of sixteen as first given out.

The Santa Rosa people want the Breeders Association to hold its meeting there this year.

Mush is entered in the Chamber of Commerce stake at Detroit and it will probably be his first start.

Frank Irvington, a son of Nutwood Wilkes, out of a mare by Anteeo, is making a season at Lima, Ohio, this year.

The horsemen of San Mateo will hold an afternoon of harness racing on the Hobart track on the first day of May.

C. F. Bunch has resigned as trainer for the Meek Estate horses and will open a public training stable at Pleasanton.

Mokelumne, five year old stallion by Silver Bow, dam Kitty Fox by Pancoast, has been duly registered. His number is 37,558.

Funston, the roan gelding by Dictatus, is being entered throughout the Grand Circuit again this year in the slow pacing classes.

Andy Kramer of Yolo county is the proud owner of a Diablo foal that arrived this week and stood 44 inches high the day it was born.

The sale of Mokelumne Stock Farm's horses will take place at Fred H. Chase & Co.'s salesyard, in this city, on Tuesday evening, May 5th.

The matinee to be given by the Los Angeles Driving Club during Fiesta week will be one of the best ever given by this successful and popular club.

Daedalion 2:11 by Diablo 2:09½, dam Grace by Buccaneer, has been registered with the American Trotting Register Association. His number is 37,559.

Mr. C. A. Hug's fast mare Charivari 2:20½ by Sterling, foaled twin colts recently by Nutwood Wilkes 2:16½ but both died. The mare will be bred back.

One of the most promising young trotters over east is the young mare Bessie Directum by Directum 2:05½, dam Wilkes Maid, sister to the dam of Major Delmar 2:05½.

N. Rucker has been sending quite a number of mules to the Hawaiian Islands lately. Good big mules bring an average of \$150 per head here at the present time.

A running meeting of six days' duration is to be given at the Petaluma track immediately after the close of the California Jockey Club's meeting at Oakland.

Frank E. Best has been elected to the office of Registrar of the American Trotting Register Association to succeed J. H. Steiner who is incapacitated from ill health.

A big bunch of unbroken range horses from Modoc county were sold by E. Stewart at his Tehama street auction stables last Thursday. They brought an average of about \$50.

Mary Lou, the dam of Kinney Lou, is owned by Mrs. J. L. McCord of Sacramento and has a fine colt by Bay Bird. Both mare and colt are for sale at a very reasonable price.

Homer P. Saxe, during the past week, has sent the pacer Denny Healey to the Hawaiian Islands and also sent a five year old McKinney gelding to a customer in Eureka, Humboldt county.

During the past fourteen months at least eighteen thousand mules have been shipped to eastern points from Stockton in this state. The supply of mules is getting pretty well thinned out in California.

Lenna N 2:05½ by Sidney is again in training. She has been in retirement for three years and has produced two foals, but both died. She will be trained this year with the idea of lowering her mark.

Nearest 2:22, the brother to John A. McKerron 2:05½, is getting some very choice mares this season. His produce are all large, good lookers and fast. The first of them trained took a record of 2:09½ last year.

Martin Carter's stallion T. C. by Nutwood Wilkes 2:16½ worked a mile in 2:19½ at Pleasanton last Wednesday. This trotter is improving right along and will get a low mark when he is ready to race.

Well bred mares and fillies are about the best investment a farmer can make at this time, provided he does not over stock. The demand for horses is increasing and prices have an upward tendency all over the United States.

There are 239 second payments in Pacific Breeders Futurity No. 3, for foals of mares bred in 1902. There were 331 first payments. Over two thousand dollars is now in bank to the credit of this stake and many of the foals are yet unborn.

The two veterans, "Uncle" Davy Cahill, owner of Charley Herr 2:07, and David A. Snell, owner of Jupe 2:07½, who will both train their horses over the Charter Oak Park, are both confident that each of their horses will go in 2:04 or better this season.

P. W. Hodges has registered the three year old stallion he purchased at the recent Oakwood Park sale as Owyne 37626. The colt is by Owyhee 2:11 out of Inex, dam of Our Jack 2:13½ and Alamo 2:29 by Sweepstakes 298 son of Hambletonian 10.

David Lee, of New York, who recently purchased Re-Elected 2:11½, has assumed the turf engagements of that horse, including the nomination in the Bonner Memorial \$20,000 purse, originally taken by W. A. Dickenson, previous owner of the stallion.

At the annual meeting of the American Trotting Register Association, held April 1st, the following officers were elected: William Russell Allen, President, Samuel Baker, Vice-President, Frank E. Best, Registrar, W. H. Knight, Secretary and Treasurer.

In the first published list of mares entered in the Pacific Breeders Futurity No. 3, the mare Lady Moor, owned by Thos. Purcell of Ferndale, Humboldt county, was given as being bred to Waldstein. This was an error. Lady Moor was bred to Goldstein, a son of Waldstein.

There will be two auction boxes at the Cleveland meeting this year. One in which there will be no limit to the price of a first choice ticket, the other run for the benefit of the smaller bettors with \$25 as the limit for choice. In the latter box each horse will be sold out as long as he brings \$5.

P. J. Kiernan of Modesto has purchased the mare Daisy Nutwood by Nutwood from Charles Woodworth of Sonoma county. Daisy Nutwood is about twenty years old, but is in foal to Vasto 2:16 and looks to be not one half her age. Mr. Kiernan will probably breed her to his horse Pacheco Wilkes.

Do any of our readers know the whereabouts of Dinah Bede, a brown mare, no white, about 15.1 and weighing from 950 to 1000 pounds. She is rangy, high headed and stylish. Her sire is Loeber by Whippleton. We understand she was sold to a gentleman by the name of Potter, who resided in this city.

B. F. Wellington, Jr., of Stockton, has consigned to the sale at Fred H. Chase & Co.'s salesyard in this city May 5th, the handsome road mare Leah by Rajah, dam by Bismarck. This mare was never trained but has pulled two men in a buggy a quarter close to 45 seconds. She is a seal brown and has a perfect disposition.

Harry Moore, of Menlo, was in town this week. He reports everything in fine shape at Palo Alto farm, and says the people of that section who admire the trotting horse are enthusiastic over the leasing of Tanforan track by Mr. A. B. Spreckels and believe that track will soon become very popular with trainers and be the scene of matinee and regular trotting and pacing events.

Geo. Stickle of Angels, Calaveras county, advertises his handsome bay stallion Silver Bow 2:16 out of the famous broodmare Grace by Buccaneer, for public service. The stallion will make the season at the race track, Angels, and will be well patronized, as he is not only a grand individual, but is one of the fastest green trotters in California. He should be a sire of high class race and road horses.

The Concord people built a new track and fair grounds last year and expected to inaugurate them this year with a big county fair and race meeting. Now that the appropriation has been cut out the association thinks it cannot afford to give a fair this year. It is to be hoped the directors will see their way clear to giving at least two or three days devoted to stock exhibits and harness racing.

Among the stallions standing for public service in Yolo county this year is the four year old Tomonco 34197. He is by Tokio, he by Alcyonium, he by Alcyone. Tokio's dam was by Legacy, he by a son of American Star 14. The dam of Tomonco is Jeannie Winston by Altamont, second dam by Hambletonian Mambrino, third dam by Emigrant. There is probably not another horse on this coast bred like Tomonco.

There is a possibility that M. E. McHenry may not drive for M. E. Sturgis this year. McHenry has contracted to train and drive Dan Patch 1:59½ whereas his engagements for exhibitions may take him, which will prevent his racing on the Grand Circuit, where the Sturgis horses will perform. It is said that Mr. Sturgis may sell all his stable but Prince Direct 2:07 and Baron de Shay 2:08½, which he will send to W. J. Andrews.

A yearling colt by Silver Bow 2:16 out of Josie Clawson by Nushagak (sire of Aristo 2:17½, etc.), second dam Ventress by Arthurton 365, third dam Lady Venture (own sister to Venture 2:27½, the sire of Directum's dam), should be good enough to place in the stud when matured with the expectation that he will produce size, style and speed. He will be sold at the dispersal sale of the Mokelumne Stock Farm in this city May 5th.

W. J. Kenney shipped this week to Walter Maben the "Geers" of California, a 1903 model McMurray sulky. It is painted white and striped in gold and is one of the handsomest bikes that has been seen in this city. The Kenney Manufacturing Company is supplying many trainers with the 1903 McMurray. It is as near perfect as a bike can be made.

The fast pacing mare, Edna R. 2:11½, is offered for sale by her owner, A. L. Conklin of Bakersfield. Mr. Conklin states that she is a better mare now than when she made her record. Edna R. is by Sidney out of Stella C. 2:26 (dam also of Ama A. 2:16½) by Director, second dam by Speculation. She is a high-class mare and royally bred.

Jim Thompson and Clipper 2:06 by Diablo broke all the track records at Pleasanton last Saturday. Col. J. C. Kirkpatrick of this city, owner of the fast pacer, expected something extra of the horse and took three or four friends up to Pleasanton that they might see how two minutes speed looks. They were not disappointed. Thompson drove Clipper a half in 1:01 and came the last quarter in 28 seconds. Clipper was fairly flying at the finish.

C. F. Dillman, of Sacramento, is the proud possessor of a very handsome little filly foaled April 1st. It is by Mrs. E. W. Callendine's colt Guy nut (son of Nutwood Wilkes and Abbie Woodnut) and its dam is the Palo Alto bred mare, Cecil by Gen. Benton, that is the dam of Electric Coin 2:18½ and Cecilian 2:22, and the grandam of Pacita 2:26. Mr. Dillman was offered \$125 for the filly the day she was foaled, but thinks the value to him is about four times that amount.

An Eastern turf journal says: "It seems to be the opinion of most of the best judges of such matters that if there is any horse now in sight that can lower the record of 2:02½, now held by Cresceus, it is John A. McKerron 2:05½, and it is confidently expected by these people that he will take a mark of 2:02 at least this season. He is to be specially fitted for a supreme effort this summer, and nothing will be left undone that will aid in any way. He will be given several trials on different fast tracks."

Mr. A. B. Spreckels, of this city, President of the Board of Directors of the California State Agricultural Society, has handed to the Governor his resignation as a Director. Gov. Pardee has been in the southern part of the State for several days and the resignation will not be acted upon until his return. The Governor will have two additional places on the board to fill before long, as the terms of J. E. Terry and M. D. Chamberlain will expire on May 8th.

The get of Seymour Wilkes 2:08½ are attracting much attention this year. Mr. Salisbury's trotter by Monroe that worked a quarter at Pleasanton in 31 seconds, and Mr. Allen's pacer in Joe Cuicello's string that has shown a quarter in 30 seconds, have set all the railbirds talking. The sons and daughters of Guy Wilkes are doing well in the stud. The new Year Book credits him with 30 sons that have sired 103 trotters and 34 pacers, and eighteen daughters that have produced 24 trotters and 4 pacers.

A Los Angeles correspondent writes that Geo. B. Easton has sold the stallions Six Bells and Aerton to Mr. Harrison G. Arms of Chicago. Mr. Arms will take them back to the windy city with him. Aerton will probably be gelded and schooled for a high stepper and will make a high class horse at that work. Six Bells is also a swell horse. Mr. Easton also sold a chestnut mare by Red Regent to Walter Maben and Maben sold her to Mr. Canfield. Col. Smith, Mr. Easton's pacer, won his matinee at Los Angeles last week, getting one heat in 2:15½ in a jog. Limonero 2:15½ will remain at Los Angeles in J. H. Williams' hands, also several of Mr. Arms' colts by this horse.

Here is a story of Russian red tape: A gentleman in Moscow ordered a particular kind of a horse from one of the government breeding establishments. After a delay of three weeks he received an official communication, spread over much paper, to the effect that as he had omitted to forward a stamp for reply there could be no answer to his request. This document was signed by several officials. The gentleman apologized and sent the stamp at once. In the course of the next week he received another communication from the breeding establishment to say that a horse such as he required could not be supplied.

Bob Carnathan, who taught Harold H. 2:04 to go without the hopples, is quoted as the author of the following: "When the average pacer trots he goes with much more action than when he paces, and if he takes all his work on the trot he acquires a habit of going high that stays with him when he changes to a pace, and excessive action is more of a handicap to a pacer than it is to a trotter. A pacer that takes his work on a trot is also very apt to cross-fire in changing his gait when he comes around at the score, which has a tendency to make him pull or step higher than he really ought to, and instead of getting away with his head down and on his natural gait, he starts away up in the air, or else he goes to a break. I have observed that many pacers who are seriously troubled with the cross-fire habit take all their slow work on a trot, and I believe that all such can be greatly benefited by making them pace in their work at all times. It is a difficult matter for some horses to pace going slowly, but I have found that if they are forced to do it, it develops the stifle and gaskin muscles to a degree that makes them stronger and, therefore, gamer. It enables them to handle their hind feet in a manner that reduces the possibility of interference to a minimum."

## Ribbonwood the New Zealand Pacer.

On Saturday, February 21st, at the New Zealand Trotting Club's Autumn meeting, the pacer Ribbonwood distinguished himself by taking the New Zealand Handicap, two miles, in record time in the harness, 4:35 4-5, beating a good field of horses, and then on Monday a half after paced a mile against the Australian record of 2:13 and covered the distance in 2:11 2-5 which is now the record for that country. In the handicap Ribbonwood was the second horse and as the track is less than five-eighths in circumference his showing is not a poor one by any means. Quite a number of trotters and pacers have beaten this time for two miles in America, Cresceus 4:17, Osward Silver 4:28, Greenlander 4:32, and Nightingale 4:33 being the trotters that have made lower records, while the pacers are Chehalis 4:19, Nervolo 4:24, and W. W. P. 4:22. The New Zealand people are very enthusiastic over the performances of this four year old son of the Palo Alto bred stallion, Wildwood. The *New Zealand Referee* gives the following account of the race:

Ever since he last appeared in public rumor has been busy associating Ribbonwood's name with phenomenal performances done in private, and sensational as many of them were alleged to be, the champion's showings on Saturday proved that they were not altogether ill-founded. Despite the magnitude of the task imposed on the Wildwood colt in the big harness race of the day, he was supported on the machine as if the result was a foregone conclusion. And so the sequel proved, for after getting to the end of his first mile in 2:20 4-5 he gradually improved his pace, and had the opposition in trouble a long way from home. Ribbonwood was timed to run his second mile in 2:15, and he must have traveled his third half at something like a 2:12 gait. Like many other horses, the black colt showed a decided objection to the dust and dirt that he had to get through, and this may account to some extent for the longer time taken for the first half of the journey. After an interval of an hour and a half, Price again led his charge on to the track to try and better Fritz's Australian record of 2:13. After doing a short preliminary Ribbonwood, attended by L. H. Hewitt on a galloper, got away at a great burst of speed. Moving like a piece of animated machinery he reached the half-mile post in 1:04 3-5, and from the way he was striding out it was quite evident that, barring accident, a new record would be established. The third quarter was left behind at almost as good speed, and though the second half occupied 1:06 4-5, I fancy it could have been bettered if necessary. Ribbonwood's new record, 2:11 2-5, is 13 3-5 seconds better than Fritz's, so it is evident that the Australian crack will have to improve on any of his previous public showings to have a chance in the match arranged between him and the New Zealander. Great as was the enthusiasm when Ribbonwood returned to the judge's box after winning the big handicap, it was even greater when his victory over time was announced. Cheers were given right lustily for the horse and its driver, while many private congratulations were showered on Mr. G. H. McHaffie, who bred the colt. Certain it is that a better horse has never been bred in New Zealand than Ribbonwood 2:11 2-5.

"Spectator," the Auckland turf writer, has a high opinion of Ribbonwood and thinks him good enough to campaign in America. He says:

All lovers of trotting must feel glad over the starting achievements of the Canterbury bred and owned pacer Ribbonwood. Less than twelve years ago no pacer in America had gone a mile under the time Ribbonwood has done, and nothing of his age had obtained such distinction in a mile. Indeed, there are comparatively few four year old colts in the list that have paced under 2:11 2-5, though a fairly large number over that age have done so. No four year old colt, so far as I can learn, has yet been given a two-mile record under 4:35 4-5. Indeed, that performance probably stands alone in pacing records, and, taking into account the fact that the course is under five furlongs, and is not built quite up to the American standard, and must be slower, the two performances are such as no other horse has ever accomplished. On the afternoon when the great pacing mare Nightingale succeeded in covering two miles in 4:33, enthusiastic lovers of the sport were wild with excitement. Faster performances have been done since, but I believe I am correct in saying that Ribbonwood's 4:35 4-5 has not been equalled by a four year old colt in any part of the world. The Americans rarely ask their horses to pace or trot so far, as the racing over these long distances that Ribbonwood has done must surely be at the expense of loss of speed for shorter races. There can be but little doubt that Price has a colt good enough to go on circuit with in the States. It would be like reversing the order of things to take over pacers and trotters to America, but I have always thought it a pity Fritz did not get a chance of going there. Some enterprising men should certainly try to send Ribbonwood over, and if Fritz still retains his form, they would be a good pair of representatives for the colonies.

"Spectator" is in error when he gives Nightingale as a pacer. The United States record for two year old pacers is 2:07, for two year old trotters 2:10, for three year old pacers 2:05, for three year old trotters 2:08, for four year old pacers 2:04 and for four year old trotters 2:07. These records were all made on mile tracks, but Ribbonwood, while undoubtedly a good horse, will have to do something better than a mile in 2:11 2-5, best he did in 1:05 4-5, before we can consider him a match for our champions.

Jackson's Napa Soda untangles the feet.

## An Echo of the Ice Campaign.

"When Cresceus made his ice trotting record of 2:15," said Wm. J. Ward, a Cleveland harness man, "the champion traveled over ice forty-two inches thick, covering the Ottawa river at a point where the water was declared to be eighty feet deep. Cresceus was shod with five-calk cushion shoes, two calks being at the heel, one at the toe and one at either side. These calks were not welded to the shoes, but were part of them, thus eliminating the chance of a broken weld. George Ketcham braved the weather in a leather suit and a toboggan cap, but other drivers, Canadians, of course, were out in shirt sleeves, without even gloves to keep their hands from freezing. Cresceus made his record on a day when the thermometer registered zero, which is about as warm as it ever is during the ice racing season. Frequently the races are held with the thermometer pointing 20 or more below.

"The track on which Cresceus performed at Ottawa was a mile circular affair, with the snow scraped away and heaped on either side. The track was surrounded by a fence, in the construction of which not a nail had been used. Supports were frozen to the ice and to these boards were attached with twisted wire. Two open grand stands, each 100 by 25 feet, a judges' stand and a distinguished visitors' stand were also erected on the ice, as was also a club house 200 feet long, in which there was an array of everything worth eating or drinking and plenty of stoves to keep one warm.

"One feature of the Canadian horse sport is the wonderful sleighs used. We have absolutely nothing in this country to compare with them. And the muskox robes that are everywhere in evidence are the finest I have ever seen."—*Cleveland Press*.

## Colt Afraid of Horses.

This is a biography of a colt who is afraid of horses.

He was born on an Iowa farm, and when only a day old lost his mother by death. The farmer determined to save the life of the babe if possible, so the whole family turned in an effort to accomplish this and make the colt a good and useful horse.

The problem of food was the first thing to be overcome. As a result the colt was taught to drink. A basin of warm milk was placed before him, the farmer thrust a finger into the fluid so that the tip projected slightly above the surface. Prompted by instinct the infant seized this tip between his lips and sucked vigorously. Gradually the finger-tip was lowered until the colt was actually drinking. After a few lessons he ascertained that this was a fine way by which to get nourishment. He waxed in bulk and strength. Constantly thrown in close association with human beings, he regarded them as his natural mates. He followed the men and women and the children about the farm, from place to place, treading right on their heels, and often on their toes. He was bound to take up quarters in the same house; soon he was wise enough to lift the latch of the back door with his nose, and would walk into the kitchen, creating havoc with his tail and his ungainly hoofs. He was very awkward.

And he was afraid of a horse! He seemed not to know that he himself was but a horse, and that all his relatives were horses. Just as quick as a horse approached him he would run in fright and seek protection.

Hoping that he would realize his folly, the farmer put him in a pasture with another colt. But instead of picking a friendship with this companion, colt No. 1 stayed as far as possible from him, and if colt No. 2 came near, would show his teeth and chatter in rage and fear.

The last I heard of him he was still afraid of horses, and almost useless for anything but a pet.—*Animal World*.

"Lafe" Shafer, the widely known trainer of Zephyr 2:11, Beausant 2:12 and Terrace Queen 2:06, says the Troy Chemical Company's new remedy, "Save-the-Horse," is the greatest thing he ever saw for a bad leg of any description. He has used it for splints, bowed tendons and lameness generally with remarkable results. In one case it affected a cure after the fire iron had failed, and in another it kept one of the fastest campaigners in the Grand Circuit last year racing sound all the fall, enabling him to gain a record below 2:05. The makers show their faith in its efficacy by selling every bottle with a written guarantee to refund the price if it fails to effect a permanent and positive cure.

The Troy Chemical Co., of Troy, N. Y., has published for free circulation a very instructive booklet on the causes, symptoms and treatment of spavins in horses. Ringbones, thoroughpins, splints, curbs, capped hocks, wind puffs, shoe boils and sprained tendons are also considered in a way that will interest horse owners. This little book tells, among other things, exactly how to use the new veterinary remedy, "Save-the-Horse," in order to cure any of these ailments. It can be obtained without cost by addressing the Troy Chemical Co.

## Scarcity of Good Trotters.

Horsemen who have been scouring the country in search of the fast green trotters and those with records that promise to be good in their classes, all agree that there has not been a time for years when such animals were as scarce as now. Owners of such are evidently aware of this, and hold them at very high prices. A correspondent of the *Philadelphia Record* comments upon this matter as follows:

"The scarcity of sensational trotting material on the market this season in Kentucky is a matter of general comment, as not even in the boom times of a decade ago were trotters so high as now, and a real good horse, stallion, mare, colt, gelding or filly will absolutely bring more money to-day than ever before in the history of the light-harness horses. The sale firms of the country have particularly drawn attention to this fact, as they unanimously report a famine in the high class market.

"They get a fair share of horses of a good type, speed and royal breeding, but wherever a prospect bids fair to create a sensation on the track or in the stud, such a horse or mare is not for sale.

"So healthy does the situation at the present look that in the last few days a very prominent thoroughbred horseman here has placed an order with a Louisville dealer to buy him a dozen standard bred trotting mares of the most fashionable line, regardless of price. He wants young stud matrons of the very best blood lines, and he proposes to breed them to the best stallions in Kentucky, and run the trotting department as a side issue to his great thoroughbred breeding establishment, like the noted Woodburn was conducted many years ago."

Owners of high class trotting stallions are reporting a remarkable number of early bookings and every indication would assure the most active breeding season in the history of the light harness industry. The many new Futurity events and the increased number and value of rich purses for aged horses have made the earning capacity of the trotter and pacer greater than ever before. Every stallion of merit that is properly brought to the attention of the breeding public should do a heavy stud business.

## James Butler Controls Empire Track.

James Butler has purchased the stock of four of the syndicate which controlled the Empire City trotting track in an effort to settle the differences which have been going on for some time among the joint owners. C. K. G. Billings, Hugh J. Grant, Henry Morgenthau and Frederick Gerken were the members dissatisfied with the plans for the track during the coming season, and they have disposed of their holdings to Mr. Butler.

The deal was practically closed a few days ago, when Mr. Butler paid over a certain amount of money. A contract was at the time drawn up clinching the deal.

It is a well known fact that Mr. Billings and the other members mentioned were opposed to the increase of the capital stock of the association from \$50,000 to \$500,000. At a meeting held at Durland's Academy on March 14th, Mr. Billings and the other members were represented by their lawyers, and when the proposition to increase the stock came the lawyers announced that if such action was taken their clients would withdraw from the track ownership, and that their stock was for sale. The Billings faction also made a proposition to buy out the interests of the other owners.

Mr. Butler was opposed to selling his interest and decided to go ahead with the scheme of increasing the capital stock, and last week a certificate was filed with the Secretary of State at Albany calling for the increase. This was the final move, and Mr. Butler is said to have made an offer for the stock owned by the members opposed to his plan.

The price was satisfactory to Messrs. Billings, Gerken, Grant and Morgenthau, and a deposit was put up to close the matter. It is said that James Butler now has absolute control of the track.

Some of the tremendous revenues which accrue to the Western Union Telegraph Company from its pool room service is revealed in the suit of P. J. Carmody against that company for an accounting of the Kinloch business of last summer. While the number of pool rooms and turf exchanges throughout the country has decreased to a marked extent the last few years, there are still enough of them in operation to yield a daily tribute well up in four figures. All of which will be further ventilated in the courts when the Carmody suit comes to trial.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

## THOROUGHBRED DEPARTMENT.

The following taken from the *Daily America* and referring to the performances of Yellowtail at the Benning track, should prove of interest to those who have followed the horse's career in California: "Who will beat Yellowtail in the Carter Handicap with 98 pounds on his back?" That is the question which New York horsemen now here are asking each other, and thus far no one has arisen to make answer to them. Yellowtail made a deep impression on the mind of every horseman who witnessed his race in the closing event on the card yesterday. Although as big as a house, as the saying goes, he ran the mile and 100 yards in 1:47, and, at that, never seemed to do more than gallop at any stage of the contest. He simply breezed from the half-mile pole, and at the end practically was pulled to a walk. He is easily the best horse that has been shown thus far at the meeting, and probably the best that we shall see here. Aqueduct may show something better, but horsemen and bettors here are skeptical on that point.

The time made by Yellowtail, 1:47, equals the track record, hung up by Bonibert last year, but when it is considered that Yellowtail carried 126 pounds, while Bonibert only took up 110 pounds, it must be admitted that Yellowtail's performance is infinitely the better of the two. Yellowtail is by Watercross out of Paloma. He is six years old and he is like good wine in that he seems to improve with age. He was always a speedy horse, but he never could carry his speed so far as he now carries it, and he never was so good a horse as he is just at present.

Major F. A. Daingerfield, manager of Castleton Stud, considers that the famous race horse Voter, winner in J. R. & F. P. Keene's colors of the Metropolitan Handicap and twenty-two other races and \$29,707, has made the most remarkable first season in the stud of any stallion he has ever had under his care.

Last season he mated Voter to fourteen mares. Four of these have already foaled and the others are due within the next three weeks. What makes this fact all the more remarkable is that two of the mares bred to him are respectively 27 and 25 years old, they being Ella T., the dam of Tea Tray and Banquet II., and Belle of Maywood, the dam of Tenny and Olympian, both of whom have just had foals by Voter. The produce of these mares have won over \$100,000 on the turf and their foals by the famous son of Friar's Balsam will be regarded as among the most valuable ever dropped in this noted place. Major Daingerfield hopes to break a record with Voter in a breeding way, and is confident of having this season at Castleton fourteen living foals by the great horse, a representative of every mare bred to him in 1902.

It is generally supposed, and no doubt true, that the majority of race tracks throughout both East and West are nowadays very paying institutions. In fact, the State tax paid last year by the tracks located in the State of New York proves this to be the case. Another healthy sign is the increase in money added to stakes and the larger purses offered and the forthcoming season bids fair to put the record attendance of even last year in the shade. However, there is one thing we think the great majority of racing associations have overlooked, and that is the providing of comfortable and cleanly quarters for trainers and their assistants, the men to whom, after all, the public must look for their amusement and the association their revenue.

In many cases trainers that wish to remain on the track close to their charges have to rig up for a sleeping room an odd stall as best they may and put up with any old shack of a building for a kitchen. Now, we do not think it would be asking too much of the racing associations to provide suitable buildings for kitchens and living rooms that trainers could occupy in comfort and remain with horses both night and day, as so many now do, even though their quarters are anything but palatial.—*Thoroughbred Record*.

It is a very different collection of thoroughbreds from that which S. C. Hildreth carried north last year that will campaign in his colors during the forthcoming summer. Hildreth left Memphis last spring, started the struggle for purses by winning the Worth Handicap with the speed marvel, Waring, and a little later started the turfites by capturing five flat races in one afternoon. There was but one other race programmed at the Worth track that day, and it was a steeplechase event which might have been won by Hildreth's Precursor had he started. The all conquering stable of Hildreth's at that time included Lucien Appleby, McChesney, Gonfalon, Searcher,

Rolling Boer, The Lady, Vulcain and others, in addition to Waring. Horses running in Hildreth's colors won \$71,466, and those he sold to Durnell & Herz and other parties won more than \$20,000, which made Hildreth the looked on largest winner of the year. Hildreth will start the local season of racing with sixteen head of good, bad and indifferent horses. The most talked of horse in his barn at present is Topsoil, an American Derby candidate that beat Dick Welles, Savable, Early and other crack two year olds in such a manner in a stake at Washington Park last summer that his stock for the Derby has increased very much of late. In Witful and Floyd K., Hildreth has other three year olds, and his four year year olds include Lord Quex, John Peters, Major Tenny, Leviathan and Harry Wilson. In five year olds Hildreth has C. B. Campbell, Sarnier, Telamon, St. Marcos and Alard. The aged Favonius is the solitary member of the old division. In two year olds Hildreth owns a couple of his own breeding, but one of them at least will never race unless a technicality that exists over the registration of the colt's dam can be straightened out with the Jockey Club. The colt is by Brutus, but the dam, Ribando, has never been duly registered. The other youngster is a bay colt by Hamilton H., which raced in Hildreth's colors and the dam is Salinas, also owned by Hildreth.

There is much argument as to the mysterious and reputedly wonderfully efficacious "dope," which has been reported to be so skilfully used by certain of the unscrupulous. This "white powder" is heroin, a preparation of morphia, and the dose is one grain for a two year old, two for a three year old, three for a four year old, and up until he gets to be a "fiend," when the dose is increased. It is placed upon the tongue, and operates in from ten to fifteen minutes, according to the certain conditions; or it may be given in a ball, made of ingredients slow to dissolve, about twenty-five minutes before it is expected to go off. A highly nervous horse is said to do better with one of the other drugs, chloral, cocaine, nitro-glycerine, etc. Many of the recipes are fearfully and wonderfully compounded, and it hardly seems credible that the infinitesimal quantities of this or that drug have any effect. The suspect generally has a drawn and wasted appearance, caused from his being rather lightly worked between "explosives" and then raced on the strength of the stimulant to utter exhaustion and subsequent collapse. Not a few, however, hold flesh and train well, but these are in the hands of men who understand and can administer antidotes, and who really train their charges between whites.

It should be very easy for the authorities to experiment with the various materials in vogue and to familiarize themselves with the appearance of a "dope" horse at all stages of the game; to order him placed in the hands of the official veterinary after the race; to be watched over night; to know when an animal "warms up," and when he does not; and if not, why he breaks out so freely, which he will surely do, either in the paddock or on his way to the post. As betting is not recognized, there can be no valid argument against ordering a suspect to be scratched, and thus upsetting any little coup that may be in view. Of course, a great many pooh-pooh the idea that drugs are used to any extent or that horses are influenced to an appreciable extent if they are administered, and such may be the case. Still, the public stare aghast at an animal which is a scared dog to-day, and, after an appropriate interval of indifferent performances, repeats his rapid transit performance, and wonder at the texture of the whip, the keenness of the spurs, and the quality of the hay and oats which can produce and sustain such violently contrasting exhibitions. It would feel much more confidence in the sport were these vagaries officially and intelligently explained, and it hopes to find that the fair augury for sport in 1903 may be capped by a complete investigation and thorough expose of everything bearing on the matter.—*Sports of the Times*.

Jockey C. Kelly, Jake Marklein's lightweight boy, is looked upon as one of the best riders in the country for any purpose to which he may be put to use. For a time Tichenor & Co. looked at him enviously, but they have decided to secure some other lightweight, because Marklein would not part with him. Last season the boy rode 585 races, finishing first 84 times, second 72, third 76, and was unplaced 353 times. While this may not seem as good as it might have been, it was good enough to make him stand No. 19 on the list of winning boys. In California this winter he added considerably to his reputation. He says he will be able to ride at ninety-five pounds this season. Altogether he has a very promising future.

Kentucky breeders are trying to secure Ned Lanigan's grand stallion, Rubicon, son of imp. Rayon d'Or and Lily R. by imp. Glenelg. They have been doomed

to disappointment, however, for the owner has refused to put a price on his prize. George Van Gorden has put aside several tempting offers for his yearling by Rubicon out of Playful, too, and the youngster (who is 15½ hands high) will be extensively entered in stakes. The sire of this baby is one of the greatest individuals in the country and 16¾ hands in height, being the largest thoroughbred stallion in the State, with the possible exception of imp. Watercross. His sire won the St. Leger in England and cost the late W. L. Scott, of Erie, Pa., \$30,000. His dam (mother also of the Futurity winner, Chaos, and Turmoil) was by imp. Glenelg (sire of Firenze and Los Angeles) out of Florence (dam of Hindoo, Mollie Walton, Florida, Firenze's dam, etc.) by Lexington.

The professional tipsters who boasted of the sleepless vigilance of their "clockers," never permitting a horse to work out without "seeing and timing it," were quietly suppressed by the Washington Jockey Club of the District of Columbia. The order of President Howland is to bar from Benning's Course during the early morning hours, when the workouts take place, all the tipping bureaus, scouts and clockers. Only recognized trainers, having at least two horses on the grounds, are now allowed within the gates until noon. This is medicine of the right kind, and if the treatment is kept up a serious evil, a menace to clean racing, will be averted.

Although John W. Schorr will begin an early Eastern campaign this season and race during the Benning meeting, a strong division of his stable will be seen at the Louisville meeting. He has written to Secretary Charles F. Price reserving eight stalls for the meeting, and indicating that Spencer Reiff and Rightful, his two Derby colts, will be in the division which will be sent here. Another stake candidate in the lot will be the two year old brown filly Volto by Dr. Rice, dam Voltine, which is entered in the Nursery Stakes.

Only a few weeks ago at Wellington, New Zealand, the black horse Advance by Vanguard-Laurel won the Wellington Cup, mile and a half, in 2:34 1-5, with the steadier of 144 pounds in the saddle. And a few days later the same horse with 126 pounds up landed the Zealandia plate, a mile and a quarter, in the starting time of 2:08. This champion of New Zealand, and other crack weight carriers from the Australian colonies of Victoria and New South Wales would receive a royal welcome if sent across the Pacific to contest the World's Fair Handicap. And why should they not come?

It was stated in the *Daily America* a few days ago that many horsemen are of the opinion that Mr. Smathers is making a mistake in leaving McChesney in the Durnell barn. The defeat of the great horse in the Montgomery and the disagreeable gossip connected with his performance have strengthened this opinion. Those who know Mr. Smathers intimately are asserting that there will be a new trainer for McChesney in a few days. "Smathers is not a countryman," said a friend yesterday. "If there was anything wrong with that race you can bet a dollar to a peanut that he knows it, and that he will take mighty good care the thing is not repeated. I expect to see Smathers make a change of trainers for McChesney in a few days—that is, if he can."

## Combault's Caustic Balsam

The Great French  
Veterinary Remedy.

A Safe, Speedy and Positive cure  
for ailments of

**HORSES and CATTLE.**

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists or sent by express, charges paid. Write for details to its use. Send for free circular containing testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Montreal, Canada.

# ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

## AT THE TRAPS.

The Golden Gate Gun Club will hold the regular monthly blue rock shoot tomorrow at Ingleside. The Empire Gun Club regular shoot has been postponed until the 16th inst.

There could not be brought together on the Coast better trap shooters than the twenty shotgun artists met up at the live bird traps last Sunday at Ingleside, the occasion being the second regular monthly shoot of the California Wing Club for this season. Besides the club race at twelve pigeons, four six-bird pools and a team match between two nine-men squads took place. The day was an ideal one for an outing and the pigeons supplied were a decidedly more than usually husky lot of swift flying birds.

G. W. Gibson (30 yards) and Ed Donohoe (31 yards) scored straight in the club race and divided the largest portion of the added club purse. The eleven-bird men were C. C. Nauman (32 yards), Dr. A. M. Barker (30 yards), Hip Justins (30 yards), "Slade" (28 yards), Dr. McConnell (27 yards), Otto Feudner (31 yards) and Jack Fanning (30 yards).

In the team race Captain Fanning's team won over Captain McMurry's team. The scores were 49 to 44 out of a possible 54. The straights in this contest at six birds each were Phil B. Bekeart, Otto Feudner, Jack Fanning, George H. T. Jackson and D. Davis.

In the six-bird pools the shooters who made straight scores and landed the biggest end of the purses were: C. A. Hight, C. C. Nauman (2), Dr. McConnell (2), Harvey McMurry and George Jackson. Out of forty-three entries in four races, but seven clean scores were shot. The men in the five-hole were twenty-three in number—all good shooters, too, but the one lively bird in the bunch would persist in eluding the gun.

Club shoot, 12 pigeons, distance handicap, \$75 added money, 5 moneys, high guns—

Gibson	30 yds.—12322 21123 22—12

The College City Gun Club shoot took place on the grounds at North Berkeley last Sunday. Besides the regular events a number of practice and pool

shoots were shot up. The best record of the day was made by R. C. Reed who broke 97 out of his last 100 targets. He also made the only straight 25 during the day, winning a club gold bar therefor. Silver bars were won on 15 straight by Seales, George Sylvester (2), M. J. Iverson (3), "Edwards," R. C. Reed, Landregor, Kerrison, Dr. Hutton, Juster and Newcomb. The scores in the regular events were:

Putzker Cup race, 10 targets, (10 birds from 16 yds., 10 birds handicap distance.)	
Kerrison	01111 01111—7
Seales	01111 01101—8
Reed	11111 01101—8
Baird	10111 01111—7
Juster	10111 01111—9
Chick	11011 01101—8
Ruble	11101 01111—8
Weir	11101 01101—5
Fish	11110 01111—8
Edwards	11111 01111—9
Hutton	00010 01111—5
Hoyt	10111 01101—7
Juster	11111 01111—10
Edwards	11101 01101—7
DeMerritt, Capt.	10001 00010—3

\* Birds only.

Shoot-off, Cup race, 10 targets.	
Juster	11111 01111—10
Edwards	11101 01101—7
DeMerritt, Capt.	10001 00010—3

† Silver bar

Practice and pool races, 10, 20 and 25 targets—Hoyt 10, Schmidt 6, Hutton 13, Huggins 4, Chick 10, Juster 11, Stoner 14, Remington 5, Ruble 4, Arnold 13, Weir 11, Newcomb 5, Harrison 13, Huggins 13, Schmidt 4, Stahl 4, Remington 10, Stoner 3, Chick 23, Hutton 16, Kerrison 22, Edwards 12, Reed 24, Seales 21, Harrison 19, Fish 15, Juster 20, Sylvester 23, Iverson 18, Burns 24, Harrison 19, Remington 10, Iverson 22, Newcomb 18, Hutton 21, Burns 22, Fish 19, Edwards 24, Sylvester 24, Seales 16, Reed 24, Iverson 21, Harrison 22, Remington 17, Baird 15, Hutton 18, Burns 22, Iverson 23, Harrison 21, Edwards 20, Reed 24, Sylvester 24, Iverson 22, Landregow 6, Burns 23, Sylvester 23, Reed 25, Iverson 24, Harrison 24, Landregow 9, Reed 14, Juster 11, Chick 10, Seales 11, Kerrison 13, L. Baird 9, Hoyt 9, DeMerritt 10, Fish 5, Weir 9, Chick 8, Newcomb 11, Schmidt 3, Huggins 14, Hoyt 10, Reed 11, Stahl 3, Juster 9, Edwards 12, Chick 12, Stahl 7, Fish 14, Newcomb 13, L. Baird 11.

The Sunset Gun Club held a blue rock shoot on the 5th inst. The scores in a 25 target race were: Jos. Lassorett 23, Dick Burfield 20, John Lassorett 24, Chas. McDonald 23. Ten targets, Chas. White 9, Jos. Lassorett 9, McDonald 10. Twenty-five targets—Burfield 25, John Lassorett 24, Jos. Lassorett 24, White 22, McDonald 20. Jos. Lassorett won against Burfield in a 25 target race for \$25.00. Lassorett scored straight, Burfield broke 19.

At the Watsonville Rod and Gun Club opening shoot Sunday last a large crowd of spectators, including many ladies, watched the members smash blue rocks. During an intermission a splendid lunch was served by the club. The club has been organized for two years. The officers are: Mr. Bixby, president, Ed Kelly, secretary-treasurer and Mr. Hedgeland, captain. Eugene Kelly is the official scorer. The club preserve of 5000 acres on Elkhorn slough adjoins the Empire Gun Club preserve. These tracts afford deer, duck and quail shooting in season.

In the medal shoot Moore was the winner in the first class, scoring 24 out of 25. Ledy broke 20 out of 25 and was the second class winner. In a six man team shoot, four moneys the winners were Varlen, Tolman, Bouter, Albright and Alford.

The scores in the medal race at 25 targets were: First class men—Herd 14, Green 18, Varlen 23, Work 23, Jensen 12, Alford 18, Albright 21, Winkle 21, H. Struett 18, Baxter 16, Wentworth 18, White 17, Palm-tag 18, Cox 15, Colman 18, Hedgeland 17, Malgreen 19, Wilkan 15, Cupid 12, Carr 12. Second class men—Leland 6, Ed Kelly 18, Ledy 20, Eug. Kelly 17, Ring 8, C. Struett 9, Bixby 5, Willoughby 15, Richardson 16, Watkins 13.

Team shoot, 25 targets per man—Hedgeland 20,

Work 22, Winkle 17, Green 21, Went 16, Struett 16; total 112. Albright 19, Varlen 22, Alford 18, Baxter 21, Ledy 15, Tolman 22; total 116.

Despite frequent attention from Jupiter Pluvius March 29th, the members of the Santa Lucia Gun Club, Monterey county, turned out in force and did very creditable work. A high south wind helped to complicate matters and rendered the nimble blue rocks more elusive than usual.

In the 25-bird practice shoot the scores were as follows:

Krough 14, Palmtag 12, Donahue 14, B. V. Sargent 14, Butler 16, Handley 12, Gill 21, Walker 18, Duncan 14, Anderson 19.

The Lincoln and Auburn Gun Clubs had a blue rock shoot last Sunday at Auburn. J. B. Landis and J. Fulton were judges, E. A. Francis referee and W. I. May and A. J. Locker scorers.

In a 25 target match the results were: W. Barrett 18, L. E. Brown 17, George Williamson 18, C. Hecker 13, J. Taffit 13, C. M. Donnelly 16, E. A. Putney 18, D. Chamberlain 19, E. Grim 13, L. Safford 13, George Barrett 17, A. D. Leavell 6, D. Barrett 10, J. Schuler 14, Vetter 18, Robinson 14, Threkel 18, Sullivan 9, Brown 17, Thomas 10.

There were eighteen entries, mostly Salinas shooters, for the inter-club blue rock contest for the handsome Winchester gun offered by the Ford & Sanborn Company to the individual member making the best score in breaking blue rocks. The contest is open to all the clubs of Monterey county, the Monterey Gun Club being barred and consists of four shoots at 25 targets each, or 100 in all. The opening shoot was held last Sunday at James Jeffery's place at Riverside. The scores made were:

C. Z. Hebert 16, E. Palmtag 12, Charles E. Duncan 12, Ed Smith 14, R. J. Vierra 18, M. Thomson 13, Dave Thompson 21, W. Handley 16, Floyd McColum 11, J. A. Chappel 11, G. A. White 11, "Gill" 21, Ed Smart 5, A. F. Tynan 5, S. Hauser 20, F. W. Sargent 10, James Jeffery 14, J. B. Iverson, Jr. 9.

After the trophy prize shoot was over, two 10-bird pool races were shot. In the first event Herbert won first money, Dave Thompson and "Gill" tied for second and Hauser won third.

In the second event Thompson won first money and Vierra second. "Gill" and Smith tied for third, in the shoot-off, miss and out, "Gill" won.

## GOSSIP FOR SPORTSMEN.

The California Rod and Gun Clubs Association was recently formed in this city at a meeting attended by delegates representing twenty-five of the leading gun and anglers' clubs in the State. The association was organized for the purpose of assimilating and bringing together the various sportsmen's organizations devoted to shooting and fishing, in the interest of fish and game protection, the securing of proper legislation for such protection and preservation, for the encouragement of good-fellowship among the members and generally to promote the welfare of sportsmen and secure a unity of action in matters of interest to sportsmen.

The first regular meeting of the association was held at room 16, third floor of the Mills building, this city, Wednesday evening. Permanent organization was carried out by the election of a board of officers and the adoption of a constitution and by-laws. The officers elected were: President, F. V. Bell, first vice-president, M. H. McAllister, second vice-president, John H. Schumacher of Los Angeles, secretary, J. B. Hauer, American National Bank, treasurer.

The clubs represented at the meeting were: Casa del Mar, Country and Anglers by W. S. Kittle; Empire by J. B. Hauer, J. Peltier and L. Allen; Mayhew Gun Club by James P. Sweeney; Teal Gun Club by Isaac Upham; Alameda County Sportsman's Club by W. H. T. Huie; Goodyear Gun Club by Bert Rose; San Francisco Fly Casting Club by A. B. Finch; Schellville Rod and Gun Club by B. Baum and E. C. Reynard; Union Gun Club by T. L. Lewis; Los Angeles Gun and Fish Association by J. Chanslor and W. Chanslor.

Representation in the club will be as follows: For clubs of not more than ten members, one delegate; for clubs of ten and not more than twenty-five members, two delegates; for clubs of twenty-five or more members, three delegates.

The committee on organization was composed of M. H. McAllister (representing the Ibis Club), John B. Hauer (Empire Club), G. D. Boyd (Country Club) and F. V. Bell (Field and Tule Club).

George Neal, the Sacramento county Game Warden recently submitted his report to the Supervisors, showing that he had posted in various places throughout the county 250 copies of the fish and game laws. The report relates:

"Thinking it may be of interest to many, and at the same time show the partial value of one variety of game alone to Sacramento county, from statistics obtained by me I find there were sold in the markets in this city, for the season of 1902-3, 41,500 ducks, valued at between \$13,000 and \$14,000, nearly all of which were obtained in this county, besides thousands of ducks which were secured by private sportsmen and many shipped to San Francisco markets, which shows the necessity of protecting game during the close season."

The Board authorized the purchase for the Game Warden of a net, at a cost not to exceed \$12, to capture small bass in shallow ponds and place them in deep water.

Mr. Chas. Williams, one of the most successful trappers of the Pacific Slope, is on our streets to-day. Mr. Williams is a master of woodcraft, having spent most of his life on the frontier and reads nature in al

her manifold and mysterious workings as an open book.

The strains of pioneer blood is still so strong in our western life that the recital of experiences in the career of such men as Mr. Williams holds for us the strongest interest.—*Chico Enterprise*.

Around the mouth of Steiner creek where it empties into San Luis creek, just below Dana street, hundreds of dead mountain trout ranging from six to eight inches in length, says the San Luis *Breeze* of the 2nd, floated belly-upwards on the water or lay tossed up by the tiny waves upon the gravelly banks.

They were killed by the petroleum residue poured into San Luis creek from the plant of the Pacific Coast Heat, Light and Power Company at San Luis.

S. A. Tucker, the well known representative of Parker Bros., Meriden, Conn., arrived in this city on Monday.

Some notes, etc., relative to this department of the BREEDER AND SPORTSMAN will be found on page 6.

As a rule, wild animals show what seems like hatred, sudden and savage, for wounded companions of their own kind, and treat them with murderous severity. This, of course, is between adults, the protection of of their young by parents, and especially by mothers, being a frequent exception to the common custom. The *Chicago Journal*, however, prints a story which hints, though it hardly proves, that wild geese will give aid to the injured until its uselessness is evident. The authority is a resident of Columbus, Ohio, and the observers were a party of hunters out after waterfowl in the Sciota valley. They saw a large flock of geese circling round, seeking a landing. The sharp report of a rifle scared the flock, and it again moved northward, flying, as usual, in the shape of the letter "V"—nearly a thousand feet above the earth. Suddenly the line was broken and the birds in it gathered around the leader. They seemed to be supporting and carrying him for over a mile, when suddenly they let the burden drop. On examination by the hunters it was found that the goose had been shot through the neck and had bled to death in midair. The flock resumed its flight northward and soon disappeared from sight. This is a pretty big story, and, with geese moving rapidly at the elevation stated, it would require extremely good eyes to warrant more than a guess as to whether they were attacking or supporting their wounded leader. Wild geese, however, are among the wisest of birds, despite the reputation of their domesticated relatives, and, perhaps, with their wisdom they have developed an intelligent altruism. The fact that the hunters didn't complete their tale with an account of a goose funeral for the goose chieftain, with eulogistic remarks by the members of the flock, indicate a high regard for truth on their part, and makes it comparatively easy to accept their theory of what they thought they saw.

Striped bass anglers and boating parties will hereafter give the inhospitable shores of Angel Island a wide berth. Last Sunday morning the sentries placed along the shore at the sandy cove just south of the fog bell point, rounded up eight Italian fishermen. These men were engaged in hauling their nets, some were ashore and others close in. The soldiers dragged one boat up high and dry and anchored the other boats out in the cove, they then marched the discomfited net fisherman away to the guardhouse.

Another boat containing two members of the Pacific Striped Bass Club, Messrs. Thackeray and Katz, it was reported, were sent off shore and away by the drastic warning of shots fired across the bow of their boat by a sentry.

The news of the peremptory and positive action of Uncle Sam's myrmidons was not long in reaching every angler in and about the Tiburon and Marin waters that day, and while there was a general regret expressed that such good fishing ground as can be had for striped bass and salmon along the shores of Angel Island is now forbidden, there was also a great feeling of satisfaction that the action of the United States army authorities will stop to a certain extent the illegal fishing of the net men on Sundays with small mesh nets. This breaking of the law is general and regular with the net men, who in the case above mentioned evidently got what they deserved.

Smuggling whiskey to the island, ferrying soldiers ashore to Tiburon, where they get drunk, the purchase of clothing, etc., and Government property by a number of privateers, who lurk about the shores of the island in rowboats, is the reason why all boats are ordered away from the island, save those having a permit to land.

Alden Sampson of the United States Biological Survey, which is conducted through the Department of Agriculture, is now in Los Angeles, ready to get at work as soon as the rainy weather is over. The National Government is soon to assume protection of wild game in certain localities in Southern California and along the Pacific Coast, and Mr. Sampson is there to select locations for national game preserves. His first field work will be done on the Trabuca forest reserve in Orange county. He said:

"To afford zones of absolute safety from hunters for native big game, where wild animals now fast being decimated may live and propagate, will be the purpose of these reserves. Animals soon learn in what locality they are not disturbed and will gather on the reserves in goodly numbers. Before long the natural increase will overflow these limits and afford good hunting, while the nucleus of game is preserved. The venture will not entail much expense at first, as the reserves will be under the supervision of the rangers already employed. I am about to begin in this part of the State an inspection of forest reserves for this purpose, which will cover the Pacific Coast, and after I have prepared my report to the department I will be better able to state just where the work will be carried on."

## Outing Days are Here.

When the vacation season begins the California Northwestern Railway Company will be ready to make thousands happy. Its lines run through one of the most picturesque regions of the State, and every here and there are ideal places for rest and recreation. Lakes and mountain streams, cosy corners in beautiful valleys, comfortable farm houses, mineral springs, natural springs, camps in the wildwood, all these are offered, and each has the advantage of being only a short distance from the city. Only a small expenditure is needed for railway fares, and in each instance the other charges are very reasonable.

In conformance with its usual custom the California Northwestern has made elaborate preparations for the glad vacation time, as is evidenced by the handsome hundred-page booklet that it has just issued. This publication gives a long list of places that take summer boarders, tells of the special attractions of each place and gives the rates by the week.

Among the thousand places reached by the line mentioned or its connections are Mark West Springs, White Sulphur Springs, Agua Caliente Springs, Lyttons, Skaggs, Blue Lakes, Laurel Dell, Saratoga Springs of Lake county, Bartlett, Carlsbad, Soda Bay, the Geysers, Duncan's, Highland, numerous farms near Petaluma and Santa Rosa, Bennett valley, resorts at and near Sebastopol and Healdsburg, attractive places near Ukiah and Willits and a hundred charming spots in Lake county.

For campers there are no end of attractions. Throughout Marin, Sonoma, Mendocino and Lake counties the climate is delightful and it is a pleasure to sleep in a tent. Along the Guerneville branch of the California Northwestern, paralleled by the picturesque Russian river, are many ideal spots for camps, the river affording good boating, bathing and fishing. One of the most beautiful places on this branch is Russian River Heights, one of the most charming spots in all the west.

The booklet contains much valuable information, and all who expect to make a vacation trip this summer will do well to supply themselves with a copy before making up their minds. Mr. R. X. Ryan is the general passenger agent of the road.

## Trout Fishing Notes.

Anglers should now find the streams in very fair condition for the fly. Favorable weather, with the exception of a light rain on Thursday, has been the rule for a week. The Paper Mill and its tributaries, despite the high water, have been pretty well exploited since the first. Reports from Point Reyes are that the white house pool is full of trout.

Theodore Rothschild one day last week landed a four pound fish from a pool in "devil's gulch." The trout was taken on a number 8 hook and fought for thirty-five minutes before giving up. Upon examining his prize, an exceedingly beautiful fish, Rothschild was surprised to find in the fish's upper jaw a rusty No. 6 hook with a small length of gut attached. He reports that a day's fishing in the Lagunitas resulted in the taking of over 30 small salmon only, not a trout being caught by him during the day.

Word has been received from Wadsworth that the fishing at that point on the Truckee is splendid at present. Fine trout weighing from seven to eight pounds in weight are caught daily with bait and spoon. These fish run up from Pyramid lake. Last week two 12-pounders were taken. This condition will last until the warm weather melts the snows and then the Little Truckee will discharge its flood of muddy waters into the Truckee and the fishing will then be over until the stream clears again.

Reports from sportsmen who have studied the Carmel river in Monterey county, say that there are more trout to be seen in the stream than for years past. It will take, it is believed, but a few days for the stream to become clear enough for fly-fishing.

In fact, the stream should be ripe for the fly now; the foregoing report was made a week ago.

P. Palmer reports the San Gregoria and Purissima creeks in San Mateo county to contain more fish than have been seen in those waters for years gone, particularly so in regard to the first mentioned stream. The water should now be down and clear enough for good fly-fishing.

Good news to anglers is the extra train service commencing last Sunday, April 5th, when a train will leave this city daily at 7 P. M., arriving at Truckee at 6:15 A. M., Reno at 9 P. M., stopping at intervening stations. Returning the train will leave Reno at 8 P. M., Truckee at 9:40 P. M. This will give the angler a whole day on the river, enabling him to get the evening fishing, which is a desideratum. One can also get off at Truckee and take the trip to Lake Tahoe and return in time for the evening train. The fisherman can get back in this city at 7:55 A. M. By this arrangement the angler can leave Saturday night, fish all day on the Truckee and get back to town early Monday morning.

With the exception of a close season on steelheads in tide water, from September 10th until October 16th, the last Legislature made no change in the trout law. It remains the same as heretofore. The law does not prohibit catching trout less than a half pound in weight, but it does not provide that it is a misdemeanor to sell or offer for sale any trout weighing less than a half pound.

"This amendment is a good one," says the *Willows Journal*, "as it has been the means of driving from the field a number of men who annually shipped hundreds

of pounds of small fish to the market men in San Francisco."

A trout that weighs half a pound is in length from ten to eleven inches according to variety. Ninety per cent of the fish caught in the mountain streams are less than half a pound in weight, and under the law in force none of them can be lawfully sold.

Salmon have repeatedly taken the trolling spoon of the striped bass anglers recently. S. H. Hawkins and Teddy Broad landed a twelve pound fish after quite a struggle one day while they were trolling about 200 yards off to the outer buoy of the S. F. Yacht Club. Last Saturday Mr. Carroll caught a large salmon just about 200 yards off the fog bell on Angel Island. The day previously he lost a big salmon through carelessness. He did not gaff the fish when opportunity offered, and the fish broke away while he was playing it.

## DOINGS IN DOGDOM.

Entries for the bench show close tonight at 10 P. M. A noticeable feature in making the entries this week has been the appearance of a number of people who are taking their initial experience in dog show matters.

The management have succeeded in getting a good entry of Poms. This breed is well represented here and should make a good showing.

During the two last days of the show there will be an auxiliary attraction—an exhibition of cats under the auspices of the Pacific Cat Club.

A new law, which it is hoped will decrease the number of sheep-killing dogs, is now on the statute book.

It is Chapter LI amending section 3341 of the Civil Code by providing that the owner, possessor or harbinger of any dog or other animal that shall kill, worry or wound any sheep, angora or cashmere goat or poultry shall be liable to the owner of the same for the damages and costs of suit to be recovered in any court of competent jurisdiction. It shall not be necessary to establish that the owner of such dog or other animal had knowledge of the acts of said dog or other animal.

Any person finding such dog or dogs or other animals, not on the premises of the owner or owners of the same worrying, wounding or killing any sheep, goat, etc., may kill the dog or dogs, etc., and the owner thereof shall have no recourse.

The ownership of Ch. Woodcote Wonder is and has been since last December a settled fact. He is owned by Woodlawn Kennels. The statement from a Coast correspondent to an Eastern exchange on that point is a bit misleading.

Jessie Rodfield, J. W. Considine's English Setter bitch, whelped March 19th, eight puppies (four dogs) to Lady's Count Gladstone. The whole litter has already been sold, the dogs at \$150 each and the bitches for \$125 apiece, a total of \$1100 for the lot. This is probably the record amount received for a litter of Setter puppies.

Dr. Wesley Mills, who judged at Victoria, B. C., last week, lectured at Vancouver to the medical society on March 26th., and the general public on the 27th, the latter lecture being on "The Dog." Dr. Mills is professor of physiology in McGill University, and is well known as the author of works on "Physiology," "The Dog," "Animal Intelligence," etc. For many years he was the largest breeder and exhibitor of dogs in Canada. He has judged dogs on many occasions, and been a visitor at shows in Great Britain and Germany. He has a wide reputation as a lecturer on many subjects, and has been appointed to give a lecture on "Popular Science" on behalf of the Royal Society of Canada in May next.

The Professor's presence in Victoria in connection with the dog show was considered an excellent opportunity to give one of his popular lectures on dogs, a subject with which he is so eminently conversant, and upon which he is a recognized authority.

## Kennel Registry.

### VISITS.

Dr. O. P. Roller's rough coat St. Bernard bitch Lady Lucille II. (Duke D.—Princess Louise) to Naird Kennels' rough coat St. Bernard, Ch. Grand Master II. (Ch. Grand Master—Bonnie Doone) March 24, 1903.

J. J. Kelley's rough coat St. Bernard bitch Beauty of the Valley (Ch. King Menekle) to Naird Kennels' Ch. Grand Master II. (Ch. Grand Master—Bonnie Doone), March 25, 1903.

Percy Weekes' black Cocker Spaniel bitch Naird Dibah (Black Earl Williams' Name) to Naird Kennels' red Cocker Spaniel Plumeria Beau II. (Ch. Hampton Goldie—Ch. Plumeria Surprise), March 25, 1903.

### SALES.

Naird Kennels sold to L. J. Rose, April 3, 1903, a black Cocker Spaniel dog puppy by Ch. Harve (Ch. Black Duke—Woodland Jude) out of Naird Kennels' Imp (Black Trophy—Stella Silk).

## Build Up.

If you are "all tired out" from hard work indoors a trip to any trout stream will do you good. The gentle exercise, change of air and the country "rub" will bring you to realize you are still fit. Skinner at 801 Market street, S. F., can furnish you the proper tackle and camp outfit, and will tell you where to go and how to get there. Make the catches as reasonable as you can, Skinner goes fishing himself.

Skinner, the sporting goods man at 801 Market street, San Francisco, is displaying the finest assortment of razors, strops and general cutlery ever shown in this country.

## Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book "Dogs" which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

## A WILD CAT HUNT.

## Trailing Mountain Lions and Bob Cats with Hounds.

What lively sport can be had, with the aid of dogs, trailing and running down mountain lions and various wild cats in certain districts of Merced and San Joaquin counties will be understood from the perusal of the following interesting letter written by M. J. H. Little of Livingston, Merced county, and in a clipping forwarded us by Mr. A. P. Wakefield of Acampo, San Joaquin county.

It will be seen that these hunts are more in the nature of regular occurrences than the results of emergency excursions from time to time. The game captured consists of a miscellaneous assortment of wild animals, and with the exception of the raccoons there is quite an element of personal danger present in making the kill. From the lively description Mr. Little gives of the capture of the bob cat, the hunters undoubtedly have had a great deal of sport in running down their quarry.

Concerning the wild pigs referred to by Sheriff Sibley, there is decidedly a hazardous flavor in a wild boar hunt. These brutes are commonly known as "tule hogs," and were originally domestic hogs that took leave of their ranch environment, making the tules their feeding and living ground. In time these animals bred and have increased in numbers. Instances are known where they have attacked and killed horses and cattle. Men have had innumerable close calls from death through attacks by the vicious brutes. Mr. W. J. Gulcher, a well-known sportsman of this city, while hunting ducks in the Suisun marsh one day, was charged by an enormous savage black bear, and had it not been for his nerve and presence of mind undoubtedly he would have been torn to pieces by the razor-keen tushes of the infuriated pig. As it was, he determined on one move and that was to empty both barrels into the charging beast's head at close range. He waited until the bear was within a few feet of him and fired, the charges of shot were buried in the bear's brain and he dropped dead in his tracks.

The story given by Mr. Little about the wild cat here follows:

"On Friday morning, March 7, 1903, myself and brother-in-law started out with the invincible old Tray, the courageous Whiskers and the doubtful Baldy, for the express purpose of bagging a wildcat, having seen tracks in the upper end of the ranch a few days before. Our other dog, Susie, I regret to say, died a few days previously from the effects of strychnine.

"It was an ideal morning for hunting, everything being damp from the rain of the day before, thus making it good for the dogs getting a scent, and it was not long after we reached the hunting ground 'till old Tray sounded the warning note that convinced us that the chase was on, and from the excited tone of his voice and the manner in which he made the brush crack, I came to the conclusion he was after the game we were looking for.

"So up and down through the thicket went old Tray, and as things began to liven up, Whiskers began to display some interest, running up and down on the outside of the brush, and evidently wondering when the thing would come to a head, and he would get a chance to do some drilling.

"It was just seven o'clock in the morning when the chase was started and at just eleven o'clock old Tray spoke in familiar dog language that was easy to translate, 'he's up a tree, boys, come on.' We charged into the brush in the direction of the sound, and soon came to the spot where sat old Tray, with eyes turned heavenward and not a wrinkle on his face, for as we followed his gaze upward, there, crouched upon the limb of an old box elder, with eyes glaring, mouth wide open, whiskers hanging down and panting like a lizard, sat 'old puss.'

"I walked round the tree and sized him up and I tell you he looked big, and he didn't deceive his looks as weight and measurements will show. Well, there was 'old puss' sitting up in the tree, and it seemed that it was to be a fight to the death between dogs and cat, for we were without firearms. Presently the big cat showed some inclination to get out of the tree, so we gave him the invitation and out he came. There was a yellow streak through the air, a heavy thud on the ground, a rushing forward of dogs, and the next instant there was a rolling of dogs and cat in all directions, and then quick as a flash from out of the midst of the scrimmage bounded 'old puss', and with prodigious leaps he scratched for the jungle; but Whiskers fortunately happened to be rolling the same way puss went, and as soon as he could stop rolling and regain his feet he gave chase and pressed 'old puss' so closely that he was forced to seek refuge in another tree. All the dogs were at the tree when we got there; from their appearance it was very evident the cat had done them some damage. Whiskers was very much excited, with blood streaming down his muzzle and flew and an expression on his face that seemed to say, 'thank God that he's up a tree and I'm able for further action.' Baldy had streaks of bloody scratches over his body and was trembling violently, for he was just recovering from the effects of a dose of strychnine, and old Tray looked hopeful with a split ear and a mouthful of cat hair. 'Old puss' was this time up a tall willow and showed no inclination whatever to get out, so we began to pelt him with sticks and clods (for we could procure no rocks, but to no avail, for he evidently remembered the loss of those few locks of hair which old Tray had caused him to plumb. Well I thought the next thing to do was to climb the tree and shake him out, so I spat on my hands and started up, but after I had climbed to within ten or fifteen feet of 'old puss', he squared himself around, lay back his ears and began to sway from side to side,

and I think would eventually have found a resting place on my head, so after due deliberation I slid down.

"We then got a long pole and tried to punch him out, but that only served to make him more fierce for he would bite off the end two feet at a clatter and the pole was soon too short to reach him. The happy thought then struck us to tie a knife on the end of a pole and stab him, so we carried the idea into execution and after two or three stabs he began to descend and show signs of weakness. He came down to within ten or fifteen feet from the ground, then sprang for his nearest enemy, and that was Whiskers. Whiskers closed with old puss in a death grip, old Tray rushed to the assistance of Whiskers, and Baldy made a gallant leap for the cat's throat, but 'old puss' fetched him a swipe along the side of the head and the shock, the excitement and the strychnine were too much for Baldy and he rolled over in a fit. 'Old puss' was too weak from the knife wounds to make a long fight so Tray and Whiskers soon strung him out. Baldy came to in time for the finish. It was just 2 o'clock P. M. when with old puss (who weighed about thirty pounds and measured about four feet) strung on a pole we started for home. It was a great old chase and I wish you could have been along and had some of the fun."

Continuing the subject we append the following clipping from a Lodi paper, which is an elaboration of the matter contained in a paragraph we published last week and also gives some information about wild boars, etc., which is suggestive of development by sportsmen who like a spice of excitement on a hunting trip:

"That mountain lion is making trouble again, and hunters are once more on his trail. Last Sunday the Wakefield brothers, A. P., O. L. and C. P., went out in search of the beast with their own dogs, and a bloodhound, Tray, owned by J. W. Little, of Livingston, Merced county. They followed the trail of the beast for some time, but finally lost it in the water. Tracks fully six inches across were found where the lion had taken to the river. Tray, the dog used by the Wakefields in trailing the lion, is an imported bloodhound, brought from England. He is black, very heavy, and finely trained. His age is six years and during this time he has to his credit, 11 bears, 107 coons, 34 bob cats and 5 California lions.

Following Tray's lead, Mr. A. P. Wakefield has killed 25 coons and 3 bob cats; and during the hunt of last Sunday 7 coons were brought to earth.

Speaking to a Stockton newspaper man the other day, Sheriff Sibley said regarding the Lodi lion and other wild beasts of this section:

"A good many people have regarded as a hoax the report coming from the northern part of the county that a mountain lion had been seen in that vicinity. There is no question as to the truth of the report, however, for I have talked with half a dozen men who saw a lion in that region of late, and I am satisfied that there are two full-grown lions instead of one. One of them was seen with a kitten. The animal stake refuge during the daytime in the thickets along the streams, and go out at night in search of prey.

"There are also a good many wild boars in the county, mostly in the tules in the extreme northwestern part. They make an ugly fight, but a sow is fiercer than a boar, and, when she has little ones, will not hesitate to attack a man without any provocation.

"John N. Woods says he thinks the lions have been in the northern part of the county for several months. Last fall he saw one on his ranch there. The animal was crouching in a swale, evidently waiting for prey to approach. Mr. Woods got within sixty feet of him before either saw the other. When Mr. Woods came into sight the lion sprang into the thicket. Although only a momentary glimpse could be obtained, there could be no mistake as to its being a lion, and it appeared to be seven or eight feet long."

## Excellent County Legislation for Fish and Game Protection.

The Boards of Supervisors of San Mateo and Santa Clara counties have taken action this week in the interest of fish and game protection that has long been necessary and will no doubt bear good fruit in the future.

At the instance of the San Mateo County Game Protective Association an ordinance was adopted on the 6th inst. which, if properly enforced—and this can not be said of some previous game ordinances of that county, will in a great measure stop the reckless decimation of game and fish in a section that is in many respects an ideal one for the sportsmen.

By the terms of the new county law it is made unlawful to kill at any time that species of squirrel known as the tree, pine or gray squirrel.

This is decidedly a move in the right direction. The State law for the protection of squirrels forbids the killing, destruction or having in possession any species of tree squirrel between the first day of February and the first day of August of any year.

Squirrels are shot by market hunters and sold in the markets and restaurants as "young rabbits;" they are also shot by the "guinea" and "goat" hunters. By these terms we refer to two classes of fellows who flood the country districts, on Sundays particularly, and shoot at every feathered and furred creature that can be potted. One class is composed of ignorant and unscrupulous foreigners and these rascals are verily human locusts in their close application to the persistent capture and destruction of fish and game as well as birds of every description, no discrimination whatever being shown in gathering up stuff for the pot, nor do they usually respect the law. Blue jays, owls, robins, larks, barnyard fowls, etc., as well as cotton-tails, jack rabbits and several species of squirrels are all game for these foreigners, and by the way this predatory class of jackal sportsmen are not unknown to many Eastern localities.

The other class referred to is composed of a reckless

element that, while they do not devote their time and talents to miscellaneous field and stream life are equally objectionable for they have various and cunning ways in which they violate the state and county game laws. These worthies are practically poachers in effect, for their most damaging forays are really organized just before close season and shortly afterwards. These vandals have been known to leave this city in small parties by wagon, camping out in San Mateo in some secluded spot, and making their presence felt in more ways than one in the adjoining county.

Ground squirrels are properly not included in the prohibition mentioned. If the hunting of these rodents is carried on by the gentry referred to with application relatively as strong as the assimilative abilities of their omnivorous stomachs then indeed will some reparation be made for many misdeeds.

The killing and taking of song birds or having possession of the eggs of song birds is also prohibited at all times.

Similar legislation should be adopted by every county in the state, in fact there should be a state law protecting useful song and other birds, the exceptions in this respect it has been proven by complete and exhaustive scientific research are but few.

Many birds have been unjustly stigmatized as destructive that reliable authority claims do more than pay their way. The small amount of toll exacted, only at certain times of the year, from husbandman and orchardist being insignificant when compared with the sum total of good these particular birds do.

Aside from the promiscuous potting of the birds, if the netting in wholesale numbers of ground nesting birds during the night hours and the woodland birds during the daytime is stopped, the agriculturists and fruit growers of the county will soon discover the wisdom of the protection adopted. Song birds that are netted go into the pot and are dished up in sautes at the restaurants, clubs and hotels, and the skins and plumage generally find their way to the warehouses of the feather dealers.

The San Mateo Board also made a close season, from January 1st to July 1st of each year, during which it is a misdemeanor to kill cottontail and brush rabbits. The rabbits of that particular county have long enjoyed a commendable table reputation. The game was, until recently, very plentiful in the county. Unrestricted hunting has made apparent a near extermination of these rabbits and sensibly there is now an effort made to save a supply for future sport and use. Six months immunity in this respect from the vandal element will also be appreciated by the rural community of the county.

But one month, October 16th to November 16th, will be the open season for shooting rails. During the open season the birds may not be killed from boats between one hour before or one hour after high tide.

In past years the San Mateo marshes were probably the best hunting grounds on the Pacific Coast for the king rail. The birds bred there and were to be found in thousands. At one time they were not protected by State or county laws; short-sighted policy it was, indeed, and the birds were hunted all the year round. Some years after rails were included in the list of protected game birds, during the opening days of the shooting seasons, hundreds of men and boys in boats at high tide and about the marshes and sloughs with their dogs have been known to slaughter thousands of rails in a day. The birds are particularly easy to get at high tide. The immense stretches of the marshes would be covered with water and the birds for the time being would perch on anything protruding above the level of the water. During this time they could often be approached so close that they were knocked over with sticks or missiles hurled at them by their destroyers. In course of time there came a natural scarcity of the supply of rails, for no hunting ground, however prolific, could fill the demand which was made upon the rail family in the San Mateo marshes. Whether, at this late day, protection will help the rail or not, is a problem time will solve; we believe, though, that the bird will never again give us even a suggestion of its former numbers in the district alluded to.

The open season on bucks has been shortened. The State law allows the killing of bucks only, from July 15th to November 1st. In San Mateo county the open season will now be from August 1st to October 1st. This a wise move, good deer shooting can be had in San Mateo county, but the time is ripe to curtail an increasing demand on fairly limited resources in that line.

The individual daily catch of trout in the county is limited to 100 fish. This seems to us a rather liberal allowance. The coast trout streams of San Mateo county afford excellent fly-fishing, but not too much so to allow the bountiful individual daily dividends countenanced by the new ordinance.

The minimum fine for a violation of any of the provisions of the recent ordinance is \$25, and the maximum \$500. For an arrest and conviction under the ordinance a reward of \$25 is offered.

This latter provision it is to be hoped will be effective in preventing conditions, such as have been alleged in the past, and which impugned minor county officials with the taint of apathy and connivance for a small consideration.

Santa Cruz county authorities on the 7th inst., shortened the deer season in that county to two months, August and September being selected as the open season for deer hunting.

We are glad to note this movement in the interest of game and fish protection. It has mainly been brought about by the active and conscientious campaigning of a number of gentlemen principally members of sportsmen's organizations in both counties. From indications it is believed that the good work will be carried on and furthered in many other counties.

In this manner the vexed question of state game districts or zones can be settled in a much easier manner than by the cumbersome state system advocated prior to the meeting of the last legislature.

# THE FARM.

## A Model Dairy.

Mr. C. H. Alvord, Chief of the Dairy Division of the Agricultural Department, recently visited California and writes as follows concerning his observations at Millbrae, the winter home of D. O. Mills of New York, which is managed by Mr. Mills' Western representative, Mr. Henry H. Taylor of San Francisco. Millbrae differs from most of the farms on the peninsula in that it has been developed as a successful dairy and stock farm. This success, especially in later years, has evidently been achieved through the application to the farm of the same business system that permeates all the other various enterprises with which Mr. Taylor is connected. By a system of daily reports from his manager at the farm he is able to keep a perfect check on the daily expenses and receipts from the farm, of the results from the various feeding rations used and the productive capacity of each cow in the herd. The milk and cream produced are delivered daily by wagon to their city agency 17 miles distant.

The barn, which will stable nearly 400 cows at one time, is a model of convenience. The feed rooms, milk room and office are located in the two-story part in the center and radiating from this are five wings that complete a semi-circle, the one at the right being twice the length of the other wings. Each wing is arranged with double rows of stalls containing about thirty-eight stanchions in each row. The feeding alley of each wing is connected with the main feed room in the center, from which the feed is distributed in a car that can be switched into either alley. The milk as soon as drawn is taken to the milk room and after straining is carefully aerated and cooled. It is seldom that one finds a dairy managed on so large a scale as this in which so very many precautions are observed to keep the milk sweet and free from contamination. The manure is disposed of in a unique way by means of a miner's dump car, which is filled from the droppings from gutters in the stable, is pushed on a track across the yard to a platform under which the manure cart is placed to receive the manure as it is dumped from the car.

The feeding racks in the yard also indicate a resourcefulness of ideas that gives one a hint at the reason for Mr. Taylor's success in the management of this farm. The racks are constructed as the ordinary V-shaped rack, but for the upright slats he has made use of iron gas pipe that was secured from the junk yards in the city. Constructed in this way the slats are neat in appearance and strong and serviceable. It surely takes originality to manage any business successfully.

The ration fed to each cow was four pounds each of bran and middlings and one pound each of cocoanut meal and oil meal. This grain was thoroughly mixed with water and salted. In addition to this the cows received green corn and oat hay. They had on the farm about 450 cows, but they were milking only about 80 per cent of them when I was there.

The laborers employed are mostly Portuguese. They received \$35 per month for milking and \$30 for work on the farm. Each milker is required to milk thirty cows and to assist in the feeding, care of the barn and the like. The laborers are boarded on the farm. Wages as a rule are higher in the Western States than further East, but there are, as well, many inconveniences or customs with which the Eastern farm laborer is entirely unacquainted, and to which he would not take very kindly.

Strike!—if they don't give you Jack son's Napa Soda.

## Case & Walker's Sale of Jersey Cattle.

The Jersey Isle Herd of imported Jersey cattle is well acclimated, the parent stock is a full sister to her, equally good, called Golden Fern's Red Rose.

## DISPERSAL SALE

## BRED HORSES

## ONE STOCK FARM

and consignments from other owners.

Bow 2:16. Daedalion 2:11, Monterey 2:09, es 2:08½, Direct 2:05½, and others.

VER BOW 2:16 (sire of 8 in 2:30) by Robert Gregor 2:17½ (sire of Cresceus 2:02½).

FACE, dam of Daedalion 2:11 Creole 2:15 (sire of Trelin 2:08½) and Eagle 2:19½, and granddam of Sir Apt S. 2:03½, by Buccaneer.

Will make the Season of 1903 at

rack, ANGELS, Calaveras Co.

UAL RETURN PRIVILEGES. For further address

GEORGE E. STICKLE, Angels, Cal.

## E-HORSE N CURE

A Few Workers in the Jersey Isle Herd of Imported and Acclimated Jersey Cattle owned by Case & Walker, Rushville, Ind.

tributed as much of the blood of Golden Fern's Lad as theirs will on April 28th, at Rushville, Indiana, where this farm is located.

There are other great bulls in this sale—in fact they 'hit it right' in other families as well as in the tribe of Golden Fern's Lad, as they brought a son of the great bull Financial King that heads millionaire William Rockefeller's herd. Mr Rockefeller is an expert in Jerseys; has personally explored the Island with one of his daughters who is handy with the camera and the snap-shots of the great cows he brought home with him constitute some of the neatest things in an illustrative way, that have popularized the Jersey in this country. Financial King is the central figure of the great Interest family. There is also a bull called Fox's Usury by Flying Fox out of Fabulous Interest one of the great members of the Interest family. The great cow Interest had eight daughters that won high honors in the public dairy tests on the Island by the amount of butter they made in competition at public fairs. Interest's blood turned out so many cows of high butter test that hers has been styled "the greatest churn family in Jersey."

The cows which Case & Walker imported were as well selected as the bulls. We publish a cut of six of them in a row but fifty could be exhibited equally as well were they all fresh at one time and the camera would span so many. The dark colored one is called Golden Fern's Rose Fern. She is by Golden Fern's Lad

out of a very celebrated Island cow called Brookhill Rose 2d. Nothing of higher breeding ever crossed the ocean. There is a full sister to her, equally good, called Golden Fern's Red Rose. The catalogue is full of splendid cows in the best blood of the Island. Peter Kellogg, of 107 John St., New York, will furnish it.

## Sheep Notes.

One of the principal advantages of intensive feeding in the spring and of the subsequent rapid growth of the lamb is that it permits of early weaning. Three or four months is a better age than six for weaning of lambs and the advantage early grain feeding of lambs is that it is not resumed on the weaning of the lamb without the possibility of loss of weight or the retarding of growth from the side of the ewe, as it gives ample time for her to recuperate before the next breeding season.

Though grass and ewe's milk seem to constitute the cheapest possible ration for lambs for a given amount of gain, and a perfect ration from the standpoint of health and thrift, the modern view is, not at it is an advantage to have lambs come on the grass comes even for butcher's purposes. Lambs that drop in the pens March have a hardy constitution and they get the right kind of a start to make fast growers by the side feeding of grains

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

## California's Colossal

## Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the wholesale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

# RACING

EVERY WEEK DAY RAIN OR SHINE.

New California Jockey Club OAKLAND TRACK

SIX OR MORE RACES DAILY

RACES START AT 2:15 P. M. SHARP.

Ferry boats leave San Francisco at 12 M., 12:30, 1, 1:30, 2, 3:30 and 3 P. M., connecting with trains stopping at the entrance to the track. Last two cars on train reserved for ladies. No smoking. Buy your tickets to Shell Mound. Returning trains leave the track at 4:15 and 4:45 P. M. and immediately after the last race.

THOMAS H. WILLIAMS, President.

PERCY W. TREAT, Secretary.

## FOR SALE.

A VERY HANDSOME THREE-YEAR-OLD Colt by Nearest 35562, sire of Alone (4) 2:09½, and full brother to John A. McKerron 2:05½, out of an Anteeomare. Absolutely sound, well broken and can show a 40 clip. Is entered in Occident Stake. Will be sold under guarantee. Is in every respect a high-class roadster. Apply to or address

T. W. BARSTOW, San Jose.

## 3 Young McKinney Stallions

## FOR SALE.

All Out of Fashionably Bred Mares.

One 2 Years Old.  
One 3 Years Old.  
One 4 Years Old.

The two-year-old and three-year-old are both well staked and are trotters. The four-year-old has a three-year-old trotting record of 2:18, and a great prospect for his class this year. All are in fine shape to train or be placed in the stud. For pedigrees, prices and full particulars address

C. A. DUFFEE, San Jose.

## IMPORTANT TO HORSEMEN.

COLIC. POSITIVE SPECIFIC. SPEEDY and sure cure for Colic in horses. TRIAL GIVEN FREE.

For particulars telephone Central—messenger to 517 Ninth street Oakland, Cal.

### Who Knows What He Eats.

These days it is truly a wise man who knows what he eats. His canned beef may be lessened by his honey may be over-starched digested with sulphuric acid and his preserves the same. His currant jam may be made of starch, gelatine and having extracts. His raspberry jam may be boiled pumpkin with a few clover seeds scattered through it. This uncertainty attaches to all manufactured food products, though in some cases the contents of the package may correspond with the label. Those who live from paper bags and tin cans can have no assurance as to what they eat. Here is where the farmer has a distinct advantage over all other classes, for when he sits down to a well loaded table, he knows what is before him and can eat with confidence the products of his soil and labor. Of course there are things he must buy at the grocers—things he cannot produce, but these are things regarding the purity of which there is little room for doubt—such as tea, coffee, salt, spices and even flour (if he does not have it made from his own wheat). With such exceptions as these, he can raise in his own field, orchard, garden, poultry yard and stock pastures the best of everything that is good for him, and live and feed his family upon better food than the millionaire can buy, even with a carload of money. But it is also true that many farmers do not live according to their privileges. Too many of them participate in the consumption of "factory made" farm products which are mysterious to all but the manufacturer. But it is also true that farmers are gradually adapting the better way, growing their own raw material and manufacturing their own food products, as well as having the very best fresh from the tree, vine, hen house and pastures.—*The Farm.*

### Cause of Many Bad Eggs.

Prof. A. G. Gilbert says: "It is not only in winter there is a demand for absolutely fresh eggs. There is a demand in summer also. In fact, my experience is that it is more difficult in cities to obtain a supply of really well flavored eggs in July than it is in January. I have known cases where eggs have been purchased from grocers in mid-summer, half of which were of objectionable flavor and the other half positively bad. This is not all due to dishonesty on the part of farmers—it is not allowing to the action of people knowingly sending stale eggs to market. I will tell you one cause to which is due the development of objectionable flavor in so many summer eggs. Summer is the natural breeding season of the fowl, and eggs—where males run with the hens—are then strongly fertile. There are also a lot of broody hens about at the same time. Now, what follows when, as is usually the case, eggs are gathered late in the evening, or possibly only once in two days? One hen lays an egg early in the morning; another follows suit later; perhaps a third or fourth or fifth comes and lays in the same nest. By this time the first egg is getting pretty well warmed up. Then a broody hen comes and occupies the nest until evening or the next morning. What is the result? Foster and Balfour tell us that some development takes place in the germ of the egg within eight hours' covering. If an egg in that condition is taken to market, the cell will be ruptured in handling, and then decomposition sets in, and the flavor is ruined".—*Poultry Journal.*

That a cow can be of great service when more than ten years old is proved by the record of Sweet Briar, a pure bred Guernsey belonging to the Minnesota experiment station. At the age of sixteen this cow has given birth to fourteen calves and has been worked up to full capacity every year. While it may be true that most cows are past their period of usefulness at ten years and that the pure bred animals are more delicate than common stock it

does not follow that this must continue to be the case. Sweet Briar's record shows that a cow may be so managed as to increase its period of usefulness one-half and be so bred as to possess the higher dairy qualities and still be as vigorous and long-lived as native stock. Her record for ten years shows an annual average of 6142.76 pounds of milk and 358.07 pounds of butter.

## Trotting Horses

in being shipped about from place to place on a circuit, subject to all kinds of weather and consequent changes in temperature are very likely to fall sick, chills, colds, pneumonia, etc., may take them at any time. Avoid trouble in time by having a supply of

## Tuttle's Elixir

ever ready to hand. It is invaluable in such cases and for hurts, bruises, sprains, spavins, etc. The best body and leg wash known.

**SPAVIN CURE**  
POSITIVELY AND PERMANENTLY CURES**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, WIND PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.** (except Low Ringbone)

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "SAVE-THE-HORSE" can be applied in all conditions and extremes of weather—hot or cold.

Work horse continuously if desired. Cures without scar, blemish or loss of hair. Contains no Arsenic, Corrosive Sublimates or other form of Mercury, or any ingredient that can injure the horse.

Chronic and seemingly incurable cases in the advanced stage that have been fired two or three times and given up as hopeless, positively and permanently cured. "Save-the-Horse" marks an achievement remarkable and unparalleled in medicine. It is the crowning success of ten years' research and experimenting in the treatments of the products of inflammation.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological

change, absorbing all inflammatory exudate and producing a healthy, normal condition of the parts.

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. Copy sent on application.

The need of second bottle is almost improbable except in rarest cases.

There is no condition or arrangement we can make more binding to protect you than our guarantee. Copy sent upon application.

Sire of ALONE (4) 2:09 1-4.

# Limonero=3=2:15 3=4.

Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/2, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/2 got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/2 will make the season of 1903 at the

**AGRICULTURAL PARK, LOS ANGELES.**

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

**HARRISON G. ARMS.**

**J. H. WILLIAMS,**

Owner.

University Station, Los Angeles, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

## NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year olds in one season with records of 2:12 and 2:12 1/4 respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10 1/4. John A. McKerron 2:05 1/4 (2:12 1/4 as a three-year-old) is the fastest trotter of all the famous trios George Wilkes.

NUTWOOD WILKES will make the Season of 1903 at the

**NUTWOOD STOCK FARM, from Feb. 1st to July 1st.**

Fee = \$50

## Grease Heel, Scratches,

**MUD FEVER, HOOF ROT, SPEED CRACKS**—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

**For Hoofs**—It will keep the hoofs healthy, soft and in perfect form.

**For Old and Chronic Sores, Etc.**—Veterinary Pixine heals collar and saddle galls, hobbles chafes abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00. At all druggists and dealers or sent prepaid.

University, Los Angeles Co., Cal.

# SEYMOUR WILKES

REG. No. 0232.

Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to race via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

Son of the Great Electioneer.

# BAYSWATER WILKES 2:25 1/4

Son of Sable Wilkes 2:18 and Fanny Bayswater Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L. holder of the champion four-mile trotting record of 10:12.

Bred to BAYSWATER WILKES and you will get colts that will sell at good prices.

Excellent pasturage for mares \$3.50 per month.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Fatality Winning Family.

**ELECTIONEER NUTWOOD**

**NEERNUT** Record 2:12 1-4  
Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W. 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

### SANTA ANA, CAL.

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two-year-old Aristo. He stands 15½ hands, weighs 1100 lbs.; blood bay with black points; trots without boots. He is a great race horse and his record (2:12½) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

**GEO. W. FORD, Santa Ana, Cal.**

## SIR GIBBIE 2D.

Stallion

**Hackney Pony Stallion**  
**13.3 hands.**

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

### MENLO STOCK FARM

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

**JAMES McDONNELL,**  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SEARCHLIGHT 2:03.4

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03¼).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcione, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his granddam and great granddam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

**2:09.3 The Blood that pro-**

me—0:31, 1:02½, 1:34, 2:05¼, 2:33-7, 1:05½, 1:38¼, 2:07½, 2:37½, 3:07½, 3:37½, 4:07½, 4:37½, 5:07½, 5:37½, 6:07½, 6:37½, 7:07½, 7:37½, 8:07½, 8:37½, 9:07½, 9:37½, 10:07½, 10:37½, 11:07½, 11:37½, 12:07½, 12:37½, 1:00, 1:30, 2:00, 2:30, 3:00, 3:30, 4:00, 4:30, 5:00, 5:30, 6:00, 6:30, 7:00, 7:30, 8:00, 8:30, 9:00, 9:30, 10:00, 10:30, 11:00, 11:30, 12:00, 12:30.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15¼, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:30¼, and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17¼ by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:05¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12¼, etc. Third dam by Lancet, son of McCracken's Blackhawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05¼, Nathan Straus 2:05¼, Ozanam 2:08, Dollade Wilkes 2:10¼, Oro Wilkes 2:11, Evangeline 2:11¼, Mary Celeste (at 2 years) 2:17¼, etc. Fidelia, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr Corbett purchased her from Mr Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12¼, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17¼, Majella B. (2) 2:29 (trial at 4 years 2:13¼), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20¼ with three and one-half months' work; blk g, 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17¼ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile close to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17¼ was equal to 2:13¼ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

### WALNUT GROVE STOCK FARM,

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.  
IT PENETRATES and DRIES IN quickly and DOES  
NOT GUM and FILL UP THE PORES like tar and oil  
compounds. It is the GREATEST REMEDY ever used to  
remove SORENESS and FEVER from the foot, and makes it  
possible to get good services out of a horse working on hard  
and hot pavements.

It gives natural nourishment to the foot and incites a  
rapid, healthy growth--ALL DRYNESS and BRITTLE-  
NESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly  
grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET  
and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UN-  
SOUND and GROWS a TOUGH, STRONG, ELASTIC WALL  
and HEALTHY FROG--A FOOT WHICH WILL STAND  
WORK on race courses.

Many of the best owners and trainers state that for track  
work nothing equals it. In many cases horses have reduced  
their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim  
and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00;  
2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied  
free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next  
issue of this paper. It is the best and because of its merits is rapidly displacing all others.

ST. CARLO.....James McDonnell, Portola, San Mateo Co  
HACKNEYS.

GREEN'S RUFUS.....The Baywood Stud, San Mateo Co  
SIR GIBBIE 2d.....James McDonnell, Portola, San Mateo Co

JOHN D. ROCKEFELLER has entered upon the most difficult enterprise he has yet essayed, if reports be true. It is stated that he has instructed an agent at Lexington to buy him a horse capable of taking the measure of anything in the stables of C. K. G. Billings, E. E. Smathers or H. K. Devereux. Probably no man living can command as many millions as Mr. Rockefeller, but the chances are that it will be much cheaper for him to buy out the entire stables of the three gentlemen named than to try to buy something to take their measure. There are two or three California bred horses now at Pleasanton, however, that will be sold at the Blue Ribbon sale next month, which can come nearer doing the trick Mr. Rockefeller desires than any we have heard of. There are Anzella 2:06½, Dolly Dillon 2:07 and the mare Lou Dillon, trial 2:08, in Millard Sanders' string; in Monroe Salisbury's stables are the trotter Monroe by Seymour Wilkes and the pacer Mush by Lottery Ticket; in the Griffith string the three year old pacer by Steinway out of Nola by Nutwood and a two year old by Direct out of a McGregor mare; James Thompson has the pacer Thornway that has paced a half in 1:03, and there are a few others. If the head of the Standard Oil Company will send his agent to Cleveland next month and buy the entire consignment from California, he may be able to lower the colors of Messrs. Smathers, Billings and Devereux, and even though the horses cost him a couple of hundred thousand dollars he would never miss the money. If he could learn to drive one of his own horses a mile better than 2:10, he would get more pleasure out of it than he has yet found at any sport he has yet tackled, from playing golf to paying church debts. The sale will be on May 11th to 16th and we advise Mr. Rockefeller to take a day or two off from business and attend it.

THE MOKELUMNE STOCK FARM SALE, which is set for Tuesday evening, May 5th, at Fred H. Chase & Co.'s salesyard, 1732 Market street, this city, will afford one of the best opportunities ever offered for buyers to get young horses of high breeding and good conformation. Size and finish are qualities that every breeder of light harness horses should be particular to secure, as those are the ones that sell readily and bring the best prices. We all know the Silver

Bows. They have size and style, good feet and legs and are fast and game. There are several young colts and fillies by this son of Robert McGregor in the consignment, and we wish to impress upon breeders the fact that the blood of the sire of Cresceus 2:02½ will be more sought after year after year, and as there is but little of it in California now is the time to secure it. There are colts and fillies also by Daedalion 2:11, one of the best bred horses in America, that should be very valuable for a breeder to own. As he is by one of California's greatest sires and out of one of the very greatest of broodmares his foals have a value other than what they will bring for road or track purposes. The get of the young stallion Mokelumne 3:55 and of the great trotter Monterey 2:09½ that are in this sale will be good investments at any reasonable price. Among the mares are Vesper by Prompter out of Sibyl by Singleton, Vesper Bell by Director Jr. out of Vesper by Prompter, Elma by El Benton out of Grandma by Orphan, Flora by Judge Waller out of a mare by Stonewall Jackson, Silora by Silver Bow out of Flora by Judge Waller, Ariel by Bourbon Russell out of Alma by Almont Rattler, Annie G. by Mambrino Boy out of Bonnie S. by imp. Bonnie Scotland, Ventures by Arthurton out of a full sister to Venture, the sire of Directum 2:05½; Fantail by Greenwich (son of the great Princeps) out of Miss Jessie by Baden Baden, Anticipate, a grand looking mare, full sister to Agitato 2:09; Grace, the dam of Daedalion 2:11; Creole 2:15 and Eagle 2:19½. These mares are all thoroughly broke, good drivers and with two or three exceptions young and can be used on the road or trained for the track. The colts and fillies are out of them and by Silver Bow, Daedalion, Mokelumne, Monterey and other sires. The catalogues have been issued and we suggest to our readers that they send to Fred H. Chase & Co., 1732 Market street, for copies and look over the breeding of those listed for this sale.

THE AFFAIRS of the Sixth District Agricultural Association have been under investigation by W. S. Melick, secretary of the State Board of Examiners, who has been acting for the Governor. The main question in the investigation is the ownership of the splendid property known as Agricultural Park, Los Angeles. The claim is made by one faction that Agricultural District No. 6 is a State institution, and that the land was deeded to this association in perpetuity for the purpose of holding fairs thereon. They also claim that unless fairs are held the property reverts to the parties who made this deed. On the other hand about fifty stockholders claim that the land is their own private property under an act of the Legislature passed two years ago. The property is worth at the present time at least a quarter of a million dollars. Until the investigation is concluded there is no assurance whether a fair and race meeting will be held in Los Angeles this year or not.

## Death of a Pioneer Horseman.

SANTA BARBARA, April 16.—Captain Dixie W. Thompson, a pioneer resident of the Pacific Coast and known in every part of California, died to-night at his home in this city. Captain Thompson was 77 years of age and had been ill for several weeks.

Captain Dixie Thompson was one of the most picturesque characters of California. He was born in Topsham, Me., and began life as a cabin boy on an Atlantic sailing vessel. Later he became a sailor and finally master of a sailing ship. He came to California in 1849 by way of the Isthmus of Darien, landing at the port of San Francisco and shortly after joined in the gold rush for the Marysville fields. Meeting with ill luck, Captain Thompson returned to San Francisco and became interested in shipping in that harbor.

Several years ago Captain Thompson moved to Santa Barbara and invested in a large ranch, as well as city real estate. He owned at the time of his death the largest lima bean ranch in the world, located in this county.

Wherever street pageants have been held on the Pacific Coast Captain Thompson was the most picturesque feature of the show. Mounted upon his beautiful chestnut horse, which he trained to perform for the pleasure of the thousands of spectators, and sitting astride the famous saddle trimmed with Mexican silver dollars, he became a familiar figure to Californians.

The Pacific Coast Trotting Horse Breeders Association has received requests from Santa Rosa, Stockton, Pleasanton, Fresno, San Jose and Salinas to hold a meeting over their tracks this year. The breeders would rather see the outside meetings given by local associations, but if they cannot see their way clear to giving them, it may step in and occupy some of the dates caused by the Governor's veto of the district fair appropriations.

Like all good things, Jackson's Napa Soda has a dozen counterfeiters.

## Speed in Standard Breeding.

Prof. Redfield's articles on speed breeding, treated from scientific principles of heredity and transmissibility, have brought out an article and a series of tabulations from the "deep-digging" statistician, A. J. Meston, that cannot fail to impress anyone with the logic of the old saying, "blood tells." Mr. Meston's production on this subject covers many phases of the problem of breeding 2:10 harness speed, showing conclusively that he has given the matter abundant and profound consideration. He points out the facts that 2:10 speed production has increased in keeping with the constant tightening of the standard rules and with breeding within their provisions. He analyzes the entire 2:10 list of trotters and classifies each with reference to his standard crosses, showing a constant increase in speed rate with additional standard crosses, as well as a proportionate reduction of the age at which trotters take their best records.

He proves conclusively that the way to breed harness speed is to breed within the standard—rely on trotting blood; that additional standard crosses mean more uniform and more extreme harness speed; that with added standard crosses trotting speed becomes natural speed, and that trotters so bred have not only a higher rate of trotting speed, but "come to their speed" earlier in life. In reference to standard and non-standard bred stallions, which is only the handiest way of speaking of trotting bred trotters and non-trotting bred trotters, Mr. Meston says, in part:

"The age of a trotter is an important factor. The quicker he attains his ultimate speed, the more profitable he is to breeder or owner. The standard bred horses trot to their best records at an average age very little in excess of six years; the non-standard trotter takes nearly a year and a half longer.

A comparison of a number of non-standard to standard trotters at various ages makes the difference in favor of standard more marked. At four years there is 1 to 16; at five years, 4 to 33; at six years, 3 to 27; at seven years, 5 to 32; at eight years, 2 to 13; at nine years, 4 to 9; at eleven years, 1 to 4—every time the non-standard product in a hopeless minority. At ten years each division has two, and at thirteen years there is one solitary non-standard trotter. Since 1892—a period covering ten years—there are only three trotters bred outside the standard that have trotted into the 2:10 list—surely proof that the system the standard seeks to establish is the right one.

"The relative speed of the two classes is a vital question. How does it compare? With the exception of Palo Alto, there is not a champion in the non-standard list. Belle Vara had a champion in the record. (It will be understood that these trotters are now standard by performance; but their breeding at time of foaling was non-standard. So with others in this class. They were bred totally regardless of standard requirements.) The average speed of the twenty-three non-standard trotters is 2 minutes 9:03 seconds, that of the standard class (over six times numerically larger) is 2 minutes 8:51 seconds. This is only half a second, it is true, but that means a distance of about twenty feet when the mile is finished—far enough ahead for the non-standard horse to be badly beaten."—*Western Horseman*.

## McKerron Will Try for the Record.

In a communication to the *American Horse Breeder*, Mr. H. K. Devereux, owner of the great stallion John A. McKerron 2:05¼, describes at length the race in which his horse defeated the Monk and Lord Derby last year, and concludes as follows:

"And now a few words as to why McKerron was not allowed to let his defeated rivals have another chance at him. Trotters are rather expensive, and when used simply for playthings one needs a fat purse indeed. For three years this horse was kept with one object in view. That object accomplished, then came the question of the future.

A well-bred young stallion, it seemed a shame to waste his life as a plaything, even though it could be afforded. It seemed necessary to decide for a preparation with view of a fast record or a continuance of racing. The two could not be worked together successfully, and I decided for the record, as it seemed high time to begin if such work was to be undertaken.

The results proved even then that we began too late, for with a few weeks of bad weather, when the last chance for the year presented itself, some of the conditions were unfavorable. Therefore the horse must try another season, and he is to be trained with the one idea in view of acquiring the lowest possible record, and given five or six chances—not one—to do it.

What the results will be I will not predict, being neither a prophet or the son of a prophet, but if he ties or beats Cresceus' record there are a few people about the Glenville track in Cleveland that will be unusually surprised."

## JOTTINGS.

HARNESS RACING WILL BE HELD at California fairs at several points. This much is certain, that if a regular circuit, so arranged that the same horses will not be required to make the same trip over the same route twice in a long time, is adopted. What of the dates selected? Are they to be chosen in a haphazard sort of way without regard to those that come before or follow after? If so, some of the associations will find themselves engaged in a rather tough game when it comes to securing entries. A well-arranged circuit will help everybody. The associations will get more entries, greater attendance and make more money if they will arrange a circuit that will avoid all conflicts and make the railroad runs as short as possible. Representatives from all associations that propose giving meetings this year should get together and agree upon dates. This will not only avoid all conflict, but it will naturally arouse considerable enthusiasm among horse owners when the list of dates is announced. If this cannot be done, however, let every association select the date that suits it best and claim it through the columns of this journal. Then, if there is a conflict, an agreement can doubtless be reached by means of a little correspondence. If the selection of dates is left to the last moment there is bound to be more or less of a mix-up to the detriment of all concerned.

Entries to the big early closing stakes are not as numerous on the Grand Circuit this year as they were last year. The turf writers are ascribing various reasons for this, and the secretaries seem to hold diverse opinions as well. One secretary lays it to the printing by newspapers of the fast halves and quarters shown at the training tracks, and says these reports frighten the owners whose horses have not shown so well. Another says the "two in three" and the "three heat" plans have caused a falling off in entries, as the majority of trainers would rather race under the old "three in five". The real cause of the shortage of entries is probably the fact that the majority of owners have found that there is little use nominating in the Grand Circuit big events unless they own first-class material. To name two or three horses that fail to start or win means several hundred dollars out of pocket, if one names them on the Grand Circuit, and the statistics show that unless a horse can trot in 2:10 or pace in 2:05 he will not stand much of a chance to win on the big ring. As the majority of horsemen are, like the majority engaged in any other business, men of small means, they cannot stand the pressure of big entrance fees and many of them. The Grand Circuit has assumed such large proportions that it requires a good long sack to provide for a string of trotters and pacers and pay entrance on them. The horsemen are learning that the man with an average horse had better race at home or on the smaller circuits than to attempt to court Dame Fortune among the big purses that are hung up from Detroit to Lexington.

While the associations that have thus far closed big purses report a falling off in entries, the lists are not small ones by any means, and in a vast majority of instances the entrance money will pay the full amount of the purses. The Eastern associations have become so accustomed to having the purses more than paid by the entrance fees that they cannot help but feel a little disappointment when this is not the case with every purse. But they are not squealing hard, and, in fact, are more than pleased with the lists they have received and are already predicting the greatest year of harness racing that has ever been seen on the Grand Circuit.

Budd Doble left on Wednesday of this week for Los Angeles and after two or three days' sojourn in the City of Angels will go East to take charge of the McKinney stable. Kinney Lou and race him through the Grand Circuit. He told me on Tuesday that he would very likely move the horse to Glenville track at Cleveland and probably make his first start there. The information he received from Memphis is that the son of old Mary Lou 2:17 is in fine shape and feeling like a cat, so he has great expectations for him this season. Last year Kinney Lou was not right all through the summer and never had that dash and vim that a high class horse needs to carry him a fast mile. On taking him out for speed work the horse never came on the track fully, but was slow and sluggish. "Seldom could I get him to trot a first quarter much better than a 2:9 gal," said the great reinsman. "It took a long time to get him warmed up and anxious to race, and not until late in the fall that I considered him good enough to go a fast mile. The fact that

he trotted a mile better than 2:10 under those circumstances made me think he was a very high class trotter and I think so yet. I believe miles in 2:06 or better should be within his reach this year and as he showed me he was game and would go the route, I think he should win pretty well this year if he stays right."

The appearance of Budd Doble in the sulky behind this son of McKinney will be one of the features of the Grand Circuit this year and there will be many an old timer who has not been to the races for years who will get out to see the man who drove Dexter to his record of 2:17 at Buffalo in 1867, Goldsmith Maid to her record of 2:14 in 1874 and peerless Nancy Hanks to her mark of 2:04 in 1892. Doble is now 61 years of age, the same quiet, unassuming gentleman he has always been, and there is a legion of people in the United States who would gladly see him once again drive a trotter to the world's record.

The California consignment to the Blue Ribbon sale at Cleveland next month is the fastest lot ever sent from the Pacific Slope. Among those to be sold are Anzella 2:06½, Sir Albert S. 2:03½, Dolly Dillon 2:07, Rey Direct 2:10, Enoch 2:12½, Bonsilene 2:14½, Iloilo 2:16½, Lady Fair 2:17½, Vi Direct 2:18, Lou Dillon, trial 2:08½, last year, and has trotted a mile in 2:11½ already this season and a quarter in 29½ seconds, Thornway that has a trial of 2:10½ and a half in 1:03 in February, the three year old Griffith colt by Steiny out of Nola by Nutwood that paced a half in 1:01 at Pleasanton last week, and many others. There are but two weeks intervening before these horses will be shipped East and those who want to see speed of the two minute order should make the trip to Pleasanton before the horses leave for the sale. If no accident happens them, or sickness does not prevent, there will be some of the fastest halves and quarters shown at Cleveland that has ever been seen in the country during the month of May.

California is getting as much advertising in the east through her harness horses as through any other means. The State Board of Trade, the Boards of Supervisors of the different counties and many other organizations are spending a great deal of money to advertise California and her resources over there, but the California owners and trainers of harness horses are doing as much as any of these organizations to bring the advantages of our soil and climate to the notice of the eastern people. During the past two months the State has been visited by a very large number of wealthy men who are interested in trotters and pacers and on their return home have, through interviews in the leading daily papers of New York, Cleveland, Chicago, Boston, Baltimore and other large cities, spoken in unstinted praise of the climate and wonderful resources of our State and of the horses which they saw in training here. The money that has come to California from the East to pay for trotting and pacing horses runs into the millions, but it is a small sum compared to what can be brought here in the future, if the breeding and training of the light harness horse continues. There will go from Pleasanton about the first of next month a few California bred trotters and pacers consigned to an auction sale at Cleveland, Ohio, that will bring an aggregate of at least a hundred thousand dollars, which will be added to the cash account of California, and this consignment is only a very small proportion of the horses that will be sold out of the State this year. There are probably one thousand men earning on an average of \$50 per month in wages, now employed on California trotting tracks where horses are being trained solely for track and speedway purposes. There is not one person in a dozen outside those identified with the harness horse business who has any conception of the vast amount of capital that is invested in the American trotting horse and the values that are added each year by the breeding farms and training tracks to the taxable property of this State. And this vast industry has had its greatest encouragement in the past from the district fairs. These fairs have been kept up by a tax of less than one-quarter of one cent on each \$100 valuation, which is proof enough that they have not been much of a burden to the people. Ten times the sum required to support these fairs is paid out every year for salaries to a lot of utterly useless political hangers on who have offices created for them if they can be no other means provided to support them at the expense of the State. The State administration seems to think nothing of paying \$3000 a year to a needless official whose hardest work is to sign his salary receipt, but it balks at an appropriation of \$1000 to support a fair that benefits every person in the district in which it is held. Such is politics however, and it is an even thing between both parties, as the Democratic Budd and the Republican Pardee have shown.

One of the favorite arguments with the present

State administration is the statement that the district fairs are financially unprofitable inasmuch as the expenditures often exceed the receipts and for this reason claim they are unpopular with the people. It was never expected by the founders of the fairs that they would be money-making ventures, except in the general profit that grew out of the increased interest for improved live stock and other productions of the districts, which the fairs naturally aroused. There are many things for which the State spends its money for which no immediate profit is received. Take the Farmers Institutes, for instance, which have been held during the past few years in different sections of the State. It often happens that two or three University professors are engaged to lecture to the farmers of a community, and that not more than a half dozen farmers attend to hear them. There are always a few short-sighted persons who are ready to condemn these institutes as unnecessary expenditures of the public money because they are not largely attended, but those who give the matter any thought know that the State gets large returns for its money. The district fairs are much the same. They are schools of instruction for those engaged in fruit raising, grain growing, stock breeding and all other rural pursuits, and because they have sometimes been mismanaged is no reason why the State should withdraw its support from them.

## Horse News From Visalia.

VISALIA, CAL., April 11, 1903.

BREEDER AND SPORTSMAN—I recently enjoyed the pleasure of a visit to the farm of R. O. Newman, twelve miles north of this city, and was so much impressed by what I saw that I am constrained to write you a few items concerning the same.

Mr. Newman is not from Kentucky, but no native of the blue grass region is more enthusiastic in the business of breeding fine horses or surpasses him in love and admiration for that noble animal.

At this time his two year old Robert Direct is his especial pride and the center of interest for horsemen in this section. He is by Direct, dam Daisy by Robert Basler (son of Elizabeth Basler and Antevolo); second dam Richmond by Pasha, third dam Miss Roland by A. W. Richmond.

To look at him the impression created is one of perfect harmony; there is nothing to criticize adversely. His outline is perfection and were it not for his coltish appearance he would look a veritable race horse. His coat is black as the raven's wing and there is nothing in his color or contour for the eye to hang upon, so to speak. He is a square trotter and can show a twenty clip I am told, but it is evident that he could be made to pace with a very slight change in his shoeing. The speed and instinct he has already shown with a little handling verifies the anticipations of aptitude created by his breeding and appearance. His capacity to go fast miles and race successfully when matured and developed cannot be doubted.

Mr. Newman has a yearling Zombro filly that very happily blends the McKinney and Basler characteristics. Her dam is Dewdrop Basler by Robert Basler, second dam Ida May by Grosvenor, third dam Susie K. by Alric, fourth dam by Jack Hawkins.

Mr. Jake Broilair of this place has a two year old filly by Stoneway, son of Strathway, dam full sister to the dam of Robert Direct, that is a remarkably fast pacer, and those who have seen her perform predict that she will be a hot competitor for the stakes in which she is entered. This filly's dam has been bred to McKinley 36100.

This well bred son of McKinney is getting a liberal patronage from the horsemen of this part of the valley. The Perkins mares, including the dams and full sisters of Jasper Ayres, Visalia and Jaspine, all being bred to him.

There is great interest being taken in harness horses in this part of the State and more breeding is being done than ever before. It is, of course, not necessary to say that the people are thoroughly disgusted with the conduct of the Governor in cutting off district appropriations. We hardly expected such action from him. It is a great misfortune to have a governor whose vision is so contracted that he can only take in a small section of the State.

K.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST Secretary, 510 Golden Gate Ave., San Francisco, E. J. CRELEY, D. V. S., President.

KANSAS CITY, MO., Dec. 13, 1901.  
Messrs. J. W. Watson & Jones, Kansas City.  
Gentlemen—I have been using your "Strap, Veterinary and Hoof Ointment" on my horses and find it a great success. I can say it is one of the best Ointments for healing sores and softening the hoofs I have ever used. I am glad to recommend the same.  
Yours respectfully,  
C. S. GOULD, Manager,  
Kansas City Stock Yard Co.

Jackson's Napa Soda untangles the feet.

## Portland Sale a Great Success.

PORTLAND, Or., April 9.—J. L. McCarthy & Son's Inaugural Combination sale of fine horses, which closed here this afternoon, was a pronounced success in every way and established Portland as one of the greatest live-stock markets west of the Mississippi river. The worst weather seen in Oregon this winter was encountered, but there was a large attendance every day and bidding was spirited and strong throughout the entire sale. Every section of the Pacific Northwest was represented by one or more buyers and as early as Sunday horsemen began to arrive in the city and when the sale opened Tuesday morning Irvington Park presented the appearance of race-week. Portland horsemen had contended that a successful sale could not be held in Portland, but by Tuesday night they were unanimous in claiming Portland to be the greatest horse market in the Northwest. The sale had been thoroughly advertised and the large number of buyers on hand clearly showed that McCarthy & Son's work had not been in vain. The sale was conducted in a thoroughly business-like manner and the new firm made an enviable reputation for themselves as hustlers and auctioneers. The result of this sale makes future sales in Portland an assured fact.

A large number of the very best horses were purchased by Portland people and the many business and professional gentlemen in attendance at the sale shows the great amount of interest in the horse which is being fast developed by the Gentlemen's Driving Club. Mack Mack 2:15½, the greatest money-winning trotter on the North Pacific Circuit last year, was in superb condition and bidding on him was very brisk. Starting at \$800 the son of McKinney soon advanced to \$1000, and at that figure all the bidders except Sheriff Storey and J. R. Bowles dropped out. The sheriff stayed in to \$1,125 and the auctioneer then knocked the star of the sale down to Mr. Bowles at \$1,150. Mack Mack was turned over to H. H. Helman, a former California trainer, who will fit him for this year's campaign. Good judges look for Mack Mack to step in 2:10 or better the coming year.

Fred Brooker, of North Yakima, who had just returned from a sojourn in the Golden State, purchased Mark Hanna 2:24½ for \$925 and expects to win the \$2000 Lewis & Clark stake to be trotted at the Oregon State Fair next fall. Sheriff Storey got A. T. Van de Vanter's fast pacer Harry Hurst at \$600 and thinks he stands a grand chance to win the Greater Salem Stake of \$2000, for 2:17 pacers, at Salem this fall. San Toy, a handsome daughter of Lovelade was knocked down to J. R. Bowles, of Portland, for \$500 and Trainer Helman has a likely candidate for 2:15 honors the coming season.

The consignment of the estate of the late Congressman Tongue, consisting of 48 head brought \$7860, an average of \$164 per head. With the exception of Mark Hanna, San Toy, Rocklace and Ben Bolt, they were in poor condition and the average is therefore remarkable.

One hundred and three head were disposed of in the three days for a total of \$19,785, an average of \$192 per head, certainly a grand showing for an undeveloped market.

A. T. Van de Vanter disposed of his great young McKinney stallion, McAlropa, to J. A. Baddely, of Weston, Oregon, at private sale for \$2000.

The following are the best sales made:  
Ben Bolt 2:18 by Alexis-Maggie; Miss Maud Hudson, Portland, \$450.

Bay mare by Fred Hambleton-Maggie; H. E. Edwards, Portland \$165.

Brown gelding (2) by Mark Hanna-Bessie; A. T. Webb, Troutdale, Or., \$195.

Bay filly (3) by Duke of Portland-Kitty Planter; G. A. Westgate, Albany, Or., \$170.

Chestnut gelding (2) by Lovelace-Maud; G. J. Rohse, Fulton, Or., \$275.

Black gelding (3) by Vinmont-Maggie; E. O. McCoy, The Dalles, Or., \$160.

Gray mare by Fred Hambleton-Sally Burrell; J. J. Larson, New Whatcom, Wash., \$150.

Carrie Nation (3) by Lovelace-Dora; T. A. McCourt, McMinnville, Or., \$160.

Roxey by Rockwood-dam by Kisbar; J. J. Bottger, Vancouver, B. C., \$185.

Black filly (2) by Lovelace-Marigold; J. B. Stetson, Boise, Idaho: \$200.

Rocklace (4) by Lovelace-Roxey; J. B. Stetson, \$455.

San Toy (3) by Lovelace-Marigold; J. R. Bowles, Portland, \$500.

Black filly (2) by Lovelace-dam by Fred Hambleton; F. T. Merrill, Portland, \$175.

Maud by Planter-Marigold; W. R. Kirkwood, Hope-well, Or., \$165.

Bay gelding (4) by Lovelace dam by Lemont; E. S. McGraff, Portland, \$200.

Mark Hanna 2:24½ by Planter-Kitty Ham; Fred Brooker, North Yakima, Wash., \$925.

Black gelding by Vinmont-dam by Fred Hambleton; Dr. Stolte, Portland, \$170.

Bill Frazier 2:14 by Pricemont-Miss Mann; A. T. Van de Vanter, Seattle; \$365.

Nellie Coovert 2:26½ by Touchet-Pussy Ivanhoe; Fred Sechtem, Portland, \$400.

Al Kinney by McKinney-Umatilla; A. McDougal, Tacoma, Wash., \$230.

Team of brown mares by Malbrino; C. A. Bell, Hood river, Or., \$385.

Team of black geldings; J. J. Bottger, Vancouver, B. C., \$325.

Team of sorrel mares by Lemont; L. A. Patterson, Portland, \$260.

Joe Caution by Caution, dam by Lemont; Geo. Chandler, Baker City, Or., \$210.

Charlotte Wilkes by Scarlet Letter-Betsy; J. M. Mann, Portland, \$250.

Amanda Q. by Phallamont Boy-Amanda Phallamont; O. Widenor, Portland, \$150.

Marshall Field by Lemont-Codicil; J. A. Richardson, Boise, Idaho, \$285.

Ned Thorne 2:11½ by Billy Thornhill-Lady Nutwood; Dr. Connell, Portland, Or., \$400.

Alton B. by Altamont-Tecora; Frank Frazier, Pendleton, Or., \$275.

Weary Willie by Al Kinney-Black Bess; A. Vann, Vancouver, Wash., \$160.

Mack Mack 2:15½ by McKinney-Nancy; J. R. Bowles, Portland, \$1150.

William C. 2:29½ by Bonner N. B.; N. K. West, La Grande, Or., \$410.

Lovessa by Lovelace-Timosa; J. H. Carey, Portland, \$300.

Nance by Hambletonian Mambrino-Lena; J. J. Bottger, \$230.

Dolly by Hambletonian Mambrino-Lady Wood; J. Connardo, Portland, \$225.

Alta Maid by Pricemont-Alice Mann; E. H. Sterling, Portland, \$190.

Pathmark 2:11½ by Pathmont-Juliet; J. H. Beckley, Portland, \$400.

Kinmont by McKinney-Beulah; Geo. W. Loggie, New Whatcom, \$350.

Della Norte 2:24½ by Del Norte-Slyetta; J. A. Richardson, Boise, \$305.

Chief Seattle by Prince Direct-Moxie Van; Ed Cudibee, Seattle, \$445.

Erectmont by Erect-Alice Man; W. A. Storey, Portland, \$325.

Harry Hurst 2:23½ by Del Win; W. A. Storey, Portland, \$600.

Wascoe Lass by Cour d'Alene; R. J. Ireland, Tacoma, Wash., \$155.

Gold Wood by Nutford-May Malvernion; Harry Ruhl, Portland, \$275.

Solo, chestnut gelding; J. J. Bottger, Vancouver, B. C., \$215.

Gray saddle gelding; A. T. Van de Vanter, Seattle, Wash., \$150.

## Items from Santa Barbara.

SANTA BARBARA, April 6, 1903.

EDITOR BREEDER AND SPORTSMAN:—This vicinity is looking fine after the plentiful rains, and the people interested in the horse business are restless and anxious since it became generally known that we no longer have a race track. The Southern Pacific Company has purchased the old track for railroad purposes. I think now is the time for the people of the county to act for themselves and have a track of their own. The Southern Improvement Company would very likely meet them half way. Such is the talk at least among the knowing ones. The improvement company certainly has several desirable localities on its famous Hope Ranch possessions.

The horse business is booming in prices, and more breeding is being done than for years past. I think that we have some Neal W. and Almonada youngsters that will be heard from. The former is the sire of a three-year-old pacer owned by George Robbins that is showing up finely, and I have a two-year-old Almonada that I brought up to Santa Barbara two weeks ago to be driven and timed by some of the doubting Thomases. The said colt is the property of Martin Mythen of Carpinteria. I hitched him with his sire Almonada, and he was first driven by Mr. George Rutherford Jr. (known in these parts as the Ed Geers of the Pacific Slope). He drove him two quarters in 40 seconds each, the writer in the buggy with him. My weight is 208, and George R. is no light weight. The next heat he was driven by our well-known dude driver, C. F. Thayer. He sent them a half—the first quarter in 38 seconds when the watch was snapped. He disobeyed orders, however, and drove him the entire half at about the same rate of speed. This was accomplished on a back street, reckoning the blocks from center to center as 500 feet. They actually run from two to five feet over according to official survey.

I had Rutherford and Thayer drive purposely, as they were the doubting Thomases, offering to bet me he could not trot the quarter in 43 seconds. I declined to bet for fear they would pull on the lines.

This colt has never been stabled a night. He runs in an alfalfa patch by day and is tied in a shed at night. His owner is a day laborer and has no time to attend to him otherwise.

There are many of Almonada's colts, equally as good if not better bred, that are owned by men of means. Yet this poor Irishman is teaching them what a little deserving attention will do for man's best friend. I hope it may have its effect on the self-boasted horsemen of Santa Barbara, for it was seen by some of them that have equally as good colts neglected in pastures. Some of them never lose an opportunity to boast of their horsemanship, both at the reins and in

the saddle. This colt is out of an Electro mare, grandam by Jim Brown (thoroughbred) and third dam by Owen Dale. It was the fourth time the colt was hitched double. He weighed 820 pounds last Thanksgiving Day, and will now weigh 900 or more.

Almonada has long since recovered from his lameness. He is not a good companion for a colt, as he goes too heavy against the bit. But this colt did this without a hitch or a break. Yours,

D. F. OGLESBY.

## Items of Interest From Red Bluff.

ED. BREEDER & SPORTSMAN: A trip to Red Bluff after six years absence resulted in a great surprise to me over the revival of harness horse breeding and training, and the all-around interest in the greatest of the equine species. Six years ago I believe there was one horse of the cheap kind in training at the Red Bluff track, to-day there are many and the grounds on workout days remind one of the leading training centres. And this in spite of the Governor's blow at the industry. The horsemen at Red Bluff are firm believers in the law of the survival of the fittest, and know that no discouragement or vetoed appropriation bills will prevent the grandest horse on earth from taking his place at the head of the equine breeds.

Trainer William Brown has in his stable six or more in training, including Bankers Daughter 2:13½ and a fast gray mare that looks to be headed for first money when the bell rings. They are the property of Mr. B. Croner of San Francisco.

Trainer Rowley, of Prince L. fame, has this horse in great shape, and if he starts him will have business with the secretary after the race. Mr. Rowley is also handling several colts by the great Zombro 2:11, one of which (entered in the Occident Stake of next year) is out of a mare by Stamboul 2:07½. These horses are owned by Mr. Robert Freeman of Red Bluff.

R. Shannon has about the sweetest two year old McKinney colt in the State. His dam is an Altamont mare, and without much work the youngster can step a 2:20 gait. I want to predict a great future for this two year old.

F. N. Frary has the Palo Alto bred two year old colt Loring by Nazote out of Ladywell by Electioneer, that looks like goods that are a yard wide and all wool. He also has Ruth and Ruby, a pair by Steinway that are fast and a great team.

Robert Freeman has recently purchased a young stallion by Sable Wilkes that is a corker, and will become very popular here with breeders. Mr. Freeman is also the owner of Prince L. by Escort out of Queen L., and I believe has just sold him to Denver parties for \$1500 cash in hand. A mark of 2:12 will not stop this trotter.

J. V. Andrews is jogging a few colts of his own breeding that are very promising. He is breeding horses on a small but very select basis. He has a splendid two year old colt by Altamont out of Prince L.'s dam that is much admired; also a four year old by Waldstein from the same dam that is a good one, and a filly he calls Miss Bessie by Gossiper out of Lizzie R. by Anteeo, that will get the money when started. Lizzie R. is the dam of Lady Fair 2:17½ and other good ones and I predict that the Andrews farm will furnish some standard performers in the near future.

There are many other horses here that I must reserve for future mention for want of time.

OCCASIONAL.

## Pleasanton to Hold a District Fair.

[Pleasanton Times, April 11.]

In response to a call which was issued to the business men of Pleasanton the early part of the week, about fifteen met in the parlors of the Pleasanton Hotel to discuss the proposition of holding a Fourth of July celebration here this year, and after earnestly discussing the question it was decided not to hold a celebration on the Fourth, but to hold an agricultural fair and race meeting for a week some time in September, the date to be decided on later.

The arguments put forth in favor of the fair were so convincing that the decision was unanimous. It was argued that in giving a Fourth of July celebration all the resources at our command could not be utilized to their fullest extent and practically the same amount of money would have to be raised to give a successful celebration for one day as would be required for a week's fair. Besides we are favored in having a fine race track and pavilion and are in better shape than most places to give a fair.

The officers who were chosen to handle the affair were C. L. Crellin, president; W. H. Donahue, vice-president; Fred E. Adams, secretary, and the Bank of Pleasanton, treasurer.

A meeting will be called shortly to perfect the arrangements, claim a date and see about the financial end of the affair. It is the intention at present to give a fair in all respects the equal of the one given last year. It is not too early to commence to boom the affair, for we want every person in the State to know that Pleasanton is to have a district fair.

## Our Cleveland Letter.

CLEVELAND, April 13, 1903.

The famous Glenville track at Cleveland, Ohio, promises to be a busy spot after May 1st. Applications for stalls are daily being received and a large number of the big stallions that expect to race down the circuit circuit will give their horses their finishing touches at Glenville before starting out for the money. There are 100 stalls in the stables owned by the Cleveland Jockey Park Company, while private stalls in connection with the track will accommodate no less than 200 additional horses, and yet it looks as if every available stall will be taken by the middle of May. Half a dozen stables have arrived within the past ten days, including those of Ben Kenney and T. W. Price, both of whom have been wintering at Lexington. The former has half a dozen green ones and will also receive the pacing mare Daphne Dallas 2:05 in a few days. Mr. Price brought eleven head with him, prominent among which are Neva Simmons 2:11½, a mare that raced successfully in 1901 but went lame early last season and was saved over until this year. He also thinks well of the mare Woodtella by Axtell 2:12, his M. & M. candidate, and the green pacing mare Miss Georgia by Regal Wilkes 2:15½, and as the latter worked a mile in 2:08½ last fall, she should be heard from this summer. There are now 150 horses at Glenville, Vance Nuckols having fifteen, including Rosebud 2:08½, Arch W. 2:11½, Dakota Dan 2:12½, Queen of Spades 2:16½ and Theron Powers 2:17½, all pacers with the exception of Arch W. T. H. Galliger, who is the local superintendent for the Fasig-Tipton Co., is jogging Schley Pointer 2:08½ by Star Pointer 1:59½, and Belle Dillard 2:16½, and will have them ready for the work early in the season.

A. C. Pennock has five or six that he expects to race over the half-mile tracks, including Minnie Jones 2:15½, pacing, and the trotter Raymond B. 2:21½. He thinks particularly well of a green sidewheeler that is a full brother to Jack 2:10½ and Jack's Brother 2:11½. Charles T. Garfield is jogging ten, Marie C. 2:16½, Little Timber 2:18½ and Cash Jr. 2:20½ being his record trotters, while he has several green ones that show up well in their early work. Charley Lyon, who made such a good campaign with the young trotter The Rajah 2:14½ last season, is working 25 two and three year olds for Henry Schulbach, the Wheeling, W. Va., breeder, including a number that are well entered in Futurities. Among the other trainers now at the track is J. M. Nelson, of Alameda, Cal., who recently arrived with six, including Vyzant Jr. (3) 2:20½, Halgreta (3) 2:23½, China Maid by McKinney 2:11½, Richard S. by Grover Clay 2:23½ and Fleet Onward by Onward 2:25½. The veteran reinsman John Splan has a green trotter in Bi-Flora by Expedition 2:15½ that should be heard from in the slow trotting stakes this year. She has been a mile in 2:11 and has wintered splendidly. Among the prominent stables that will be here by June 1st are those of Ed Geers, W. L. Snow, E. E. Ecker, W. B. McDonald, W. O. Foote, Budd Doble, Millard F. Sanders, Monroe Salisbury, B. O. Shank, Scott Hudson and others.

The five year old mare Italia (3) 2:23½ by Zombro 2:11, that W. P. Murray purchased at Los Angeles, Cal., a year ago, has filled out and looks like a different mare than when she arrived here last May. No effort was made to work her last season, but in the fall she was given her head one day and she trotted a half in 1:55½.

H. K. Devereux's great trotting stallion John A. McKerron 2:05½, wagon record 2:06½, by Nutwood Wilkes, will remain in charge of Ed Benyon, at Lexington, until June 1st, when he will be shipped to Cleveland. Many of the wise ones look for this good gaited trotter to be the fastest performer of 1903 at that gait. There are three colts by him at the track at this time, all of them being splendid individuals and having a good way of going.

Charley Mae 2:07½ by McKinney 2:11½, a gelding that has wintered in charge of "Doc" Tanner, has been sent to New York with seven other fast ones, including the trotters Louise Jefferson 2:09½, Imogene 2:11½, Fanny Foley 2:11 to wagon, and the pacers Hontas Crook 2:07½, Home Circle 2:08½ and Willard T. 2:24½. They are to be driven on the New York Speedway this spring by C. K. G. Billings and will return here in time for the opening of the matinee season in June.

While in California a year ago E. Holmes purchased the bay mare Marianne by Nutford. He drove her at the matinee last season giving her a wagon record of 2:14 and it looked as if the mare should beat 2:15 this year. While being clipped the other day she slipped her halter and ran out into the street, collided with a street car and was instantly killed.

A glance over the list of the various early closing of the Grand Circuit tracks show that more green trotters and pacers are to be raced here this season than ever before. The chestnut mare Lou

Dillon by Sidney Dillon, the sensational green trotter owned by the Santa Rosa Stock Farm, is entered in the \$10,000 Merchants' and Manufacturers' Stake for 2:24 trotters at Detroit, also in the \$5000 Electric City Stake for 2:25 trotters at Buffalo. Eastern horsemen look for her to be the one to beat at Detroit, provided she will stick to a trot and race.

The green pacer Mush by Lottery Ticket, now in Monroe Salisbury's stable at Pleasanton, Cal., is a sidewheeler that is occasioning much talk these days in this part of the country, his reported mile in 2:11½, and quarter in 29 seconds, making him look like a dangerous factor. He is well entered, among his engagements being the following: \$5000 Chamber of Commerce Stake for 2:24 pacers at Detroit; 2:23 and 2:15 paces, \$2000 each, at Cleveland; \$5000 Frontier Stake and \$2000 Empire State for 2:25 and 2:14 pacers, respectively, at Buffalo; \$3000 event for 2:20 pace at the Empire City meeting, New York; \$5000 Metropolitan Stake for 2:20 pacers at Brighton Beach meeting; \$5000 stake for 2:25 pacers and \$3000 event for 2:10 pacers at Readville. The bay trotting gelding Monroe by Seymour Wilkes 2:08½, dam by Geo. M. Patchen Jr., in Monroe Salisbury's stable, also, is another one that is well engaged. I presume this is the horse known as Col. Talbot at Pleasanton. His engagements are as follows: Detroit, \$10,000 M. & M.; Cleveland, 2:28 and 2:19 trots; Buffalo, \$5000 Electric City Stake for 2:25 trotters; Empire City meeting, \$5000 2:09 trot and \$5000 2:20 trot; Brighton Beach, Hiram Woodruff Stake for 2:20 trotters; Readville, \$5000 2:30 trot and \$3000 2:16 trot. Mr. Salisbury has also entered Monte Carlo 2:09½ in the \$5000 stake for 2:09 trotters at the Empire City meeting. Emma Isabelle Howard, of Los Angeles, Cal., has named the trotter Bonnie Russell by Conifer, dam Bonnie Ella by Bonnie McGregor, in the M. & M. at Detroit, and the \$5000 Empire Stake for 2:20 trotters at the Empire City meeting.

Budd Doble's fast trotting stallion Kinney Lou by McKinney, now wintering at the Walnut Hall Farm, Donerail, Ky., is entered in the 2:28 trot at Cleveland, and this will probably be his first start of the season. His name is also seen in the list of entries to the \$5000 Electric City Stake for 2:25 trotters at Buffalo, and the \$5000 events for 2:20 trotters at the Empire City meeting and that at Brighton Beach, the first at Yonkers, N. Y., and the other at Brooklyn, N. Y., the two handiest mile rings to New York city.

Chanslor & Canfield, of Los Angeles, Cal., have nominations in the \$20,000 Bonner Memorial Stake at the Brighton Beach meeting, and in the \$15,000 Massachusetts Stake at Readville, both being for 2:12 trotters.

Juan Gallegos, San Jose, Cal., has the two pacers Diabla by Diablo 2:09½ and Trilby by Direct 2:05½ entered at several of the above meetings, while J. C. Kirkpatrick, of San Francisco, has named Thornway by Steinway in the \$2000 2:23 pace at Cleveland, and in the \$5000 events for slow pacers at Buffalo and Readville.

A number of the associations whose meetings follow those named, have not as yet announced their entries to early closing purses, but undoubtedly the California horses will also be found in the list of entries to the later meetings.

Every indication points to the most interesting and successful season's sport in the history of the light harness turf and the Eastern horsemen are pleased to have the company of their Pacific Coast brethren.

## Answers to Correspondents.

Did Lochinvar, a black stallion owned by James Brown, or by Brown and Blamey, win a race and purse at Colusa, Cal., last year?

Very respectfully,

CHAS. W. KITTS.

Yes. On August 16th, he won the 2:20 class trot in straight heats. The time was 2:24, 2:21 and 2:21. H. D. B. won second money and Prince L. was third.

"Curly" Brown has accepted the appointment as starter at the Pimlico meeting, which follows after Benning's. Mr. Brown retired from the starter's box two years ago, after having earned the reputation of being one of the best starters in the country. His work on the Canadian circuit proved irksome for several reasons, and he gave it up and devoted his time to the care of the racing stable which he formed in partnership with Mr. Liger. His acceptance of the Pimlico position is out of courtesy to the management. His horses will be shipped to Aqueduct.

Bouzetta 2:06½ by Onward, dam Boulah by Harold, is dead at the Patchen Wilkes Farm near Lexington, Kentucky, from typhoid pneumonia. Bouzetta was twelve years old, bred by Ed Ayres, a poor Kentucky farmer, who won \$21,430 first money in the Kentucky in 1894 and then sold her to Peter Duryea and W. E. D. Stokes for \$17,500. She has produced three colts, two of which were by Patchen Wilkes and one by Axtellion 2:15½.

## The World's Greatest Sires.

Nine sires are now in the list of horses represented by 100 or more standard performers as follows:

Onward 2:25½	169
Nutwood 2:18½	168
Red Wilkes	161
Electioneer	160
Alcantara 2:23	151
Gambetta Wilkes 2:19½	117
Wilton 2:19½	113
Simmons 2:28	110
Baron Wilkes 2:18	104

In the list of horses which have bred on through their sons, George Wilkes still stands at the head with over 2500 standard performers to the credit of his sons. The list of those sires whose sons have sired 500 or more standard performers is as follows:

George Wilkes 2:22	2521
Hambletonian 10	1700
Electioneer	1044
Nutwood 2:18½	763
Belmont	645
Almont	582
Red Wilkes	524
Onward 2:25½	502

To carry the tables still farther there are 15 sires whose daughters have produced 100 or more standard performers, they being as follows:

Nutwood 2:18½	202
George Wilkes 2:22	173
Blue Bull	167
Mambrino Patchen	152
Strathmore	139
Red Wilkes	135
Almont	130
Hambletonian 10	117
Belmont	116
Electioneer	111
Onward 2:25½	107
Happy Medium	106
Dictator	102
Daniel Lambert	102
Harold	100

It will be noticed that Onward, Nutwood, Red Wilkes and Electioneer appear in all three tables, while Hambletonian 10, George Wilkes, Belmont and Almont appear in two of the tables, a fact that rather discredits the theory once prevalent that the Hambletonian family, while prepotent in the male line, was not especially so in the female line. The two leading sires of broodmares, Nutwood and George Wilkes, belong to the Hambletonian family, and 12 of the 15 sires in that table are of the same family. Mambrino Patchen comes fourth in the table of broodmare sires, while that wonderful old plebian, Blue Bull, stands third. These tables, always interesting to breeders, are particularly so just now when sires are being selected to patronize the coming season.—*Horse World*.

Rosy Morn the famous producer of speed now in the Dreamwold Stud on March 16th dropped a black foal by Daredevil 2:09. Rosy Morn is one of the greatest producers alive having given birth to Matin Bells 2:06½, Boreal 2:15½ sire of Boralma 2:07, The Curfew 2:27, Prince Leon 2:28, sire of Van Meter 2:16, and Beauseant 2:12. Mr. Thomas W. Lawson, who owns her and her new foal, states that inasmuch as the new arrival's dam is Rosy Morn, her second dam Noontide, third dam Midnight, fourth dam Twilight, fifth dam Daylight, sixth dam Darkness he has christened her Dreamwold Dawn. Rosy Morn will be bred to Dreamer.

Public betting on horse races in Texas will cease on July 1st. The most drastic anti-pool selling bill possible to frame passed both houses of the Legislature and was signed by Governor Lanham. As the new law contains no emergency clause, it becomes effective ninety days after adjournment of the Legislature, set for April 1st. For each day's violation pool sellers, bookmakers or other gambling managers are subject to \$500 fine and ninety days' imprisonment. Owners or lessees of property used in violation of the law are subject to similar punishment.

Routine business was chiefly transacted by the Western Jockey Club in the afternoon at its monthly meeting held last week. Application for licenses from trainers and jockeys were mostly considered, and granted in each case where the applicant was in good standing. Among the jockeys to whom license was granted to ride was Milton Henry, recently barred from the French turf. Applications to be restored to good standing by owners who participated in the Newport racing were denied.

Henry Ward Beecher once, when about to take a ride behind a fine looking horse, said to a man: "That is a fine looking animal. Is he as good as he looks?" The man replied: "Mr. Beecher, that is the best horse in our stable. He will work any place you put him and will do any work any horse can." After eyeing him a moment, the great preacher said: "I wish to goodness he were a member of our church."—*Exchange*.

There is nothing better for contracted feet, corns, or brittle and sore feet than Campbell's Horse Foot Remedy. It is a hoof grower and supplies the nourishment needed to counteract the bad conditions always present during the spring. Many of the diseases of the feet of horses which render them unfit for hard work, and cause a loss just at the time when most needed, can be either wholly prevented or easily cured at small expense if this preparation is used in the early stages of disease. It pays to look after these things.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Notes and News.

Geers has fourteen black horses in the string he is working at Memphis.

The first Diablo to be foaled in Oregon is a beautiful bay filly out of the Altamont mare Vevo.

Anaconda continues to take his work nicely in an open bridle and leather bit for Fred Noble.

Ten \$1000 purses will be hung up for the harness horses by the Minnesota State Fair this year.

Julia M. by Zombro, in W. L. Snow's stable at the Jewett covered track, is counted a 2:10 prospect.

Key Direct 2:10 and three or four of his get will be sent to the Blue Ribbon sale by Geo. A. Davis of Pleasanton.

An Eastern owner has named his colt by Idolita 2:09½ Pierpont Morgan with the expectation that he will get all the money.

Andy Welch predicts that harness races will be trotted over turf or grass tracks in this country in the near future.

The catalogues for the Mokelumne Stock Farm sale are out. Send for one to Fred H. Chase & Co., 1732 Market street, San Francisco.

Geo. R. Ford, of Santa Ana, has sold three young trotters by Neerut 2:12½ to Mr. H. G. Arms, of Chicago, who will ship them home soon.

The stalls at the Alameda track are about all filled and there are about twenty-five trotters and pacers worked there. The track is in fine shape.

W. O. Foote will race the trotter Porto Rico 2:14 by Electric this season. This fast Denver gelding trotted a quarter in 28½ seconds on a wager last year.

From the advance reports of the various pairs of trotters to try for team record honors, the long standing 2:12½ of Belle Hamlin and Honest George should be displaced this season.

May 14th is the day set for the departure of the Salisbury string for the East. Mr. Galleagos, of Mission San Jose, will ship his two, Trilby and Diabla, in the same car.

If you want an extra good prospect for the track attend the sale of the Mokelumne Stock Farm horses at Fred H. Chase & Co's Salesyard 1732 Market street, this city, on Tuesday evening, May 5th.

M. J. Weber, of Rohnerville, writes the BREEDER AND SPORTSMAN that the race track at that place is in good order and that racing will be held there on the 4th of July and there may be a fall meeting.

Billy McLaughlin is training Tom Griffin's horses at Lexington. He has the trotter Black Bart 2:17½ that Griffin bought of Tom Charlton in Ukiah, this State, in 1902, and thinks he will lower his record this year.

Grace, dam of three in 2:20, by Buccaneer is one of the greatest broodmares in California. She will be sold at the dispersal sale of the Mokelumne Stock Farm at Chase & Co's Salesyard, in this city May 5th.

Get the McGregor blood through Silver Bow 2:16 and Mokelumne 37558 at the Mokelumne Stock Farm Sale. The blood of the sire of Cresceus 2:02½, champion trotter of the world, is getting more valuable every year.

Salinas will not permit the Governor's veto to destroy its annual harness racing. A three days' meeting will be announced soon and early closing stakes for three year old pacers and two year old trotters are to be offered.

Those who secure fillies by Daedalion 2:11 at the Mokelumne Stock Farm sale on the evening of May 5th, will get something royal for the breeding ranks. There are only a few of them but they are bred in the right lines.

The old broodmare Cornelia B. by Blue Bull is twenty-four years old this spring but has just produced a fine lusty foal by Sunrise Chimes. Cornelia B. is the dam of two with records below 2:20, and grandam of another.

A green pacer by Silkwood, named Highball, paced a mile in 2:12 for I. Mosier last Friday at the Los Angeles track. Highball is out of a running bred mare and is a great prospect. He can step a mile better than 2:10 and will bear watching.

The McCarthy combination sale at Portland, Ore., was a big success. The horses averaged \$192, which is a splendid showing as there were about forty head from the estate of the late T. H. Tongue that were mostly young things and in poor condition.

Keybel, the three year old filly by Key Direct 2:10, dam Mabel, the dam of Directly 2:03½, worked a half in 1:03½, last quarter in 30½ seconds on Wednesday of last week at Pleasanton. She is one of the smoothest gaited pacers ever seen on the Pleasanton track.

There is not one of the entire consignment from the Mokelumne Stock Farm to be sold by Fred H. Chase & Co. May 5th in this city, but is a good individual. This is the stake to buy either for training or breeding.

According to the New York Sun, the Turf, Field and Farm has been purchased by the Sports of the Times, and that one more issue of the former will come out, and then the two papers will appear in a consolidated issue.

Oscar Ames, of Wheaton, Illinois, is now the owner of Dan W. 2:17½ the roan horse that J. M. Nelson took east last year to race. Dan W. has improved so much under his new management that he is looked upon as one of the best horses in Illinois for the 2:18 class this year.

The three year old filly Miss Todd by Peter the Great 2:07½ out of Fanella 2:22½, dam of the sensational colt Todd, has been entered in several three year old stakes under the name of Sadie Mac. This filly showed remarkable speed as a two year old and sold for \$12,000.

So well does Mr. Salisbury think of his green trotter Monroe by Seymour Wilkes that he has nominated him in some of the same events in which he has named Monte Carlo 2:09½, under the condition which permits two or more horses to be named for one entrance fee, although only one can be started.

Mr. Ed Topham, of Milpitas, was in town this week and says the grass in the pastures in that section is growing faster than he ever saw it and that the colts and mares are all doing well. Last week three colts were dropped at his place, one by McKinney and two by Monterey 2:09½, all out of well bred mares.

If a series of races could be arranged between Dan Patch 1:59½ and Prince Alert 2:00, the same would probably result in a new world's race record. While the majority of horsemen may think Dan Patch the best of the two, Mart Demarest is anxious to make a match, and will back the fast hopped gelding.

A visitor to the Pleasanton track was talking with Monroe Salisbury the other day about training horses to go fast and good gaited, when the king maker offered the following: "You will find it just about as easy to hire a man to make you a million dollars, as to make you a trotter that can win on the Grand Circuit."

The Baywood Stud, San Mateo, sold a very fine pair of horses to Miss Crocker last week. Mr. Parrott writes us that he has a very fine single horse, a bay gelding five years old about 15.2, a magnificent animal for a gig, plenty of action, good looks and rare conformation. If he could match him he would have a \$3000 pair.

Mush was given three heats at Pleasanton on Wednesday of last week. The first two, in the nature of warming up miles, were in 2:22 and 2:18. The third heat Ben Walker took him up to the half in 1:06 and then let him step home. He came the last half in 1:03½ and last quarter in 30 seconds flat, making the mile in 2:09½.

The Driving Club in Denver suffered a severe loss a fortnight ago when Andrew D. Moorhead died suddenly in his carriage. Mr. Moorhead was one of the most enthusiastic supporters of the matinee meetings and among other fast performers in recent years has owned and driven Aulse 2:10½, with which he always won or was close up.

The terms of three Directors of the State Agricultural Society will expire next month. Those whose terms are out are Jos. E. Terry and John Mackey of Sacramento and M. D. Chamberlain of Yolo county. These vacancies with the resignation of President A. B. Spreckels will give the Governor an opportunity to appoint four new directors.

William Hogboom has in training at the track at Walla Walla, Washington, a three year old colt called Teddy that has already paced a mile in 2:27 with little work. He is by Diablo 2:09½ out of the great broodmare Elmorine, dam of four in the list. The five year old trotter Charles H. by Lynnmont out of Elmorine showed him a mile in 2:19½ last year.

Blue Bull 75 is still among the leading sires. The new volume of the Year Book credits him with 56 trotters and 4 pacers in the standard list, 48 sons that have produced 55 trotters and 77 pacers and 108 daughters that are the dams of 82 trotters and 85 pacers with standard records. As he did not leave more than 200 daughters in all probability, this showing through them is most remarkable.

Boston is to have its cart-horse parade on Memorial Day. A committee of merchants which has had the selection of the date in charge chose as it did in response to the request of the drivers that a legal holiday be chosen so as not to interfere with their regular work and to give every one a chance. It is said that almost all the prominent horse users of Boston have promised that their best shall take part in the parade.

Fred Chadbourne, who is training the pacer Ben F. 2:22½ at Pleasanton, drove him a half in 1:03½, last quarter in 31 seconds last week. Ben F. is ten years old and has only started in one race, which was at Concord in 1901. He won in straight heats in 2:22½, 2:23 and 2:24, and this year was turned over to Mr. Chadbourne to train, who has succeeded in making a lot of improvement with him. Ben F. is by Bradtmoor 19,616, dam Carolla by Steinway. He was bred by Ed Dinkelspiel, editor of the Suisun Republican, and gives every promise of being a 2:10 performer.

It costs considerable more than service fees to raise a colt until it is a yearling. There are a half dozen as well bred yearlings as were ever foaled in California to be sold at the Mokelumne Stock Farm sale at Chase & Co's Salesyard in this city Tuesday evening, May 5th.

S. T. Coram, of Newark, advertises two well bred mares for sale that are in foal to Gossiper 2:14. There are few better bred horses in California than Gossiper, and his death a few months ago was a loss to the State. If the foals from these mares should be fillies they will be especially valuable. Write to Mr. Coram for prices of these mares.

Vanguard, the Australian thoroughbred sire and good race horse, is getting quite a reputation as a sire of trotters. The New Zealand Referee states that his progeny take to trotting as naturally as if got by standard trotting sires. At the Otahuhu meeting last month two of Vanguard's get won trotting races. One of them was the bay gelding Taihoa that won the Electric handicap at a mile in 2:32. This race was to saddle.

William G. Layng, the popular live stock auctioneer informs us that he will have a half page advertisement in the BREEDER AND SPORTSMAN next week announcing the sale of all the horses of the Pierce Estate. There are about 300 head in all, including Sidney Dillon and the other stallions and all the fine broodmares. The campaigning stable of the Santa Rosa Stock Farm is to be sold at Cleveland by the Fasig-Tipton Company May 11th, but every hoof of the horses remaining are to be sold by Mr. Layng.

Mr. P. W. Bellingall, the well known Custom House broker of this city, claims the name Good Friday for a colt foaled April 10th at his Oakland home. The colt is by Nutwood Wilkes 2:16½ out of Mi-Ma by Secretary, grandam by Geo. M. Patchen Jr., great grandam by Almont 33. Mr. B. says he thinks this fellow will win the Breeders Futurity for foals of this year. Mi-Ma is one of the fastest and sweetest road mares in California. She can trot a 2:20 gait on the road at any time, does not pull an ounce and her owner can control her entirely by the voice. She could take a low record if trained.

The Eastern gentlemen who visit California are getting badly misquoted by the turf writers of the Eastern press. According to one of the pencil pushers Mr. Smathers gave out the information that Monroe Salisbury bought his pacer Mush for \$300 in Texas. The horse was bred and raised in California, being by Lottery Ticket out of a mare by Richard's Elector. The price paid by Mr. Salisbury was \$1300. Another report credits R. L. Barnes with saying that Sweet Marie is a full sister to Charley Mac 2:07½, which will be news to the men that bred them. While both are by McKinney Charley Mac is out of a mare by Doncaster, and Sweet Marie out of a mare by Mambrino 1789.

The five year old bay trotting mare Italia (3) 2:23½ by Zombro 2:11, that W. P. Murray purchased in California a year ago, has wintered splendidly and is being jogged daily, being in "Doc" Tanner's stable. This filly won the California Occident Stake for three year old trotters in September, 1901, this being one of the classic turf events on the Pacific Coast, and took a record of 2:23½. No effort was made to work her much last season, it being Mr. Murray's desire to get the mare thoroughly acclimated and allow her to mature more fully. Last fall she was allowed to step a half and negotiated the distance in 1:05. She is hearty and strong and should be heard from at the matinees this summer.—American Sportsman.

A trotting bred stallion was sold in Australia last month for \$5000. The stallion sold was Rothschild, a son of the successful Australian sire Child Harold 414, an American bred stallion by Harold 413, dam Young Portia by Mambrino Chief, second dam Portia by Roebuck, third dam by Whip. Child Harold was bred at the celebrated Woodburn Farm, Kentucky, and sold to John Hendrie, Glasgow, Scotland, who in turn sold him to Australian parties. Rothschild's dam is the California bred mare Kentucky Maid by James Lick, son of Homer, son of Hambletonian 10. Rothschild is one of the leading sires of Australia, and during the last two or three seasons his get have won more races than those of any other sire.

The American Sportsman of Cleveland says: "There are three youngsters by John A. McKerron 2:05½ at the Glenville track, and three nicer individuals or better gaited ones could not be found anywhere. The two year old out of Henrietta G. 2:19½ in Fred Keyes' stable is very large for his age, and Fred says he is a sure trotter and improves every time he is hitched. There is a two year old gelding by Mr. Devereux's great stallion in 'Doc' Tanner's stable that is owned by W. H. Silverthorne, being out of Czarina by Brown Wilkes that promises to do credit to his sire, and J. E. French sent the yearling by McKerron and out of the dam of Sunland Belle 2:08½, wagon record 2:07½, out to 'Doc' this week."

It is stated that an effort is being made to arrange a three-cornered sweepstakes for Dan R. 2:04½, Dan Patch 1:59½, and Prince Alert 2:00, to be contested as a special attraction at the Indiana State Fair next September. An offer has been made to each of the owners of these three great pacers and it is thought the race may be paced. So far as the season has gone this is the most important event suggested for pacers, though it seems to be certain that Patch and Prince Alert will meet on one or more tracks before the season closes. It was on the Indianapolis track that Joe Patchen and Robert J. fought out their memorable race before an immense crowd and should the special suggested be brought off it is estimated locally that all records for attendance at the Hoosier fair would be broken.

## Talks With the Old Campaigner.

[Kentucky Stock Farm.]

"It looks to me," said the Amateur, as he helped himself to a six-finger slug of Bourbon, as if the big meetings will be short of horses this year. These wise secretaries who think they have things all ready to make a bonfire of the universe by adopting a lot of fool notions about shorter races will wind up with horseless harness races if they don't look out. I have tried to look at the matter from all points of view, and it appears to me that the proper caper is to stick to the good old three-in-five and prosperity."

"The harder you try to do some things, retorted the Old Campaigner, "the easier you fall off of the main line to the right station. To begin with there is no more danger of a real shortage in the list of starters at the big meetings than there ever was in any other year. If you think I am mistaken you take a few weeks off and run around to the tracks where arrangements are making for the training of the trotters and pacers that will be campaigned this year. If you keep the dirt dug out of your ears and the dust out of your eyes you will hear and see some things that may make you do something in the way of single-handed thinking.

"Leave Memphis and Lexington out of your itinerary if you like, for any one who keeps tab on what is in the wind will tell you that there are enough horses getting ready at those two places to make a fairly respectable meeting and keep the other starters in all the big stakes from getting lonesome. It stands to reason that there should be no suffering because of a shortage of horses. There never before was as much interest in the business. There never before was as much money in sight for horses that can answer the question. There may have been more horses in sight, certain overflow years. But to my mind the crop will be big enough to make all concerned satisfied with the harvest, and no change that has been made in the system of racing can have anything to do with the shortage—if there is one. Andy Welch is quoted as having said that the betting will adopt itself to any system of racing. It is also true that the horses can be adopted to any system of racing. The question is not as to what the effect will be on the horses, but as to what it will be on the public.

"So long as there is a market for trotters and pacers they will be bred and developed, and so long as they are bred and developed they will be raced. And it can be further said that if, by some mischance, the system should be changed to seven-in-eleven there would still be enough horses to furnish all the necessary sport. Some of you people who think you think, ought to find time from your laborious task of regulating the universe to read back over the history of harness racing. And if you should happen to do it you will discover that no matter what the shortcomings of the system in vogue or the squeezing of the conditions imposed, the horsemen were Johnny-on-the-spot every time, year after year. You can talk about the liberal policy of this or that association or of all the associations, if you care to, and you may not, even then, say enough in praise; but all you can say will be about deuce high to the liberality of the men who have developed and campaigned the horses that have made harness turf history. And those same fellows, and their successors, will keep right on furnishing the horses and, if need be, the most of the money to keep the game going. If you have been lying awake nights stewing yourself into nervous prostration, you can dismiss the ghosts and make up the lost sleep, for there will be horses enough this year, you can bet on that. If you want to do some one a real favor, go and figure out how to drag the public, with the dollars, through the gates. That's the only problem that confronts the track managers in these days of prosperity."

Capt. W. A. H. Bass, nephew and heir of Lord Burton, the great ale manufacturer, and an officer in the Tenth Hussars, is now the owner of the famous race mare Sceptre, the four year old daughter of Persimmon and Ornament by Bend Or, R. S. Sevier having at last concluded to sell the mare. The price is not made public, but it is supposed to be somewhere in the neighborhood of \$100,000. Sceptre is unquestionably the most talked of race horse in the world. After winning last year nearly all the early fixtures on the British turf of any consequence, including the Two Thousand Guineas, the One Thousand Guineas, the Oaks, the St. James Palace Stakes and the St. Leger, William K. Vanderbilt offered Mr. Sevier £40,000 (\$200,000) for the filly, which was refused. Mr. Sevier declared that he would consider no offer less than 50,000 guineas (\$262,500). It was said that the Czar of Russia made an offer of £40,000 for Sceptre about the same time, which was also refused. At the time she was considered almost a certainty for the Derby, but she ran unplaced in that race and this impaired her value. She is still regarded as the best race horse in England.

## Handicapping Will Not Be Popular.

The American trotter is not nor was never intended to be a draft horse, hence, the utter uselessness of all talk of handicapping by weight ever becoming popular on the harness racing tracks. What pleasure would the lover of harness racing derive in seeing Cresceus try to draw 250 pounds faster than some ordinary horse could draw 125? In such a contest Cresceus might trot a mile that would really be a more creditable performance than his record mile, but as it would, of necessity, be slower than his best record drawing regulation weight, he would never receive the full credit of it in the record tables. Once introduce handicapping by weight and the whole system of keeping records and estimating the value of horses from a speed standpoint would have to be re-established. Speed and the ability to carry a fast clip through a race of heats would no longer be the proof of a horse's merit. Any trotter, no matter how fast and how game he may be, can be made to drop back and perform in a mediocre manner, if he is given a heavy enough load to pull. There would be no glory in making a really great horse appear mediocre by giving him a load heavy enough to make him no better than a horse vastly his inferior, and it is safe to say that, not until the conditions surrounding harness racing become very much different than they now are, will the proposition to do so be received with any favor. At present, fortunately, there is no need to resort to handicapping to equalize the chances of the horses seen each year on the harness tracks. In the slower classes there is never any considerable length of time when one horse can easily beat all the others being raced in the open events. In the fast classes, too, there is nothing near the inequality there was a score or more years ago, when there were no more than four or five horses available for the free-for-all class. To-day, who can name, with any certainty, a trotter with a record between 2:05 and 2:08, that can beat all the others with records between those figures? There will nearly always be one trotter and one pacer that will be regarded as a little better than any other trotter or pacer, but aside from the actual championship holder, there will always be enough high class performers eligible to the different classes to provide good contests without the necessity of resorting to handicapping.—*Horse World.*

## Some Good Suggestions.

Mr. Frank E. Best, who at the annual meeting of the American Trotting Register Association was elected registrar of the company, has practically been connected with the association since its incorporation as it was in the month following the latter act that he commenced to look after the statistical work. In being elected registrar he receives the official recognition due him for as a matter of fact Mr. J. H. Steiner, even previous to his illness, found that the duties of his position as secretary of the National Trotting Association occupied his time so fully that Mr. Best was left to look after the details of the work of the register association. That Mr. Best has performed his work in a faithful and conscientious manner is patent to all familiar with the office and with Mr. Best. There have been errors in the publications sent out by the association, but these were due almost without exception to the system and not to the official. The sources of information for the securing of statistics relating to the trotting turf are not what they should be. The system under which horses are allowed to race is such that it is impossible to secure in full the data which should be conspicuous in the publication for its completeness. What few rules there are relating to the pedigrees of horses entered in races are seldom enforced and in many instances the information so obtained is practically worthless.

The history of the American trotter lies in the publications of the Register Association and every effort should be made to make and keep it full and accurate. Not until breeders are compelled to register all foals before they are three months old or suffer the penalty for not doing so, will the records of the trotter be what they should. The advantages of making and enforcing such a rule are all in one direction—in favor of the breeder. The expense would be trifling, while the benefits would be many. With such a rule there would be fewer "ringing" cases, and nothing gives the public such a bad impression of the sport as the widespread publication of stories in relation to these frauds. It is hardly necessary to go into details, for it does not seem possible that there should be any serious opposition to such a rule despite the fact that it has never been adopted. Until such a rule is adopted no one need look for perfection in the publications of the Register Association. In the meantime all breeders can rest content, satisfied that in the new registrar they have a gentleman who will see that the facts are accurately recorded in so far as it is possible under the present system.—*Chicago Horseman.*

## Passing of the Tout.

An Eastern writer has the following to say in reference to the passing of that well-known race track habitue, the tout:

"Up in the South End, the other day, I happened across a New York race track tout. He was equally as much at home on a running as a trotting track in the days of yore, and his face was familiar to all the regular patrons of racing. 'How's everything?' I asked him, little thinking of the spiel he would deliver in reply. 'To tell the truth, business is on the bum, and I don't see any prospects of its being better when the bell rings. Say, do you know, racing has got to be so all-fired decent and keener now that there's nothing to it. With the Pinkerton's men watching every move, I'm lucky to get on a race track at all. If I make a false move one of them is sure to spot me, and he'll throw me off the track in a half minute. It ain't like the old days, when a smart guy could get a half a dozen suckers down on one race and stand to win any way it came. I guess we worked the game too strong, and that's the reason we are in the soup now. They won't stand for us in the West, either, and besides, there ain't the money there now at the ordinary tracks.

"Why, I tackled a half-mile bull ring last fall—got off the main track, you know, in order to gather a little spare change for winter grub and fixin's. S'help me God, I tried to steer a likely looking proposition onto a good thing; good odds, you see, which had a chance to win, too, and what d'you suppose he says to me? 'Young man (young man to me, mind you, who's been through the game from coast to coast and from Canada to Texas). 'Young man,' he says, 'you'd better screw, and screw quick. I'm looking for a live one myself.' Wasn't that discouraging? Yes, the biz is on the bum for fair. The public is full of dope, and a man ain't got a chance against these swell guys that's touting now.'

"The tout's plaint was a very natural one, as the conditions have changed materially for the race track hanger-on who has to live by his wits. A few years ago the tout was a recognized and strong institution on the turf. Thoroughly unscrupulous and with a colossal nerve, he bluffed his way through and as he had nothing to lose, he naturally had everything to gain. The public was certainly a gullible one in those days, and all the tout had to do was to get enough men "down" on a race and he was certain to win. His system was to get each man to bet on a different horse and whichever one won, he was certain to be on hand when his man cashed in to get his 'bit.' The public did not study form then as closely as it does now, and if a plausible talker told a man a straight story about a horse and made it strong enough there would be a bet down. If it won the tout got his proportion, and besides had a good customer for the next race. If it lost, there were extensive explanations, perhaps, and perhaps none at all. That depended on the size of the bettor's roll and the extent to which he would permit himself to be gulled.

"Sometimes the tout got the laugh from the bettor, and this was a sad moment in his checkered career. If a winner refused to 'give up,' he was branded as a man who was 'not on the level' and the tout would complain bitterly of the unjust treatment he had received. It would seem that the tout should have become a millionaire in a short space of time had he attended strictly to business, but there was the weak spot in the scheme. While he was getting his men down on this or that horse he was also betting himself, and very often had more money on a race than the man he was touting. As the man with small capital has little chance on the race track, he inevitably lost the money his dupes supplied him with, and had to depend on them to keep him going. Of late years the touts have had a rough time of it, as the several trotting associations in the country have set their faces against them and will not allow them to work on the track. Then the public has come to think for itself and don't want anyone to tell them what to do do."

The entries for the Saratoga Stakes are most encouraging. They deserve to be, for the association has been most liberal in the matter of added moneys, and they must needs have a bumper meeting to make the balance come out on the right side. That it will do so, there seems little reason to doubt. The entries are of the highest class, and so far as attendance goes no one who is fond of racing can afford to let such an opportunity escape them of witnessing the sport of kings under its happiest auspices.

No more this season will the "red and white stripes" of Walter B. Jennings be seen at the Oakland track. After an exceedingly prosperous season Mr. Jennings left for New York last Wednesday, his entire string of runners having already preceded him across the Rockies.

## The Money Winning Tribes.

The winning stallion tables for 1902 are very interesting. Wishing to find out how the three great lines of Herod, Matchem and Eclipse came out during the past season, we find, taking in all stallions that have sired the winners of \$300 and over, Eclipse is first, 409 stallions having sired the winners of \$3,478,770, an average of \$8505 55-100; Matchem is second in point of average; his return reads 57 stallions with \$397,974 75-100, average \$7104 82-100. Herod, although the monetary return is far larger than that of Matchem, does not come out nearly so well in point of average—169 stallions, amount won \$718,738, average \$4252 88-100.

For the first time in many years a stallion descending in direct tail male from Matchem heads the winning list, Spendthrift's son, Hastings, being the champion sire for 1902. It is, indeed, quite remarkable how well the sons of Spendthrift, who in his day had few equals and no superiors as a sire, have done in the stud; besides, Hastings, Lamplighter and Kingston have done well, as has Barcaldine's son imp. Oddfellow, all of which have to their credit over \$20,000. This looks as though a genuine Matchem revival had come to pass, a fact that redounds very much to the credit of the breeders in the United States, for ere long breeders in other countries will be forced to look to the United States to supply the Matchem blood to offset the superabundance of the Eclipse blood that now dominates almost all modern pedigrees.

The Herod line, outside of imp. St. George, Hanover and his sons, must be considered to have done badly, the average winning per stallion being the lowest of the three. But the sons of Hanover are yet young in the stud and their future will certainly be watched with great interest by all students of pedigree. The line of Lexington has about played itself out. Prince Royal is the sole representative whose get have won over \$20,000 and now that he has gone, to what horse are we to look to keep the famous old stock alive?

Of the Eclipse blood it is strange to notice a son of Hermit standing second on the list, for the Hermits are, as a rule, failures in their native land. Sir Dixon, of the Blacklock line, continues to hold a very prominent position and the dead Bend Or makes a bold show with imp. Ben Strome and imp. Golden Garter. The successes of Wadsworth and The Bard do much to redeem the character of the general run of Longfellow stallions. Imp. Pirate of Penzance, Salvator and imp. Wagner keep the Prince Charlie blood well to the fore. Imp. Esher has done well and is another stallion tracing to Stockwell through Blair Athol. Hampton's best is the remarkably well bred and coming young sire imp. Star Ruby. The all-conquering Galopin line of England has failed so far in this country to meet with any remarkable success. Imp. Sain and imp. St. Andrew show the best, but another of the Blacklock line, imp. Mirthful, has done extremely well for a first season. Old Himyar continues to occupy a prominent place, as does his kinsman imp. Albert. The blood of the former line should be carefully preserved, for we think this is the only line tracing through imp. Eclipse to Orlando, and for speedy broodmare blood it cannot be surpassed. In England the three horses stand as follows:

Eclipse.....	\$444,254
Matchem.....	24,869
Herod.....	15,664

Verily, a case of Eclipse first, the rest nowhere. The house of Herod seems to have gone utterly to the bad. They have had no Hanover over there to keep up the line and the descendants of such by-gone stars as Bay Middleton, Flying Dutchman, Wild Dayrell and his son Buccaneer, have very small amounts to their credit. Matchem, as in the United States, seems to have taken a spurt. The main factor in the success of this line here again is West Australian, his son, Solon, being the sire of Barcaldine and Arbitrator, and from these two horses are descended almost all the successful Matchem stallions in England. The most prominent Eclipse line just at present is, of course, the Blacklock. Galopin, the father of the present house, if we may so term him, has 34 stallions tracing to him in tail male, which have begotten the winners of \$152,197. Touchstone, by the aid of 74 stallions, has amassed \$110,611; his best cards are Newminster, whose sons Lord Clifden and Hermit stand out well and Ethuril, ancestor of Musket. The two strongest lines to Birdcatcher are, of course, Stockwell and Sterling. Stockwell has amassed \$92,379 by the aid of 67 stallions, a comparatively poor total when compared with that of Galopin, remembering always that the latter horse is of far more recent day than Stockwell and we can very readily see the way the tide is flowing. Sterling has 24 stallions on his list and \$69,006 won. Practically all of this amount has been won by the descendants of Isonomy, his average per sire being far better than that of Stockwell, although it does not approach the average of the Galopin tribe. Isonomy horses are usually stout of heart and slow to mature, both on the racecourse and in the stud.—*Thor. Record.*

## Sable Kid by Sable Czar.

Three or four years ago Mr. C. C. Christie of Kansas City, Mo., purchased from John Clancy of Ventura a young trotter by Mr. A. C. Dietz's stallion Sable Czar, son of Sable Wilkes. Recently Mr. Dietz wrote to Mr. Christie, inquiring about the horse, and received the following answer:

KANSAS CITY, Mo., April 6, 1903.

Mr. A. C. Dietz, Ferndale Ranch, Santa Paula, Cal.:

Dear Sir:—I have your letter under date of March 31st, and advise that I am the owner of "Kid Sable," as you call him, or "Sable Kid," as we call him, and you are right in your understanding that I bought him from Mr. John Clancy of Ventura.

I have been unfortunate with this horse because of his bad front legs. We trained him in 1901 and 1902, and about the time we would be ready to race him he would throw out a big splint on each front leg, which, of course, made him lame and necessitated his laying off for the year. Last year we had Mr. McKillip of Chicago (the best veterinary in this part of the world) fire him from his knees to his ankles, and he is at this time in training and going sound and all right. He is a very fast horse and, if his legs stand up this year, will give a good account of himself in the Grand Circuit. We have never asked him to go a mile up to the limit of his speed, and I think the fastest work he has ever done is around 2:15. He can trot a quarter in 30 seconds as easy as any horse you ever saw, and last spring at Memphis neither Lord Derby, The Monk, The Roman, or any other of the crack trotters who were in training there, could beat this fellow a quarter of a mile. This does not mean that he could not go on, as he is a very stout little horse, and I am very confident that, if his legs will stand, 2:06 or 2:07 will be a mark that he will go into winter quarters with this year. Sincerely yours,

C. C. CHRISTIE.

Mr. Dietz tells us that Sable Kid was a catch colt and the first of Sable Czar's get. He was a little fellow when he left California and had no special training and no particular care. As he was foaled in the fall of the year he did not grow much and was less than 15 hands high at maturity. Mr. Dietz sold him for \$100.

Among the entries in the \$5000 purse for four year old trotters at Brighton Beach horsemen have noticed that Ed Geers has named Travelesso by Direct Hal, dam by Candidate. This fellow is a big black gelding that until recently Geers had no idea of starting this year. One morning, not long ago, one of Geers' assistants remarked that as long as they were making entries it would be wise to enter Travelesso in a few purses. Geers answered that he would be satisfied if that horse got good enough to start in 1904. The assistant insisted, however, that the gelding was a much better horse than Geers thought. Geers got him and drove him. The last quarter of a slow mile was trotted at a creditable clip, and when the gelding was tapped with the whip, just at the finish, he amazed the driver by finishing the brush at a two minute clip. When Geers dismounted he remarked that Travelesso would do to enter in a few of the big purses, and that is how he came to be named in the Brighton Beach purse.

One member of the stable in which Frank S. Gorton of Chicago takes a great deal of interest is the pacer Dacy. This horse, only a midget in size, is a son of Direct, and his dam was the trotting mare Lulu F. 2:20; she by a son of the trotter Santa Claus 2:17. The colt was foaled while the mare was in training, and this did not tend to increase its size. When George West had the Gorton horses, Dacy was good for a mile in about 2:16, when everything was favorable, but, unlike most of the Directs, he was not reliable, wanting to make breaks when there was no good cause for such action. Last summer Fullager drove Dacy right at 2:10 in a race, and thinks he will beat those figures this season.

An eastern exchange says: It is too much to say that the majority of mankind has a liking for that which is pernicious. It is not too much to say, judging by facts and effects, with reference to those that patronize running races. No stronger illustration of the truth of the statement can be found than the fact that in those localities where running races were patronized horseracing was killed the moment betting was prohibited. Trotting, where trotting is the preferred method of horse racing, succeeds without betting, but running dies the moment the stimulus of gambling is removed. This proves conclusively that it is not the love of the sport that actuates the habits of the running tracks, but the excitement of gambling.

The Michigan harness racing circuit promises to be productive of more and better sport this season than in any previous year. This circuit will begin at Traverse City on June 25th and continue on down the line four days a week through the following itinerary: Traverse City, Pontiac, Windsor (Ont.), Detroit (Grand Circuit meeting), Saginaw, Grand Rapids, Bay City, Caro, Port Huron and Lansing, after which last gathering will come the week's sport to be held in connection with the Michigan State Fair at Pontiac. Saginaw has already announced its program of early closing races, offering \$1000 purses for four classes.

Thomas W. Lawson strongly contradicts the report that he is gathering a stable of runners. "I am not gathering a stable of runners, or a single runner; have no intention of gathering any, and neither my son nor I have ever heard of the matter in any shape or form until we read it in the papers," is the expression he uses.

Sober up on Jackson's Napa Soda.

## Doing a Rushing Business.

The International Stock Food Company of Minneapolis, Minn., has been compelled to put on a night crew and run its factory 24 hours per day owing to a great rush of business. A letter to this paper from this company dated the 7th inst, says:

This week we have added 10 more typewriters and this gives us a force of 56 typewriters. Our office force now consists of 130 people, and our office is the largest in the entire Northwest.

Our sales for 1903 have been larger than for the corresponding months in 1902, and our March sale was the largest month since we have been established. We are pleased to report this condition, because it is absolute proof the International Stock Food, and our goods, have superior merits and that farmers and stockmen obtain paying results from their use.

Intelligent farmers will not use any preparation year after year if they are not satisfied that it is a money maker for them. Our largest trade comes from states where International Stock Food has been longest on sale.

Such facts as we give in this letter prove conclusively to any fair minded man that International Stock Food is exactly as we represent it to be. Our object in writing you this letter is simply to give you some facts as to the tremendous growth of our business.

The Louisville Horse Show Association will offer \$22,000 in premiums this year. The show will be held the week of September 28th to October 3d. Louisville people are preparing to build a \$300,000 coliseum to accommodate the horse show and other large attractions.

## VETERINARY DEPARTMENT.

CONDUCTED BY

WM. F. EGAN, M. R. C. V. C., F. E. V. M. S.

Subscribers to this paper can have advice through these columns in all cases of sick or injured horses, cattle or dogs by sending a plain description of the case. Applicants will send their name and address that they may be identified.

VALLEJO, CAL., March 30, 1903.

BREEDER AND SPORTSMAN:—Have spent the evening reading the BREEDER AND SPORTSMAN and it occurred to me that you could give me the information I am in need of. My bay colt Spinnaker entered in Breeders Futurity does not seem to do well. He has grain twice a day, oat hay chopped with bran and runs out to grass several hours per day, but in spite of all I do is getting poor. He is as lively as a cricket, in splendid health and I do not think he has worms. Have intended to train him this year for the three year old stake but am discouraged at the prospect. Can you help me in any way?

Very truly yours, H. C. MYERS.

Your colt probably has indigestion. Take the chill off his drinking water; give it before feeding, and none for at least three hours after he has eaten. Give bran mash with some condition powder in it, and also a tablespoonful or a little more of flaxseed meal, morning and evening. Give a moderate feed of oats about noon time, and if he eats fast, put a little dry bran, or chopped hay through it so that he cannot bolt it. If he frets a good deal he should have long slow exercise, and when he is not at work he may run in the pasture, but see that he does not go to the cold water, until his stomach is in better condition, when he may get all that he wants to drink of it, before eating. If he is a stallion see that there are no mares near his paddock, to excite him.

Report result of this treatment after you have continued it three weeks. Look for signs of "osteoporosis" or big head, and also look to his mouth for wild oats, foreign bodies in his teeth, irregular teeth, etc., and report anything unusual in his eating, general action, etc.

**Warranted  
to give satisfaction.**

**GOMBALD'S  
CAUSTIC BALSAM**

A safe, speedy and  
positive cure for

Curb, Splint, Sweeney, Capped Hock,  
Strained Tendons, Founder, Wind Puffs,  
and all lameness from Spavin, Ringbone  
and other bony tumors. Cures all skin  
diseases of Paracetes, Thrush, Diphtheria.  
Removes all Bunches from Horses or  
Cattle.

As a **HUMAN REMEDY** for Rheu-  
matism, Sprains, Sore Throat, etc., it  
is invaluable.

Every bottle of Caustic Balsam sold is  
warranted to give satisfaction. Price \$1.50  
per bottle. Sold by druggists, or sent by  
press, charges paid by the customer. Do not  
lose. Send for sample bottle and full in-  
structions. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland

# ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

## Fishing Lines.

Not to worry, merry campers,  
With their tents and well-filled hamper,  
Start away for river, mountain stream and lake.  
To ramble through woods and valleys,  
For a season they will give life's cares a shake  
Soon they'll be in a twofold slaughter  
Among the denizens of water,  
For the fishes work from dawn until it's late;  
And when banks they are not hugging  
To their tents you'll see them lugging  
Many kegs and boxes plainly labelled "Bait."  
'Tis a life sometimes exciting,  
For when fish are not a-biting  
The wily goat may add unto the fun;  
Or some hornets, long neglected,  
May call 'round when not expected,  
And it's then you'll see how fisherman can run.  
Then sometimes, when all are sleeping,  
The blue skies will get to weeping,  
And arouse them by the thunder's crashing din;  
But it's not a time for joking,  
For each camper gets a soaking,  
And he cannot find a dry garb to get in.  
Thus the campers pass the season  
Till there comes an urgent reason  
For dispersing with a speed precipitate;  
Then off homeward they will scurry,  
This the reason for their hurry—  
They've expended all the money saved for "Bait."

## AT THE TRAPS.

Three regular blue rock shoots to-morrow will offer a choice of attraction for trap shooters—The Union Gun Club at Ingleside, the Empire Gun Club at Alameda Point and the College City Gun Club at North Berkeley.

The Golden Gate Gun Club shoot last Sunday was notable by reason of the excellent averaging scores in four events, each of which were arranged so as to bring the shooters up to the full tension of their skill.

In the first event, the regular club shoot, Otto Feudner and C. C. Nauman scored straight, dividing first and second moneys; Captain Whitworth won third money losing but one target in this race. W. J. Golcher and Ed. Donohoe divided fourth and fifth moneys, Jos. J. Sweeney and "Slade" split the remainder of the purse. In the second race, reverse system Nauman and Whitworth were one, two with seventeen breaks and Golcher, Dr. McConnell and Hip Justins divided third and fourth moneys. Following came a race at 20 singles, reverse system, unknown angles, both barrels coming into play. Clarence Haight, Capt. Whitworth and Will Golcher captured the honors, each losing but one bird. In the fourth race, one man up, Sergeant system, Naumann scored the only straight. The last event was a shoot at doubles with five men in—Naumann and Whitworth were again in one, two order.

High guns prevailed and the shooters were handicapped in distance. During the day Feudner and Naumann won club gold bars on 25 straight and Whitworth, Sweeney and Donohoe won club silver bars with straight strings of 15 targets. The scores in the different races follow:

Event No. 1. Club shoot, 25 targets, distance handicap, \$50 added money, seven moneys, \$12.50, \$10.00, \$8.50, \$6.50, \$5.50, \$4.50, \$2.50, high guns—

Nauman	18 yds.—1111 1111 1111 1111 1111—25
Feudner	16 "—1111 1111 1111 1111 1111—25
Whitworth	16 "—1111 1111 1111 1111 1111—24
Golcher	16 "—1111 1111 1111 1111 1111—23
Donohoe	16 "—1111 1111 1111 1111 1111—23
Sweeney	16 "—1111 1111 1111 1111 1111—22
Slade	16 "—1111 1111 1111 1111 1111—22
Justins	16 "—1111 1111 1111 1111 1111—21

Event No. 5. Doubles, 10 pairs—Nauman 19, Whitworth 14, Haight 13, Feudner 10, Golcher 9.

The Washington Gun Club's regular blue rock shoot on the 12th inst was well attended by Sacramento shooters and good scores were made.

Club shoot, 25 targets—J. W. Hughes 15, F. Adams 20, E. Peek 24, J. Woods 20, T. Rust 18, F. Rubstaller 15, J. Blair 20, Hal Stevens 20, Chapman 18, C. Flohr 15, J. Becker 24, J. R. Hughes 17, J. R. Shore 19, W. Haggerty 18, Perkiss 10, Rohr 21, Carey 15, E. Moon 12, O'Connor 3, De Merritt 21, Trumpler 14, Williams 19, M. Newbert 18, C. D. Morgan 22, F. M. Newbert 25, H. Vetter 21, L. Smith 5, A. Just 23.

At 25 targets—C. D. Morgan 23, A. Just 16, F. M. Newbert 22, Perkiss 6, M. Newbert 23, L. Smith 11, C. S. Ludden 8, Morgan 18, Hughes 22, Vetter 16, Blair 13, C. D. Ludden 7, J. O'Connor 0, A. Just 12, J. W. Hughes 15, H. Vetter 16, F. M. Newbert 6, Ludden 7, Newbert 10.

At 25 targets—Hughes 20, Adams 21, Peek 18, Woods 18, Rust 16, Rubstaller 10, Blair 13, H. L. Stevens 24, Chapman 18, Flohr 17, Becker 19, J. R. Hughes 21, Shore 18, Cotter 11, F. Adams 18, Perkiss 6, Bohn 13, Cary 12.

At 10 targets—O'Connor 1, De Merritt 1, Trumpler 8, Williams 8, Peek 7, Mathelos 7.

Oak Park Gun Club held its regular shoot at Sacramento last Sunday. The day was ideal, and some good scores were made, Newbert making 62 out of a possible 65. The following are the scores:

Ten targets—H. Kerr 9, Vanderford 5, Marty 9, Stevens 9, Davis Sr. 8, Brady 8.

Fifteen targets—Vetter 13, Newbert 14, Marty 9, Brady 14, Davis Jr. 9, Amber 14.

Twenty-five targets—Amber 15, Newbert 24, Shaw 14, Eckhardt 20, Smith Sr. 8, Smith Jr. 10, Wilbur 11, Smith Jr. 5, Eckhardt 21.

Club shoot, 25 targets—H. Kerr 20, Vetter 19, Vanderford 18, Marty 20, Snook 14, Newbert 24, Davis Jr. 12, Shaw 15, Stevens 23, Brady 21, Fical 17, Amber 15, Davis Sr. 21, Ralphs 11, Wilbur 18.

Trap shooting has developed into a well patronized sport at Vallejo. The first regular shoot of the Vallejo Gun Club took place last Sunday on the club's newly fitted up grounds. There was a large attendance of shooters and the club's roll of membership was also increased.

In the club race at 25 targets, unknown angles, the following scores were made: W. Beveridge 20, F. Dunphy 19, Brown 19, P. Magstrini 19, C. Drake 18, H. Hoyt 17, W. Mitchell 16, D. Beveridge 16, J. Greig 15, W. Chapell 15, J. Herbert 14, I. Burnett 14, J. Brady 14, E. Fitzgerald 13, J. Erwin 13, W. Davidson 11, F. Dexter 11, Harry Smith 10, William Saxton 10, William King 9, James O'Hara 9, James Lynn 8, E. C. Ulmer 8, F. T. Eisenhuth 7, R. Carter 7, J. Wood 7, William Kregelo 7, G. Herbert 5, J. Fifield 4, M. Solomon 4, J. Wise 4, J. De Bonis 3.

Team races at 10 targets followed. In the first contest the teams and scores were: Captain Mitchell 6, Magstrini 7, W. Beveridge 5, H. Hoyt 4, Greig 4, T. L. Lewis 6. Total 31. Captain D. Beveridge 4, Dunphy 8, Chappell 8, Woods 4, Fitzgerald 6, Brown 7. Total 37. Second team race: Captain Chappell 8, Brown 4, Fitzgerald 5, W. Beveridge 5, Drake 6, Lewis 5. Total 33. Captain D. Beveridge 8, Magstrini 3, Dunphy 9, Mitchell 8, Wood 5, Hoyt 4. Total 37. Third team race: Captain W. Beveridge 6, Magstrini 5, Hoyt 9, Greig 6, Mitchell 6, Dexter 9. Total 41. Captain D. Beveridge 4, Dunphy 7, Chappell 7, Woods 5, Fitzgerald 5, Brown 8. Total 37.

Practice races, 10 targets: Davidson 4, 3, 6; Carter 4, 3, 2, 4; Lynn 4, 4, 5; "Remington" 6, 4; Costello 0, 0; De Bonis 0; Booth 5; Chappell 8; Brown 8; Berg 3, 3; J. Brady 3, 4, 2; Dunphy 9, 7; Saxton 5; Kregelo 3; J. Greig 8, 7; J. Irvin 6, 7; W. Beveridge 9; Mitchell 5, 2, 4; Magstrini 7; D. Beveridge 8; W. King 3; Fitzgerald 4, 7, 5; J. O'Hara 4, 3, 5, 6; Solomon 2, 3; C. Drake 5, 5; Eisenhuth 4; J. Dexter 5, 5; Hoyt 5, 4; R. Ullman 1.

Tom Lewis was present and shot under the nom de fusil of "Remington." He scored 17 out of 20 in one race and 9 out of 15 in another.

Messrs. Ulmer and Solomon and De Bonis, new members of the club did good shooting for newbeginners.

The features of the Grand American Tournament at Blue River Park, Kansas City, on Wednesday, was the preliminary handicap at 100 blackbirds. There were about 160 entries, and the same handicaps governed as in the G. A. H. There were also four events at twenty blackbirds each, entrance \$2, \$25 added. Practically all of the crack shots took part and the competition was keen, the shooters making the best of the last day's practice before the Grand American Handicap, which commenced on Thursday.

In the four minor events which were shot first on Wednesday, eight men made clean scores of twenty targets and divided the money. They were as follows: Fred Gilbert, Spirit Lake, Ia.; C. O. Lecompte, Eminence, Ky.; E. S. Gunfaur, Montana; Chris Gottlieb, Kansas City; H. Klein, Spirit Lake, Ia.; E. D. Rike, Dayton, O.; George J. Roll, Blue Island, Ill., and D. T. Timberlake.

The preliminary handicap at 100 targets was then shot. Of the well known men among the first to finish

were the following: W. R. Crosby, O'Fallon, Ill., 23 yards, 87 out of 100; Fred Gilbert, Spirit Lake, Ia., 23 yards, 84; H. C. Hirschy, Minneapolis, winner of last G. A. H. at pigeons, 22 yards, 81; J. M. Hughes, Palmyra, Wis., 22 yards, 79.

The preliminary handicap was called at dusk, and was finished Thursday morning. D. T. Timberlake of Seneca, Kan., and M. E. Hensler of Battle Creek, Mich., made the best scores in this event, each breaking 91 targets, shooting from the seventeen-yard line. Among the other high men were W. A. Mattheson, Abilene, Kas., 18 yards, 90. E. S. Gunfaur, of Montana, Fred Gilbert and C. M. Powers made straight scores of 20 in the second event.

The Grand American handicap at targets began Thursday morning immediately after the completion of the preliminary. There are 191 entries.

The regular monthly shoot of the Watsonville Rod and Gun Club took place last Sunday on the club grounds. The scores, considering the time of the season, were exceptionally good. The first class medal was won by W. H. Warren, with 25 targets straight. The second class prize was won by J. E. Willoughby with 23 out of 25.

The scores in the club race were: Albright 20, Varlen 25, Winkle 22, Trafton 19, Jessen 16, Hedge-land 23, Carr 19, Work 17, Greene 1c, Alfred 22, Mahngrem 22, Ledy 17, Overhulser 18, Baxter 20, Struve 16, Ring 11, Willoughby 23, Richardson 18, Redman 17, Bixby 11, Leland 13, Kelly 12.

The Sunset Gun Club held their second shoot a Ocean Beach last Sunday. The scores in a 25 blue rock race were: Jos. Lasserott 23, Chas. Owens 20, John Lasserott 19, Chas. Franklin 17, Chas. McDonald 23, Dick Burfeind 24, George Burfeind 21, Chas. White 24. Burfeind beat White on the shoot-off, 10 to 9.

The members' gold watch race was won by McDonald with 25 straight. Mr. "Dick" Burfeind announces that he will meet any blue rock shooter on the Coast for \$50 or \$100. His address and scalp can be located at the National Brewery, this city.

Fine weather and a desire to get into condition for the big May tournament of the Ocean Park Country Club brought out a fair turn-out of shooters at the seashore grounds on the 12th inst, for an all-day blue rock shoot.

First event, 25 targets—Shemwell 17, Naylor 13, Lovelace 19, Shelton 18, Blanchard 19, Sockrider 12, Estudillo 5, Wright 16, Millard 11.

Second event, 25 targets—Shemwell 23, Shelton 21, Wright 13, Estudillo 6, Naylor 14, Lovelace 18, Sockrider 16, Blanchard 17. Re-entry—Wright 18, Estudillo 7, Naylor 12, Lovelace 18, Blanchard 17, Sockrider 14, Millard 19.

Third event, 25 targets—Lovelace 21, Blanchard 20, Shemwell 19, Sockrider 20, Naylor 16, Wright 14. Re-entry—Lovelace 20, Blanchard 18, Shemwell 22, Sockrider 17, Lovelace 20, Blanchard 18, Sockrider 20.

Final shoot, 25 targets—Lovelace 21, Shelton 23, Blanchard 21, Shemwell 22, Sockrider 19, Wright 14, Estudillo 9, Naylor 16. Re-entry—Lovelace 23, Shelton 22, Blanchard 21, Shemwell 20, Sockrider 17, Wright 15, Estudillo 15.

## San Francisco Fly-Casting Club.

SATURDAY CONTEST NO. 4—Stow Lake, April 11, 1903.

Events	1	2	3	4
Young C. G.	91	88 8-12	85 8-12	80 10-12
Kenniff, T.	90	84 4-12	86	86 8-12
Edwards, G. C.	88	83 8-12	87 8-12	88 8-12
Brown, F.	83	84	85 8-12	85 8-12
Kenniff, C. R.	103	87 8-12	87 4-12	87 5-12
Reed, F. H.		84 8-12	92	86 8-12
Foulks, G. H.	98	87 4-12	81	77 6-12
Torney, P. J.	85	88 4-12	85 8-12	75 8-12
Lane, G. W.		76	81	73 4-12
"Carr, A. B."		87 4-12	92	88 6-12

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

The local brothers of the angle—both the fresh and salt water brand—cannot be accorded the distinction of having had the quantity or quality of sport desirable at this time of the year. If anything the salt water fishermen have had a shade the best of it.

Trout fishing, never so promising, has been under the ban of high water. Anglers who have had the opportunity to get away to the headwaters of small streams have had good luck and good fly-fishing. The Paper Mill has been in fine shape for bait fishing in the tide waters and a number of nice fish have been landed. To-morrow should be a good day on almost any stream within reach of this city.

A number of striped bass have been taken in the "straits" during the week. The tides to-day and until Wednesday will be favorable for the trolling boats.

A Fish and Game Protective Association has recently been organized at Cloverdale. Attorney George W. Hoyle was elected president, S. W. Adcock, vice-president and Dr. Smith secretary and treasurer. A determined effort will be made to stop depredations against fish and game in the northern part of Sonoma county.

## Get Ready for Outing.

Vacation will be here before you know it, and there is lots of joy about getting ready. It will interest you if you are going camping, tramping, or both, to visit Skinner's, 801 Market street, San Francisco, and see the greatest display of everything for outdoor sports and recreation ever shown in this country.

The Self-Basting Broiler is one of the new camp comforts. It sells for 50 cents, and Skinner has it. Don't fail to see it if you are going camping or hunting during vacation.

## Hunting Without the Gun.

To go on a wild goose hunt without a gun would seem a very singular proceeding anywhere, except in the Falkland Islands; but there such a weapon is not necessary, as the young men and boys use an equally effective projectile called the bird bolas, which is made of the knuckle-bones of cattle. That employed in the capture of wild horses is made of three stone balls, connected by twisted sinews four or five feet in length. A similar bolas is found among the Eskimos, the balls being of ivory carved from the tusk of a walrus.

A sportsman thus describes the method employed in taking wild fowl with the bolas. A young goose hunter crawled slowly along between the tussocks, occasionally raising upon his hands and knees to glance cautiously at the big white geese which floated on the lake. There were at least fifty, some standing on a little spit that reached out into the lake, and against which, being of black bog, the white forms of the geese stood out in striking relief, while others were swimming idly about or plunging their wedge-shaped heads into the dark waters in search of the succulent roots and fibres which constitute their food.

It was difficult work stalking game in this way, as the nearer the bolas thrower approached the lake the softer the ground became. Step by step he crawled, crouching low, until, peering through the tussock grass, he found himself within 150 feet of the flock. Between him and the game was a large cluster of grass weeds, which he finally reached. The little island was found to be exactly suited for his purpose, the grass being six or seven feet high in the center, while from it, in the direction of the unsuspecting geese, the land extended for twenty or thirty feet, almost devoid of vegetation. Wringing the black, wood stained water from his clothes, the hunter arranged his bolas, taking the small ball in his right hand and swinging the others over his left arm, already to throw, then plunged carefully into the grass. Slowly he worked his way until he could see the geese through the green and yellow screen, barely 100 feet away; then dashed from his cover and ran down the little island shore at full speed, and before the astonished geese could recover he was almost amongst them. They scurried off in every direction, some flapping furiously over the water in vain efforts to rise; others circling laboriously into the air.

To the latter the young hunter devoted himself, and now stood leisurely swinging the two balls around his head, with a slightly upward angle. Faster they flew, until they finally disappeared from sight; and then, the air being filled with geese, he released the ball in his hand, and the remarkable weapon, with its three balls widely stretched in opposite directions, yet whirling violently round, went whistling into the air. Up it went, and with almost human intelligence seemed to glide in among the birds and wind about them like the coils of a snake. One bird was stunned by a blow from the ball, while two others, completely entangled in the cords, came fluttering down into the water, where they were easily secured, a little later being fastened to the horse and on their way to the home of the herders, miles out on the moorland. The bolas is the natural weapon of the Spanish South Americans, who are remarkably proficient and skillful with it. They use it on the continent in taking the ostrich, following this swift bird on horseback, whirling the three or four balls in the air with very long cords, and sending them so swiftly that they rarely miss, twirling tight around the legs of the bird and bringing it down. On the Falkland Islands the bone bolas is exclusively used by the young Scotch herders, particularly by boys, who in the chase of ducks and geese are very expert.

## The Respiration of Fishes.

The fish's gills, which are practically its lungs, are fleshy laminae on movable bony arches; the number of laminae varies in different fishes. Each of these laminae has within it many minute blood vessels. The gill coverings are usually bony. All living water contains more or less air; fish could not live in water without air. The fish is continually breathing it takes in water through its mouth, passes it under the gills and out though the gill openings, or it takes in water through the gill opening and passes it under the gills and out through the mouth. From the water thus kept constantly flowing over the gills, it absorbs into the many minute blood vessels of the gills, and so into the blood, the air which it requires to aerate the blood. Many fishes, as for example the trout, come to the surface and take in water and air at a gulp, or perhaps air only, filling their air bladders in that way. Fishes are often drowned, and from a variety of causes. If a fish is caught on a hook through one of its jaws, and the mouth is held wide open, respiration is interfered with, and the fish will finally drown. Sometimes a fish is forced against a wall or a rock and held there by a tide or current, one gill being, perhaps, thus made useless. It may be unable with a single gill to supply itself with sufficient air, and so it may drown. Sometimes a fish becomes wedged in between rocks in such a manner that it cannot use its gills at all and then it drowns. Fishes caught in gill nets are unable to use their gills and they drown.

If a fish is where it can be observed readily, as, for instance, in a tank at an aquarium, it will be seen to be always breathing. If the fish is inactive, simple idle in the water, the movement of the gill covers may be very slight, just enough to show the opening into the gill cavity and to admit a small volume of water.

If the fish is more active and breathing hard, it may throw out the ends of the gill covers enough to reveal the red gills in the cavity back of them. Long, slow breathing is an indication of strength and of good health in a fish. Exercise or continued exertion accelerates the breathing of a fish as it does the breathing of a man. In aquariums fishes are kept in circulating tanks and in self-sustaining tanks; in self-sustaining the water is kept aerated by the introduction of plant life; in circulating tanks by an inflow of new water, either constant or at intervals, the old water running off by an overflow pipe. When the water is turned on in a circulating tank it is a common thing to see the fishes cluster around the intake opening, as human beings might go to a window in a room, when a breeze had sprung up, for a breath of fresh air. The fishes enjoy the incoming flow of fresh, sweet water with its new stores of air, and they head up close to it, their gill covers opening and closing as they bathe their gills in the refreshing tide.

Sometimes the water for circulating tanks is additionally aerated by permitting it to flow for a short space, from the receiving pipe to the distributing tank, through the open air. In the case of sick or ailing fish the water of a tank is sometimes still further charged with air by permitting a stream to flow into it from above, falling for a short space through the open air. As a rule, fishes do not live long out of water, but there are some that will live for a considerable time. Salt-water minnows, for example, in the fall can be kept alive for four or five days if kept in moist seaweed and where a current of air can get to them. The minnows open and close their gill coverings and take air through the gills in substantially the same manner as when in the water. The minnows in seaweed would live much longer than the same number in a small body of water.

## DOINGS IN DOGDOM.

The total list of entries for the San Francisco Kennel Club show next week falls below that of any show since the initial show of the club in '97. The list, however, has the pleasing and healthy coloring of a large number of new exhibitors. Many of the old stagers have dropped out as well as some of the budding enthusiasts who were prominent in their adherence to the sport for two or three years past. The gentlemen identified with the show this year have worked under a handicap and can be congratulated on the good showing made.

The lopping off of the dead branches and other impedimenta is more a matter of congratulation than regret for a larger showing than appears this year. The disgruntled exhibitors and those other fanciers who undoubtedly were wretchedly treated last year will come to the front again when they find out that the club proposes to run its shows in the interest of the fancier and breeder.

The largest number of entries this year are in Bull Terriers, Collies, Cocker and Fox Terriers, in the order named. St. Bernards make a better showing than last year. From present indications the show promises to be a success and will be a boom to doggy affairs not only locally but for the whole coast.

The doors of the Mechanics' Pavilion will be open at 8 o'clock next Wednesday morning, with Dr. Steers, the club's official veterinarian ready to pass on all dogs brought to the show. No dogs will be received after 12 o'clock.

The entry of northern dogs is a very good one considering, some high class Setters are with the string brought down by George Tinto of Seattle.

The recent Seattle and Victoria show were very successful. George Thomas' judging at Seattle seems to have met with the general approval of exhibitors and spectators. Several reversals set the doggy circles agog, notably so where Wandee Mayse was put over Reminiscence, Mrs. Bostick's Fox Terrier in winners and open at Seattle. The Setter Real John went over Ch. Roy Montez at Victoria. Under Thomas the positions were changed.

Portland show commenced under good auspices on Wednesday. Considerable curiosity is manifested as to which dogs will win two out of three. We are inclined to think Mayse and Real John will be the dogs. The Victoria and Seattle awards are given in this issue.

We ask the attention of sportsmen who like a royally bred Pointer to note the announcement of Stockdale Kennels of some choice Pointer puppies. There is not a better bred lot of young dogs to be found in the country than the good ones offered by Manager R. M. Dodge. The opportunity is too good to be lost.

Wallace W. Moore purchased from R. E. de B. Lopez last week a promising 18 months old Fox Terrier by Aldon Swagger out of Snip (Oriole Bluffer-Creole). He will be tried out in the novice class next week.

Gabilan Kennels offer a number of well bred Setters this week, the sale announcement on page 19 is worthy of consideration by sportsmen who like a good Setter.

## Coming Events.

## Rod.

- April 1-Aug. 15—Close season for lobsters and crawfish.
- April 1-Nov. 1—Trout season open.
- April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
- April 19—Sunday Contest No. 4. Classification series. Stow lake 10 a. m.
- April 25—Saturday Contest No. 5. Classification series. Stow lake, 2:30 p. m.
- May 1-Sept. 1—Close season for shrimp.
- July 1-Jan. 1—Open season for black bass.
- Sept. 1-Nov. 1—Close season for crabs.
- Nov. 15-Sept. 10—Season open for taking salmon above tide water.

## Victoria Show.

St Bernards—Puppy dogs—1 His Highness, W F Hall, Victoria; 2 Mascott, A Rusta, Victoria; 3 Nero, S York, Nanaimo. Novice dogs—1 His Highness, 2 Mascott. Limit dogs—1 His Highness, 2 Nero, A F Barber, Vancouver; 3 Mascott. Open dogs—1 Grand Master II, Nairo Kennels, San Francisco; 2 His Highness, 3 Nero. Puppy bitches—Gemma, C W Duck, Victoria. Limit bitches—1 Gipsy Lee II, Nuirod Kennels. Open bitches—1 Gipsy Lee II. Winners, dogs—1 Grand Master II, 2 His Highness. Bitches—1 Gipsy Lee II, 2 Gemma.

Great Danes—Novice dogs and bitches—1 Remus, Geo W Seymour, Vancouver; 2 Bobs, John Holland, East Wellington, B C. Limit dogs and bitches—1 Cunningham's Carlotta, J L Cunningham, San Francisco; 2 Remus, Geo W Seymour, Vancouver. Open dogs and bitches—1 Cunningham's Carlotta, 2 Remus. Winners, dogs—1 Remus. Bitches—1 Carlotta.

**Fox Terrier, wire or smooth—Wandee Mayse, Wandee Kennels, San Francisco.**

**Irish Terrier—Bantry Banagher, Mrs C P Curtis, Tacoma.**

#### Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergent's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today, having received the highest endorsements of the leading dog men and kennel owners of this country and Canada. They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

### How I Handle Chester Whites.

Each man must be governed by circumstances in handling his hogs. He should choose his breeding animals with reference to the demands of his market. I select long-bodied sows, with twelve or more teats, as a sow with less than twelve cannot support a very large litter of pigs. As a rule, long-bellied sows raise large pigs and larger litters than short, chunky ones. I select a boar, choosing one that is strong in points where my sows are weak. In that way the shortcomings of one parent are counteracted by the other. For my use I want a boar that is rather chunky and compact. He must be masculine in appearance, must be a good individual, and have a good pedigree. For summer feed nothing is better than a clover pasture, adding a little grain in the feed lot once a day.

If clover is not available I use sweet corn fodder as a main crop and rye, oats and peas for green feed, before the corn is large enough. I have never used rape, but I think that I will try it next year. For succulent feed during the winter I use small potatoes and think they are worth 8 to 10 cents per bushel for this purpose. I always cook them and add a little bran or other ground feed. In addition to potatoes, I use mangels, sugar beets, turnips, carrots and cabbages that are unsalable. I begin with turnips, as they are usually available first, then follow with carrots and mangels, as these roots keep better than any of the others. I occasionally give my pigs clover hay during the winter. They eat it quite readily, and it seems to be a valuable food.

Many people do not consider it absolutely necessary to have green feed for hogs during the winter, but I believe it is quite essential. I can keep my breeding animals more contented than when only dry feed is used. They eat a greater volume, and seem to be satisfied as long as their stomachs are full. On grain alone they never seem to get fat enough, and if they do, they get too fat for best results in the breeding pen.

For grain feed I am using peas and oats one part, to rye one part, ground together. This mixture contains too much protein to make a good ration alone, and I usually mix with it a little corn meal. When I have to buy feed I choose bran, shipstuffs, shorts and oil meal, using my corn to balance the ration. For young pigs three and a half to four months old I use the shorts, as the bran is too harsh, and they do not seem to do well on it. If you have good animals do not keep them too fat. They may look better, but fat sows never have large litters, nor do those that are too thin. The sow that is moderately thin

is most satisfactory. Above all things, avoid getting the sows fat upon corn, as this seems to be more disastrous than too much fat from any other feed. If an animal is intended for the butcher it is an entirely different matter, and corn should be used freely, as this puts on fat more readily than any other farm feed.—Geo. C. Borck, in O. J. Farmer.

### A Model Dairy.

Williams & Young Company expect a carload of Holstein-Friesians cows and a thoroughbred Holstein bull from Henry county, Missouri, shortly, they having been already shipped, which they intend to turn on to the Kelly ranch, which Mr. Williams recently purchased from Tom Kelly.

Mr. Williams who has leased the ranch to the Williams & Young Company is making a number of improvements on the place for them. He is fencing eighty acres (which is all in alfalfa) of the quarter section with hog tight fence, had the trees taken out, with the exception of those necessary for shade and which will be whitewashed as well as the fence, is putting down two more wells, making five in all and has also built a new ranch house.

It is the intention of the company to make the place a first class dairy ranch and only registered dairy stock will be put on the ranch. A DeLaval separator with a capacity of 650 pounds a day has been ordered from Ridgway Brothers, which will be used on the ranch and the cream sold to Ridgway Creamery.

The enterprise of the company is a worthy one and it is hoped they will be successful and their example followed by others.—Porterville Enterprise.

It is now the season for setting hens. The process is a very simple one. Generally the hen is not wanted to sit in the nest where she has been laying, or at least not in that place. Prepare a good clean nest, by putting a spadeful of soil in the bottom, then mould the nest by pushing the soil to sides and corners. Then fill in and put down some cut straw or short hay. Take the hen off at feeding time, just before dark, and while she is off substitute the new nest for the old one. After dark remove nest and hen to the place where she is wanted to sit. If she remains on the nest for a day and night, give her the eggs and let her begin the hatching process. It is best to withhold the eggs until the hen has come off the nest and voluntarily returned to it. After this she will be a safe sitter.

If a dairy cow is built like a steer and looks like a steer, she should share the fate of a steer and not wear out a man's patience in the dairy herd.

Strike!—if they don't give you Jack son's Napa Soda.

### NEW MODEL 1903

TOOMEY PATENT  
33 to 35 lbs.  
TRACK SULKY  
and  
ROAD CARTS  
THE BEST IN THE WORLD.

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

California's  
Colossal

Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside—the wholesale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance.

SAN FRANCISCO

**A New Squirrel Exterminator.**

Dr H. N. Cross has discovered a method of destroying squirrels which is said to be the most effective in use in the valley while it costs but a trifle in comparison with other methods. It is simply the use of gasoline in exactly the same manner that bisulphide is applied.

The only apparatus necessary is a piece of rubber hose with a funnel inserted in the top. The tube is inserted in the squirrel hole and a two-ounce measure of gasoline poured into the funnel. The hose is withdrawn and the hole filled with earth. The inmates are doomed as they never pass the gasoline in seeking egress. Only the highest test gasoline is used.

A large number of farmers in this section are using the gasoline method and they are enthusiastic over it as a squirrel exterminator. It is a simple matter to prove its effectiveness and if it is found to work as well elsewhere the farmers of the State will be saved thousands of dollars annually.—*Livermore Herald.*

We notice much in the papers about how to grow very large turkeys. This seems to us superfluous, as the demand is for fat turkeys of medium size. For breeds it is all right to cater to the demand for big turkeys, for turkey raisers will try to raise very large ones, merely from a misunderstanding of the size the people usually buy for the table. Of

course a large turkey will bring as high price as a smaller one, but they are not so readily disposed of, and it costs more to grow monsters than normal sized birds. As in other fowls, inbreeding should be avoided, not solely to increase the size of the progeny, but to promote vigor and vitality. A farm is the only suitable place to raise turkeys, as their nature requires a wide range which they cannot have in small enclosures.

The best cow for each one is the cow we like best to handle and be around. There is such a thing as incompatibility of temper between the man and his cow often times, and this fact often marks the line between success and failure. The man who loves his cows and cares for them as a man will who has this affection for his stock, will most assuredly receive better returns for his labor than the one who simply tolerates his dairy. The man who takes pride in the Guernsey or the Jersey or the Durham should turn his attention to that particular breed.

A press dispatch from Fort Worth, Tex., tells us that the firm of Gunther & Jones, whose holdings of cattle in South Texas are among the largest, has sold to Major Maud, acting for the British Government, 2500 head of breeding cattle to be delivered at Galveston for immediate shipment to South Africa. Export buyers in the Chicago Union Stock Yards also have some orders for cows to go to South Africa.

# "SAVE-THE-HORSE"

TRADE MARK

## SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, WIND PUFF, WEAK (except Low Ringbone) AND SPRAIND TENDONS, AND ALL LAMENESS.**

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "SAVE-THE-HORSE" can be applied in all conditions and extremes of weather—hot or cold.

Work horse continuously if desired. Cures without scar, blemish or loss of hair. Contains no Arsenic, Corrosive Sublimite or other form of Mercury, or any ingredient that can injure the horse.

Chronic and seemingly incurable cases in the advanced stage that have been fired two or three times and given up as hopeless, positively and permanently cured.

"Save-the-Horse" marks an achievement remarkable and unparalleled in medicine. It is the crowning success of ten years' research and experimenting in the treatments of the products of inflammation.

The potent, unfailing power of "Save-the-Horse" lies in its concentrated, penetrating, absorbing properties. It cures by penetrating to the seat of the injury or disease, producing a physiological

change, absorbing all inflammatory exudate and producing a healthy, normal condition of the parts.

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle, constructed solely to convince, satisfy and protect you fully. We know positively "Save-the-Horse" will absolutely and permanently cure, and for that reason guarantee is made all your way. Copy sent on application.

The need of second bottle is almost improbable except in rare cases.

There is no condition or arrangement we can make more binding to protect you than our guarantee. Copy sent upon application.

\$5, all druggists or dealers, or sent by express prepaid.

## Limonero=3=2:15 3=4.

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/4 will make the season of 1903 at the

## AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS.

J. H. WILLIAMS,

Owner.

University Station, Los Angeles, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

## NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12 1/4 respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10 1/4. John A. McKerron 2:05 1/4 (2:12 1/4 as a three-year-old) is the fastest trotter of all the famous trios George Wilkes.

NUTWOOD WILKES will make the Season of 1903 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

IS THE SIRE OF

For the Season

With return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for but no responsibility assumed for accidents and escapes.

But three of the grandsons and granddaughters of NUTWOOD WILKES ever started in races. Of these, Alone 2:09 1/4, fastest four-year-old of 1902, is by a son (Nearest 2:22), and Who Is It 2:10 1/4 and Miss George 2:35 are out of his daughters. Young stock by NUTWOOD WILKES for sale. For further particulars apply or address

MARTIN CARTER. Nutwood Stock Farm, Irvington, Alameda Co., Cal.

## BONNIE DIRECT 2:05 1-4

Winner of fastest 5 heat race paced in 1900. Winner of Chamber of Commerce Stake at Detroit; Blue Hill Stake at Readville, and three other great races. Biggest money winner of "New" Pacers of 1900, having \$5575 to his credit the first year out.

Sired by Direct 2:05 1/4, sire of Directly 2:03 1/4.

Hal Direct 2:04 1/4, Prince Direct 2:07.

Directum Kelly 2:08 1/4, etc.

Dam BON BON 2:26 (dam of Bonilene 2:14 1/4), by Simmons 2:28, sire of Helen Simmons 2:11 1/4. New York Central 2:13, etc. Also sire of dams of Ferret 2:07 1/4, Tommy 2:10 1/4, Owyhee 2:11, etc.

Second Dam BONNIE WILKES 2:20 (dam of 13 in list) by George Wilkes 2:22.

Third Dam BETTY VILLEY by Bob Johnson, Thornton, and son of Boston.

BONNIE DIRECT is a black stallion, 15 1/2 hands high, weighs 1200 lbs. Is a good individual, has a limit of feet and legs, and is absolutely sound in every way.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in fact can be returned next season or service fee refunded, at the option of the owner of mare. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates.

C. L. GRIFFITH,  
Pleasanton, Cal.

## Grease Heel, Scratches,

MUD FEVER, HOOF ROT, SPEED CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Fixine

After Blistering. Veterinary Fixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair.

As a Preventive—If a light application of Veterinary Fixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Fixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

Vendome.....2:18½  
Dr. Frasse's Sister, 2:25½

By PALO ALTO 2:08½ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12½, Pasante (4) 2:15, Palita 2:16, Rio Alto 2:16½, Palatine 2:18, and 11 others in 2:30 list.  
Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31½, and of 3 in 2:30 list, and the dams of 6 in 2:30 list.  
Second Dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12½ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal.

## Alta Vela 22449

RECORD 2:11½

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07½, Sunol 2:08½, Palo Alto 2:08½, Alta Vela 2:11½, and 9 more in the 2:15 list, etc.). Dam LORITA 2:18½ by Piedmont 804; second dam Lady Lowell (dam of Ladywell 2:16½, Lorita 2:18½, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16½.

Will Make the Season, 1903---Fee \$50---Race Track, San Jose.

Limited to 10 mares, as he will be trained and raced again this year.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,  
Race Track, San Jose, Cal.

## SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 787. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

BLOOD THAT PRODUCES CHAMPIONS

## STICKLE

Sire, SILVER BOW 2:16 (sire of 8 in 2:80) by Robert McGregor 2:17½ (sire of Crescens 2:02½).

Dam, GRACE, dam of Daedalion 2:11. Creole 2:15 (sire of Javelin 2:08½) and Eagle 2:19½, and grandam of Sir Albert S. 2:03½, by Buccaneer.

Will make the Season of 1903 at

Race Track, ANGELS, Calaveras Co.

Terms, \$25 the Season, WITH USUAL RETURN PRIVILEGES. For further particulars address

GEORGE E. STICKLE, Angels, Cal.

## MONTEREY 2:09 1-4

Reg. No.  
31706

Will Make the Season of 1903 at

SAN LORENZO SATURDAYS, SUNDAYS. MILPITAS WEDNESDAYS, THURSDAYS AND FRIDAYS.

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility for accidents or escapes. Send for card containing pedigree and full particulars. Address

P. J. WILLIAMS, San Lorenzo, Cal.

Breed for Size, Style, Speed, Gameness.

## HAMBLETONIAN WILKES 1679

The Only Son of the Great Geo. Wilkes in California, . . .

SIRE OF

Phoebe Wilkes.....2:08½ | Tommy Mac.....2:11½ | New Era.....2:13 | Saville.....2:17½  
Robert I.....2:10 | Vic Schiller.....2:11½ | Aeroplane.....2:16½ | Grand George.....2:18½  
Phebon W.....2:10½ | Arlene Wilkes.....2:11½ | Sybil S.....2:16½ | J. F. Hanson.....2:19½  
Rocker.....2:11 | Sunbeam.....2:12½ | and 12 more in 2:30

Will Make the Season of 1903 at

GREEN MEADOW FARM

Brokaw Road, 1-4 mile from Santa Clara.

Terms for the Season, \$40. Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escapes or accidents. No wire fences. Address

R. I. MOORHEAD,  
SANTA CLARA, CAL.

## BAYSWATER WILKES 2:25½

Son of Sable Wilkes 2:18 and Fanny Bayswater Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10½

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

Excellent pasturage for mares \$3.50 per month.

For cards containing full pedigree and all particulars address

S. H. HOY, Winters, Cal.

THE BARON WILKES. WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Bred to the Futurity Winning Family.

## BARONDALE 2:11½

Reg. No.  
20,184.

SIRE OF

Son of the Great BARON WILKES 2:18, greatest living

Sire of 2:10 performers (sire 9 in 2:10 list).

1st dam NATHALIE (by Nutwood 600), dam of Grand Baron 2:12½ and BARONDALE 2:11½.

2d dam BEATRICE (by Cuyler 100), dam of Patron 2:14½, Prodigious 2:16, Pangloss and Patronage, all great sires.

3d dam MARY MAMBRINO (by Mambrino Patchen 58), dam of Elvira 2:18½, Dunraven (sire) and dams of Ponce de Leon 2:13 and four others.

Where Can You Beat This Breeding?

Season 1903 San Jose Track.

TERMS \$50 SEASON, with usual return privileges.

TOM JAMES,

1120 Alameda Ave., San Jose, Cal.

## ZOMBRO 2:11

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

ZEPHYR (4).....2:11

ITALIA (3).....2:23½

LORD KITCHENER (4).....2:29½

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06½ in a race, Julia M. (5) 2:12, Italia (3) 2:15½, Zombowette (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19½, Tee Dee Cee (4) 2:21½, Zerica (5) 2:25½, Gold Coin (4) 2:26½, Mabel W. (4) 2:28½, Edmond S. (5) 2:28½, Gyr Falcon (5) 2:30, Zombro C. (5) 2:30. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes.

Send for card containing pedigree and full information. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

## THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL.  
(Property of JOHN PARROTT, ESQ.)

Imp. Hackney Stallion

**GREEN'S RUFUS 63 (4291)**

Will serve a limited number of Approved Mares, Season 1903

**FEE - - - \$75**

Reductions made for two or more mares.

Manager, WALTER SEALY.

**Breed to Extreme Speed.**

**CHAS. DERBY 4907, rec. 2:20 \$50 the Season**

SIRE OF MUCH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09½, OWYHEE 2:11, LITTLE BETTER 2:11½, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at reasonable prices. Address

## OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

ELECTIONEER

NUTWOOD

**NEERNUT** Record 2:12 1-4  
Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

**SANTA ANA, CAL.**

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two-year-old Arion. He stands 15½ hands, weighs 1100 lbs.; blood bay with black points; trots without boots. He is a great race horse and his record (2:12½) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

GEO. W. FORD, Santa Ana, Cal.

## SIR GIBBIE 2D.

No. 370

American Hackney

Stud Book

**Hackney Pony Stallion**  
13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

**MENLO STOCK FARM**

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

JAMES McDONNELL,

Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SEARCHLIGHT 2:03½

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03½).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Arion, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

**Terms for the Season, \$75.**

## LECCO 2:09¾ The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01½, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

**\$50 for the Season.**

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Good pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:20½, and 36 others in 2:30 list. Dam, Fidelity (at 2 years) 2:36, Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:06½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelity, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancel, son of McCracken's Blackhawk 7:57.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:06½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelity, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancel, son of McCracken's Blackhawk 7:57. NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:06½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelity, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancel, son of McCracken's Blackhawk 7:57. NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross as it has produced John A. McKerron 2:05½, Nathan Straus 2:06½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:11½, Mary Celeste (at 2 years) 2:17½, etc. Fidelity, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancel, son of McCracken's Blackhawk 7:57.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morhead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER  
SORES and SADDLE GALLS there is none  
superior.

The horse CAN BE WORKED AS USUAL.  
For BARBED WIRE CUTS, CALKS, SCRATCHES,  
BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery  
as well as a dry sore.

Its use will absolutely prevent BLOOD POISON-  
ING. In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1900 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
it is THE GALL CURE OF THE 20TH CENTURY.  
It is a quick and sure cure for those troublesome  
skin cracks under the neck which injure and often  
lay up race horses.

All Trainers should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

THE BREEDERS MEETING IS WANTED by several of the towns in California. Communications have been received by Secretary Kelley from Fresno, Stockton, Santa Rosa, Pleasanton and Salinas asking what inducements must be offered to secure this, the leading harness meeting held on the Pacific Coast. The big stake already advertised to close June 1st, together with the attraction of the two year old divisions of the first Pacific Breeders \$6000 Futurity which are to be decided this year, will make the Breeders 1903 meeting a very notable one. The meeting last year at Fresno was quite a successful one, and a large number of people were drawn to the Raisin City during the week. The meetings held by the association at Santa Rosa have always been well attended and the prospects are that wherever the Breeders go this year the meet will be well patronized. There is every prospect of the program being the best offered in years, the big stakes already announced being especially attractive. \$2000 for slow class trotters, and \$1500 for slow class pacers are prizes worth raining for, but in addition to these are purses of \$1000 each for trotters of the 2:15 and pacers of the 2:13 classes. The Directors of the association will make every effort to select a place and date for the principal meeting within the next two weeks, so that owners and trainers will know just how to prepare their two year olds for the futurity event.

THE BUTCHERS of San Francisco will hold their ninth annual picnic and race meeting at the California Jockey Club's track at Emeryville May 20th this year and advertise their racing program in our business columns to-day. The San Francisco butchers have the strongest organization of tradesmen in the city, and thousands of people attend their annual celebration at Emeryville every year. The picnic, dancing and athletic events are held at Shellmound, just opposite the race track, and 25 cents admits to both places. The purses for harness horses are \$75 each, and the plan of racing is the same as has been followed at these meetings for the past few years. There are but two heats to each race. The winner of the second heat is awarded second money and the second horse in this heat gets third money. There will be a large entry list and more fun for the money than at any meeting held in California.

TRANSACTIONS of the California State Agricultural Society during the year 1901, is the title of a volume of 466 pages just issued from the State Printing Office. The volume is a year late owing to the rush of work in the State Printing Office.

"The resources of California should be understood and as broadly advertised as possible; with this end in view we have collected complete reports from each county, containing data in relation to general agricultural pursuits, cereal products, horse, cattle, sheep and swine breeding, and fruit and dairy interests, together with such other information bearing upon the growth and prosperity of California as it is possible to obtain. We feel certain that the information contained in this report will be of great value to the people of the State and will give to the world at large an idea of what can be accomplished by those who desire to till the fertile soil and exploit the great mineral deposits of California."

In addition to a complete financial statement of the association for 1901, there are articles on subjects relating to live stock of all kinds and their breeding and care by such experts as Prof. Leroy Anderson of the State University, S. B. Wright, C. H. Sessions, Henry Berran, George Andrews, James Withcombe, Dr. C. H. Blemmer, State Veterinarian, and others. We have not had time to thoroughly examine the volume but expect to make many extracts from it in the near future for the benefit of our readers.

## VOLUME TWO of the American Horse Show Blue

Book has been received at this office through the courtesy of the publication company. The book contains complete summaries of all recognized horse shows held in 1902 in the United States and Canada, giving the official awards in all classes, names and descriptions of prize-winning horses and ponies, rules of appointment of equipages for the show ring and road, horse show rules and regulations, table of horse show championship winners, rules for classification of saddle horses, scale of points for judging Shetland ponies, list of horse show exhibits and many beautiful photographs and half tone illustrations of prize winners. The volume is magnificently printed and bound in blue leather and is a most valuable addition to every horseman's library. To those who desire to know correct form in equipage the article on that subject is worth ten times the value of the book.

HAY IS HIGH in California at the present time, but the prices here are small in comparison to those asked up in Washington. Timothy hay is retailing at \$26 a ton in Eastern Washington. The shortage is said to be due to the large purchases recently made by the Government for shipment to the Philippines, together with extra heavy shipments to Alaska and the northern mining camps. The prices for hay in San Francisco are quoted as follows: Wheat, \$11@14; wheat and oats, \$11@13; wild oat, \$10@11.50; red oat, \$10.50@12.50; barley, \$10@12; volunteer, \$10@10.50; alfalfa, \$10@12.

MR. J. L. MCCARTHY, who conducted the very successful combination sale of trotting stock at Portland, Oregon, two weeks ago, has been in San Francisco this week. Mr. McCarthy states that the market for horses is very good in Oregon and he could have sold twice the number consigned to his sale at the same good average, which was \$192 per head. He also states that the outlook this year for racing on the North Pacific Circuit is most excellent and promises to be even better than last year, which was the best ever held in the Northwest. He will have charge of the betting at the big Spokane meeting this season, as he did last.

MAY AND DECEMBER were united in New York last week when *Turf, Field and Farm*, the oldest turf journal in that city was purchased by the enterprising proprietors of *Sports of the Times*, the youngest weekly of that character. We hate to be compelled to give up the pleasure of perusing the *Turf, Field and Farm*, that has had an honored existence of forty years or more, but cannot but think that the union of the two is a wise move. *Sports of the Times* is an ably conducted up-to-date journal that seems to have swung into the road to success with a gait and condition that is carrying it to the goal.

ENTRIES FOR THE BUTTE MEETING will close to-day. The meeting will open June 6th and continue until August 15th. There are eleven stakes advertised in this issue, to close to-day. The added money in nine of these stakes is \$6000 each, and for the other two \$750 each. These stakes have been arranged for all distances and all ages, and will doubtless receive a good list of entries. At least two hundred and fifty runners will attend the meeting from California.

CHAS. A. DURFEE was up from San Jose this week and informed us that he is getting out of the horse business just as fast as he can, having sold two of his McKinney stallions during the past month. He incidentally remarked, however, that he had bought a couple of McKinneys the day before, a two and a three-year-old, and also purchased their dam. When Durfee gets out of the horse business for good, order your ascension robe for immediate delivery as Gabriel's trumpet will be heard the next morning.

WALTER HOBART, who went East a few weeks ago with a dozen polo ponies that he proposed shipping to England, telegraphs that he has sold ten of them to Harry Payne Whitney, of New York, for \$20,000, which leaves him but two to take on his trip to England, where he will take part in several polo games. The ponies were a great lot and Hobart must have cleaned up about \$15,000 on the deal. Among the ten sold to Whitney was Terry McGovern, one of the best ponies ever seen at Burlingame.

## THE SUPPLY OF WORK HORSES in California

has had so many demands made upon it during the past two or three years that there is danger of it being so depleted that difficulty will be had in securing enough horses to move the big crops that this State will produce this year. From all parts of California come reports of great prospects for heavy crops of fruit and grain, and horses are being purchased at the present time by the farmers, the very persons that should have them for sale.

AUGUST BELMONT, the well known New York millionaire patron of racing, owns one trotting bred colt of his own breeding. It is by the champion, Cresceus 2:02½, from Sierra Madre by Baron Wilkes. The mare and foal are the only trotters Mr. Belmont owns, but if he could see this youngster grow into a 2:10 trotter, there is no telling but he might try and breed many more. The disease generally runs such a course.

If we were called on to select, from pedigree alone, the most likely unproven broodmare, we should hesitate a long time before giving a decision against the young mare, The Princess Rose 2:30 by Dexter Prince 1:363, dam Sweet Rose (1) 2:25½ by Electioneer; second dam Rosemont, dam of three, by Piedmont 2:17½; third dam Beautiful Bells 2:29½, dam of ten, by The Moor; fourth dam Minnehaha, dam of eight, by Bald Chief 1766; fifth dam Nettie Clay by C. M. Clay Jr. 2:22; sixth dam Col. Morgan Mare by Abdallah 1; seventh dam by Engineer II., sire of Lady Suffolk 2:28. Here we have seven generations of trotting blood with trotting speed production all through the middle and at both ends of the pedigree. If we could have the selection of a stallion to which The Princess Rose should be bred for five years, and she should not produce some very great trotters, we would be willing to freely admit that we have no real conception of the correct principles of speed breeding.—*Western Horseman*.

J. H. Wallace, founder of the trotting stud book and year book, recently gave \$120,000 to the Washington and Lee University, at Charlottesville, Va., and he had previously given away \$1000,000 to educational institutions and charities. Soon after Mr. Wallace received \$130,000 for his publication he invested the money together with what he had before made, in stocks and bonds, which have greatly appreciated in value in the last few years. He is living in New York and, though eighty-one years old, is still busy tracing pedigrees—not the pedigrees of trotters, however. He recently compiled and published the genealogy of the Riggs family, of which he is a descendant, and is now at work, purely for his own pleasure, on the genealogy of the Coe family, which interests him because, he says, it has produced more Presbyterian elders, ministers and ministers' wives than any other family in America.

The Philadelphia *Record* tells this hard luck story: "A blind hopped pacer, touted to be a world beater of the trotting gait and one that could be purchased at reasonable figures, gave James Morris, George Hindemeyer and E. N. Payne, three local horsemen, a long trip a few days ago. The tip on the animal came straight, but on inspection and a trial the boys came home disgusted and minus a large sum for expenses. The animal was found twelve miles from a railroad station below Hagerstown, Md., near the Virginia line. On refusing to purchase, the owner charged the boys \$3 each to haul them to the station."

Sober up on Jackson's Napa Soda.

## JOTTINGS.

THE MOST TALKED ABOUT HORSE of Pleasanton this year is Maurice Salisbury's big pacer. Most by Lottery Ticket 2:21, son of Dexter Prince and Emma Natwick. Perhaps his peculiar name has something to do with it, but his wonderful speed has been the talk of the track and visiting horsemen all spring. The quarter in 2 seconds, the day Messrs. Smathers and Dick of New York were there, was Missouri's evidence that proved the speed reputation of Miss, and now from California to Maine the horse papers are talking about him. Mr. Salisbury had him let out for a pose before my camera last Saturday, and then his new purchase, Dick, a full brother to the pacing terror, was posed for a snap. They say Dick has the speed symptoms as clearly defined as his brother with the breakfast food name, though all the boys at the track are unanimous in the opinion that on the day of his arrival at the track he was the most ornery specimen of horse flesh every seen in that section of California. While he is no beauty yet, good hay and oats and a liberal amount of elbow grease (which Mr. Salisbury always keeps a good supply of) have improved him a great deal and, as his picture shows, he looks like his illustrious brother.

So much taken with these two big pacers was Mr. Salisbury that he made a quiet trip up to Dick Richards' farm at Grayson two weeks ago and purchased for a song their dam, a big mare by Mr. Richards' Electioneer horse Elector 2:10. She is in foal to a son of Lottery Ticket, Mr. Salisbury told me, but he could not remember the name of the horse or his breeding. "I want you to take a good look at that old mare," said he, "and when you have you will not wonder at her producing two such promising big horses. I don't know her dam's breeding, but will try and trace it up if possible. They say her dam was a thoroughbred mare, and I guess they must be right as she carries plenty evidence of the blood; but she's good enough as she is without a pedigree."

For a big mare she has considerable quality, and although there is lots of bone and muscle in her make-up she does not look coarse. I asked Mr. Salisbury what stallion he intended breeding her to, and his reply was characteristic: "The idea of you asking me such a question! Bonnie Direct, of course, by two or three hundred per cent!" If I had thought a moment before making the interrogatory, I would have known, as I have heard the maker of champions express his opinion many times as to the individuality, speed, breeding and other qualities of this grandson of the great Director.

Mention of Mr. Richards' name recalled to me a remark I once heard that gentleman make, and I repeated it to Mr. Salisbury. It was this: "If I had bred a few trainers before I started breeding horses, I would have had better luck with my trotters."

"Nothing truer," said Salisbury. "When I had old Director I brought out a champion of his get every year, but you don't hear of many now. He has Directum, Direct and seven or eight more very fast ones, but with the proper mating of mares to him and the proper training of the produce there would have been fifty in the 2:10 list by that old horse."

In making up the group of pictures for the front page of the BREEDER AND SPORTSMAN this week, I recalled a snap-shot I took at Pleasanton over two years ago. George Davis of the Rancho del Vallo had old Flying Jib at the track, and Mr. Salisbury was looking his old favorite over and admiring him. We induced Mr. Salisbury to get into the cart and hold the lines while I turned my camera on him. The promise was given not to publish it until he was back into the business, as he did not want notoriety. Now that the kingmaker is about to leave for the East with one of the best strings he ever started out with, and is right in the public eye, I am absolved from the promise then made. I call the picture one of the gems of my collection. Flying Jib still holds the world's record of 1:53 for a male with running mate, made when in Mr. Salisbury's stable, and the association of one of the greatest pacers ever bred with one of the greatest horsemen that ever lived gives it a historic value, although it is only a snap-shot made with a little hand camera.

The Salisbury string will leave Pleasanton for Empire City track, New York, about May 14th. In the string will be the famous San Jose mare Lynda Oak by Yucca, that is consigned by the irrepressible, who gets there every time horseman, politician and estate dealer, James W. Rea, better known everybody as Jim Rea. A year or so ago Miss Na-

bel E. Wilson, of Decatur, Illinois, who is a cousin of Mr. Rea, was visiting his family at the Garden City. She is quite a horsewoman (it's in the blood) and having the use of Lynda Oak for road and pleasure driving while in San Jose, fell in love with this handsome mare and when she left for home Mr. Rea made her a present of the daughter of Guy Wilkes. Lynda Oak is one of the best road mares ever driven, as she is not only fast, but pure gaited and not afraid of anything. She is the dam of Dr. Frasse 2:12½, The Vendome 2:18½ and Dr. Frasse's Sister 2:25½. Another of her produce, Elsie Downs by Boodle, was very fast, but met with an accident and was not raced. Her last foal, The

GAYZOTE

Mascot by Iran Alto, is a very fast filly and will take a record below 2:20 if raced. These are all trotters. Lynda Oak made her record in 1900 under circumstances that were remarkable. She was in use every day as a buggy mare by Mr. Rea. She was ten years old and Farmer Bunch, who was training the Vendome Stock Farm horses, told his employer that it was a shame the old mare did not have a record and he would give her one if Mr. Rea would send her to the track during fair week. Mr. Rea turned Lynda over to Bunch on Sunday. The following Friday he started her and she won the race and the third heat in 2:18½. Her breeding is as follows: By Guy Wilkes 2:15½, dam Yedral (dam of Thos. R. 2:15) by Nutwood 600; granddam Lady Patchen by Budd Doble 3764, son of Geo. M. Patchen Jr. 31. It is unfortunate that Lynda Oak is to be lost to California, as she is one of the great brood mares of the State and should be in the breeding ranks regularly. Last January Mr. Rea mated her with his stallion Iran Alto 2:12½, son of the great race horse Palo Alto 2:08½, and she is believed to be safely in foal. When Lynda Oak arrives in Decatur, Illinois, she will be taken in charge by Miss Wilson, who will drive her on the roads. Mr. Rea says his uncle, 90 years of age, will also handle the ribbons over the mare occasionally, and as the old gentleman is quite "horsey," like all the Rea family, it is not likely he will be beaten on the road by anybody, unless it is someone that owns a faster horse.

Among the horses consigned to the Fasig-Tipton Company's Blue Ribbon sale at Cleveland, the first to be shipped from Pleasanton will be the Griffith Estate and Geo. A. Davis' consignments. They will leave next Tuesday, the 28th. I think the three year old pacer Siletto by Steinway out of Nola by Nutwood is the highest class pacing colt of his age that ever turned the Pleasanton track. This is saying a good deal, but he is a pacing wonder and can real off quarters now as fast as anybody's horse of any age, and he is as sound as the best hickory spoke ever picked out for a buggy wheel. He don't know anything but pace when on the track and can go faster than Bert Webster has ever permitted him to step, although he has shown a half in 1:03, a quarter in 29½ seconds and an eighth in 14½ seconds. If the party that buys him at the sale will keep him out of races or severe training until he is five years old, I believe he will be a two-minute horse as certain as anything in this uncertain world. Siletto is very much like a colt as yet, but when he reaches maturity and has filled out fully he will make a grand looking stallion. The combination of Steinway and Nutwood blood is pretty close to the top in breeding. Nola is the dam of Phoenix 2:15½; the next dam Belle Byron by Bowman's Clark Chief, produced one standard performer and the dam of another; the third dam was by Almont 33, the fourth by Bay Chief and the fifth by Davy Crockett.

In the Davis consignment are Roy Direct 2:10 and three of his get. One of these, a three year old filly out of Mabel, the dam of Directly 2:03½, is a very fast

pacer having shown quarters below 30 seconds and a half in 1:03½. Another, Reydlotte, has the mare Siletto 2:22 by Sidney for a dam. She is a square trotter and a fast one. There is a colt by James Madison in Mr. Davis' consignment that is one of the most promising colt trotters now at Pleasanton. He is a sweet gaited fellow and will show what he can do at Cleveland if he reaches there in good shape. I look for him to bring quite a bunch of money.

Gayzote, the two-year-old Palo Alto bred colt by Nazote from Lulu Wilkes (the dam of Advertiser 2:15½, Alla 2:21½ and Welbeck 2:22½) by George Wilkes, second dam the famous mare Lula 2:15 by Norman 25, is going to the Cleveland sale in charge of Millard Sanders. Mr. Ed Tipton is about as quick to discover a good colt as the next man, and when he was in Pleasanton a few weeks ago "got stuck on" this fellow. After he reached home he was quoted by the papers as saying that Gayzote was one of the best two-year-olds he had seen on his trip. The colt was not then consigned to the sale, so it was not any advertising talk. Ever since Mr. Sanders took Gayzote into his string the Pleasanton folk have been admiring the son of Azote's full brother. He is undoubtedly a great colt trotter and a grand individual. He is the style of horse to head a stock farm, as he has size, style, finish, bone and muscle. When matured few stallions will be able to outshow him, and Mr. Sanders is confident that few will out-trot him.

Henry Sanders and Ed Mills are doing very well in their business of buying and selling trotters and pacers. The firm's name is Mills & Sanders and they have invested quite a sum in horses that in their opinion are worth taking a chance on. They will send Owyho to the Cleveland sale and he should bring a good price. He is by that good game race horse, Owyhee 2:11 out of Bertha, the dam of Don Derby 2:06 Diablo 2:09½ (sire of Sir Albert S. 2:03½, etc.), Elf 2:12½, Ed Lafferty 2:16½, Jay Eff Bee, 2:26½ as a yearling, and others that will soon be in the list. This colt Owyho is one of the best formed colts that the mare Bertha has yet produced, and the daughter of Alcantara has founded a wonderful family, as her two sons, Demonio and Arner are producing colts that give every promise of being as fast as those sired by her son Diablo. Bertha is without doubt one of the leading broodmares of America and her family is still on the increase. She will be bred to Searchlight this year and the produce should be a real crackerjack. I look for Owyho to attract a lot of attention from Eastern buyers when he reaches Cleveland. He has speed—lots of it for a three year old—and is a good individual. Chas. Derby and Steinway, by whom Bertha has had all her other foals, are both great stallions and great speed producers, but Owyho is by Owyhee 2:11, a horse that went down the Grand Circuit in 1899, and without being entered in any of the big stakes, won over \$12,000, getting first money in seven purses, one second money and one third money out of nine starts. As Owyhee was sold to Australian parties for \$5000 a year or so ago, there will be no more of his get in California, which is unfortunate, as they tell me that his colts and fillies at Oakwood Park are the most promising of the young stock there.

Al McDonald, who trained Who Is It and gave him his record of 2:12 as a three year old, and afterwards gave his half brother What Is It a mark of 2:16½, is now at the Meek Farm, where he is handling about a dozen head of trotters and pacers. Seven or eight of them will go to the Cleveland sale and they are a fine lot of young horses. McDonald went over to the Sulphur Spring Farm last Sunday and purchased What Is It and two or three others from the Gurnett Estate. One is a McKinney colt that is quite a trotter. Al is a good, careful man with horses and young colts and is one of the few who can wait on a horse while training him and not expect to get all the speed the first month. In the gray gelding What Is It he has a horse that should be a real good one in his class. This son of Direct had a very bad foot last year from gravel, and trotted a couple of game races with it when he should have been in the stable. The foot is all right now and 2:12 should not stop him when he is right.

The Pleasanton people are determined that the Golden Gate Fair shall not be permitted to lapse just because the Governor saw fit to knock out the ap-

proportion therefor. They have held a meeting at the horse centre and propose to raise enough money to insure a first class fair and race meeting. Lou Crellin has been elected President of the committee, Editor Adams of the *Times* is Secretary, mine host Onley and City Clerk Jos. Neal are among the workers, and there are several others who are taking the most enthusiastic interest in the proposed fair. They say the town will raise \$2000 towards giving a fair and this will certainly insure them against any loss. The idea is to have three or four days racing, a stock exhibit and a pavilion, and if the fair last year is any criterion of what the town can do, it will be a genuine success in every way. A week in August will probably be selected and the Pleasanton fair may open the circuit.

J. R. Freeman, of Red Bluff, has sold his trotter Prince L. 2:17½ by Escort to a Denver man who has placed him in James Thompson's charge at Pleasanton. Prince L. is not the handsomest horse on earth, but he won three races within seven days at the State Fair last year driven by old man Rowley whose white beard was fanned by a breeze that was not slower than 2:24½ in any heat. There were eleven trotters in the first race which was for 2:30 trotters, on Sept. 10th, and Prince L. walked through the field in straight heats in 2:21½, 2:19 and 2:21½. On the 13th he was started in a field of nine comprising about the same horses. Every driver in the race knew that he had Prince L. to beat if he won and they jockeyed the old man pretty lively. The crowd's sympathies were with the long bearded veteran, however, and cheered when he won a heat and put its money down on him for the race and won it after five heats had been trotted. Prince L. was ready for another race on the 17th and while the field was smaller it was of higher class as Zambra and Arketa were both entered. Prince L. got the first heat and his present record of 2:17½, and won the second in 2:19. Zambra took the next two heats in 2:19 and 2:18½, reducing his record both times. Arketa was the contending horse in the fourth heat and was only beaten an eyelash, many claiming she had won. Had it not been for the rule of the State Agricultural Society which sends all horses to the barn at the end of four heats that have not won a heat, the gray daughter of McKinney might have won the race and a lot of money, as many thought "Red" Green had been holding her back for just such a killing. She had to go to the barn with the rest of the non-heat winners that had been rendering her all the assistance possible and Prince L. won the fifth heat amid a regular ovation for himself and aged driver. Prince L. is a rather rough gaited horse, but he is true blue and should lower his record materially as he has 2:10 speed.

A gentleman who came up from Los Angeles Thursday of this week tells me that Mr. I. C. Moshier of that place has a pacer called High Ball by Silkwood that is showing speed enough to be reckoned a candidate for the free for all class by another year. Mr. Moshier worked him a half in 1:05 last week and on Tuesday of this week stepped him through the stretch in 30½ seconds. Of course halves and quarters at that rate of speed is no proof of a world beater; one can see such performance almost any workout day at the Pleasanton, Sacramento, San Jose, Woodland and other training tracks in this part of the State, but my informant says that Mr. Moshier's pacer handles himself so nicely and looks to be going so easily that the horse experts at Los Angeles are confident he is one of the kind that will keep every promise he makes in his workouts.

Tom James is one of the busiest men in California this year, his second in this State, with his royally bred stallion Barondale 2:11½. He should be, as he owns one of the best sons of the great Baron Wilkes and is himself as nice a gentleman as ever got into the horse business. If he is a fair sample of Iowa's citizens a big emigration from that State to California would be Iowa's loss and our gain. Barondale is getting many more mares than he did last year and a higher class. He is not only a sire of early and extreme speed already but he is going to be a great broodmare sire as sure as his fillies are bred. There are no mares in his pedigree but great broodmares, and his daughters will produce to a certainty. Mr. James received a letter from Hamilton Browne, President of the Newton and Northwestern Railroad Company, Boone, Iowa, the other day and I give it space here to show how Barondale is thought of at his old home:

BOONE, Iowa, April 12, 1903.

Tom James, Esq., San Jose, California.

Dear Sir—From the several mares I bred to Barondale I got three foals. One died; another got crippled as a colt and since getting old enough I've bred her (last year) to Sphinx. It was a very fine gaited trotter and could show more speed in the pasture than any colt I ever owned. Dad Whitney, who broke it at two years old, used to tell me that it could trot

faster than any colt I ever bred, and I think he was right. The third one, a fine, good sized bay filly, is a pacer. No better gaited one lives; has speed, good head, likes to race and can. We broke her as a two year old and turned her out until last spring. Took her to Galesburg in April. She could not show better than a 3:30 gait at that time. It was impossible to give any horse steady work last spring or summer owing to frequent rains, but the third time she had a slow repeat we drove her the third mile in 2:36, and the seventh time we worked her out for speed she went a full mile at Joliet in 2:18 and we let up on her for a year. If she keeps sound she will beat 2:10 sure this year. I wish Barondale was back in Iowa. If I was out there I would buy a colt of his out of a good dam. There must be some good ones there now. Am glad on your account that the horse is proving a success as a sire and wish you luck with him.

Yours truly, HAMILTON BROWNE.

Geo. Beckers writes me that he will leave Los Angeles, June 1st, for Salem, Oregon, with Zombro 2:11. Out of habit I was about to say "his great stallion Zombro," but the son of McKinney now occupies a position where he does not require the qualifying adjective. Zombro has achieved greatness. He is not only the best race horse that McKinney ever sired, but he has already sired a filly that has equalled his record of 2:11, and there are quite a number of others that will beat that mark. Zombro will remain at Salem until September 1st. Beckers will take a stable of trotters up north with him, all by his horse. One of them is the horse Tee Dee Cee that he thinks is about the best trotter he ever had any business with. Beckers bought him last summer from T. D. Condon, of Portland, the man that bought Lord Kitchener 2:29½. George is feeding him on angel's food and chocolate drops. The 2:15 list of trotters by Zombro will have quite an addition this year if the colts all stay right, as there are enough of them showing that rate of speed now to make the list quite formidable. Dr. Hazlett, of San Bernardino, owns a three year old Zombro filly, dam by Pope Leo 2:19, son of A. W. Richmond, that with 60 days' work has trotted a half in 1:10. Johnny Donahue has her in his stable. I see that Julia M. by Zombro has been entered in the 2:11 trot at Cleveland, so they must think pretty well of her.

Walter Maben is still on crutches they tell me, but he managed to climb into a sulky last Tuesday and jog one of the horses in his string. Fred Ward is doing the fast teaming for him and is doing well with them. Walter has had a good many bad falls from sulkies, generally the result of some other person's carelessness. It would be hard for anyone to name a more popular reinsman than Walter Maben and it is a pleasure to know that he is fast recovering from his lameness and will soon be driving as much as usual.

#### Matt Byrnes in Hungary.

Matt Byrnes, who stands almost without a peer among trainers and whose name a few short years ago was upon every one's lips, but who in the hurry and bustle of events has been lost sight of, is now in Hungary. He is training the race horses owned by C. Boross of Budapest. The stable is not an important one and it is passing strange that the man who so successfully handled the mighty Salvator, the peerless Firenze, Tammany, Montana and other kings and queens of the turf should be forced to go abroad to earn a livelihood, especially in view of the fact that good trainers are scarcer now than ever and the demand for their services greater than ever.

In a letter to a friend in New York Mr. Byrnes speaks highly of the class of horses in training in Austria, and is enthusiastic with everything but his lack of knowledge of the language.

The veteran trainer's letter follows:

"I am at present quartered at the Hirsch Club Stables, Magyar, which is about six miles from the city of Budapest. The training grounds are about a mile from my stable. There are about 100 head of horses trained at this place. The track is one and a half miles around, and is a very heavy, sandy track. My employer, Mr. E. Boross, expects to build a stable and track as soon as he finds suitable grounds. I must say that I am impressed very much with the thoroughbred horses in this country. They have the very best blood that can be procured in England. All or very nearly all the horses are imported.

"The thoroughbreds possess size and plenty of bone, which speaks well for the country. The racing stock in my care, I regret to state, is not particularly promising. When I first arrived here I had only two cheap three year old fillies, selling platters, which had been bought out of selling races last year, and three two year old fillies as yet untried. Since then Mr. Boross has leased the racing qualities of five others. I have been given carte blanche to buy high class horses, but owners want considerably more for them than they are worth. My outlook for this year does not appear to be very encouraging.

"The race courses at Vienna and Budapest look very well. No one is allowed to train on the race courses for a week before a meeting begins. Both of these courses are turf. I find it very difficult to get along, because I cannot speak the language. There is not one out of a thousand that can speak English here, and everything has a different name."

#### Lively at Sacramento Track.

ED. BREEDER AND SPORTSMAN:—The Sacramento track under the new lease of Mr. Tom Norton looks like plenty of prosperity for the trainers. Not for four years, say most of the horsemen, has the track been in such fine shape. Mr. Norton spares no pains and keeps a competent man on the track at all times to keep it in condition, and horsemen are finding out that this is one of the very best and fastest mile courses on the Pacific Coast. There will be no need of anyone leaving Sacramento to find a good training track, as this is now as good as the best. The stalls are all being renovated and so many new horses are coming in that one will soon be able to see a horse race any morning by going to the track.

Hi Hogboom has an addition to his string, a fine three year old by Diawood, dam a full sister to Ned Thorne 2:11½.

Walter Tryon has some fine colts that he is doing time on and they look like oats in the bin. Mr. Tryon's stallion Azmoor is in the pink of condition and doing a large business in the stud.

Mr. Jorgensen has a few good colts that he is giving first lessons to. Among them is the fine young stallion, Athamax, that is bound to be a producer, if breeding, size and good looks count.

Mr. Callendine has four head of very promising youngsters. Guynut is the bright, particular star of this string, and is going faster than any Nutwood Wilkes of his age. He is a wind splitter.

Mr. L. M. Clark has the stallion Ouboul in fine shape and has commenced active work on him. He expects to open up from four to five lengths with him in any field he may meet this year. Mr. Clark also has a fast green trotter by Bay Bird that belongs to John Norton that can go out now and show the boys that he is one of the fittest that will survive.

Messrs. Paine and Wright have some fine three year olds the latter is educating and by the improvement they show, 2:10 will not stop some of them.

Frank Ruhstaller finds time each week to drive his three year old out of Bell Bird. If good looks and fast quarters are valuable, this fellow should bring a big price in the best of the Eastern markets.

Fred Perkins, owner of Athamax, has a fine filly that he is working a little. She is by Altamont 3600, dam Datura C., and makes the rail bird chirp quite lively when he lets her step. They say she comes down the stretch in an old fashioned style that looks like the real goods.

If things keep on as now and the horses and colts keep coming in, we will soon be short of stall room at the track. So trainers had better come early and avoid the rush.

Mr. White, who has been working the track, has left here, and two others have taken his place. Mr. Norton thinks there is work enough for two, as he intends keeping the track in the best shape of any place outside of Cleveland. SUCH WALLER.

#### Woodburn Farm to be Continued.

It is reported that the famous breeding establishment of Woodburn Farm will be run as a whole in the interest of all the heirs of the late A. J. Alexander and not dismembered as at first reported. It is said that Lucas Brodhead, who has been the manager for many years, has resigned the position and that Dr. A. J. Alexander will conduct the breeding interest of Woodburn. It is said to be the desire of the new manager to regain the former glory of the place as a breeding farm, where such well known trotters as Maud S., Wedgewood, Belmont, Harold and several famous light harness horses first saw the light of day along with such famous thoroughbreds as Harry Bassett, Norfolk, Duke of Magenta and a host of others.

#### Oregon Wonder Goes to England.

The long maned horse known as Oregon Wonder has been shipped to England for exhibition. The first of these long maned Oregon Wonders came to light in the eighties, being worked on a farm in Oregon until he was ten or a dozen years old. He was then taken East and put on exhibition, dying in Coney Island in 1887. His son Linus was the only colt sired by him of which there is a record that had the same superabundance of hirsute adornment and Linus 2d was likewise the only one of the sort got by his sire. It is this horse Linus 2d that has just been shipped to England. It is stated that at the time of embarkation the hair in his mane was thirteen feet long and insurance policies representing \$40,000 were secured on him before the ship sailed.

R. W. Walden has refused \$8000 for Contentious, his Galore-Conjectrix youngster, who won both of his starts at Benning. The offer was made just as the colt was being loaded on the cars at Bennie's shipment to New York.

## Thoroughbred Sales in the East.

The spring sales of thoroughbreds by the Fasig-Tipton Company at Sheephead Bay will begin Tuesday, June 11, with a large consignment from the famous Rancho Stock Farm of New Jersey. The Virginia yearlings from the Elderside Stud of Capt. R. J. Hancock & Son will come up for sale the following day, June 12, and will number 25 head.

The largest broodmare in the world, James B. Haggis, will occupy the entire week from June 15 to 20, with his Ranch del Paso and Diamondford consignments from California and Kentucky.

Sales will follow daily up to and including July 7, the Adelbert, Hartland, Raceland, Spendthrift, Dixiana Farm, Dixiana Stud, Balgowan, Nursery, Melbourne, Preakness, Stonewall, Sunny Slope, Rockwood, Larchmont, Mere Hill, Springland, Horse Haven, Trade Wind, Eaton and other studs, sending the pick of their breeding. Nearly all these sales will be held at Fasig-Tipton Co.'s Sheephead Bay Paddocks, and there will be the usual offerings of race horses in training at the various metropolitan race courses.

Mr. A. B. Spreckels of California will make a new departure this year, selling his Napa Stud yearlings at Chicago, in July, during the Washington Park meeting, while Mr. Charles Reed, as in 1902, will sell the last of the Fairview Stud yearlings at Saratoga during the meeting in August.

## Recognizes the Value of Fairs.

The Kentucky Stock Farm says: M. V. Richards, the Land and Industrial agent of the Southern Railway, was in Columbus, S. C., recently, and took occasion to drop these remarks: I am glad to see the interest manifested in the subject of county fairs. It is my candid opinion that an agricultural fair held in each county of your State will tend to advance the agricultural interests of the State more than any move that can be made. The fair should be the farmers' show and could be if he will make it so. To meet with the best success the farmer must become actively interested. I have attended fairs in many Northern States and in Canada, and can seriously advise the people of the south to patronize their local county fair. The townspeople should interest themselves also, and I have no doubt will do so, if approached. A good fair means improved methods and better farming, increased wealth and prosperity.

## W. H. McKinney Says:

KANSAS CITY, Mo., Nov. 3, 1903.

After giving your Veterinary Hoof Ointment a thorough trial, I can truly say it is the best I ever tried for bad legs, swollen tendons, and will allay fever quicker than anything I ever used. For bad legs and feet, it has no equal. Respectfully,  
W. H. McKINNEY,  
Trainer and Driver.

## Live Stock at St. Louis Fair.

The Live Stock Department of the Louisiana Purchase Exposition was virtually organized only since the first of the year, and hence its plans are far less advanced than is desirable. Work on the classifications and the rules and regulations governing exhibits is now, however, being energetically pushed by the Department's chief, Mr. F. D. Coburn, who is placing himself in the closest possible touch with breeders of improved stock everywhere, with a view to utilizing their best ideas for making their feature of the great Exposition what it should be. The Exposition management has planned an exhibition on a scale about twice as large as that of any previous international exposition. The cost of the World's Columbian Exposition at Chicago was about \$19,000,000; the estimated cost of the St. Louis World's Fair is near \$40,000,000. The live stock interests at the Louisiana Purchase Exposition are likely to be given proportionate attention. Classifications will include all recognized improved breeds. It is expected the friends of all the varieties of live stock, pigeons, poultry, pet stock, as well as horses, cattle and other ruminants and swine will find at St. Louis much greater recognition than has been given them on any previous occasion.

## Running Meeting at Sacramento.

The Sacramento Record-Union of April 17th says: The spring meeting of the Capital City Jockey Club, the organization recently incorporated, and to which the Mayor, the Chief of Police and the President of the Board of Trustees recently issued a permit to sell pools on track events, will be held at Agricultural Park, May 11th to 25th, inclusive, and good racing is promised.

Many of the best horses in the State will contest for the purses hung up, which will aggregate between \$15,000 and \$17,000. A carload of horses from Oakland, among them some of the best now running there, will soon arrive. The meet will be under the rules of the New California Jockey Club.

The Capital City Jockey Club proposes to give spring meets each year, and is organized for the purpose of giving races, breeding thoroughbreds and bringing the stock farms of Sacramento county to the front. The officers are Thomas Fox, President; F. E. Wright, Secretary; C. W. Paine, Theodore Shad, W. J. Irwin, Frank D. Ryan and J. W. Hughes, directors.

W. C. Sharp, of 2109 Mission street this city, reports the arrival on the 15th instant of a big chestnut filly by Falrose, from his handsome mare Princess Irene. The little miss will be fed futurity oats and speed hay as she is in the Breeders Futurity and will be pointed to win first money in it in fast time.

Like all good things, Jackson's Napa Soda has a dozen counterfeits.

## Racing in the Park This Afternoon.

Members of the Golden Gate Park Driving Association will hold matinee races this afternoon over the park speedway. The association will give a big program of events at Tanforan or some other track on Decoration Day and the racing to-day is preliminary to that. The horses for to-day's races have been classified as follows:

Trotting, 2:15 class—E. Aigeltinger's Dolador, D. de la Montanya's Ivy, M. M. Donnelly's Young Salisbury.

Pacing, free-for-all—E. D. Sachs's Al Sandy, S. Watson's Albert S., H. W. Miller's Lady Falrose.

Pacing, 2:30 class—H. Schottler's King V., G. L. Swett's Steve S., A. Jacobs' Arthur F.

The officials will be: Starter, L. Richardson; judges, G. L. Swett, E. Sachs and W. J. Simpson. E. Aigeltinger, president; F. W. Thompson, secretary. The first race will be started at 1:30 P. M. The various events will be half-mile heats, best two in three.

## Year Book Statistics.

According to the New Year Book, there are 18,548 standard trotters, an increase of 923 in 1902. This is wonderfully close to the number for 1901, which was 918. The total number of standard pacers is given as 9,713, which makes the gain for 1902 exactly 1,111. In 1901 there were 1,022. The pacers are surely outstripping the trotters, although when it comes to a consideration of extreme speed there is less difference. In 1901 only 11 new 2:10 trotters appeared; in 1902 there were 29, a gain of 18, or almost 164 per cent. In 1901 there were 50 new 2:10 pacers, and in 1902 there were 70, a gain of 20, or but 40 per cent.

## Additional Foals at Palo Alto.

A letter from Superintendent Frank W. Covey to the editor of the BREEDER AND SPORTSMAN states that since his last report the following foals have made their appearance on the farm:

April 7, b f by Nutwood Wilkes, dam Liska 2:28 by Electioneer 125.

April 8, b f by Nutwood Wilkes, dam Novelist 2:27 by Norval 2:14½.

April 18, ch c by Nutwood Wilkes, dam Palita (2) 2:16 by Palo Alto 2:08½.

April 22, br f by McKinney 2:11½, dam Elden (3) 2:19½, (dam of Eleata 2:08½) by Nephew.

The auction sale of boxes for the Boston Horse Show was held last week and over \$16,000 was realized from the sale of same. There are a dozen less boxes this year than last, so this sale was remarkable. The highest price paid for a box was \$325 and was sold to Thomas W. Lawson. This was \$5 more than the same box sold for last year. Other buyers were A. C. Burrage, Col. John E. Thayer, Eben D. Jordan, Francis Peabody, Jr., John Shepard and others.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Goehner, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

**TROTTER TRACKS.** How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track owner needs in his business.

**THE SECRETARY.** His trials and tribulations in the merry-go-round of racing. On the other side of Jordan he may find rest, there is nothing for him here but advice.

**THE SANDPIPER.** How the Dutchman did not outpace his bill for gravel while the little man in brown shirt put and then ahead of the race, nothing well they lost, animal.

**A STRANGE LAND.** How a shipwrecked Boer made a stir in another racing world. Unborn unique and if you do not believe it, you can see it is true.

**MR. DOLL.** How the best green horse in Missouri broke into turf history. He won the "Truist" stake. That is enough. If you were there you saw him.

**STRANGER.** A picture of a young power of North Carolina, whose history has a pinch of romance mixed in it.

**ANDY ANDI.** What a well-known pair learned at France and England after the hotel clerk, secured the sign, and then they could not make sense.

**RUB OF A LIFETIME.** How a flying dirt put a picture of the best broodmare in the game. Buy it now.

**FAST CHARGE.** A Southern tale of a real horseman but it is more the way a man should be than the tale of a horseman. Buy it now.

Also sent this valuable book as a present to the members of the BREEDER AND SPORTSMAN. Send for it and the book will be postpaid on receipt of price \$2. Address:

BREEDER AND SPORTSMAN  
30 Centre Street, San Francisco

## THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

## ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. **Wheels.** We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

T. H. SPEDDY, 23 DAVIS STREET, SAN FRANCISCO,  
Sole Agent for the Pacific Coast.

## Notes and News.

Golden Gate Park Driving Club will hold matinee racing on the speedway in the park this afternoon.

It costs more, an exchange has figured out, to keep a chafing dish than it does to keep a horse and buggy.

The veteran, Orrin Hickok, is reported to be in a very critical condition at the Lakeside Hospital, in Cleveland.

Secretary George Dietrich is endeavoring to secure Cresceus for a trial against the high wheel sulky record at Cleveland.

A number of young trotting bred horses owned by J. B. Haggin and bred in California, are in New York in the care of Matt Dwyer.

According to the figures of the Stock Yard Company, at Chicago, the average value of the 102,100 horses sold in this plant in 1902 was \$130.

Electioneer's sons that have sired 2:10 speed are twenty-one and the number of his grandsons that are credited with 2:10 performers is eleven.

Murray Howe is going to give dash racing a thorough test by giving a couple of dash events along with the early closing classes at Memphis.

Geo. T. Beckers, owner of Zombro 2:11, will take that great son of McKinney to Salem, Oregon, June 1st, where he will remain until September 1st.

Secretary Pettit thinks that a repetition of the Memphis race—Prince Alert and Sir Albert S.—would be an attraction at the Blue Ribbon meeting at Detroit.

There are a few stalls to let at the Alameda race track, which is now in first class condition and will be kept so. Apply to Secretary Gott. See advertisement.

Mart Demarest will commence giving Prince Alert 2:00½ his prep in a few weeks. He thinks he will be able to shade his record a trifle before the snow flies next fall.

Cresceus 2:02½ is just recovering from a mild attack of distemper. Mr. Ketcham proposes to start him in the fall against Maud S.'s record of 2:08½ to high wheel sulky if he is in shape.

If you have not received a catalogue for the sale of the Mokelumne Stock Farm horses, to be sold in this city Tuesday evening, May 5th, send to Fred H. Chase & Co., 1732 Market street, for one.

Report has it that Billy Andrews will campaign Prince Direct 2:07, Baron De Shay 2:08½ and Darwin 2:13 for M. E. Sturgis, and that M. E. McHenry will devote all his time to Dan Patch 1:59½.

The Massachusetts \$12,000 purse has sixteen nominations, the same number as the Bonner Memorial \$20,000 purse received, and of these there are but six men who each made nominations in both.

Klatawah (3) 2:05½ is receiving many royal mares at his court at Danforth Farm, Washington, Ill., among the late arrivals being the dams of Online 2:04 and Greenline 2:07½ and the fast mare Wigalietta 2:10½.

C. K. G. Billings has made the trophy room a feature of his handsomely appointed stable on Washington Heights. It contains thirty-eight silver trophies won by his horses in the show rings and on the trotting tracks during the past three years.

George Starr will train the Simpson and a few outside horses at the Terre Haute track this spring. He has already made arrangements for a couple of first class outside horses and before the training season is opened will have a very select string to take to the races.

William G. Layng wants to purchase two stallions. They must be descendants of Director, Electioneer or Guy Wilkes and be not less than 14 3 and not over 15.2 in height, and between four and six years of age, not older. They must be standard and registered. See advertisement in this issue.

Columbus says: "It is not necessary to decorate your 'bike' with white enamel and goldleaf, or to uniform your stable help, in order to win through 'The Short Grass Circuit.' Just buckle the straps of your hopples a little tighter, pound the old pacer on the back and cash in your tickets."

Owyho, the son of Owyhee 2:11 and Bertha, dam of Don Derby 2:06, Diablo 2:09½ and several others, is one of the greatest three year olds ever bred at Oakwood Park Farm. When he is shipped East California will lose one of the best bred as well as one of the fastest colts the State has ever produced.

A mare owned by Joel Carter, Edwardsville, Ill., bids fair to beat the record for producing twins. She has already given birth to three pairs, the last of which, prematurely foaled March 13, came dead, as is often the case. She raised a pair last year that are living, and are said to be big and rugged.

Though the training rules demand it, pedigrees are seldom given either wholly or in part in making entries, and the secretaries, taking no further interest than to get the names of the horses entered, make no effort to enforce the rule. It is not so on the running turf, and should not be so on the trotting turf.

It is a hard matter for a man who is an ardent lover of good horses to quit the breeding business and stay quit. Gen. B. F. Tracey has sold out twice, but he still has a few well bred ones left for seed. Among them are seventeen two year olds, two three year olds and five broodmares, all located at his Marshland Farm.

Mambrino Boy 844 sired the dams of Axtell 2:12 and Allerton 2:09½, two great producing stallions. A mare by Mambrino Boy is in the Mokelumne Farm sale. She has been bred to Daedalion 2:11 this year and the foal should be worth a lot of money, as the combination of blood will represent a great broodmare in every generation.

Dr. Neal, editor of the *Western Horseman* aptly says: "Every stallion owner should get it everlastingly out of his head that a favorable reference by anyone to another stallion is a 'knock' against his own. Members of different churches used to fight each other on their way to heaven, but even 'Pentecosters' know better than that now."

Ben Chaboya has matched up a pair of trotters at Pleasanton that are attracting much attention from horsemen. They look and move so much alike that they make a very handsome team, and while they are not fast, are sound, gentle and nice drivers and safe for anyone to drive. They can trot together about a

three-minute gait, have good action and style and are nice handsome bays. The engraving of this team printed herewith is from a photograph taken last Saturday at the Pleasanton track. They have been driven together but a few times, but give every promise of making an almost perfectly mated pair in gait and action as well as looks.

Tom James is getting letters every week telling him good news of the Barondales in Iowa. His horse left quite a family of youngsters there and they are all showing speed. Mr. James says the only way to stop the Barondales is to never hitch them up. If a harness is put on them they immediately begin to show speed at the trot or pace.

One of the attractions of the Barnum & Bailey show this year is a forty-horse team—the largest, no doubt, that ever pulled a band wagon. The animals composing it are the pick of three hundred fancy draught horses recently sold by a New York firm to Barnum & Bailey for \$100,500. They are hooked four abreast in ten rows. One man drives them all.

The Golden Gate Park Driving Club of this city has decided to hold matinee races at the speed track in the park on Saturday, May 23d. Races are to be best two in three, one half mile heats. The first heat will be called at 2 P. M. sharp. The same club has also decided to hold races on Decoration Day, Saturday, May 30th. The track has not yet been decided upon.

P. W. Hodges of Santa Ana writes us that his mare, Hazel Kinney 2:09½ by McKinney 2:11½, has foaled a very handsome brown colt by Zombro 2:11, and he claims the name "The Angelus" for him. Mr. Hodges was offered \$1000 for him on Wednesday of last week, but declined the offer. The Angelus is an inbred McKinney, being by a son of that great sire out of a daughter.

H. K. Devereux, owner of John A. McKerron 2:05½, says the books of one poolroom in Cleveland show a total of \$75,252 wagered on the Boston Challenge Cup race, in which McKerron defeated Lord Derby and The Monk last season. No betting on the race was permitted at the track, but the amount wagered elsewhere was probably larger than on any other harness race of the year.

A recent table, supposed to have been compiled from the Year Book by a "pedigree expert," makes three glaring omissions in that Pilot Medium, with 118 performers to his credit; Sphinx, with 87, and Norval, with 73, are not included in the list. This is the most surprising from the fact that this expert stated that "the Electioneer branch of the Hambletonian family is represented only by its head." As a matter of fact, Sphinx and Norval are the two greatest producing sons of Electioneer, and Sphinx, with the exception of Allerton and Axtell, is the youngest horse in the list of world's leading sires with seventy-five or more in the list.

Vesper Belle, a nine year old mare by Director Jr. out of the registered mare Vesper by Prompter, should be a very valuable mare in the breeding ranks. She is well broken, single and double, is sound as a pebble and an excellent roadster. She has a very handsome filly at foot by Daedalion 2:11, and will be sold at the Mokelumne Farm sale advertised for Tuesday evening, May 5th.

Another stallion from the East has been brought to California. A Plumas county man has purchased King Willis 2:16½, a five year old that made his record at Titusville, Pa., last season. King Willis is a pacer and is by Bright Bell 19705, son of St. Bell 5336, he by Electioneer out of Beautiful Bells. The dam of King Willis is the mare Propose by Prospect 6142, a son of Dominion 5996, he by Red Wilkes.

The McMurray road cart, this year's model, is the best thing for the road that has yet been manufactured. The Kenney Manufacturing Company of 531 Valencia street is selling a large number of these carts, and in every instance buyers are much pleased with them. Kenney is making a new sulky wheel for 1903, after designs of his own, that is as near perfection as a wheel can be constructed. They sell for from \$18 to \$25 per pair and are fully guaranteed.

The blood of Prompter 2305 is much sought after in this State by those who are breeding for handsome conformation as well as speed. Those who have made a study of breeding have found that the Prompter mares when bred to good stallions almost invariably produce handsome foals. There is a Prompter mare and two of her fillies in the Mokelumne Farm sale at Fred H. Chase & Co.'s salesyard, 1732 Market street, which will take place Tuesday evening, May 5th.

N. W. Hubinger, of New Haven, will not take his horses up from the South until just before the races in Detroit, in which several of them are entered. After the races there he will ship them East. His string is now in various portions of the South and they are being placed in racing shape. Elastic Pointer and Zip are still in the care of John Hussey, of Louisville, Ky., and Metellas and Judge Baker are being put in shape by "Ed" Geets, of Memphis, Tenn., where there is a string of fifty horses, with five excellent drivers.

Oscar Duke, proprietor of Poverty Row Stock Farm, Conejo, Cal., claims the name Poverty Row for a bay or brown colt foaled April 13th, this year, by Strathway 2:19, sire of Toggles 2:08½, etc., out of Mississippi by Red Nuttle, second dam Molly Small, thoroughbred. Mr. Duke says he sees other subscribers to the B. & S. are claiming first money in the Breeders Futurity for foals of 1903, but he wants to say right here that if good looks go for anything his colt will get some of that money.

Mr. F. Gomet received word this week that his black mare Zarrilla by Dexter Prince out of Lilly Thorn by Electioneer, second dam Lady Thorn Jr. (dam of Santa Claus 2:17½) by Mambrino, third dam Kate by Highland Chief, had foaled a very handsome bay colt by McKinney 2:11½. The colt stood 42 inches the day it was foaled and is a remarkably well boned and well formed youngster. It is a royally bred colt and is a valuable addition to the list of sons that the great McKinney has left in California.

Milton Hatch, of the *Trotter and Pacer*, offers the following: "I noticed in a turf paper the other day that Monroe Salisbury did not name 'Mush' because he thought the gelding soft, but that the name comes from a word used by the Alaskan Indians, equivalent to our term of 'get up' when they want to start their dogs or horses. I am not trying to pose as a linguist or as a critic on nomenclature, but may we not reasonably conclude that their word is derived from the pronunciation of *marche done*, as used by our French-Canadian friends? If this be the case, the gelding should have his right name—Marche."

Neernut has been mated with 35 mares up to April 19th. Among those bred to him are Grace Kaiser, dam of Coney 2:02 and others, and Grace McKinney, a sister to Coney. P. W. Hodges has bred three fine mares to Neernut, Hazel Kinney 2:09½ by McKinney, Atherine 2:16½ by Patron and Malvina by McKinney. The yearling filly by Neernut out of Hazel Kinney is surely one of the fastest and sweetest yearling trotters in California. Mr. Ford, the owner of Neernut, reports the sale of a two year old stallion by Neernut out of Dew Drop to Mr. Henry Carter of Santa Ana for \$1000. Nine of Mr. Ford's mares will produce foals by Neernut this year, four having foaled up to date. Among them is a chestnut filly full sister to Neeretta 2:09½. It is now one month old and Hong Kee a Chinese laundryman of Santa Ana has offered Mr. Ford \$2000 for the little miss.

The *American Sportsman* of Cleveland says: "J. M. Nelson, the California trainer located at Glenville, has two green trotters in his stable that look like they would do to take to the races. Richard S. is a full brother to Clay S. 2:13½, being by Grover Clay 2:23½, a son of Electioneer and out of Belle by Whippleton; grandam Jenny Butterfield by Geo. M. Patchen." He is a rather rakish made gelding, showing his several crosses of thoroughbred, but has a smooth way of going, and is said to be real good. Fleet Onward is a solid, compact-made four year old stallion by Onward 2:25½, his dam Flight by Baron Wilkes being a full sister to Baronet 2:11½, Barolite 2:17½ and Jingles 2:24½. This fellow is credited with a mile in 2:19½ as a two year old, and while only about 16 hands is of remarkable development and goes high all around. He would bring a tidy sum if gelded and taken East, as he is the show horse order."

## News from the North.

## Portland Race Spirit.

W. E. Watson, of Portland, Oregon, is now the owner of the mare Nora McKinney.

Ada Norte 2:19 has landed a very fine bay filly by Hunter N. B. She looks like a diamond in the rough.

The members of Walla Walla are getting up an out door horse show and street parade for May 2d, which promises to be quite a society affair.

John Gron is negotiating for the McKinney mare Ark 2:14 for the racing season. He will also have the gray pacer School Section, which will make his stable a great prize.

The late horse sale has put more life into the horse market here than many that ever happened here. Not even the big demand created by the war made such a dash to the horse market. These sales should be kept up and no doubt will be in the future.

J. A. Richardson of Boise, Idaho, has bought the good pacer mare Oregon Maid by Del Norte 2:08 out of Alta Dell 2:16 by Holmdel, from T. A. McCourt of McMinville. She was shipped to Boise with the horses purchased by Mr. Richardson at the auction sale.

Fred Stoppelfeld, who has opened a public stable at Hillsboro, has a very promising green pacer by Lovelace 2:20 out of a mare by Altao 2:09 that he expects to take to the races. He also has a full brother to him, two years old, that is entered in the Oregon stake with a bright prospect of winning.

The Oregon State Fair Board has decided to hold an auction sale of blooded stock at the coming State Fair. It will be a combination sale, and breeders are requested to send in their consignments to the secretary early in the season so that they can be catalogued. Nothing but pure bred and registered stock will be accepted.

H. B. Rutherford has arrived at Irvington track with his stable of trotters and pacers from Walla Walla. He has Miladi B. (p) 2:16, a candidate for the Greater Salem Stake, Belladi an unmarked trotter and a candidate for the Lewis & Clark Stake, Helen Norte 2:26, candidate for the Webfoot Stake, Lorna Norte, a promising three year old pacer which will be entered in the Inland Empire Stake.

Howell W. Peel, of Spokane, who bred five mares to Zombro 2:11 last season, says they are all in foal. The mares bred are as follows: Deta, full sister to Chelalis 2:04, Del Norte 2:08, etc., Detamont by Hambletonian Mambrino, out of Deta; Cascade Coral by Delpho, out of Hazel May 2:29, by Ingraham; Maud Meredith by Meredith, out of Hazel May. Mr. Peel feels quite proud of his good luck, and thinks he has five chances of getting a world beater.

The directors of the Spokane Inter-State Fair are arranging matters for the banner fair and race meeting on the entire circuit. The great success that crowned their efforts last year are spurring them on to a larger event this year. Spokane is a great commercial and railroad center for a vast farming district, and the few fairs held there have done much to stimulate live stock breeding in that district, which will lead up to one of the most important industries of that great wheat-growing belt. The live stock show last year was the best ever held in that section, and it is the intention of the management this year to make the show still larger. H. G. Stimmel, the new secretary and manager, is getting things ready to open an office in the city, where he will start a vigorous campaign in the interest of the coming fair. Howell W. Peel, the president, will give the fair all his time and attention possible, and the prospects for a big fair this year are certainly very flattering.

Racing Secretary C. D. Jeffries is also laying plans for a big race meeting. The directors have ordered the track subsoiled with eight inches of new dirt, which will be completed in time for early spring work. Mr. Jeffries has his fall race program blocked out, which will be made public in due time. The number of horses already in training at the track, and the successful meeting held last year presage a most successful meeting this year.

## Likes and Dislikes of Horses.

There is something about a highly organized, intensely nervous horse that makes him quick to form likes and dislikes, says Francis M. Ware, in "Our Noblest Friend; the Horse." Horses are perfectly submissive in the hands of some men, although they have never seen them before.

A certain "horse dentist" was sent for to attend to the teeth of a very savage stallion, but, through a mistake, was not informed that the animal was vicious. He came, and finding no one in charge of the stable, and seeing that there was only one stallion there, concluded that that was the patient. He entered the stall and was busily working on the stallion's teeth when the man in charge returned.

The groom could scarcely believe his eyes, as he had himself for years been the only one who could handle the horse. The secret of it was that the doctor, not knowing that the horse was vicious, had no fear, and the horse accepted him very probably, since he did not speak, as his regular attendant.

Certain race horses have been known either to fly into a frightful rage or to shake and sweat with dread when they heard the voice of a jockey who had brutally punished them in a race; yet this same rider could stand directly before them and no demonstration followed so long as he did not use his voice; but the merest whisper was enough to excite them.

One well known race mare was so upset every day by hearing the trainer's voice giving orders to the boy rider when at exercise that nothing could be done with her until a code of signals was arranged by means of a stick. From that day, although the trainer changed his appearance in no respect, she was perfectly quiet and tractable, in spite of the fact that the man was always about her, both in and out of the stable. He might be in her box for a long time, handle her in any way, but if he spoke she would fly at him instantly, and act like a wild thing for some time afterward.

Certain race horses also take such a violent antipathy to certain riders that they will not try to race when ridden by them, but sulk and refuse to run, nor are these boys those who have abused them.

## Horse Parade and Racing.

[Los Angeles Herald.]

In addition to the racing matinee of the Los Angeles Driving Club to be given at Agricultural Park, Thursday, May 7th, the club is making arrangements to give a horse and vehicle parade similar to the one given last year. There will be as many classes as there are letters in the alphabet, and every style of society, business and practical vehicle and horse will be shown off. Stallions, mares, geldings and colts will be on hand and paraded, but other horses can appear in anything from a common cart to a surrey, victoria or a six in-hand.

In addition to the parade, the club is arranging for several of the best races ever given in this city. These include trotting and pacing races, and, if possible, there will be one or two match races. It is probable that there will be at least five races and perhaps six, and as this feature of the Fiesta has always been an entertaining one, it goes without saying that this year's performance will be in no wise below the standard set up in former years.

## New President for Kentucky Association.

R. C. Estill was elected by the directors of the Kentucky Trotting Horse Breeders Association to the presidency to fill the place made vacant by the death of R. P. Stoll, who has been president of the above association for the past four years. Mr. Estill is beyond a doubt one of the most popular breeders in the country and is well acquainted with the duties he has to fill. Mr. Estill had the management of the breeding establishment of Henry Schmulbach of Wheeling, W. Va., and owns quite a number of very high-class mares and youngsters himself. His breeding establishment at Elmhurst, a few miles from Lexington, is one of the prettiest in the Blue Grass section.

## Colt Stakes for Trotters and Pacers.

A number of breeders and owners of light harness horses met in Salinas last week and organized the Monterey County Colt Stakes Association. M. J. Smeltzer was elected president and J. D. Kalar secretary-treasurer. It was decided to open colt stakes as follows: A two and a three year old trotting colt stakes; also a two and a three year old pacing colt stakes. All colts owned June 1st in Monterey, Santa Cruz, San Benito and San Luis Obispo counties are eligible. The entrance in each stake is \$50; \$10 June 1st, when entries close; \$15 August 1st and \$25 fifteen days before the first day of the Salinas race meeting this fall.

## Nora McKinney on the Speedway.

An Eastern turf writer thus speaks of the mare Nora McKinney 2:12, bred by David Young of Stockton and sold East last year.

"Of the brushes so far had this season on the New York speedway, the best among the trotters have been between Queen Wilkes, owned by Mr. Smathers, and The King, owned by Mr. Lamar, and Nora McKinney, owned by General Brayton Ives, and Swift, owned by Col. John F. Cockerill. Queen Wilkes and The King are quite evenly matched in speed, and every time they turn at the head of the drive for a brush the spectators are sure of witnessing an interesting contest, and unless one of them 'tips over,' as one writer expresses it when a break is made, a close finish is sure to result, for all brushing in which this pair have so far engaged the mare has won all but one, and that according to the accounts published in some of the daily newspapers, was a dead heat. There is not a trotter on the speedway at present that can head the handsome bay mare through the stretch, and if she maintains her present form she will be a dangerous factor in the important matinee events later in the season.

In Nora McKinney, Mr. Ives has one of the best comparatively green animals ever seen upon the speedway. Her gait is pure and frictionless, and she enters into the spirit of a contest with such enthusiasm as to leave no doubt that with sufficient education she will rank with the best. She has met the bay gelding Swift, the pride of Col. Cockerill's stable, on several occasions, and has yet to meet defeat by the Antonio gelding."

## Good Ones in California.

Ed. A. Tipton on his return to New York from his trip to California, was asked about the horses he saw here and said:

"I never saw such a lot of fast, sound horses as are now quartered at the Pleasanton track. They are beginning to get up plenty of speed out there now, although at the time I left none of them had been asked to go at speed for a full mile. From now on, however, they will be reeling the miles off instead of the quarters and halves, as many of them will be shipped East next month. One of the things that took my fancy was a youngster which I think will become famous. It is the two year old trotter Gayzote by Nazote, the brother of Azote 2:04. I saw Millard Sanders drive him a quarter in 34.1 second. He is one of the finest looking colts I ever saw, as big as a four year old, well turned and strongly built, a natural trotter, with a marvelous turn of speed. There will be some corking ones from California this spring to go after the purses down the line."

## Sacramento Driving Club's Matinee.

The Sacramento Driving Club will give one of its charming matinees at Agricultural Park, Saturday April 25th, at which the best roadsters in the city will compete for ribbon honors.

The Sacramento Driving Club's matinees have long been popular events in this city. There are no gate charges, and all lovers of good horses and good racing are extended a cordial invitation to attend. Sacramento has some of the best horses on the Pacific Coast, and to see them moving for "blood" is a pleasure.

William Sayers, Frank Rubstaller, Jr., Charles Silva, Frank D. Wright and other members of the club purchased blooded two year olds during the winter, and it is among the probabilities that a bunch of the youngsters will be sent along for a half-mile.—Record-Union.

## Every Horse in His Class.

Under the administration of Charles C. Lloyd, who succeeds C. K. G. Billings, as president of the New York Driving Club, a new system of amateur harness racing is to be introduced this year at Empire City park. It is proposed to classify the horses at the beginning of the season without reference to their public records, dividing them into twelve groups or classes, according to their estimated speed capacity. Whenever a horse wins a race in the class in which he starts he will go on to the next faster class, and on winning there again will move up to a still faster class until he reaches the open or championship class, if he is capable of doing so. According to this plan a horse will remain in a class until he has won a race in that class, but he cannot win twice in the same class. It is believed the new system will operate to improve the sport and force every horse into the class into which he belongs.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

LEXINGTON, KY., October 1, 1901.

*Cracked Heels Remedy.*  
Gentlemen: After six years continual use of your Horse Foot Remedy, I find it the best for all diseases of the hoof, and it is a pleasure to recommend it to all horse owners and trainers. I have never lost a horse to a cracked hoof since I used it.  
Yours truly,  
A. N. DEAN, SREAT VETERINARY SURGEON.

EAST ORANGE, N. J.

*Cracked Heels Remedy.*  
Gentlemen: I have used your famous Horse Foot Remedy for only four months, and it has cured one of my horses of a cracked heel. I am a veterinarian and I am doctoring for over a year, and I have never seen a horse with a cracked hoof that I could not cure with your remedy. It is a great relief to all other horse owners with a cracked hoof. It is a great relief to all other horse owners with a cracked hoof. It is a great relief to all other horse owners with a cracked hoof.  
Yours truly,  
M. J. KAVANAGH.

Conclusion for Mr. T. E. Barr, 125 Harrison St.

## San Francisco Veterinary College.

Next session will be in June 15, 1903. Write for catalog giving full particulars. M. L. PANCOAST, VET., 510 Golden Gate Ave., San Francisco. CREELEY, D. V. S., President.

## Some Influential Sires and Dams.

It is universally conceded that no really great horse ever had a poor sire or mother, and the characteristics and peculiarities of the kings and queens of the harem form some of the most interesting and instructive studies in horse lore. Varied as are the conditions under which the successful matrons have demonstrated their work, wide as may be the difference in their conformation or blood, there is "one touch of nature which makes them all akin," that certain indefinable quality which has been termed nerve force. This particular attribute would seem to take precedence over the "mere accident of birth and breeding" considering the great number of historic mares which rest upon their own intrinsic merit, unsupported by the prestige of any known line of blood.

Certain it is that many of the great performers and progenitors have been brought into existence by mares of superlative nervous energy and pronounced individuality, but of unknown or unfashionable breeding (as some would term), while no mare whose excellence has consisted in the mere combination of the bluest blood lines has yet produced the best type of the trotting horse. These sturdy, old-time mares form the foundation upon which stands the present superstructure of inherent speed; few, indeed, are the performers of to-day which do not trace to one of the great mares whose far-reaching influence has established a family distinctively her own, and fortunate is the young aspirant to honors in the stud, the pedigrees of whose horses show a combination or concentration of the blood of famous mothers, the initial point in the production of Hambletonian, Dictator, Geo. Wilkes, Electioneer, Strathmore, Steinway, Happy Medium, Pilot Medium, Alexander's Abdallah.

Giving all due credit to other sires, there was no greater son of Hambletonian than Alexander's Abdallah. Goldsmith Maid alone would be a sufficient monument to his worth. Also the matrons Black Jane, Lady Patriot, Princess, One Eye, Silvertail, Green Mountain Maid, Primrose, Fleetwing, Dolly Spanker, Nancy Pope, Lou, Nancy Awful, Dolly, Lady Dunn, Clara, Nancy. All have produced extreme speed, and extreme speed has been characteristic of all their generations. Alexander's Abdallah's sons sired extreme speed, his daughters produced extreme speed, and his grandsons and granddaughters again swell the honor roll of his greatness until breeders have come to know the race as one who breeds on equally well through both male and female lines, breeds on extreme speed and breeds on campaigners, and it seems to me that Alexander's Abdallah is to live in the memory of man chiefly through Almont and down through the blood of Robert McGregor, and he has founded a family differing widely from any other son.

Robert McGregor's dam was Nancy Whitman, also dam of Madeline 2:23 (years ago) and sister to Lady Whitman 2:30, by American Star 14. His sire was Major Edsall 2:11 by Abdallah 15, dam by Harris Hambletonian, and the latter was in his day, what Hambletonian, Geo Wilkes and Electioneer were in a later period, the greatest sire of his day. American Star needs no person to sing his praises. He is a classic hero, and not to know his greatness means to be unlearned; that his daughters produced Guy 2:10½, Dexter 2:17½, Driver 2:19½, Joe Bunker 2:19½, Nettie 2:18, Dictator, sire of the only Director 2:17, (and he in turn sire of Directum, in my opinion, the greatest trotter that the world has ever seen to this date) and one of America's greatest sires. Cresceus by Robert McGregor 2:17½ has to his credit the world's trotting record of 2:02½. And such a racing career in actual battles, and a long continued siege against the watch, and best of his generation. He must be the head of the royal trotting tribe, and that he was bred and born to be a king. Physically his equipment, as we might surmise from the work he has done, is superb. As near the general purpose horse as any stallion I can recall, except it be his near kin, that handsome stable companion, Silver Bow 2:16. Some are born great, some achieve greatness and some have greatness thrust upon them. Silver Bow was born great and came by his birthright, but environment has been against him. Yet I look for his achieved greatness to crop out in spite of adverse circumstance, as he is gifted by nature with the physical requisites for it. For his limited opportunity in the stud, nobly has he accounted for the gifts which are his. I now carry in my mind the picture of that gallant horse as I saw him a few years ago, game as a badger, fast as the fastest of his competitors. Neglected and abused in his training, yet feeling the obligations of nobility, always doing his best as a race horse, he has not denied his ancestors. He is a horse of immense strength, and by memory I should say like his sire about 15.2½ hands. His stifles are simply immense, while his hips are broad and of good shape, his width the stifle is greater than that of many horses; his

barrel is round, his shoulders are bunched with great muscle at the arm and elbow, and his breathing apparatus is deep, with a powerful breast. He is a sensible, level-headed fellow, and takes inspection with much grace.

It is not a difficult task for me to see that he was a much neglected horse both upon the turf and in the stud. I well know that there is a satisfaction in breeding to a stallion whose owner trains his stock, for every animal that drops into the 2:20 list adds to the value of those outside of it. Any stallion must at first be owned by some enterprising practical breeder that will see that he gets the right kind of mares and the produce developed and presented before the public as soon as possible. As a person, and a horse, must first have the goods and opportunity before they can possibly make a success, no intelligent, fair minded lover of the great trotter will require much reading to know that Silver Bow has not been blest with much of an opportunity, either upon the turf or in the stud. No gifted pen ever sung his praises and his owner, as a new breeder and in his independent way, neglected to see that the horse had the best of opportunity, both in the stud and development of his produce.

Some horses are like men—environment prevents them from coming to their birthright. Daughters of American Star have demonstrated their worth, such as Clara, Nancy Whitman, Widow McCree, Lady Dunn, etc. I have always admired the blood of Silver Bow through his matrons' lines and predict that his daughters will prove valuable to the breeders in the future. The blood of Silver Bow 2:16 has been very much overlooked here. His going back East adds strength to the breeders' interest, and the owners of his produce will be able, willing and desirous of giving his progeny such cultivation as they merit. The breeders on this side of the Rockies are too hasty to condemn and cast aside a good animal for a lesser light. A great horse in the East, for breeding purposes, is looked upon with more intelligence and foresight than here. Remember that the blood that produces the great all-around trotting horse is becoming scarce. The breeders are becoming very much alarmed. It has come to pass that there is no way for a student to know the difference as to some horse's gait; they advertise in these days, 10 in the 2:15 list, and when the records are looked up there are about two trotters, the rest pacers in hoppers. It is misleading, as the great trotting and smooth gaited pacer will be forced out of sight. As a rule the blood of Silver Bow all trot and his present owner never tried to mislead the public or encourage the public to patronize him, to all of which it was very unfortunate to the public, owner and horse.

Yours,  
SAMUEL GAMBLE.

## SADDLE NOTES.

The California Jockey Club announces that its stakes and purses will be increased in value next season. There will be several \$500 purses every day, and a \$600, \$700 and \$1000 handicap every week. New and valuable stakes are also to be added to the present list. The present season has been a very profitable one to the club.

According to a report from Chicago, Jockey Walter Robbins, the Chicago lad who was injured recently, will not ride in the East for Jack Follansbee, as originally contracted. The lad was to report to Mr. Follansbee on April 8th, but when the time came for separation with his father and mother, the trio agreed that it was best for the boy to remain in the west. Robbins will probably ride for James Arthur.

W. R. Gerst, Jr., has engaged Jockey Bullman to ride Fore and Aft in the Cumberland Park Derby. Trainer Will McDaniel has the crack son of George Kinney right on edge for this race, and his party think that the colt has a cinch on the stake. He has outworked all the other eligibles quartered at the Nashville track.

A great many well meaning persons appear to say farewell, or at least au revoir, to the quality of sweet reasonableness when it comes to discussing merits and demerits of the boys who ride the horses on our tracks. There is a strong tendency to exalt a jockey to the skies when he wins consistently and to cover him with obloquy when he has a losing streak. The more a boy is praised when he wins, the worse the censure that is his lot when he loses. The case of Arthur Redfern is in point. In the early days of the Bennings meeting his skill and luck were at their best and he was overwhelmed with injudicious praise. Later on he failed to land three or four picked mounts in succession and a torrent of hostile criticism broke forth. A little more temperance in this matter is demanded. The average jockey is a youth whose education has been neglected, who has been raised in a stable and who, in most cases, is possessed of an intel-

lect that will not bear great strains. If he is not spoiled by success and foolish adulation it will be because he has more common sense than most of his kind. On the other hand, if his failures are honest ones, let censure be temperate. Jockeys have neither Websterian brains nor imbecile mentalities. To proceed upon the assumption that they have either is to commit a grave mistake that will result in unfairness, both to the boys and to the public.—*The Sportsman.*

The will of the late R. H. Fry, for over twenty years the acknowledged leader of the English betting ring, who died December last, was probated last week, the estate being valued for legacy duty purposes at slightly over \$150,000, all of which was left to the widow. That Mr. Fry should have died comparatively poor is a matter of great surprise to those who were aware of his munificent gift during his lifetime to hospitals and other charities. On several occasions Fry is known to have paid out more in settlements over Derbies and other great betting races than he died possessed of, and at no time in his career was he a gambler, always confining himself to a strictly business book. The only explanation of a man who handled such gigantic sums as Fry did leaving so little behind him is the enormous amount of bad debts he accumulated during his twenty years' leadership of the ring. Competent authorities place this at the almost incredible sum of a million sterling—\$5,000,000—a fine commentary on the much vaunted English system of betting on credit. All Fry's books, which were very carefully kept, all his correspondence and many interesting documents have, it is understood, been handed over to a publisher in order to form the basis of a biography of the famous bookmaker. Should this volume ever see the light it would afford very interesting reading, but for obvious reasons it is hardly likely to do so.

The inducements English secretaries use to persuade owners of good horses to school them over jumps usually takes the form of events with substantial amounts added for maidens, either over hurdles or through the field. At the recently concluded Liverpool meeting, which is a mixed affair, combining flat racing and jumping, the opening and closing races of the three days' program were events of this description. The conditions of the Stanley Chase, which opened the proceedings, was for five year olds at three miles. The added money was liberal and the distribution even more so, the winner taking \$1200, the second \$500, the third \$200 and the fourth \$100. Yet so greatly do owners dread the difficult Aintree country for novices that only three of a numerous entry went to the post. Two or three went down ere a mile of the journey had been completed, while the third persistently refused two fences farther on. Joined by one of the others, which had been remounted, he consented to jump a few more fences and then fell. This enabled the remounted horse to come home alone and gather in all the coin, neither of the others completing the course in the necessary twenty minutes. The Altcar Chase, which concluded the meeting, resulted in an even worse fiasco. This was four year old maidens at two and a quarter miles, the considerations being \$1000, \$200, \$150 and \$50. Again only one completed the course, and even he took two tumbles during the journey. As the course for the Altcar is just half that of the Grand National, some idea of the magnitude of the task the winner of that race encompasses may be gleaned.

## Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

GOMBAULT'S  
CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

## SUPERSEDES ALL CALTERY OR FIRING.

Impossible to produce any sore or bluish. The safest best Blisters ever used. Takes the place of all liniments and is not covered with them. Removes all Bunches or blood lumps from Horses or cattle.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with all directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

# ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

## The Grand American Handicap.

Prize money was the focus of a majority of Grand American Handicap, the fourth annual event at target shooting, which was held at Interstate Park, Kansas City, Tuesday afternoon, April 16th, by a comparatively unknown shooter at seven yards. Springing into national prominence in a forty-five minutes and beating out the crowd who had been set far back in the crowd, M. Diefenderfer of Wood River, Neb., was the feature of the tournament with a score of 94 out of the possible 100. M. E. Hensler, the 19-year-old shooter from Battle Creek, Mich., caused the second big surprise by finishing next, with a score of 93. Hensler was the marvel of the tournament, for, besides winning second money in the Grand American he won the Preliminary handicap, beating D. T. Timberlake of Seneca, Kas., in the shoot-off at 25 targets, 23 to 21. Timberlake also finished in the money in the Grand American, scoring 86.

M. Diefenderfer, who is a hardware merchant in Wood River, has been shooting only about four years in tournaments, and then only in the smaller ones. He has averaged three or four shoots a year in this time, and this was his first Grand American. His first noteworthy work was done a month ago in the tournament at Hastings, Neb., where he was high gun, with 185 out of 190. Up to April 16th his best record in the Grand American tournament was 17 out of 20.

Max E. Hensler is a son of J. F. Hensler of Beaver, Wis. Max has been doing field shooting ever since a boy of 14 years, and was tutored in the rudiments of the sport by his father. It was not until the last three years that the young phenomenon took up trap shooting, and since then he has made such rapid progress that a great future is pictured for him. His first experience in a tournament was in Battle Creek, Mich., two years ago, when he won the State championship. He participated in two other tournaments there last fall. His shooting in the tournament at Kansas City was remarkable, his score of 91 in the Preliminary handicap being exceptionally good, even for an older shooter, considering the weather conditions. When he made the score of 93 in the Grand American, this was the highest score up to that time and he was the idol of the crowd until Diefenderfer cracked off 94; but still, Hensler's laurels were not lessened, for he went in afterwards and won the shoot-off in the Preliminary handicap.

L. J. Squier, Wilmington, Del., shooting from nineteen yards, and C. B. Adams, Rockwell City, Ia., with a handicap of eighteen, each made 92.

The Grand American handicap was the big event of the tournament, and it fell on the best day the shooters had during the meet. The flight of the targets was more natural Thursday on account of the wind of the previous two days dying down and warm sunshine taking the place of cold, muzzling weather. Monday and Tuesday were probably the severest tests that many of the shooters had ever had. The wind turned the targets into most unnatural courses and the heavy sky added to the dark background made the shooting extremely difficult. Shooters from the East who had been accustomed to level grounds adapted especially for target shooting and swift, low-flying targets, were completely thrown out of their form when they faced the conditions of the opening two days of the tournament. The targets carried by the wind shot high into the air, making it the meanest kind of shooting.

Considering all these adverse conditions, the fourth

Grand American handicap tournament has probably been productive of the best shooting of any of the previous events. Last year the big handicap was won by Charles W. Floyd, from seventeen yards, by a score of 94. The tournament was held at Interstate Park, Long Island, where the grounds were as level as a floor and built especially for target shooting. Diefenderfer won the handicap last week with the same score, under less favorable conditions. The preliminary handicap last year was captured at Interstate Park by Dr. Britton, with a score of 92 from seventeen yards; 89 won the Consolation handicap last year.

It has been the history of the Grand American handicaps that a newcomer having a small handicap usually wins. The first Grand American at targets, which was held in 1900 at Interstate Park, was an exception to this, Rolla O. Heikes making the exceptionally fine score of 96 from nineteen yards. E. C. Griffith was the next winner, he taking the event in 1902 with a score of 96. He also won the Grand American at live birds the same year, establishing a record that still stands. It is perhaps the general feeling that an amateur should win these big events. It stimulates the target game and encourages new shooters to enter in the big events. If the cracks were victorious there might be some complaint that an amateur could not win, but the present handicapping system has been demonstrated as being a great equalizer. The amateur, it is claimed, has as much show as the expert when placed at the comparative distances.

The Grand American started at 9 o'clock Thursday morning and three of the twenty targets for the day were declared off, so that all of the day's program with the shoot-off of the preliminary handicap could be finished. Hensler was among the squads to shoot along in the middle of the day. He missed one target at the first three traps, starting in at No. 4 set with a score of seventy-two out of seventy-five. By this time his finger was bleeding badly from a cut made by the gun kicking, but he was cool and deliberate. His birds out of the last set of traps proved a most trying lot, and he missed four of the finishing string. This left him with still the highest score made so far, however, and the word soon passed down the line that Hensler was high in the Grand American also. He held this honor until the handicap had nearly been finished, when Diefenderfer, in squad 28, run one higher. Diefenderfer's squad started in about 4 o'clock. In the same squad was E. Brady, who up to the last set of traps had a score better than Diefenderfer. Both missed one target in the first twenty-five, and Diefenderfer broke only twenty-two of his second string, while Brady got twenty-four. At the third set of traps each made twenty-three. By this time it was known generally over the grounds that these two had a chance to win the Grand American.

A large crowd gathered at the last set of traps when the squad moved along to shoot at its last twenty-five. The scores up to this time stood: Brady, 70; Diefenderfer, 69. Brady had his troubles on the last twenty-five, and one by one he missed until he had let five whole ones sail away, and then it rested upon Diefenderfer. He was pumping away, cool and unflinching, centering the targets well. As he neared the end the crowd became quiet, and all eyes were upon the Nebraskan, who was not disturbed in the least by the situation. Others in the squad missed, but he broke every one, and as the twenty-fifth target was shot into a dozen pieces, making his first straight 25 string of the tournament, the crowd gave one big cheer, and then rushed in and began pulling and tugging at the new target champion. He received his many congratulations with a quietness and presence of mind that had marked his shooting, but he could not conceal his pleasure. The handicap had not then been finished, but he was heralded as the winner, for it was not thought likely that anyone would beat 94.

As soon as the handicap had been finished, with no scores to endanger his, President Irby Bennett, of the Interstate Association, presented the winner with a handsome watch, suitably engraved, in a very neat and appropriate speech. Mr. Diefenderfer made a short response, and then the crowd, headed by Manager Shaner, gave three cheers for the Nebraskan.

As soon as possible the crowd was cleared away and preparations made for the shoot-off of the tie in the Preliminary handicap between Hensler and Timberlake. They were soon at the traps and with little ceremony the race for the diamond trophy began. Both started off in a determined manner, showing somewhat the strain they were under. Hensler was the first to miss, his seventh target sailing away untouched. Timberlake got into a bad row shortly after this and he missed his ninth, twelfth, and fourteenth targets. This left Hensler a lead of four, but he lost his twentieth, making the final score 23 to 21.

The shooters finishing in the money in the Grand American handicap were: M. Diefenderfer 16 yards, 94 breaks; M. E. Hensler 17-93, L. J. Squier 19-92, C. B. Adams 18-92, J. M. Hughes 22-91, H. Sconce 20-91, C. M. Powers 19-91, A. J. Stauber 19-91, C. E. Fort 19-91, Dave Elliott 18-91, M. Thompson 17-91, L. Foley 19-91, C. W. Budd 19-90, E. Brady 16-90, W. T. Irwin 16-90, R. O. Heikes 21-89, C. O. LeCompte 20-89, E. J. Churgren 18-89, Fred Gilbert 23-88, F. C. Reihl 18-88, P. C. Ward 17-88, E. Rike 19-88, W. H. Heer 20-87, George Roll 19-87, H. C. Watson 19-87, L. J. Wade 19-87, H. Steege 18-87, W. D. Townsend 18-87, L. Rue 17-87, S. A. Smith 17-87, H. C. Hirschey 22-86, J. A. R. Elliott 21-86, A. S. Tolma 18-86, H. N. Kirby 17-86, D. T. Timberlake 17-86, G. K. Mackie 16-85, J. T. Atkinson 19-85, Dave Linderman 19-85, Alex. Mermod 19-85, Abe Frank 18-85, D. C. Sanderson 17-85, Wm. Clayton 16-85, J. P. Leggett 16-85, L. A. Sherman 15-85.

The scores of the fourth annual Grand American handicap, 179 entries, at 100 targets, were the following, appear below.

## AT THE TRAPS.

Committees are at work arranging for the first annual Pacific Coast blue rock tournament of the Ocean Park Country Club, which is scheduled for May 1 to 17 inclusive. At this tournament there will be \$300 added money aside from special prizes and trophies, and there will be a long list of merchandise prizes to be shot for on each day of the tournament. There will also be pool shooting daily and championship shoots beginning the first day. Dana Burks, president of the club, says there will be a large attendance, as experts from Arizona, New Mexico and as far north as the British Columbia line have written asking for lists and signified their intention of participating in the tournament.

The regular shoots of the Capital City Blue Rock Club and the Capital City Live Bird Club took place on the 19th inst. at the Klmbal & Upson grounds at Sacramento. The attendance was good, the day ideal and the scores averaged high.

The first event of the day was the regular club shoot of the live bird contingent, and following are the scores:

Weber	212321121111	12	Blair	11121232110	10
Judge Hughes	11021021111	7	Blair	1021021111	7
Gusto	122011121111	11	Gusto	1100222232	9
Ruhstaller	1100222232	9	O'Brien	04020122140	9
O'Brien	04020122140	9	Stevens	2111222230	9
Stevens	2111222230	9	Callahan	0311122101	10
Callahan	0311122101	10	Adams	2210222232	9
Adams	2210222232	9	Just	2*03021121	8
Just	2*03021121	8	Herold	2110212202	9
Herold	2110212202	9	McWilliams	2221120121	11
McWilliams	2221120121	11	Gibson	2221211015	10
Gibson	2221211015	10			

In this event Herold shot at 30 yards because he was high gun at the previous shoot. Gibson, while not a member, shot for the birds only, and stood at the 31-yard mark.

Following the live bird shoot, blue rock shooting was in order; besides the club shoot a number of 10, 15 and double bird races were indulged in.

The scores in the club shoot at 25 target were: Brown 21, Blair 24, O'Brien 18, J. W. Hughes 23, Gallup 14, Stephens 18, J. R. Hughes 15, Ruhstaller

17, Adams 15, De Merritt 22, Herold 18, Trumpler 13, Peek 21, McWilliams 12, C. J. Mathews 21, Just 19, Callahan 17, W. E. Mathews 21, Gusto 17, Englehardt 20, Weldon 20, Ludden 11, Fissel 23, Smith 21, Poor Bill 22, Coter 15, Englehardt 17, Haggerty 17, Gibson 23, J. W. Hughes 21, C. E. Stevens 18, Just 22, O'Brien 22, Blair 21, Ruhstaller 18, J. R. Hughes 19, Weldon 20, Poor Bill 21, Fissel 24, Gusto 17, Englehardt 18, Martin 10, Van Meter 17, Gusto 19, Upson 16.

Just to keep the guns warm a 100 bird match was shot between two teams as follows: Team No. 1—Englehardt 82, "Poor Bill" 80, Gusto 80, Ludden 51, Upson 71. Total 364.

Team No. 2—Ruhstaller 71, Blair 52, Hughes 76, Gibson 90, Weldon 74. Total 363.

This score is remarkable in the fact that 1000 targets were trapped, and the winning team gained their victory by only one bird.

Double bird shooting was then taken up at twelve pairs, and the annexed scores show the result. It will be seen that Gibson made the clever run of 23 out of 24: First set—Ruhstaller 10, Gibson 20, J. W. Hughes 12, Weldon 14, "Poor Bill" 15, Gusto 10. Second set—Ruhstaller 8, Gibson 23, Hughes 20, Weldon 14, Gusto 19, Gusto 12. Third set—Ruhstaller 16, Gibson 19, Hughes 20, Weldon 20, Weldon 14, Gusto 19. Fourth set—Ruhstaller 13, Gibson 16, Hughes 14.

To finish the shoot before sending for candles eight sets of three targets each were sprung from the traps simultaneously, and the pump-gun cracks did as follows: Gibson 12, Ruhstaller 14, Weldon 12, Hughes 12. At the next shoot another set (three in all) of blue rock traps will be installed, and the rules that are to prevail at the tournament of May 15th, 16th and 17th will be exemplified. A large delegation of out of town shooters have signified their intention of being present. There were visitors from Marysville, Gridley, Williams, Dixon and Davisville present and participating in last Sunday's shoot.

At the College City Gun Club shoot last Sunday Juster was high gun in the gold watch race at 25 targets. This trophy will be the permanent property of the high gun for the season of six monthly shoots. Leavell made 23 out of 25 in the medal race which followed. The medal must be won three times in succession to remain in the possession of one shooter. Reed won the medal last month, losing to Leavell ("Edwards") by one bird on Sunday. In the gold watch race, Juster and "Edwards" are a tie, each with 43 birds out of 50. Reed and Chick have 42, Seales and Baird 38, Hutton and Newcomb 37. Following the medal race a lively team race was shot up; the "Reds" won by 4 birds. In a three-man team shoot the scores were Seales (Bar) 23, Juster 20, Reed 22, 64 out of 75, Chick 21, Leavell 21, Hutton 20; total 62. The meet closed with practice shooting for bars. The scores in the regular events were:

#### Gold watch race, 25 targets—

Baird	11111	11100	10111	11111	11101	21
Seales	11011	10101	11111	11111	11111	21

Edwards	11111	11110	11111	11111	11111	22

\* Silver bars.

Practice bar shoot, 15 targets—Chick 11, Edwards 10, Reed 12, Juster 10, Johns 8, De Merritt 10, Juster 12, Edwards 13, Baird 7, Hutton 10, Newcomb 12, Chick 13, Hutton 11, Edwards 13, Reed 14, Juster 10, Baird 9, Montayo 9, Reed 14.

Practice bar shoot, 25 targets—Juster 19, Edwards 20, Baird 18, Seales 21, Hutton 23, Reed 23, Reed 22, Juster 20, Hutton 21, Edwards 23, Montayo 15, Reed 23, Hutton 15.

The Auburn Gun Club met the Lincoln Gun Club on the grounds of the latter club last Sunday for a return shoot. The day was perfect, and some good scores were made. Davis of Auburn made the highest score, smashing twenty-four blue rocks out of twenty-five. The Lincoln shooters, however, averaged up the better and beat the Auburns by eight. The following is the score:

Lincoln Gun Club—W. Barrett W. Hughes 21, C. Hecker 12, A. Leavell 3, L. E. Brown 22, G. Barrett 21, I. Schuler 21, Vetter 20, D. Barrett 22, G. Williamson 21, Duryea 14, Toft 10; total 214.

Auburn Fish and Game Club—Davis 24, Donnelly 23, Gum 10, Thükel 15, Armbruster 8, Chamberlin 16, Sullivan 16, Brown 18, Robinson 19, Safford 23, Thomas 14, Fathey 20; total 206.

The two clubs will meet at Newcastle May 3d for the deciding contest, each having now won one contest. Much interest is being awakened in blue rock shooting as a result of these tournaments, and they will undoubtedly develop some excellent trap shooters.

After the shooting a fine banquet was spread for the boys, and it was announced by Mr. Vetter that Kimball & Upson of Sacramento would put up one of the best blue rock tournaments ever held on this Coast in the near future.

Three squads of blue rock shooters took advantage of the splendid weather last Sunday and smashed asphalt saucers at Ocean Park near Los Angeles. Ed Vaughn of Santa Ana, was on hand, and found several others there who could give him all he wanted to do, good shot though he is. An average of more than 100 birds was shot off, there being no re-entries in most of the events. The scores made were as follows in four shoots of twenty-five and one at ten birds:

Vaughn	19	21	21	9	18
Small	20	15	15	7	20
Hagerman	23	23	20	9	16
Naylor	16	20	19	8	22
Lovelace	22	19	23	9	22
Lewis	17	16	17	14	14
Decker	12	16	19	7	15
Carlisle	19	16	17	6	19
Murphy	17	18	17	6	19
Russ	10	10	10	5	10
Lane	18	19	19	7	10
Wright	15	15	13	8	10
Herwick	9	9	9	4	10
Gerkins	11	16	5	10	10
Kindberg	16	19	20	10	10

### DOINGS IN DOGDOM.

The Pacific Kennel League, the parent organization under which most of the show-giving clubs on the Coast hold their exhibitions, held its annual meeting on the evening of April 9th, at Seattle, for the election of new officers and transaction of other important business.

The following officers were elected for the ensuing year: President, F. Willis, of Portland; vice-presidents, J. A. Peebles, Seattle; J. W. Creighton, Victoria; M. J. Coffee, Sacramento; S. G. Bawley, Nainaimo; R. P. Forshaw, Vancouver; secretary, W. W. Peebles, Portland.

J. G. Morgan, of that city, suspended on recommendation of the Portland club last year, was by unanimous vote ordered reinstated.

Delegates of the various clubs composing the league each reported that the sentiment for continuing the league intact was overwhelming, and that every effort possible should be made to enlarge upon its scope, to the end that every show-giving club on the Coast may ultimately become members of the organization. Norman J. Stewart, the founder of the league, who is now in Scotland, will shortly return to the Coast to live, and a letter from him, in which he assured the league of his active co-operation upon his return, was read at the meeting.

A vote of thanks was tendered the retiring president, Mr. J. Redelsheimer, for the able manner in which he has at all times championed the interests of the league and all matters pertaining to the welfare of Pacific Coast clubs.

Mr. Thos. S. Griffith a leading member of the Spokane, Wash., business community and an ardent Collie fancier is the owner of the golden sable and white imported Collie Lenzie Prince (Ch Rightway-Seaford Daisy). Prince has quite a string of Scotch winnings to his credit as follows:

Kilmarnock, 1st, novice; 1st, puppy and special, best dog in show. Dundee, 1st, open medal, best dog in show; 1st, limit medal, best dog in show; 1st, novice medal, best dog in show, 1st, puppy, gold medal, best dog in show. Prestwick, 1st, puppy and special, best dog in show. Ayr, April 26, 1st, limit and cup; 1st, Ayreshire, 1st, maiden; 1st, puppy; 1st, nonsporting. West Kilbride; 1st, open and special; 1st, puppy and special. Neilston, May 7, 1st, open; 1st, open; 1st, puppy. Kilmacollm, May 13, 1st, open; Paisley, May 26, 1st, open; 1st, puppy. Helensburg, June 4, 1st, open. Dunoon, June 10, 1st, open. Shettleston, June 11, 1st, open. Aberdeen, 1st, open. Dunfermline, 1st, open. Comrie, 1st, open. Dalkeith, 1st, open. East Kilbride, 1st, open. Paisley, 1st, open. Springburn, 1st, open. Shettleston, 1st, open; 1st, confined. Kirkintilloch, 1st, open. West Kilbride, 1st, open. Dunoon, 1st, open.

Among the brood bitches in the Griffiths' kennels is Moreton Vesta, imported, bred by Countess of Warwick, a big winner on this side and England. She is also the dam of Lord Stamford, who has won ten prizes this year at seven months. Vesta is in whelp now to Rippowam Archer, who is also sire of Lord Stamford.

Gold Belle, another bitch, was the winner of third in puppy class, New York. She is sired by Gold Dust (who sold for \$2500) and is the winner of fifty first prizes. Belle is in whelp to imp. Corinthian, a big winner. Glengair Lassie, just imported from Scotland, will be bred to Lenzie Prince. Maplemont Dot (sired by imp. Vertish Mac, a winner of many first prizes in Scotland) is in whelp to Shan MacQuirk by Knight Errant, also a big winner.

Cairnbrogie Dolie by imp. Majestic, he by Ch. Balgrogie Hope (the world's premier champion), is in whelp to Lenzie Prince.

Cairnbrogie Louise by Young Ormond is the winner of many first prizes and will be bred to Lenzie Prince. Sable Plum II. by imp. Pensarn Guard will also be bred to Lenzie Prince.

From the foregoing it will be seen that these kennels contain scions of the best Collie blood extant. The announcement of stud dogs, etc., appears on page 19.

### Get Ready for Outing.

Vacation will be here before you know it, and there is lots of joy about getting ready. It will interest you if you are going camping, tramping, or both, to visit Skinner's, 801 Market street, San Francisco, and see the greatest display of everything for outdoor sports and recreation ever shown in this country.

The Self Basting Broiler is one of the new camp comforts. It sells for 50 cents, and Skinner has it. Don't fail to see it if you are going camping or hunting during vacation.

### The San Francisco Show.

The San Francisco Kennel Club show opened very auspiciously on Wednesday. The entry was the smallest ever made in the history of the club. Quality was not lacking tho' the dogs were. The show, under the management of W. C. Ralston, Charles K. Harley and J. L. Cunningham, was run smoothly. The judging went along rapidly and with machine like routine under the veteran George Raper. J. B. Martin and W. E. Chute alternating as ring stewards. The one drawback was the failure of the printer to get the catalogue out properly and on time. The attendance has been better than for years past, the outlook for a paying gate is more than encouraging.

Among the out of town visitors were Mr. and Mrs. Graham E. Babcock of San Diego, Mr. and Mrs. Chas. Harker and J. C. Berrett of San Jose, Mr. and Mrs. O. J. Albee of Lawrence, Mr. W. B. Fechheimer and George Tinto of Seattle, Miss Della Beach of San Jose, W. F. Wameley of Pendleton, Oregon, and many others.

A full report of the show and list of awards will appear in our next issue.

### Portland Show.

Secretary Peebles and Treasurer William Goldman state that this year's bench show has been the best in every respect of any ever held in Portland. The dogs have been of better quality, the attendance has been greater, people have taken more interest in the show, the decisions have given general satisfaction, and last, but by no means least, the financial result has been more than 10 per cent greater than at any of the previous shows. Over 400 dogs were benched.

George Raper's decisions were accepted with general satisfaction so states Mr. Chas. K. Harley. Ch. Woodcote Wonder was lucky in not being there. The Portland awards were practically the same as were those given at Seattle where the same dogs came together at the Portland show.

The regular awards and the specials were as follows: Bloodhounds—Open dogs and bitches—1 Don, 2 Belle, both owned by Charles F. Wise, Astoria, Or. Winners, dogs and bitches—1 Don, 2 Belle.

Mastiffs—Limit dogs—1 withheld, 2 Bummer, T T Nelson, Pendleton, Or. Open dogs—2 Bummer.

St Bernards (rough coated)—Puppy dogs—1 His Highness, W L Hall, Victoria, B C. Only entry. Limit dogs—1 Duke, Theodore Godel, Portland; 2 His Highness, 3 Cap, Louis Eschle, Portland; h c Kruger, T A Garbade, Mount Tabor. Open dogs—1 Ch Grand Master II, Naird Kennels, San Francisco; 2 Colonel, C W Fulton, Astoria; 3 Jack, W A Storey, Portland; res Duke, Theodore Godel, Portland; v h c His Highness. Winners, dogs—1 Ch Grand Master II, res Colonel. Limit bitches—1 and 2 withheld, 3 Lady Noble, Eugene Froessner, Portland. Open bitches—1 Gypsy Lee II, Naird Kennels, 2 withheld, 3 Lady Noble. Winners, bitches—1 Gypsy Lee II.

Great Danes—Limit dogs and bitches—1 Lief, Dr J C Zan, Portland; 2 Mont Alto, E A Schloth, Portland; 3 Cunningham's Carlotta, J L Cunningham, San Francisco; res Prince Hamlet, E A Schloth, Portland. Limit dogs and bitches—1 Lief, 2 Mont Alto, 3 Cunningham's Carlotta. Winners, dogs and bitches—1 Lief, res Mont Alto.

Greyhounds—Puppy dogs—1 Tim, C B Williams, Portland. Limit dogs—1 Boney Boy, J E Tilden, Portland. Open dogs—1 Boney Boy, 2 Prince, E F Thayer, Astoria. Winners, dogs—1 Boney Boy, res Prince. Limit bitches—1 Clara, Claude Jones, Gervais, Or. Open bitches—1 Queen, E F Thayer, Astoria, Or. Winners, bitches—1 Clara, res Queen.

Chesapeake Bay—Open dogs—1 Boxer, R C Callahan, McMurry, Wash. Winners, dogs—1 Boxer.

Pointers—Puppy dogs—1 Rocket, C D Gabrielson, Salem, Or; 2 Montavilla Paddy, C P Lumsden, Portland; 3 Niard King, A T Weissel, Portland; res Jeweler Boy, H S Butterfield, Portland. Novice dogs—1 Jap, M L Coovort, Vancouver, Wash; 2 Pickles, William Hilgers, Portland; 3 Sam's Dan, S Woods, Portland; res Ted, Peter Hobkirk, Portland; v h c Dote H, William Hilgers, Portland; Bob, Leon A. Shaw, Vancouver, Wash; Printer Boy, N D Blain, Astoria, Or; h c Ned, G W Stewart, Portland; Sam's Kenneth, Robert Hughes, Portland; c Teddy, Francis B Wire, Albany, Or; Windsor George, J S Seed, Portland. Limit dogs (under 55 pounds)—1 Laddie W, Charles H Carter, Pendleton, Or; 2 Jap, 3 Teddy, res Jack, H S Niles, Portland; v h c Printer Boy, h c Don, James Peat, St Helene, Or. Limit dogs (55 pounds and over)—1 Minnesota Joe, H F Zeigler, The Dalles, Or; 2 Pickles 3 Snaps, L E Armstrong, Portland; res Plain Star, H Pease, Portland; v h c Gnome, F V Holman, Portland; h c Zero, Theodore Leibe, The Dalles, Or. Open dogs (under 55 pounds)—1 Laddie W, 2 Bummer, H J Donnerberg, Portland; 3 Plain Star, H Pease, Portland; res Gnome, h c Sam's Kenneth, Zero. Winners, dogs—1 Minnesota Joe, res Laddie W. Puppy bitches—1 Oregon Jingo, W M Davis, Portland; 2 Babe, G W Sharpe, Vancouver, Wash. Novice bitches—1 Clatsop Beauty, W F Halderman, Warrenton, Or; 2 Belle Whitestone, P Zimmerman, Portland; 3 Oregon Jingo, res Nellie K II, G F S Kammerer, Portland; v h c Walla Walla Queen, N D Blain, Astoria, Or; h c Royal Nig, H Pease, Portland; Bessie H, J D Honeyman; Leada A, Mrs M T Avise, Portland. Limit bitches (under 50 pounds)—1 Clatsop Beauty, 2 Oregon's Jessie, F F Wamsley, Pendleton, Or; 3 Nellie K, G F S Kammerer, Portland; res Columbia Queen, B R Nicholas, Portland; v h c Walla Walla Queen. Limit bitches (50 pounds and over)—1 Seal II, House, Portland. Open bitches (under 50 pounds)

# THE FARM.

## New Sheep Law.

The last Legislature enacted a law creating the office of sheep inspector. Boards of Supervisors are authorized, on a petition of a majority of sheep-owners of the county, to appoint an inspector, but he gets no pay from the State or county. He must look to the sheep men for his compensation, which is \$4 per day while in the performance of his duty. Such appointee is a deputy to the State Veterinarian, who is ex-officio inspector of the State. The deputy must be a practical sheep man and he is subject of removal by the Board of Supervisors. The deputy is empowered to administer oaths. He must personally examine all sheep between the first day of February and the first day of June in the spring, and during October and November in the fall. If the sheep are free from disease he must issue a certificate stating such fact, and such certificate will permit said sheep to pass through any counties in the State. Bands of sheep of less than twenty head, when known to be sound, shall not be subject to examination, except upon complaint. Sheep found diseased must be quarantined. Diseased sheep may be granted a traveling permit over such route as the inspector may designate, but only to some place to be dipped for disease.

When the inspector finds sheep with an infectious disease he must serve notice on the owner to dip them within fifteen days and keep them isolated from other sheep. Failure to obey the order of the inspector in this respect subjects the owner to a fine not less than \$100 and not more than \$250. The inspector is authorized to dip the sheep and collect the expense from the owner. If the sheep are not cured by one dipping the inspector may require as many dippings as circumstances demand. Owners cannot be required to dip between the first day of December and shearing time in the spring. It is not required that ewes which lamb be dipped from December 15th to May 15th, but if they are infected they must be quarantined. Sheep held in quarantine during such period of exemption must be spot or hand dressed with some reliable medicine. A herder who refuses to give an inspector information as to the condition of sheep is subject to a fine of not less than \$25 or more than \$100. The inspector must keep a record of all his transactions. Sheep cannot be shipped or cross a bridge or ferry without the person in charge having a certificate showing that the sheep are free from disease. A violation of these provisions subjects the offender to a fine of not less than \$100 or more than \$250. The inspector is empowered to arrest and take offenders before a justice of the peace.

## Vitality of Cows.

How to produce dairy cows so that the two essentials and at least some of the secondary desirable characteristics, are secured would be an easy matter if the mind could be freed from fads and fallacious theories, writes Prof. T. L. Haecker in *Farm, Stock and Home*. Many of the laws of breeding laid down in books are destitute of sound basis. One of the chief errors is the point claimed to indicate constitution. An animal deep in the brisket, with broad shoulders and fore legs far apart has no more stamina and endurance than one with a narrow, sharp shoulder and ewe neck. In fact, the latter, as a rule, has more nerve force and endures longer. So far as my observation goes, an animal with a good middle and carrying little surplus tissue is fitted for much work and a maximum period. The Channel Island cattle and the Ayrshires are of this type and are noted for longevity and staying qualities. They are also remarkably free from contagious diseases. About 500 animals have now been subjected to the tuberculin test on the Island of Jersey and not a single case of tuberculosis was found.

## Shipping Coops.

As fowls pass through the country over the lines of our railroads it is amusing to note the expressions of people who know but little of quality. Have noticed a thousand times at stations of delivery and transfer people go to the nice, clean, attractive coops and note the name of the shipper and remark, "Don't these fowls look splendid?" While the same people would turn up their noses in disgust at better quality shipped in old, dirty, unattractive boxes. The day of old, shiftless ways has gone to come no more. Hundreds of fowls sent on approval come back to the shipper simply because they arrive in bad condition. Nice, clean, well-conditioned fowls of medium quality that are sent in neat shipping coops will please the average purchaser, when better sent in poor condition will go back.

The cost of neat, clean shipping coops is trifling, or if we are able to build neat-looking shipping coops ourselves from store boxes well and good, but under no condition should a shipper risk his reputation within a slipshod, ill-constructed shipping coop. Neatness and dispatch is the up-to-date business rule in every line. Those who make it their rule are usually the ones to succeed, while those who neglect it seldom if ever, succeed. It is only necessary to consider one's own thoughts when anything we purchase comes to us in bad condition, to fully realize the thoughts of those who get from us fowls that are sent to them in poor condition.

Strike!—if they don't give you Jack son's Napa Soda.

### One Hundred Head of IMPORTED JERSEY CATTLE

of Island and English Breeding. Selected by him for the American Market

The English contingent was obtained from the very celebrated Chestall Herd of J. Reid Walker, Esq., Rugeley, England, in choosing which Mr. Peer had the valuable advice and assistance of Mr. Frank Sugden, Agent of the Chestall Estate.

Among several valuable bulls in the importation are the world-famous GOLDEN FERN'S LAD and the very exceptionally bred BROOKHILL FOX by Flying Fox out of Brookhill Rose 2d. Mr. John Thornton, of eminent authority, pronounced these the best two bulls in England. Many Island breeders regard the former as the greatest Jersey sire that ever lived. There are eight daughters of Golden Fern's Lad, and numerous get of such highly approved sires as Napoleon Bonaparte, Eminent 2d, Forfarshire, Hamley, Golden Lad 2d, Orlando, Flying Fox, Financial King, etc.

Sale will take place at

Hexamer's Riding Academy, 219 Hudson St., Hoboken, N. J.

(3 minutes from ferry), 30 minutes from City Hall Park, or Union Square, New York City, by ferries from Barclay and Christopher streets.

PETER C. KELLOGG, 107 John St., New York.

## "SAVE-THE-HORSE" TRADE MARK SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND (except Low Ringbone) PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.

FROM A REPUTABLE AND NOTED TRAINER.  
Glenville Driving Park, Cleveland, Ohio.  
For the enclosed \$5 please send me one more bottle of "Save-the-Horse." It is doing great work.  
Respectfully,  
MILLARD F. SANDERS.

Hartland, Mich.  
Find enclosed money order for \$5, for which send me another bottle of "Save-the-Horse" spavin cure, as it has done all you claim for it for me. With the bottle I bought of you I took off a curb, spavin and a side bone on a three-year-old mare that other spavin cures refused to help in the least. I consider your spavin cure the best on the market.  
E. M. PARSHALL.

Howick, Quebec.  
I had a mare suffering from a bone spavin and very lame. I concluded to try a bottle of "Save-the-Horse," and at the expiration of six weeks' treatment she was free from all lameness and I consider it one of the greatest compounds made.  
DAVID BARRINGTON.

Edgewater, N. J.  
Enclosed check for \$5, for which you will kindly send me another bottle of "Save-the-Horse" by Wells-Fargo Express soon as possible. The horse that I have been treating with "Save-the-Horse" went sound and I sold him, and the last I heard of this horse he was still going sound and was working

every day, and I think he will stay sound. The bottle I am ordering now I will use on another horse that has a pair of spavins and a curb; he does not go very lame but walks on his toes, but I think "Save-the-Horse" will bring him around so that he will walk all right. Very truly,  
OTTO MEYER.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous failures in treating, the concentrated, penetrating, absorbing power of this remedy is unfailing.

\$5 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost impossible, except in rarest of cases.

Copy of Guarantee sent upon application. \$5, at all druggists and dealers, or sent express prepaid.

TROY CHEMICAL CO., Troy, N. Y.

D. E. NEWELL, Pacific Coast Agent  
519 Mission St., San Francisco.

## The New Simplex Cream Separator.

MR. MUNROE, CARE OF WEATHERLY CREAMERY CO., PORTLAND, OR.

Dear Sir: The No. 2 700-lb. Simplex Hand Separator I bought from you is a dandy. It will separate 850 lbs. of milk per hour by opening the milk faucet wide open. I made several tests of the skim milk, running the machine over capacity and skimming 850 lbs. per hour at 80 degrees. Skim milk tested .01. 700 lbs. at 56 degrees .02.

My boy ten years old ran the Separator to skim 391 lbs. of milk. I made four pounds more of butter off of 1300 pounds of milk than I did with the old machine. Any one in doubt of the Simplex Separator's work, refer them to me. It is far easier to clean than the — Separator.

Yours respectfully,

WM. H. MILLER,

Fish Hawk, Columbia Co., Or.

Send for New 1903 Creamery Catalogue, just issued, and special Literature on Simplex Separators and Churns.

BAKER & HAMILTON  
SAN FRANCISCO, CAL.

## The Thoroughbred Stallion St. Carlo

St. Blaise.....	Hermit.....	Newminster Seclusion
	Fusee.....	Maryas Vesuvienne
	Kingfisher.....	Lexington Eltham Lass
	Carita.....	The Ill-Used Camilla

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$30,000 as a two-year-old. He is a wonderful young sire, among his get being Ruinart (winner of the Burns Handicap, Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7695), Joan, February, St. Cuthbert, St. Callatine, Count of Flanders, Lord Marmion May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

MENLO STOCK FARM, SAN MATEO COUNTY, CAL.

TERMS FOR THE SEASON, - \$100

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

JAMES McDONNELL, Portola, San Mateo Co., Cal.

## THE STANDARD-BRED TROTTING STALLION

### BOODLE Jr.

By BOODLE 2:12½, sire of Ethel Downs 2:10, Thompson 2:14½, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30. Dam NINA B. by Electioneer, sire of Arion 2:07½, Sunol 2:08½, Palo 2:08½, and 164 more in 2:30 list.

BOODLE JR. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal, provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$3 per month, but no responsibility assumed for accidents. Season open now, and will close August first 1903. BOODLE JR. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1300 pounds, is of a rich mahogany bay.

Apply to

J. D. CARR, or JOHN GARSIDE, at Gabilan Ranch.

## Silver Bow Jr.

By SILVER BOW (sire of Arrow 2:14, Silver Ring 2:14½ and 6 others in 2:30 list); dam MAGENT by Tempest (sire of Tago 2:11, etc.); second dam by Commodore Belmont

SILVER BOW JR. is 16-1 hands high, weighs 1200; bay, handsome, stylish, splendid action and has shown quarters in 303 seconds. Has nothing older than two-year-olds and they are all big, fine-looking and show speed.

Will Make the Season at MILPITAS.

Fee \$30 FOR THE SEASON. Good pasturage \$4. Excellent care taken of mares, but no responsibility for accidents or escapes.

Ship mares and apply to

I. MOREHOUSE, Milpitas, Cal.

## MONTESOL

Sire McKINNEY 2:11½, Sire of 22 in 2:15 and 48 in the 2:30 list. Dam IGO (sired by Antelope 2:14, 2d dam Daisy May by Natwood 2:16, 3d dam Ralston Mare by Alexander's Abdallah.

MONTESOL, 5 years, old, stands 15½ hands, weighs about 1100 pounds; is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Natwood with that of the greatest son of the great Alycane. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

\$40 for the Season, with return privilege.

## POLE STAR

The above Stallions will stand at the Race Track, Alameda

P. FOLEY, Race Track, A.

# Limonero=3=2:15 3=4.

A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and performance, is without a peer. He has 35 two and three year olds that have won at the track. A number of them are handsome, big bays and browns. From them are bred the best of the best judges many of them are sure to be good horses with every prospect of some star performers. A number of these are now on the Los Angeles track.

LIMONERO 2:15 was a three-year old in the fourth heat of a stake race, and won at Lexington, beating a field of six of the great three-year olds of that year, including the great Expressive, B. B. P. Hurd, and the White and Futurity.

LIMONERO 2:15 will make the season of 1903 at the

**AGRICULTURAL PARK, LOS ANGELES.**

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS.  
Owner.

J. H. WILLIAMS,  
University Station, Los Angeles, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

## NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year olds in one season with records of 2:12 and 2:12½ respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:05¼ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribes (George Wilkes).

NUTWOOD WILKES will make the Season of 1903 at the

**NUTWOOD STOCK FARM, from Feb. 1st to July 1st.**

Fee = \$50

**Nutwood Wilkes 22116**

For the Season

With return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents and escapes.

But three of the grandsons and granddaughters of NUTWOOD WILKES ever started in races. Of these, Alone 2:09¼, fastest four-year-old of 1902, is by a son (Nearest 2:32), and Holo 2:16¼, and Miss Georgie 2:35 are out of his daughters. Young stock by NUTWOOD WILKES for sale. For further particulars apply or address

**MARTIN CARTER, Nutwood Stock Farm, Irvington, Alameda Co., Cal.**

## BONNIE DIRECT 2:05 1-4

Winner of fastest 5-heat race paced in 1900. Winner of Chamber of Commerce Stake at Detroit; Blue Hill Stake at Readville, and three other great races. Biggest money winner of "New" Pacers of 1900, having \$7575 to his credit the first year out.

Sired by Direct 2:05¼, sire of Directly 2:03¼, Hal Direct 2:04¼, Prince Direct 2:07, Directum Kelly 2:08¼, etc.

Dam BON BON 2:26 (dam of Bonilene 2:14¼), by Simmons 2:28, sire of Helen Simmons 2:11¼, New York Central 2:13, etc. Also sire of dams of Ferozo 2:07¼, Tomboy 2:09¼, Whybee 2:11, etc.

Second Dam BONNIE WILKES 2:39 (dam of 3 in list) by George Wilkes 2:32.

Third Dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

**BONNIE DIRECT** is a black stallion, 15½ hands high, weighs 1200 lbs. Is a good individual, has best of feet and legs, and is absolutely sound in every way.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates. Address

## Grease Heel, Scratches,

**MUD FEVER, HOOF ROT, SPEED CRACKS**—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c; 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

Season 1903 San Jose Track.

TERMS \$50 SEASON, with usual return privileges.

TOM JAMES,

1120 Alameda Ave., San Jose, Cal.

**ZOMBRO 2:11**

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

**ZEPHYR (4) 2:11**  
**ITALIA (3) 2:23½**  
**LORD KITCHENER (4) 2:29½**

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06½ in a race, Julia M. (5) 2:12, Italia (3) 2:15½, Zombowette (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19½, Tee Dee Cee (4) 2:31½, Zerica (5) 2:35½, Gold Coin (4) 2:36½, Mabel W. (4) 2:38½, Edmond S. (5) 2:38½, Gyr Falcon (5) 2:39, Zombro C. (5) 2:39. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

**FEE \$75 THE SEASON.**

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes.

Send for card containing pedigree and full information. Address

**GEO. T. BECKERS,**

University, Los Angeles Co., Cal.

**SEYMOUR WILKES REG. No. 0232.****Race Record 2:08 1-2**

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

**Lakeville, Sonoma Co., Cal.**

**SEYMOUR WILKES** earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

**SEYMOUR WILKES** is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

**Terms for the Season \$30.**

particulars apply to **THOS. ROCHE**, Lakeville, Sonoma Co., or J. W. GREGORY, Stables, 408 Bush street, San Francisco.

## THE BAYWOOD STUD

THE BUNGALOW, SAN MATEO, CAL.  
(Property of JOHN PARROTT, ESQ.)

Will serve a limited number of Approved Mares, Season 1903  
FEE - - - \$75

Requisitions made for two or more mares.

Manager, WALTER SEALY.

Breed to Extreme Speed.

### CHAS. DERBY 4907, rec. 2:20 \$50 the Season

SIRE OF MICH BETTER 2:07½, DERBY PRINCESS 2:08½, DIABLO 2:09½, OWYHEE 2:11, LITTLE BETTER 2:11½, CIBOLO 2:13½, and many other fast and game racehorses.

Terms for young stallions and pasturage on application. Developed Trotters and Pacers for sale at reasonable prices. Address

### OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

ELECTIONEER

NUTWOOD

### NEERNUT Record 2:12 1-4 Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

SANTA ANA, CAL.

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two year-old Aristo. He stands 15½ hands, weighs 1100 lbs; blood bay with black points; trots without boots. He is a great race horse and his record (2:12½) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

GEO. W. FORD, Santa Ana, Cal.

## SIR GIBBIE 2D.

No. 370

American Hackney  
Stud Book

### Hackney Pony Stallion 13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at

MENLO STOCK FARM

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

JAMES McDONNELL,

Supt. Menlo Stock Farm,

Portola, San Mateo County, Cal.

## SEARCHLIGHT 2:03½

THE FASTEST STALLION BY THE RECORDS EVER  
OFFERED FOR SERVICE ON THE PACIFIC COAST.

He still holds the World's Records for 4-year-old (2:04½) and for 5-year-old (2:03½).

SEARCHLIGHT is one of the fastest and gamest horses that ever raced on the Grand Circuit. He is a horse of rare individuality and is one of the most perfect specimens of horseflesh ever foaled. He has repeatedly beaten one minute to the half-mile pole in his work, and has pulled the heavy cart in which he now takes his exercise a half in 58 seconds with a dozen watches held on him.

Few stallions that ever stood for service in California have such royal blood lines. Darknight, the sire of SEARCHLIGHT, was like the great McKinney, a son of Alcayone, and is a sire of extreme speed, having four 2:10 performers to his credit. The dam of SEARCHLIGHT is one of the great brood mares, having four with standard records and his grandam and great grandam are both in the great brood mare list. His oldest colts, now two years old, show that he imparts these qualities to his get, and he is certain to be a producer of early and extreme speed as well as size and good looks.

Terms for the Season, \$75.

## LECCO 2:09¾ The Blood that produced Dan Patch 1:59½

LECCO 2:09¾ is a very handsome black stallion, a square trotter and as game a racehorse as ever looked through a bridle. He is by Bonnie Boy, one of the best producing sons of Patchen Wilkes, sire of the great Joe Patchen 2:01½, that in turn is the sire of the unbeaten Dan Patch 1:59½. The dam of LECCO is a great brood mare by Homer, and his second dam is a producing mare by Rochester and his third dam is a producing mare by Clark Chief. For four generations in the pedigree of LECCO there is not a sire or dam but is a producer of standard speed.

LECCO made a campaign through the Grand Circuit in 1899 that shows his wonderful speed and gameness. He met the best horses out that year and in seven starts won four first moneys, two seconds and was but once unplaced. His action is perfect and he cannot help siring a family of high class, handsome, fast and game trotters.

\$50 for the Season.

The above horses will stand at the PLEASANTON RACE TRACK, and all mares not proving with foal may be returned free next year, or in case the horse is not in California the service fee will be returned. It is the intention of the owner, however, to keep both SEARCHLIGHT and LECCO in this State for the next four or five years. Due care taken to prevent accidents or escapes, but no responsibility assumed should any occur. Pasturage provided at \$4 per month, and all bills payable before mare is removed from my possession.

For further particulars and tabulated pedigrees address

EDW. MILLS, Rose Hotel, Pleasanton, Cal.

## NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 3 years) 2:18½, Rutington 2:12 years 2:30½, 36 others in 2:30 list. Dam, Fidella (trial 2:36 at 2 years), dam of Fidette 2:38½, dam of Mary Celeste (at 2 years) 2:17½, by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lanet, son of McCracken's Blackhawk 767.

NUSHAGAK'S sire, Sable Wilkes, is a remarkable sire of early and extreme speed; his son Oro Wilkes 2:11 was one of the gamest colts that ever raced down the Grand Circuit. The Wilkes and Director blood is a successful cross, as it has produced John A. McKernon 2:05½, Nathan Straus 2:05½, Ozanam 2:08, Dollade Wilkes 2:10½, Oro Wilkes 2:11, Evangeline 2:12, Mary Celeste (at 2 years) 2:17½, etc. Fidella, NUSHAGAK'S dam, is in the great broodmare list and she would have been a very fast trotter if given an opportunity, as with very little training she trotted a mile in 2:35 as a two-year-old. Mr. Corbett purchased her from Mr. Goldsmith for a broodmare, consequently her training was discontinued. The get of Reavis' Blackbird, the sire of NUSHAGAK'S second dam, were noted for their remarkable gameness and vigorous constitutions. His two noted daughters, Mamie Griffin 2:12 and Vic H. 2:12½, were exceedingly game. NUSHAGAK has only got eighteen or twenty foals older than yearlings, of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His other colts that have been handled some are: Brown filly, 4 years old in 1902, showed trial of 2:20½ with three and one-half months' work; blk g. 3 years old in 1902, with three months' handling showed mile in 2:35½, last quarter in 35½ seconds. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. Before taking sick we felt confident that Aristo would trot a mile closer to 2:10 in his three-year-old form; the way he raced after being sick made us feel satisfied that we had made no mistake in our estimate of him. His third heat in 2:17½ was equal to 2:13½ or 2:14 over the Woodland, Santa Rosa or Stockton tracks.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege if mare proves not with foal. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed should any occur. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morhead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES  
NOT GUM AND FILL UP THE PORES like tar and oil  
compounds. It is the GREATEST REMEDY ever used to  
remove SORENESS and FEVER from the foot, and makes it  
possible to get good services out of a horse working on hard  
and hot pavements.

It gives natural nourishment to the foot and incites a  
rapid, healthy growth--ALL DRYNESS AND BRITTLE-  
NESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly  
grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET  
and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UN-  
SOUND and GROWS a TOUGH, STRONG, ELASTIC WALL  
and HEALTHY FROG--A FOOT WHICH WILL STAND  
WORK on race courses.

Many of the best owners and trainers state that for track  
work nothing equals it. In many cases horses have reduced  
their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES  
We Guarantee That It Will Do What We Claim  
and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00;  
2-1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied  
free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next  
issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JUST A MONTH will elapse before the Pacific Coast Trotting Horse Breeders Association will close its six big events advertised in this issue of this journal. Before that time the place and date of the meeting will have been announced and horsemen will know whether they can enter in these rich stakes with advantage or not. The principal event is The California, inaugurated last year and won by Petigru whose fastest heat in the race was 2:16. This stake has a value of \$2000 and is for trotters eligible to the 2:24 class. The pacing stake is arranged for the 2:20 class and has \$500 added to its value of last year, making it worth \$1500. Both these events should fill well as they give a green horse an opportunity to win enough in one race to pay for all his training expenses and a profit besides. The 2:15 trotters have a purse of \$1000 to trot for and the 2:13 pacers are offered the same sum. There is also \$600 for three year old trotters and \$500 for pacers of the same age. These stakes are only preliminary. The Breeders will announce a long list of additional stakes as soon as the place and date of meeting are decided upon. It is proposed that a stake of \$1000 be offered for pacers of the 2:10 class and it will very likely be arranged. This should bring out a bunch of entries that will make the race one of the best contests of the year and one of the big drawing cards. Among the eligibles would be Alone 2:09½, Dictatress 2:09½, Harry J. 2:09½, Robert I. 2:10, Topsy 2:10, Kelly Briggs 2:10½, Eagletta 2:11½, El Diablo 2:11½, Midnight 2:11½, Silver Coin 2:11½, Alford C. 2:12½, Athnio 2:14½, Doc Wilkes 2:12½, Enoch 2:12½, and several others. It would be one of the best betting races of this year and the person who could pick the winner would get better than 2 to 1 for his money in the auctions. While the California circuit will not be as extensive as usual this year owing to the cutting off of the district fair appropriations by Gov. Pardee, there will be at least eight weeks of racing on the circuit and the purses will be generous and the class of horses contending most excellent.

THE CALIFORNIA JOCKEY CLUB'S winter racing closed on Thursday of this week. It has been one of the most successful ever held by the club, and the profits have been larger than ever. The coming week there will be a six days' meeting at Petaluma, to be followed by a meeting at Sacramento. Many of the horsemen will then take their strings to Seattle and Butte for the extended meetings to be held at those places.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

THE MANY FRIENDS of Ralph H. Tozer, the well known turf writer and authority on racing matters, who was connected with the BREEDER AND SPORTSMAN for so many years, will regret to learn of the sudden death of his esteemed mother, Mrs. Charles Mason, which occurred at her home in Gilroy, this State, on Wednesday of this week. Mrs. Mason was an educated and refined woman and was a native of England, although the greater part of her life was spent in Tennessee and Kentucky before she came to this State. Her son is now at St. Louis, where he is officiating as clerk of the scales at the Kinloch meeting. No closer bond of mutual love and esteem ever existed between a mother and child than was enjoyed by this estimable lady and her son during her lifetime. Her loss will be severely felt by him, though he will have the sympathy of all who know him as one of nature's noblemen, a son of whom any mother might be proud.

THE OREGON STATE FAIR will be greater than ever this year. Its speed program is thoroughly up to date, and big stakes for the trotters and pacers will draw large entry lists to a certainty. The principal events advertised are a \$2000 stake for 2:20 trotters and one of the same value for the 2:17 pacers. These stakes are open to the world and will close May 15th. Salem, where this big fair will be held, has dates on the North Pacific Circuit, where ten or twelve weeks of racing with liberal purses will be given. Times are good up in the northwestern country and money is quite plenty. The circuit there last year was the best ever given, and this year it will be even better. The Oregon State Fair will open September 14th and close on the 19th. Secretary M. D. Wisdom is the one to send entries to. His office is at Portland. Read the advertisement.

## Payments in Stanford and Occident Stakes.

Several parties who have purchased colts eligible to the Stanford and Occident stakes of this year have asked us to publish the dates of payments due on them.

In the Stanford stake the last payment is \$20 and must be paid twenty days before the first day of the State Fair this year.

In the Occident stake the final payment is \$50 and must be paid thirty days before the day of the race.

These are the only payments now due on the stakes of 1903.

## An English General's Opinion.

General Baden-Powell, before sailing for England on the completion of his tour in this country, speaking of the United States cavalry, said:

"I rather expected to find men of fine physique in your cavalry and was surprised to find the reverse. The enjoy too many luxuries in their food and their system of exercise is not thorough. Their food is far too highly seasoned. They should be deprived of coffee altogether and should have only an occasional portion of tea. The British cavalryman, when in barracks, have a salt-water bath every day, which keeps them in perfect physical condition. Plain diet, vigorous exercise, combined with regular drill, are what have made the British cavalrymen superior to all other cavalrymen in the world. Your cavalry have not yet had a hard campaign, like the Boer war, to show their staying powers. I am inclined to think that if the chance ever comes their mode of life will tell the tale in a long sick list.

"Your cavalry horses cannot be equalled. Probably 50 per cent of the horses in the British cavalry are American bred, and they are able to wear out 5 per cent of their riders in a two weeks' journey. They are especially good over a rough and dry country. Your cavalryman is more active, both physically and mentally, than the average British horseman, but I think he lacks the staying powers."

Gen. Powell's opinion in regard to American horses is founded on actual experience with them. His opinion of our cavalrymen is only theoretical. If ever a war demonstrated that the British soldier lacked staying powers it was the Boer war that Gen. Powell referred to. American cavalry in our Indian country have suffered more hardships than ever the British did in South Africa and yet they stood the test on coffee, sow belly, hard tack and beans. Our American soldiers are not too well fed to fight and the reason our horses are better than any others is that they are raised on the richest grasses the earth produces. The fact stated by Gen. Powell that American horses wear out five per cent of their English riders in a two weeks' journey shows that the Britishers have not the staying powers the American soldier has, as there is no such percentage of men riding in the ambulances when an American cavalry regiment ends a two weeks' march, and they have had many of them in countries as rough as any to be found in South Africa.

KANSAS CITY, MO., May 14, 1902.

Messrs. Lew Watson & Jones, Kansas City.  
Dear Sirs:—We have used your Strap, Veterinary and Hoof Ointment with good success in several instances, and we feel that your remedy cannot be spoken of too highly. Respectfully,  
GUYTON & HARRINGTON MULE CO.  
By A. J. WRIGHT.

## Cheap Horses That Made Good.

Statistics compiled by an expert authority brings to light the fact that among the great 2-year-old winners of \$5,000 and upwards in 1902 on the running tracks, are many performers that were decidedly cheap yearlings of 1901. The filly Philo, that won the races and \$5 770, cost \$60 as a yearling. Flocarline, the winner of eight races last year and \$7 720, including the New Orleans Preliminary Derby, sold for \$70, and the sensational Eugenia Burch won in the year \$25,259 more than the \$25 she cost as a yearling.

Other enormously great bargains among the star 2-year-olds of last year were: Dick Weller, cost \$300, won \$9,185; Monte Carlo, cost \$350, won \$5,705; Astarita, cost \$450, won \$1 780; Girdle, cost \$700, won \$14,105; Mamari, cost \$600, won \$8,025, and Onatas, \$900, and won \$6,415. Africander and Sergeant only cost \$1,000 each, and won, respectively, \$12,400 and \$7,000, while River Pirate was a great bargain at \$1,400, winning \$8 255, and during the season sold for \$20,000.

Other higher-priced yearlings which were profitable investments as 2-year-olds in 1902 were Merry Acrobat, \$2,000, won \$6,355; Sir Voorhies, cost \$2,000, won \$5,580; Grey Friar, cost \$2,100, won \$28,385; Hurstbourne, cost \$2,200, won \$13,390; Irish Lad, cost \$2,600, won \$45,120, and Golden Maxim, cost \$3,800, won \$10,965.

There were many disappointments in the yearling crop of 1901. W. C. Whitney paid \$16,000 for the St. Simon—Lady Reel filly, and she never faced the starters flag, and J. B. Haggin gave \$15,000 for the imported Ayrshire—L'Esclaire colt, which is still a maiden. J. R. & F. P. Keene gave \$6,750 and \$6,500, respectively for Futurita and Ponca, and while each won a single indifferent race neither was anywhere near even second class form.

Other big disappointments of the racing season, all of which are still maidens, were: Thunderbolt, cost \$13,000; Amariyllie, cost \$11,500; Princelet, \$10,300; Moondyne, \$10,000; Karna C., \$6,000; imp. Melton, Mowbray, \$5,100; Passan, \$5,000 and Water Spirit, \$5,000.

All this goes to show that, even with the vast improvement in breeding in the last few years, buying yearlings for prospective racehorses is still a big lottery, the buyer being as likely to draw a blank as to secure a prize.

## Answers to Correspondents.

Can you tell me what became of the horse Alban 5332, son of Gen. Benton and Lady Morgan? Was he successful as a sire of speed? Name some of his get that have records.

ALBAN is the sire of three in the list; they are Seylex 2:15½, Almoner 2:20½ and Hilarita 2:29½, all trotters. His son Almoner is the sire of one pacer—Island Boy 2:17. One of Alban's daughters, Gift, produced You Bet 2:07. We do not know who owns Alban, but a letter to F. W. Covey, Superintendent of Palo Alto Farm, would doubtless bring that information by return mail.

Olney & Son, of the Rose Hotel at Pleasanton, tendered the horsemen a banquet last Monday evening, which was largely attended and greatly enjoyed. The banquet was arranged by Messrs. Olney as a farewell to the owners and trainers who will race on the Eastern circuit or ship to the Blue Ribbon sale and it furnished the occasion for many pleasant exchanges of courtesies between those present. A sumptuous feast was spread at 10:30 and toasts were given and responded to, until the "wee sma' hours" of the morning. There was none of that boisterous hilarity which spoils many a feast, but good fellowship and bright repartee made the evening one to be long remembered by all present.

W. J. Winkler, the Ohio buyer who created something of a sensation by paying \$395 in the Chicago auction one day nearly two years ago for a drafter in little more than feeder condition, is again on that market with an extensive order from Eastern consumers for heavy horses. He reports the demand very strong for high class offerings and does not anticipate that the prices now current will be lowered appreciably for the next three years. He states that his experience suggests that by 1906 the oldest of the three large crops of foals now maturing will come on sale and the supply will then be more likely to meet inquiry than any that is to come between now and then.—Breeder's Gazette.

The noted trainer Charles Marvin says that Hilgar (2) 2:15½ by Wiggins (2) 2:19½ is the best two year old he ever handled, barring Arion, that he drove to a two year old record of 2:10½.

Entries for the races to take place at the Butchers' Picnic will close May 16th.

## JOTTINGS.

THE MOST IMPORTANT EVENT in harness racing in California, to occur during the coming week is the sale of Geo. H. Fox's Mokelumne Stock Farm horses at Fred H. Chase & Co's salesyard in this city next Tuesday evening. I am not well enough up in matters prophetic to tell just what these horses will bring but I know there are quite a number that will sell for less money than they are worth. There's that grand old mare Grace, by Buccaneer. Two thousand dollars would be a low price for her as an investment, but she may not bring half that sum. Any stud colt by a good stallion and out of this famous old matron that has produced three in 2:20 something but very few mares have achieved) can earn \$2000 a year net for any enterprising owner. There are three young sons of Grace that have never started and anyone of them can go in the list. Suppose Senator Stanford were alive to-day and owned this old mare. He would see to it that these three young horses were given standard records and that would give Grace six in the list, placing her among the most select of the greatest broodmares. With this prestige for her what would a colt from her by such a horse as Chimes, Baron Wilkes, McKinney, Nutwood Wilkes, Mendocino, or any of the fashionable speed producers be worth? This mare Grace never dropped a foal that could not take a record below 2:30.

Just as I had finished the last sentence a letter was handed me from Mr. Fox in which it was stated that Grace foaled a black filly last Monday morning by Mokelumne 37558 that is a regular crackerjack in looks. The person who buys Grace and this filly at the sale will have an opportunity, that is not met with at every sale, of breeding her to the stallion of his choice as the filly will be just eight days old the night of the sale. There has not been such a chance offered for many a day. A great broodmare, dam of three in 2:20, with a filly at foot by one of the best bred young stallions in America. This filly foal is closely related to as many champions as any foal of 1903. Her great grandsire is the sire of Cresceus 2:02½, champion trotter of the world. Her dam's granddaughter has produced Sir Albert S. 2:03½ one of the fastest pacers living. Within four generations she is related to Cresceus 2:02½, Alix 2:03½, Nancy Hanks 2:04, Dr. Leek 2:09½, Stamboul 2:07½, Sir Albert S. 2:03½, Kelly Briggs 2:10½, Javelin 2:08½, Mercury 2:05½, and many other of the extremely fast ones. Grace and this filly foal would be a better start for a stock farm than a whole band of mares that are from unproducing dams.

There will be three sucklings by Mokelumne in the sale—his first foals. One is a filly from Grace as above mentioned, another is from Vesper, a daughter of Prompter, and another is out of a daughter of Vesper by Silver Bow. This last mentioned will have two crosses of Silver Bow in its veins.

There is a four year old filly by Silver Bow out of Vesper in this sale that is, to use Mr. Fox's words "a peach." I saw her at the farm about five weeks ago and can bear him out in his description. She is a square trotter like all the Silver Bows and should be given to a trainer, as she is naturally fast and clean, open gaited. At this stage of trotting horse breeding, when pacers are nearly as numerous on the breeding farms as the diagonal gaited foals, breeders should not fail to keep up the lines that throw trotters with regularity. Of all the foals produced by Silver Bow 2:16 there is but one pacer to date and that is out of a pacing mare that never trotted a step in her life. The Silver Bows trot, have size, style and action, feet and legs like iron and are the kind that sell for good prices. For these reasons alone this sale should attract buyers who are looking to breed the best and most saleable horses. And when it is added that every horse catalogued is well bred, an additional inducement is put before buyers. I look to see Fred Chase's new pavilion crowded next Tuesday evening.

Editor Adams, who is secretary of the citizens' committee of Pleasanton that is arranging to hold a big fair and race meeting at the horse centre this season, was in San Francisco this week on business connected with the fair. The Pleasanton folks are fully awake on the proposition of holding a fair, and propose that it shall be second to none in the State. A large pavilion display is assured, and the stock exhibit will be large as a number of rich prizes are to be given and many breeders have already promised to send their stock to compete for the prizes. There is some talk of having the racing under the management of the Pacific Coast Trotting Horse Breeders Association which would assure a large entry list of all the

best horses in training in California. Owner Thos. Ronan and Manager Geo. A. Kelly of the Pleasanton track are both much in favor of having a fair and race meeting there this year, and Mr. Kelly says he will keep the track in first class shape for training and have it as near perfection as possible for the week of the meeting. There is no doubt but the Pleasanton fair and race meeting will be one of the best ever held in California. The whole population of the town and the surrounding country is enthusiastic over it and a generous money subscription will be raised to assure the financial success of the enterprise. Arrangements will be made with the railroad company for special rates from all points within a radius of fifty miles, and nothing left undone by the committee to draw a large attendance during the entire week. Horsemen can look for the announcement of the program within the next two weeks and the purses will be liberal.

If Cresceus starts this year it will be against the records of Maud S. and Sunol to high wheel sulky. The record of 2:08½ was made by Maud S. at Cleveland, Ohio, July 30, 1885, over a regulation oval track. Sunol's record of 2:08½ was accomplished in 1891 over the Stockton kite. If Cresceus succeeds in pulling an old fashioned high wheel sulky a mile faster than these records, he will have all trotting records worth gaining to his credit. There is no doubt in my mind but the son of Robert McGregor can do the trick if he is in first class condition. He has the speed and stamina and only needs to be fit. Pulling one of those old vehicles with steel tires is a very different matter when going round the turns from drawing one of the modern pneumatic ball bearing bikes. On the straight I do not think a strong going horse like Cresceus would notice the difference very much, but on the turns quarters in 32 seconds are very difficult when the wheels are sliding and swinging outward from centrifugal force. Cresceus can break the record, however, if any horse can, but the mere fact that it is still unbroken after a lapse of nearly eighteen years is evidence to me that Maud S. was just about as fast as any of the trotters that have appeared since her time.

Lou Dillon, the marvel of speed that will be sold in the Santa Rosa Stock Farm consignment at Cleveland on the 11th inst., trotted a half at Pleasanton last Saturday in 1:02½. Millard Sanders, who, to my mind, is one of the greatest speed makers of all the trotting horse drivers this country has produced, dropped the remark that he believed the little chestnut mare could step a mile that day faster than she ever did in her life, and as we all knew she has gone a mile in 2:08, we, who were at the track, missed our lunch to see him give her this half. She was hitched to one of those long shaft Payne sulkies and had been given a mile in about 2:25 twenty minutes previous with a fast brush through the last eighth. After scoring her down once Sanders took her away on a jog and at the half my watch showed 1:20. Here Millard gave the beautiful daughter of Sidney Dillon a looser rein and she stepped the three-quarter in 32½ seconds. He then let her have her head and she fairly flew. She needed no urging at any part of the remaining distance and the last quarter was in 30½ seconds. She is the prettiest trotter I ever saw and every person that sees her immediately falls in love with her. Her color is that rich dark chestnut, the most beautiful of all colors for an equine. Her form is symmetry itself and her action the very poetry of trotting motion. I have no idea what figure she will bring at the sale, except that it will take five figures to express it, but she will be worth every dollar she brings no matter what the price may be.

Among the fast ones at Pleasanton that will not cross the mountains this year is Martin Carter's pacing mare Miss Georgie by McKinney out of a mare by Nutwood Wilkes. Cecil drove her a quarter in 29½ seconds on Wednesday of last week and on Saturday he gave her two fast quarters—both in 30 seconds flat. She is a little on the delicate order in looks, but is game and can go the route. She will make another 2:10 performer if nothing happens her this year. Mr. Carter's favorite young horse T. C. by Nutwood Wilkes out of Zeta Carter by Director is coming very fast these days. I saw him trot a quarter in 32½ seconds and he seems to improve every time he is taken out. He is one of the big, strong, robust kind and they think he will trot in 2:10. He ought to make a great clock horse.

Mills & Sanders have a two year old by Klatawah 2:05½ (the champion three year old) out of Ruth C. by Gulde, son of Director that Henry Sanders drove a half in 1:11 and a quarter in 35 seconds last Saturday and she trotted every step of the way as if she liked the game. I guess Klatawah was about the greatest bargain that has been picked up in many a day. He was bought for \$1450 by an Illinois man at auction last year, who is getting some of the greatest mares

in the west to breed to the son of Steinway and Katie G. this season. Klatawah will make twice his cost price for his present owner this year.

Jim Thompson, orator and dreamer, has put the Indiana pajamas on Col. J. C. Kirkpatrick's pacer Clipper 2:06, and the gelding by Diablo is taking as kindly to them as a sixteen year old girl does to a new spring hat. Jeems worked Clipper a nice mile with the straps last Saturday in 2:12, and the Colonel told me afterwards that he would lower Clipper's record this year. Clipper must weigh nearly two hundred pounds more at the present time than he did the year he took his mark, and the hoppers don't seem to bother him in the least. They are not drawn tight and will be let out still more and it need not surprise anyone if he paces in 2:04 or better before the season is over. He acquired a habit of jumping up when at speed and many thought he had soured on the game, but with the straps on he seems to enjoy his work. When Thompson drove him in 2:12 last Saturday he seemed to be coaxing Clipper back all the time, and the quarters were all about the same speed as he went to the half in 1:06½.

Another son of Diablo that is showing up well this year is J. M. Alviso's Rey del Diablo that took a two year record of 2:23. Al is going easy with him this year and has his legs in fine shape. His son worked him a mile in 2:20 alongside Mr. S. F. Martin's bay gelding by Diablo out of a mare by Cresco, driven by S. K. Trefry. The pair worked two heats at this speed during the forenoon and both could beat it a few seconds. Mr. Martin's gelding is a trotter and a good one, to my thinking.

Millard Sanders drove the Diablo mare Diablita, owned by Mr. Vanderhurst of Salinas, a mile in 2:18 and she is looking like "the real goods" this year. She took a record of 2:15½ in a race last year when she was in poor form, and now that she has filled out and looks strong and rugged 2:10 should not stop her. She is to be sold at the Cleveland auction, and I look to see her bring a good figure if she can show a fast half or quarter there, as she is a very handsome mare, has size, good color and is well bred.

## Contra Costa District Will Hold a Fair.

The following letter from President H. J. Curry, of the Contra Costa District Fair Association, is a piece of good news. This organization gives one of the best fairs in the State among the smaller districts and the fair this year will be the first held on the new grounds at Concord, where an excellent mile track has been laid out:

MARTINEZ, April 27, 1903.

BREEDER AND SPORTSMAN:—At a meeting held at Concord last Saturday, the directors of Contra Costa County Agricultural District No. 23 decided to hold a three or four days' meeting, which will take place some time in September; as yet we have not set any time. There was a full meeting of the Board present and they all seemed very anxious to keep up the good work. Knocking out the appropriation was a great loss to us at this time, as we had been to so much expense by buying new grounds; but, however, we will not get discouraged and will try to give them a good meeting this year. I write you these facts so you will give mention of it. Thanking you in advance, I remain, yours very truly,

H. J. CURRY.

## Send the Mare Back.

The *American Horse Breeders'* editor writes as follows: "It is a difficult matter to breed fast trotters by rule. Those who attempt to do so will conclude that the exceptions to the rule are so numerous as to render the business perplexing and unprofitable, rather than pleasing and remunerative. There is one rule, however, which those who are just entering upon the business will find it safe to follow. It is this: When a mare has produced a fast trotter by any stallion send her back to that same stallion when possible to do so, and when not possible then send her to one that is bred in similar lines to the one with which she was mated when she produced the fast trotter. A careful study of pedigrees will enable a breeder to learn what combinations of blood lines have proved most successful in producing uniform and extreme speed in the past. This will be as useful to him as the chart and compass is to the mariner."

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

Like all good things, Jackson's Napa Soda has a dozen counterfeits. Watch out!

## Wants a Late Meeting.

VISALIA, Cal., April 26, 1903.

**BREEDER AND SPORTSMAN:**—The announcement in a recent issue of the BREEDER AND SPORTSMAN that the time and place of holding the Breeders meeting would soon be fixed is creating unusual interest among breeders here. We feel that we would like to meet in actual contest with some of those phenomenal youngsters of the bay counties, and I am importuned to lay our claim before the directors of the Breeders Association in the matter of time and place of holding the meeting. It is a well known fact that the existing extreme climatic conditions of California render it impossible to give a midsummer meeting without working a great advantage to some and a disadvantage to others. The excessive heat of the interior being against us in the coast climate, and the same is equally true of those shipping from the coast to the interior, but autumn tempers these conditions that equality may be meted out to all if the directors so will it. Again, a late meeting would result in larger fields, especially in the colt stakes, and since California is looked upon as the world's greatest nursery of trotting colts, it naturally follows that a late meeting would result in faster contests, thereby enabling us to retain the coveted prestige. A grander aggregation of great bred colts has never been named for any stake than those named in the Pacific Breeders stakes to be decided at this meeting and the results will be closely watched by Eastern investors and will largely influence them in turning to California in quest of young stock, and while it is true that but one can win a stake, if under the most favorable conditions the races are fast, we will all win ultimately by reason of the great showing made, thereby stimulating the demand for California bred stock. If it be argued that chances would be taken in holding a late meeting through inclement weather, we answer that Fresno has a climate that comes nearer obviating this possible danger than any other locality in California, with Stockton a close second choice and perhaps more centrally located of any place making a bid for this meeting.

At any rate, let it be not earlier than October, that full justice may be done to the occasion.

JACOB BROLLIAR.

## Horse News From Riverside.

At a meeting of the Shakespeare Club last eve, held on the porch of the Glenwood Tavern, each person present gave a quotation from Shakespeare; Landlord Miller was the president of the club and last to quote, as follows:

"When two or three are gathered together in my name (if there is anything in it), I'll be there also."

One gentleman doubted the exactness of the landlord's quotation and a lady doubted its being from Shakespeare, intimating that she thought it was from Milton's "Paradise Regained."

At this juncture up drove Mr. Donnelly with Stanton Wilkes 2:10½, as perfect a formed and dispositioned pacer as can be found in California, by Nutwood Wilkes. His high form and speed he seems to impart to his colts in a marked degree.

J. H. Thompson, the owner of El Diablo 2:11, joined our circle, he handing us a picture of Miss Monbells by Monbells, dam Emaline 2:27½ by Electioneer. This is a large, strong filly, elegantly bred and should surpass the expectations of her owner.

The bay filly Conchita by Zolock 2:10½, dam by Maxi, millian, he by Echo, is one of the finest young fillies in the State, beautiful in form and geared high for speed, with the sweetest of dispositions.

El Diablo 2:11 is in the hands of A. W. Bruner, of Los Angeles, and is looking fine and showing faster than ever before. Dr. Ramsey, V. S. here, owns the bay colt Hylcock by Zolock 2:10½, dam Hyto by Happy Prince; this colt is entered in the futurity. The Doctor also owns Emaline 2:27½ by Electioneer, dam Emma Robson, the dam of three in the list.

Mr. Bartee, the owner of the black gelding Midnight 2:11, thinks him a much better racing proposition than last year, good as he was.

Such elegant sires as Raymon, Christmas, Jud Wilkes, Grandee and Grey Cloud have made seasons here and there are many animals worthy of note in this locality that later I will mention.

ALCANTELLUM.

## Cured Bad Fistula and Running Sore.

KENT, O., January 26, 1903

*The Lawrence-Williams Co., Cleveland, O.*  
We used Gombault's Caustic Balsam on fistula and cured it in about four months. This fistula was very bad, on both sides of the shoulder; run at four or five places, and one side was terribly swollen and a net work of pipes. We had used three other remedies and all failed. We also used it on a horse for running sore which was obstinate to other medicines. I cured the sore in two weeks. A bottle of Gombault's Caustic Balsam can always be found at our stable.

CHAS. RHODES.

California's favorite hot weather drink—Jackson's Napa Soda.

## Kentucky Futurity Has Big Entry.

The world's greatest trotting turf event—Kentucky's \$22,000 Futurity—which closed its nominations on March 16th, signalizes the advance and progress of the great breeding interest of the country by showing two hundred and more nominations than the same fixture commanded last year, a most gratifying increase, not only to the association and the breeding interests in general, but to Secretary Shanklin. It also tends to show the extensive popularity of this great stake and, too, breeders realize the increased value of a foal by reason of its eligibility to it.

Last season this stake commanded a total of 1145 nominated mares, while for this year the total reaches 1366, and increase of 221, certainly a very gratifying gain and an indisputable evidence of the esteem and popularity in which both the stake and the association back of it are held.

In the matter of nominations, Kentucky, of course, stands at the head with a total of 491, a trifle more than one-third the entire list of 1366. The Empire State furnishes the next largest number, 144 mares being nominated by owners in New York, while Massachusetts presses close upon this number by enlisting 129. But three other states have sent more than a half hundred, Illinois, Ohio and Pennsylvania, whose contributions are 85, 64 and 55 respectively. There are represented 37 different states and territories, besides Canada, which this year has nominated 23 mares.

Kentucky also furnishes the largest individual nominator—Patchen Wilkes Stock Farm, whose total of 57 gives some idea of the extensive breeding operations carried on there. Walnut Hall Farm (whose Fereno won both the two and three year old futurities), also a Kentucky establishment, is second with 46, and Groverland, yet another Kentucky farm, is third with 43. Then follow three Massachusetts farms, J. Malcolm Forbes with 23, Allen Farm with 23, and Dreamworld, the farm of Thos. W. Lawson 22, the latter having the same number as Hudson River Stock Farm, New York.

Then in order, follow A. S. Ashbrook (Ky.) 20; Henry Schmulbach (W. Va.) 20; East View Farm (N. Y.) 16; L. E. Brown (Ill.) and Village Farm (N. Y.) 15; A. G. Danforth & Son (Ill.) and Smyser Bros. (Ky.) 14; A. R. Gumaer (Col.) and Riverside Park Farm (Wis.) 13; Empire City Farm and Stony Ford (both N. Y.) 12; Jas. E. Clay (Ky.), Idle Hour Farm (Ga.), Alex. MacLaren (Canada) and John H. Shults (N. Y.) 11, while the nominators of ten are J. W. Bailey (Texas), J. L. Druien (Ky.), International Stock Food Co. (Minn.), Maple Ride Farm (Ky.), Margrave Stock Farm (Ind.), Palo Alto (Cal.), J. E. Thayer and Chas. Whitmore (Mass.).

Walnut Hall Farm's Moko (the sire of Fereno 2:07½, Mabel 2:10½, etc.) is the most extensively represented stallion, 42 of the nominated mares being bred to the young brother of the sensational campaigner Bumps 2:03½. Arion 2:07½ shows second with 32, Bingen 2:06½ third with 31, Wilton fourth with 23, while San Mateo 2:13½ and Silent Brook 2:16½ tie for fifth honors with 22 each. A number of prominent sires are represented with from 15 to 20.

E. W. SHANKLIN.

## San Francisco Riding Club to Have New Quarters.

A purchase has been made to the north of Golden Gate Park which will result in an establishment for driving and riding clubs that will not have its superior in the United States. The property is that on the southwest corner of Seventh avenue and C street, which has been bought by Colonel John Flournoy, vice-president of the San Francisco Riding Club. It is 120 by 250 feet in size, and was obtained from four owners for \$16,000 through Shainwald, Buckbee & Co. as brokers. It is the intention of Colonel Flournoy to erect on this spot a concrete and brick stable of modern sanitary style, and to lay out a ring 100 by 120 feet in dimensions, which will be surrounded on three sides, both on the ground and in galleries; and capable of seating 1200 persons. The stables will have stalls for at least 100 horses, and it is expected that all will be in readiness by the early winter. These quarters will be occupied by the San Francisco Driving Club, which will remove from its present location at 1649 Pacific street, and by a driving club which is to be formed. Speed animals will be excluded from the club. The situation of the new riding and driving club building is on the driveway between the Presidio and Golden Gate Park, and its location has been chosen in order to take advantage of the good roads in the Park and the military reservation and to avoid riding or driving over the bituminized city streets, which are severe on horses and unpleasant to owners, especially in damp weather.

Jackson's Napa Soda does not tangle the feet.

## Matinee at Sacramento.

[Record-Union, April 26th.]

Quite a crowd assembled yesterday afternoon at Agricultural Park to witness the matinee of the Sacramento Driving Club, and they witnessed two good races and had lots of fun.

The three races were mile heats, best two in three, owners to drive, the first being between C. B. Rust's Harry R., William Trust's Candy Joe and Charles Silvey's Charles S. Candy Joe was never headed in either heat and won by a couple of lengths, with Charles S. second in each heat. Time, 2:44 and 2:33.

The second race was between F. E. Wright's Margaretta, Charles Silvey's Polka Dot and F. J. Rust-staller's Monroe B. The first heat was a good one, Margaretta winning, with Monroe B. a close second.

In the second heat they got a good start and Margaretta shot ahead. At the quarter Monroe B. moved up and they went together up the back stretch at a good clip, reaching the half in 1:06½. Margaretta was three lengths ahead at the turn and kept her lead until the head of the stretch, when Monroe B. fell back a little and Polka Dot passed him in a rush, collaring Margaretta. They came like a double team down the stretch and Margaretta won the heat and race by a nose, and Monroe B. finished ten lengths behind. Time, 2:17½.

For the third race the starters were Albert Elkus' Zulene, Jay Wheeler's Bobby Dobbs, Dr. McCollum's Jennie H., and Dr. Weldon's Aristocrat, Canny Scot having gone wrong. Bobby Dobbs was a bad actor, and as they came to the wire the second time the crowd yelled "Go!" and they went, Wheeler pulling up Bobby Dobbs at the eighth. The Aristocrat led up the back stretch, with Jennie H. a couple of lengths behind. At the half Zulene came up and collared them, and they went together round the turn. At the head of the stretch Zulene came to the front and there was a struggle all the way down the stretch between her and Jennie H., Zulene in the lead. Near the wire both broke, but Elkus pulled Zulene down, and she trotted under the wire in 2:46, Jennie H. second and Aristocrat six lengths behind. The crowd enjoyed the send-off, and the drivers had to endure considerable joshing when both horses came down to the wire on a run, Elkus barely pulling his horse down in time. When Dobbs' driver came in something less than a hundred yards behind, having pulled up his horse at the eighth, and then trailed around after the others, he was greeted with a storm of jests. He had his revenge in the next heat, however, for his horse was steady enough when in front of the field, and as the word "Go!" was given, when he was four lengths in front of the others, who got a very ragged start, he was never headed and went round without a skip, finishing six lengths ahead in 2:37. The race was given to Dobbs, although only two heats had been trotted, of which he won the last.

Vet Tryon and Albert Elkus were judges and Dan Dennison timer.

## Made a Poor Man Well To Do.

Writing of the recent death of Beuzetta 2:06½, *The Horseman* says: "Beuzetta was bred by E. W. Ayres, of Duckers, Ky., and she was the best investment he ever made in the line of horseflesh. At the time he nominated the dam of this great mare in the Futurity he was not well endowed with worldly goods. In fact, the few horses he had represented, with his farm, all his worldly wealth, and there was a heavy mortgage on all this property. When the filly won the Futurity it was one of the years when the stake was a very rich one and his share of it was in the vicinity of \$24,000. Immediately after the race the filly was purchased by W. E. D. Stokes and Peter Duryea, the proprietors of the Patchen Wilkes Farm, for \$16,000 or \$17,000, and this enabled him to clear his place and leave a snug sum in the bank. For one filly to clear close to \$40,000 in one day was one of the rich lotteries of the breeding of trotters, and Kentuckians generally were glad to see that fortune had smiled on the breeder. From that eventful day she was owned by the Patchen Wilkes Farm. The latter raced her in her four year old form, when she secured her record. One of the foals she produced after being retired to the ranks of matrons was one that knuckled over so badly a few days after foaling that Mr. Duryea gave orders that it be destroyed. The negro to whom the orders were given rebelled at the thought and declared that he could bring the youngster around all right. The owner agreed to the proposition and stated that if he was fortunate enough to do so he would buy him a better suit of clothes than he ever had in his life. The colt grew up strong and sound and Mr. Duryea made good, purchasing a \$75 suit, picking out a dark coat and vest, and a very loud pair of trousers. A few weeks later the negro sold the coat and vest for \$10, explaining that the goods were not the right colors."

### An Opportunity to Get Good Ones.

Next Thursday evening at Fred H. Chase & Co.'s sale, corner of Van Ness avenue and Market street in this city, the horses from Geo. H. Fox's Mendocino Stock Farm will be sold to the highest bidder. Mr. Fox is selling all his horses with the exception of his stallions, the mare Kitty Fox by Pancoast, and three or four Silver Bow fillies. All the rest, twenty-eight head, comprising broodmares, four and five year old geldings and fillies and a half dozen yearlings will be sold next Tuesday evening. While Mr. Fox has not had his horses trained, all two year olds or over are thoroughly broke, and for size, style, conformation, breeding and soundness are not surpassed by the horses from any stock farm in California.

The catalogue which has been issued shows that every mare on the farm has been and is a regular breeder.

There is Vesper by Prompter, a five year old filly from her by Silver Bow 2:16, a three year old filly also by Silver Bow, and a yearling by Daedalion 2:11. She is in foal now to Mokelumne 3:55½, son of Silver Bow and Kitty Fox.

Vesper Bell, a mare by Director Jr. out of Vesper, is in the sale and there is a two year old filly and a yearling colt from her, both by Silver Bow.

Elma by El Benton, son of Electioneer, is one of the handomest and best bred broodmares in the sale. She is the dam of a three year old gelding and a two year old gelding, both by Silver Bow, that will also be sold. She has a filly at foot by Daedalion and has been bred back.

Flora is by Judge Waller, the sire of that fast mare Paenol 2:11½. She raised a bay colt by Daedalion last year that is in the sale and she was stunted to that stallion again this year. Her five year old daughter Silora by Silver Bow is a fine big mare and will be sold at this sale.

Miss Fletcher is a registered thoroughbred mare, bred at Rancho del Paso. She is by Hyder Ali and out of Kate Fletcher by Harry O'Fallon. She foaled a filly on March 2d by Daedalion.

Ariel is a grandly bred mare. She is by Bourbon Russell, sire of Mary Russell 2:09½, etc. She is in foal to Daedalion 2:11.

Annie G. is another mare whose breeding is first class. She is by Mambrino Boy 844, sire of the dams of Axtell 2:12 and Allerton 2:09½, etc. Annie G.'s dam is by Bonnie Scotland. She is stunted to Daedalion.

Grace by Buccaneer is well known to all our readers. She is the dam of three with records below 2:20 and is from one of the greatest broodmare families in trotting horse history. She is a regular breeder and will have a foal at foot at the sale by Mokelumne 3:55½.

Ventures by Arthurton out of Lady Venture, own sister to Venture 2:27, sire of Directum's dam, is in the sale and is represented by a three year old colt by Silver Bow and a yearling by Monterey 2:09½.

Fantall is another registered mare of good breeding. She is by Greenwich 2488, son of the great Princeps and himself a producer of speed. She has a filly at foot by Daedalion, and there is a yearling, full brother to this colt, to be sold also.

A yearling bay colt with a small crescent in forehead is worthy the attention of all breeders. He is by Monterey 2:09½ out of Kitty Fox by Pancoast, second dam by Dictator, third dam by Mambrino Time, etc. He is eligible to the Stanford Stake of 1905 and to the Stallion Stake for foals of last year. He has every mark of a fast trotter. Whoever gets him will get a colt that will develop into a high class horse.

There is another yearling colt that is most royally bred in a son of Silver Bow and Josie Clawson by Nushagak, sire of Aristo 2:17½, last year's Occident and Stanford Stake winner. The second dam of this colt is Ventures by Arthurton and third dam the sister to Venture.

Anticipate, a handsome mare, own sister to Agitato 2:09, champion of his age, should bring a good price. She was foaled in 1891, and is a regular breeder. Her foal, a four year old gelding, is in this sale. He is by Silver Bow and is a rare good one.

The bay five year old stallion by Silver Bow from Grace, the dam of Daedalion 2:11, Creole 2:15 and Eagle 2:14½, is one of the grandest looking trotters in California and one of our greatest prospects. He is a natural trotter, has shown better than 2:20 and although never raced has all the speed and gameness to make a great race horse.

The same evening that Mr. Fox's horses are sold four well-broke trotters consigned by Jos. Culcetto will be offered to the highest bidder. Three are by Seymour Wilkes 2:08½, one of the coming great sires of speed in California, the other by Direct. All have size, are good gaited and ready for road or track work.

Ir. B. F. Wellington Jr., of Stockton, will also contribute to this sale the handsome brown mare Leah by

Rajah, son of Sultan out of Jenny H. by Bismarck 67. She has a perfect disposition, is young, kind and gentle in every way, and a square trotter.

This sale is one of the most important held in California for some time, and should be well attended, as it doubtless will be.

### A California Horseman in Jersey.

CLOSTER, N. J., April 20, 1903.

EDITOR BREEDER AND SPORTSMAN, San Francisco, Cal. Dear Sir:—Recently while looking over one of the western turf journals I noticed where mention was made of a very promising colt sired by Toots, son of Monbars 2:11½ and Nellie by Geo. M. Patchen, Jr.

For the benefit of breeders I wish to state that the horse is now called Toots M. and has gained a record of 2:24½ on a half mile track. I write this as there are quite a few colts by this horse in California. The reason for changing his name was in order to have him registered as there was a stallion registered by that name.

This has been a busy season around these parts. At present I have the following horses in training. Toots M. 2:24½ by Monbars 2:11½—Nellie by Geo. M. Patchen Jr. I will get him ready for a low mark as he showed great form ere his retirement to the stud two years ago. He certainly is proving a great sire of speed in these parts.

I also have what I think is one of the grandest fillies in the country. Black filly, Carrie L. (3) pacer by Arthur L. 2:15, dam Carrie G. full sister to Alcyoner 2:25½, sire of six, by Alcyone 2:27.

I also have Lady Toots (2) by Toots M. 2:24½, dam Wedgewood's Daughter by Wedgewood. Dandy, chestnut gelding by Huron Boy 2:16.

Major Medium by Pilot Medium, dam by Spartacus. Ella B., chestnut filly by Nut Dale, dam Ida B. 2:28½ by Ashland Chief.

I will have four others as soon as I go to the track. Weather has been fine.

Yours very truly,  
DAVID F. HERSPRING,  
Trainer and driver for A. H. Brewster.

### Hickok in Good Physical Health.

The Cleveland correspondent of the *American Horse Breeder* writes his paper as follows:

"Sensational reports concerning Orrin Hickok's proximity to death are not borne out by the facts; I went to see him at Lakeside hospital the other day, and found that, while he no longer possesses his mental faculties, he is stronger physically than he has been at any previous time during his treatment at the hospital. He went there last July, and until November was confined to his bed. Since then, however, he has been up and around every day and seems to enjoy his surroundings, if it can be said that one without a mind can enjoy anything. He eats heartily and sleeps well, and his doctor says that he takes great delight in the game of seven-up, which he still plays with skill. He remembers that he was at one time connected with horses and he talks of them in a general way, but he does not remember any particular horse. Nor does he remember even for a short time anything that may be told him. The physician informed me that Mr. Hickok might live for years notwithstanding his advanced age.

This reference to the aged horseman recalls a fact that comparatively few persons ever knew, i. e., that Orrin Hickok and 'Wild Bill' Hickok, the Kansas marshal and dead shot, were brothers. Orrin never referred to the relationship. Like Orrin, 'Wild Bill' had an abundance of nerve. In his capacity of marshal he had the cut-throats at his mercy, and on one occasion killed ten of them single-handed after his two companions had been slain. But, like other preservers of the peace in the wild West, Bill died by the hand of a murderer, having been assassinated while sitting in a game of cards."

Geo. S. McKenzie, ex-Sheriff of Napa county, who has been living at Hilo, Hawaiian Islands, for the past three years, where he has been Superintendent of the Volcano Stables and Transportation Company, has returned to California and will again take up his residence in Napa, where he has business interests. Mr. McKenzie was presented with a handsome gold watch, by the employees of the Volcano company at a banquet tendered him the day prior to his departure from the Islands. During the time he resided at the islands Mr. McKenzie purchased many horses in California, which he used in his business there and owned a racing stable which contained a number of good winners.

NEW YORK, N. Y., March 20, 1903.

Mr. W. Young Springfield, Mass.  
Dear Sir—I have used your Absorbine for several years and have found it the best of anything I ever used for strained tendons and muscle soreness.  
Yours truly  
W. J. ANDREWS,  
414 W. 155th St.

### Concerning Jogging.

Roy O. Austin, of Taunton, Mass., writes as follows to the *American Horse Breeder* concerning jogging horses in training:

"If our horse is a little stiff or limpy, we hitch him up and jog him four to eight miles a day. If we are going to train him next summer, we jog him, in fact, we jog him anyway. Why? I really believe because it is a custom handed to us by our predecessors.

The more I study this method of using our well bred horses, the more I am convinced that jogging hurts them more than it does them good from a speed standpoint. The more we jog a horse, the more it teaches them to like to jog, the same as the more we speed one, the easier it is for him to speed.

A horse doesn't learn to trot fast by driving him slow all the time, but rather dreads to be speeded up after being jogged several days. Every time you go with a horse it ought to serve as a lesson, and teach either the horse or yourself something, even if it is but to teach him to walk faster.

Some trainers jog their horses because their owners expect them to be jogged every day, and even if the trainer thought it better for a certain animal to stay in the stall and have perfect rest and lots of oats, he doesn't dare to do it for fear the owner will think the animal sick or the driver too lazy. The owner will ask why, anyway; and then has to follow the explanation, which must be in harmony with the owner's ideas to avoid criticism or censure.

Some drive: jog to harden and others to limber the muscles and to develop the lungs, not only preparatory to fast work, but the year around. It is the slow, steady, sleepy jog, generally on a loose rein, to which I refer.

I asked one driver why he jogged his horses so much. Answer: 'Oh! my boy, everybody jogs his horses.' 'Yes, but why?' 'Oh, to harden the muscles and improve the wind.' Now we all know a horse in speeding very fast brings into use a whole lot of muscles that he does not use in jogging, and there is an entirely new pressure on the lungs. So why is not all the trainer's time spent in jogging to harden the muscles and improve the lung power for speed lost?

The same afternoon I ventured to ask another 'older head' why he jogged his horses so much nearly every day and kept it up all through the winter. He said, 'You jog your horses, don't you?' I told him 'I jogged one, once, one time.' After asking him again what good it did his horses he said, 'Limbers them up.' What had they been doing that they needed limbering up? They had been jogged all winter.

The fact was he had jogged some of them so much that they were stiff, and the more he jogged them to limber them up the stiffer they would come out the next day. One of his horses was so sore and stiff forward I told him the cruelty to animal folks would be after him, and that he ought to put castors on in front. He said he would, only he didn't see how he could get around the turns."

### Club Racing in the Park.

The speedway was the scene of some good racing last Saturday afternoon between horses owned by members of the Golden Gate Park Driving Club.

The first race was made up of the 2:25 class trotting horses, E. Aigeltinger's Dolador coming in first, M. Donnelly's Young Salisbury second and De la Montanya's Ivy third. The second race, also of the 2:25 class, was in two heats, Eddie Sachs' Sandow winning both heats and H. Miller's Lady Falrose second in both heats.

In the third race the contestants were of the 2:30 pacing class. This race was in two straight heats, the first heat being won by Arthur Jacobs' Arthur F., George Swett's Steve S. second, H. Schottler's King V. third. The second heat was won by George Swett's Steve S., H. Schottler's King V. second and Arthur Jacobs' Arthur F. third. Steve S. won the deciding heat. The prizes were ribbons, blue for the first horse, red for the second and white for the third. There were also silver trophies for the winners. George W. Swett acted as judge.

The chestnut trotting gelding Arch W. 2:11½ was found in his stall last week at Glenville with a leg broken, and it was necessary to kill him. Arch W. won a number of good races on the Grand Circuit for Vance Nuckols, in 1900, and as will be remembered was suspended, together with his owner, Henry Eck, that fall, it being claimed that the horse had been raced out of his class. During the past winter J. W. Adams, of Cleveland, purchased Arch W. from Mr. Eck, intending to race him at a few meetings and then drive him at the matinees, the suspension matter having been adjusted.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## Notes and News.

Dora Doe 2:12 has gone East to the Blue Ribbon sale.

Cresceus will probably be taken to Europe on an exhibition tour this fall.

The American trainer, John A. Peck, died in Vienna, Austria, last month.

Lida W. 2:18½, the dam of Nutwood Wilkes, has been bred to Searchlight 2:03½ this year.

Kinney Lou has been placed under the standard and measures just 15 hands, 1½ inches in height.

McHenry is now at Memphis, working Prince Direct and Baron de Shay, both of which horses he owns an interest in.

Don't miss the Mokelumne Stock Farm sale at Fred H. Chase & Co's salesyard 1732 Market street, next Tuesday evening.

There will be fifty-two fairs held in the State of Indiana this year, including the State Fair that will be held at Indianapolis.

Dates for the California circuit will be announced this month. There will be at least seven weeks of racing with good purses.

M. McMahan, the well known real estate dealer of this city, is now the owner of I Direct 2:12½ by Direct and is using him as a road horse.

Henry Titer expects the five year old son of Bingen 2:06½, dam Nancy Hanks 2:04, Admiral Dewey 2:14½, to get a mark better than 2:10 this year.

F. G. Jones drove Dr. Book 2:10 and Mabel Onward 2:10½ miles right at 2:20 at Memphis last week. Both are consigned to the Cleveland May sale.

Mills & Sanders have a four year old pacer at Pleasanton by Chas. Derby out of Economy by Echo that paced a quarter in 30½ seconds the other day.

No effort will be made to race Directly 2:03½ again, as has been stated. An attempt will merely be made to fit him to lower his record late in the fall.

Pinky H., the chestnut mare by Dexterwood, that took a record of 2:17½ at Fresno last year is showing great speed this year having worked a mile in 2:15.

Quite a number of horses are in training for the races at Oakland on Butchers' Day. The fields promise to be large and the betting will be fast and furious.

Mabel McKinney 2:17 has been sent to the Nutwood Stock Farm at Irvington to be bred to Nutwood Wilkes. She is owned by Mr. W. L. Spoor, of Redlands.

There is one living foal by Major Delmar 2:05½, got before he was gelded, when a four year old. It is owned by his former trainer, Charles Baldwin of Ticonderoga.

If any one thinks that the automobile has superseded the horse he has another guess coming. According to the Year Book, over 10,000 horses raced last year at 1104 meetings.

C. K. G. Billings' Lucille 2:07, the world's champion trotting mare to wagon, has been shipped to Kentucky to be bred to John A. McKerron and the produce should prove to be a sure wagon performer.

Winnie Wilkes 2:17½ is at Pleasanton to be bred to Searchlight 2:03½. She is in foal to McKinney and when led onto the scales last week tipped the beam at 1610 pounds. What standard bred one can beat this?

Mush worked a mile in 2:12, last half in 1:03½ and last quarter in 29½ seconds last Saturday. Ben Walker did not intend to drive him better than 2:14, but the big son of Lottery Ticket got away from him a little in the stretch.

Trilby, the little black pacing mare by Direct, owned by Senor Juan Galleagos, of Mission San Jose, worked a half in 1:06, last quarter in 31½ seconds, at Pleasanton last Saturday. She is one of the sweetest gaited pacers that has been seen on the Pleasanton track this year.

Robizola, the mare by Robin that Millard Sanders has leased for the year, stepped the Pleasanton track last week in 2:13. She is a good gaited trotter and does her work without the protection of a lot of boots. In the green classes over East she should make a showing this year.

The three year old Janey Directum by Directum 2:05½, dam Janie T. 2:14 by Bow Bells, is a very promising trotter, and looks as if she would be the real thing in the futurities this fall. She is coal black and a beauty. She is owned by International Stock Food Co., Minneapolis, and they have high hopes for her future. As her sire and dam were both champion colt trotters, Janey Directum ought to be a great performer. It looks as if the Directums will make a great showing during 1903.

W. B. White may decide to give Star Pointer 1:59½ a careful preparation with a view of starting him in the pacing cup event at the inter-city matinee next summer. The champion is in splendid condition, his legs appear smooth and sound and he may furnish a surprise party.

Chin Waa a bay gelding that took a record of 2:25 in a race for members of the Fresno Driving Club last year at the Breeders' meeting, is a much improved horse. He is in J. Albertson's string at the Raisin City, who stepped him an eighth in 15 seconds one day last week.

Two yearling colts by Monterey 2:09½ out of elegantly bred mares are to be sold at the Mokelumne Stock Farm sale at 1732 Market street in this city next Tuesday evening. Either of them is well enough bred to head a stock farm. They are both promising young trotters.

Entries to the four main stakes opened by the Oregon State Fair will close May 15th. The 2:17 pacers have a stake of \$2000, the 2:20 trotters one of the same amount, and the three year old pacers and trotters are each given \$500 to contest for. See the advertisement in this issue.

Reybel, the three year old filly by Rey Direct 2:10 out of Mabel, dam of Directly 2:03½ by Naubuc, has stepped a quarter in 29½ seconds at Pleasanton. She is as game as a pebble and we should not be surprised to see her bring a price up in five figures at the Fasig-Tipton Blue Ribbon sale week after next.

W. Mendenhall, who recently purchased What Is It 2:16½ by Direct out of Lassie Jean by Brigadier and placed him in Al McDonald's charge, will race this gray fellow over the California circuit this year. There never was a gamer trotter and his record is not within five or six seconds of what it will be.

Fred Chadbourne worked the pacer Ben F. 2:22½ by Bradtmoor a mile in 2:12½ at Pleasanton last Saturday. Mr. L. R. Palmer, owner of the horse, was there to see the pacer go and was naturally much pleased with the showing made. Ben F. is a good prospect in his class and will get a mark close to 2:10 if nothing happens him.

R. P. M. Greeley of Oakland has sent his filly by Diablo 2:09½ to Mills & Sanders of Pleasanton to train. This filly is a trotter and very fast at that gait and is eligible to the Stanford Stake of this year. She is one of the anxious kind when going away, but if she can be controlled will be a hard one to beat in any company.

The mile ring at Glenville was thrown open on Monday of last week for the first time this season and the many trainers have been giving their horses miles around three minutes. About 2000 loads of clay were placed on the track last fall and the trainers are universal in the opinion that it will be better and faster than ever before.

Mr. Zibbell, who is training quite a string of trotters and pacers at Fresno, worked Nance O'Neill a quarter in 30½ seconds over that track one day last week. He drove the trotting mare Lady Rowena a mile in 2:17, and the McKinney stallion Tom Smith 2:16½ is doing well in his care. All these horses belong to Prof. E. P. Heald of this city.

Anaconda was shipped to Charter Oak Park last week, where his training will begin in earnest. Fred Noble has been giving him preliminary work at New Haven, where his fastest mile was 2:39. His first start this season will be at the Branford Driving Park, July 4th, where he will attempt to reduce the half mile track record of 2:04½, made by Joe Patchen.

Monroe Salisbury will ship his string of horses to Empire City track next Tuesday or Wednesday. Ben Walker has worked like a Trojan on the Salisbury horses all winter and his endurance has been well established. No man can go more heats in the sulky day after day than Ben Walker and every one of the horses he has driven at Pleasanton is good gaited and fast.

There are lots of horses at the Empire City track. There are seventy-five green ones from C. X. Larrabee's Montana ranch. They are by Alcane, Commodore Belmont, Lambert Boy, Alaska, Malcolm and other highly bred sires. Thomas Murphy, Fred Dumont, A. E. Perren, John Day and Charles Thomson, all have good strings and are beginning to work them.

"Farmer" Bunch has opened a public training stable at Pleasanton and is ready to take horses to train for the track or road use. Mr. Bunch is one of the old guard and as good a speed teacher as the next man. He has already given four horses records in the 2:10 list, to say nothing of a half-dozen more that he has put in the 2:15 list. He expects to tour the California Circuit this year.

F. W. Perkins of Sacramento writes us as follows: "My mare Dolly L. foaled a chestnut filly on the 23d of April. It is a fine, large boned filly with the same short back as her sire Athamox. It is the first of his get to appear this season. Athamox is doing well in the stud and now that he has commenced to take on form and move up they all tell me he is the finest made horse they ever saw. But before they all said he was a lobster and only had good breeding. They now say 'I told you so.' He had a blind splint all winter, but it was treated and he has come out O. K. Owing to his size I have not sent him any fast miles as yet, but I have all kinds of faith in him, and he is like Tryon's horses. The last one he gets is always the best."

There will be a race for the 2:06 pacers at the Blue Ribbon meeting at Detroit. It would make a grand race if it should have such horses as Elderon 2:05½, Fanny Dillard 2:05½, Nathan Straus 2:05½, Twinkle 2:05½, Casonda 2:05½, Dumont W. 2:05½, Little Squaw 2:06, Terrace Queen 2:06, Martha Marshall 2:06½, Riley B. 2:06½, Charley Hay 2:06½, Roamer 2:06½, Prince Direct 2:07, Sphinx S. 2:07, Greenline 2:07½ and Nervolo 2:07½.

Rancho del Paso will hold a sale of driving and draft horses and young mules on May 14th, 15th and 16th. Two hundred head will be sold and the sale will begin at 10:30 A. M. each day. The place of sale will be on the ranch at the American river bridge, just outside the city limits of Sacramento. Rancho del Paso has bred many high class harness horses and there are always a grand lot of bargains to be obtained at its sales.

Harry Logan 2:12½ is doing well this year and looks better than he ever did. Sam Gamble measured him last Saturday and he stands 16.2 hands. Harry wears the hoppers, but his half brother Bert Logan by Colbert goes without them and is one of the cleanest gaited pony built pacers in California. Bert is just about as tall as Prince Direct 2:07, but is a heavier horse. Dr. Boucher will take Miss Logan and her two sons to Denver this month.

Lottie Parks 2:16½ dropped a chestnut colt by Owyheel last week and has been bred this week to Monterey; this inbreeding to that good son of Sidney (as Lottie herself being by Cupid, another good son of Sidney) ought to produce remarkable speed as Lottie had repeatedly shown 2:10 form in her work before she went lame. The produce of this mating ought to be valuable when fully matured. Lottie Parks is owned by Mr. T. J. Crowley of this city.

C. L. Griffith's string of horses for the Blue Ribbon sale, accompanied by the consignment of Geo. Davis of Rancho del Valle, left last Tuesday for Cleveland. The Griffith horses were in charge of Bert Webster, while the Davis string were in Sam Parker's care. They will be able to show speed at Cleveland that will open the eyes of the public to the fact that California is the only place to get early speed, and that Pleasanton has the greatest winter training track on earth.

Greer McDonald of Lodi writes us under date of April 27th, as follows: "The candidate for Futurity is at hand—a slashing chestnut colt—no marks. In conformation and style, the counterpart of his grand-sire, Diablo 2:09½. A natural trotter, no inclination to pace. Have named him 'Hades Prince.' Daedalion was son of Diablo (The Devil) and Hades their abode. This colt's breeding is as follows: Sire Daedalion 2:11, dam Queenie by Dexter Prince. Queenie is full sister to Maggie 2:13, second dam by Peerless, son of Gen. Knox; third dam by Black Boy.

A. B. Rodman of Woodland lost his valuable mare Advocatrix by Advocate last week. She died soon after foaling a still born colt by Diablo. Advocatrix was one of the handsomest as well as one of the best bred mares in California and was Mr. Rodman's especial pride of all the mares ever owned by him. He has four foals from her, a four year old and a three year old by Goldrose, a two year old colt by McKinney and a yearling by Tuberosa 2:25½. The McKinney colt is one of the best proportioned and most promising sons of McKinney on the Pacific Coast.

Henry Dunlap is working King Cadenza 2:15 and his bay mare Explosion by Steinway at Pleasanton. King Cadenza looks like the same reliable old pacer, able to go as many miles around 2:15 as the next horse and do it every week in the year. Explosion is a likely three year old filly that Mr. Dunlap purchased at the Oakwood Park sale in March. Her dam is Flash (the dam of Javelin 2:08½, Flare Up 2:14, Sally Derby 2:19, Walker 2:23½ and Bee 2:24½) by Egmont. Explosion has shown a quarter in 31 seconds, is a perfect driver, and like King Cadenza needs no boots.

Sam Hoy, who is training quite a number of horses at his own track at Winters, reports that he has but one record horse in his string, Kelly Briggs 2:10½. The owner of this pacer is very anxious for Mr. Hoy to take him East to race with the top notchers over there, but Sam thinks the chances of a string composed of but one horse would not be the very best and would rather race here at home if there are any purses for the 2:10 class, as he can then take along several of his green horses and colts by Bayswater Wilkes and start them in a few races.

In a letter from Senator Perkins read before the meeting of the directors of the Chamber of Commerce, at Santa Barbara recently, it was learned that Attorney-General Knox has completed arrangements for erecting a magnificent residence there and will make Santa Barbara his future home. The horsemen of that locality had better look a "leedle out" when this member of President Roosevelt's cabinet gets settled there. He owns one of the fastest pair of trotters in the country, one of them being the California bred horse Dr. Leek 2:09½, and is averse to taking anyone's dust.

Bert Webster, who has been the trainer of the Griffith horses for several years and gave such horses as Bonnie Direct 2:05½ and others the most of their training, will "close his engagement" with Mr. Griffith when the sale is over as there will be no horses left to train. Bert will doubtless remain in the East all summer, but will return to California before ice forms over there and will make his headquarters at Pleasanton, where he may train a public stable. He is a careful man with horses, an excellent colt trainer and knows how to teach them to race. He should do well as he has hosts of friends in California.

### The Ideal Trotter.

The American trotter as a type, or if one may use the expression, the ideal trotter, will be a composite of the best that has been seen in the past, together with other qualities that are absolutely lacking and always have been in every trotter that has been seen. The trotter of the past has had no distinct type nor is the average light harness horse the equal in any respect with what will be a distinct type when it comes. The American trotter of to-day, taking him as an average, lacks that very essential characteristic called quality that must be a strong feature of all blooded horses where speed is the desideratum. The thoroughbred of to-day differs greatly in general appearance from the Godolphin Arabian as depicted by the cuts that are frequently seen, and which doubtless, in a measure, are reasonably good likenesses. One hundred and fifty years' breeding for a type has succeeded in establishing one, and so distinct has it become that the thoroughbred in training can be distinguished from among all other breeds by anyone in the least familiar with the various families of horses. Not so with the American trotter; he comes in all sizes, colors and in all shapes, and no two trotters can be found that are enough alike in every respect to be distinguished from horses of absolutely no breeding; in fact, it is not an uncommon thing to see horses that are known to have not one drop of trotting blood to possess infinitely more quality than is found in the average trotter. The ideal trotter of the future, or the typical trotter, will probably be a horse ranging from 15.2½ to 15.3 hands high, and his weight, while considerably more than the thoroughbred of the same height, is not likely to be equal to that now usually found in horses of that height, for the reason that with advanced breeding will come a certain fineness of texture of bone and a lack of coarseness and flabbiness now so common. The typical American trotter in conformation, if one can judge from what has been seen in the past and the gradual change towards a type, will be very like the thoroughbred in many respects, although with possibly more substance than is found in running horses of the best specimens.

The head and neck of any horse used entirely for speed is patterned after one model and nature has made this model herself. The only material difference that is likely to be found between the two breeds of horses as regards the head will be in the ear, which in the trotter is somewhat longer and larger than that of the thoroughbred. There is the same reason in each family for the tapering or pointed muzzle, large nostril, broad flat jaw, the wide forehead and the prominent eye and the blood-like throat, entirely free from any semblance of coarseness, is as necessary in a trotter as in a thoroughbred. The American trotter as a type is likely to carry his head in a different posture from the thoroughbred, the latter almost invariably standing with his head not much above the level of his back and extending with his muzzle pointing outwards; whereas the American trotter ever since his beginning has been taught to carry his head higher and with his chin nearer his shoulder. Whether this trick, which doubtless came from the old-fashioned custom, especially among saddle horse men, of forcing the head into this position has been the cause of what is now the natural poise, we do not know, but certain it is that a position so desirable from a picturesque standpoint in the trotter is condemned by breeders of the thoroughbred. Any one that has studied the paintings of Troye, one of the greatest delineators of animal life that ever lived, will be struck with this characteristic pose of his thoroughbreds. Lexington stood naturally in this position to an almost exaggerated degree; the same is true of Hanover, and Hamburg stands with his head almost on a level with his back and he seems from his position to be reaching after something. The typical trotter of the future will be conspicuous for muscular development in his thigh and gaskin, and while the characteristic sickle hock of to-day will give way to a straighter one, the hind leg of the trotter does not need to be nearly so straight as that of a thoroughbred, for the reason that no weight is carried on the back, and for the same reason the position of the feet is not so important as regards the trotter, except that a horse that stands with all his legs well under him is one that recovers in his stride more quickly than does one that stands stretched out like a hackney.

It will be noticed that as a rule the trappy gaited, smooth-going trotters, of which Neco was such an admirable example, invariably stand with their feet well under them, or as thoroughbred breeders express it "in a saucer." An oblique shoulder is absolutely essential in any horse that is intended for extreme speed, for the concussion incident to this speed would soon bring injury, or at least soreness, to a straight shoulder. Here again is a slight difference between the types of the thoroughbred and the trotter, for in the former the concussion is so much greater than in

the trotter than anything else than a very oblique shoulder is feared, especially in view of the fact that the weight of the rider is very nearly directly over a line drawn from the withers down. It is very essential that the canon-bone of all horses intended for speed should be extremely short, as the danger of a break-down is lessened in such, and in this respect the trotter of to-day must undergo a radical change before the type is reached, as in no breed of horses can a longer canon-bone be found than in the average trotter. Summed up the essential characteristics of the typical trotter will be quality with much substance, muscular development brought to a high degree in the hindquarters, great depth through the heart to allow for heart and lung play, oblique shoulder, short stout neck, flat, straight hocks, short canon-bone, sloping pasterns and an oblique foot. The striking feature of the trotter of a distinct type from that of to-day will be the absolute lack in the former of what is now called slab-sidedness and lightness of waist as well as lack of flabbiness which is so characteristic of the trotters of the present day.

Any distinct type of horse at his best is good looking. The Percheron has the beauty of power and strength, and there is a general air of symmetry about him as well as about the other types of draught horses. The hackney, as distinctive a type as any family of horse, has the beauty of carriage and the style which is natural with him. The thoroughbred, in many respects the most perfect type of horse known, made so after two hundred years of scientific breeding, combines the rarest quality with great substance, because the texture of his bone is of the finest quality, and his general appearance so thoroughly blood-like, he must be considered a perfect type of horse, although he lacks to a great degree of daintiness, the almost effeminate delicacy of the Kentucky-gaited saddle horse, which for more superficial beauty is the superior of any type known; yet, as the latter lacks the substance of the thoroughbred and only excels in point of quality, he cannot be considered a standard. The typical trotter of the future should be of rare beauty of form, as many of the best known families combine the blood of the thoroughbred and the saddle horse, and if a type can be produced combining the good qualities of each the American trotter will be the most perfect horse in existence.—*Kentucky Stock Farm.*

### New York Driving Club.

The annual meeting of the New York Driving Club was held on Monday, April 13th, and the following officers were elected for the coming year: Charles C. Lloyd, president; Edgar Bronk, vice-president; Peter McDonnell, treasurer, and Alfred Reeves, secretary. Following are the directors: Thomas J. Brady, S. F. Paul, Brayton Ives and James Butler.

Six silver trophies will be offered for amateur competition at the Empire City track this year, in addition to the usual ribbons. The cups will be given as follows: To the trotter covering the fastest mile; to the pacer making the fastest mile; to the trotter winning the greatest number of heats; to the pacer winning the greatest number of heats; to the trotter winning the championship and to the pacer winning the championship.

It was decided that the cups donated last year under conditions which required them to be won three times before becoming the property of any member, should be given without further competition to the gentlemen who won them. The drivers were F. C. Schmidt, C. K. G. Billings and H. C. Mapes. This year's cups will become the property of members when the season ends. There will be sixteen matinees during the season.—*Sports of the Times.*

### Can't Recover Money Lost on Races.

The poolrooms were beaten in the test case on the legality of race track betting decided in New York last week. The decision was made in the Tenth District Municipal Court, by Justice Thomas E. Murray. More than thirty suits have been brought by men who have bet on horses on the race track, to recover the money they have lost. Poolroom men are bringing these suits to test the constitutionality of the law which permits wagers on horse races being made at the track, and also of the law which prohibits the laying of wagers in poolrooms in cities. Justice Murray's decision ends the suit of R. P. Moulton, who alleged that on October 11th of last year he wagered \$50 with William J. Torpie at the Morris Park track on a race horse and that the horse lost. He sued to recover this money on the ground that betting at race tracks was common gambling, despite any special law which permitted it. The jury returned with a verdict for the defendant, Torpie, and against the plaintiff, the plaintiff to pay the costs of the action.

Sober up on Jackson's Napa Soda.

### Status of Amateur Drivers.

The drivers of the Denver Gentlemen's Driving and Riding Club have decided upon entering the events advertised for the Overland Park meeting, where a purse is hung up. At first many of the members were doubtful about making entries, fearing the act might class them with the professionals. To guard against any such disastrous conclusion the following letter was sent to H. K. Devereux, president of the Cleveland Driving Club, and also president of the National League of American Driving Clubs:

DENVER, COLO., April 3, 1903.

H. K. Devereux, President Cleveland Driving Club.

Dear Sir: A racing association in this State has hung up a purse of \$500 for members of any driving club in this State, for which they charge an entrance fee, the same as in regular events. They are going to charge admittance at the gates and are also going to sell pools on the race.

According to my understanding this would be a public race for a money consideration. Would it make the driver a professional to participate in this race, or would he still be an amateur?

J. A. BURNETT,  
President of the Denver Gentlemen's  
Driving and Riding Club.

To the above the following answer was received:  
CLEVELAND, Ohio, April 10, 1903.

J. A. Burnett.

Dear Sir: The race you refer to, wherein the association proposes to offer \$500 in the regular way for a race at their meeting, open to members of any driving club in the State of Colorado, would not make a man sacrifice his amateur standing by taking part, for the reason that it is given for amateurs, and the rules provide that an amateur must not drive in a public race except those specially arranged for amateurs. Truly yours,

H. K. DEVEREUX.

Two years ago, when Edwin Gaylord drove Coney to a wagon record at Cleveland, the record was disputed by C. K. G. Billings of Chicago and his friends on the ground that Mr. Gaylord was a professional driver. The contention was supported by quoting an entry in the year book, which was a mistake, that showed Mr. Gaylord had driven in a race at Denver, arranged for amateurs, where the prize was a purse of \$500. The record was changed, as the race had been for a trophy, but the protest showed what was thought about the racing at that time. The formation of the League of Amateur Driving Clubs appears to have changed the point of view materially.—*Chicago Horseman.*

### State Aid to Fair and Race Meetings.

C. H. Gelo writes as follows in the *Horse Review*:

It goes without saying that the withdrawal of State appropriations from the support of the district fairs in California that have been enabled, through this aid, to offer good purses for harness racing, is a hardship after these organizations have fallen into the habit of depending on this always acceptable subsidy. Judging by the numerous good fairs that provide sizable purses for their racing department held annually throughout the central west, notably in such States as Iowa, Minnesota, Kansas and Nebraska, without State aid, our California friends need not worry over the loss of such a comparatively trifling allowance. They should make renewed effort and pattern after their friends farther east, where conditions are so more favorable for making race meetings and fairs self-sustaining than in California. At any rate, they would hardly admit that their natural resources fall short in comparison with other States. After a few years of successful fairs and race meetings without the paltry "hand out" from the commonwealth treasury, they will forget that they ever enjoyed such a luxury, if it is such. It should be remembered that when no State money is drawn for the maintenance of fairs where harness racing is a pronounced feature, it removes to quite an extent political influence and often consequent adverse legislation; in other words, the acceptance and use of public money invites political interest, which is not desirable at best. It is "politics" in so many of the State Fair organizations that are subsidized by their respective States that brings about a partial political management, which has in many instances proven so odious to the patrons of the speed departments of these fairs. Many of them are also handicapped in many ways through legislative acts in the matter of administering to the practical needs of their speed departments, which is almost invariably made the target of politicians and lobbyists craving for popularity with their rural clientele.

CHICAGO, January 22, 1903.

Jas. B. Campbell & Co.,

Gentlemen: We have been using your Horse Foot Remedy on all of our horses' feet for the past eight years, and are pleased to say it has proved very effective in curing cases of corns, quarter cracks and kindred ailments, and we find by painting it on the feet daily, they are kept in good condition.

FLEISCHMANN & CO.,  
per A. Klein,  
Foreman of Stables and Routes.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Status of the Horse.

With the passing of the winter comes the word from every nook and corner of the country that great activity is noticeable in the horse industry. Never have these reports been so very encouraging as they are now. Take the market first. Week after week it is one long continued story of values well sustained at the highest level ever known in the trade in this country. Trotters and pacers are approaching the values of the good old boom times, when Arion sold for \$125,000, Axtell for \$105,000 and Williams refused \$150,000 for Allerton. Pacers have far exceeded the prices paid for them in those days. An offer of \$70,000, the wires tell us, was turned down for Dan Patch not long ago. The \$60,000 for which his present owner bought him is the record price for a horse of the side-wheeling gait. Thoroughbreds are quite as expensive luxuries as they ever were. It is thought that the average prices for yearlings from the successful studs this season will break all American records. The heavy harness horse never ranged so high in value. There were never so few of the really good kinds for sale nor so many men after them. There is not one well known dealer in such high priced commodities who has not unfilled orders on hand. Drafters are needed in about the proportion of two to one to the supply. Perhaps the ratio is larger.

Horse shows are scheduled to be held from one end of the country to the other from the present week until late in November—open-air shows, shows indoors and shows in which a little of both is enjoyed. Several cities are building great houses in which to hold such exhibitions, showing that it is intended to make their holding permanent. New features are constantly being added. The rich men who like to drive fine horses are doing all they can to encourage their production. Some of them have made standing offers of sums reaching well into the thousands for heavy harness horses which may be brought to them when of marketable age. Coaching men have arranged for more runs and better service than in any former year. Coaching clubs have been formed in cities where none ever before existed and more folk have announced their intention of availing themselves of the healthful privileges afforded. This ought to be the red letter year in the history of coaching in America.

From farm and training track come stories of numbers of horses in trainers' hands in excess of any previous season. Greater speed is also claimed. In the Merchants' and Manufacturers' Stake (2:24 class), which is annually trotted at Detroit, the eligibles this year include several horses which in 1902 beat 2:10 in their work but were either not raced or if they did face the flag were given no marks in order that they might be entered in the more valuable events of 1903. Many men of means have agents in the field looking for such prospects and all a breeder has to do to get a very long price for a harness race horse is to show him sound enough to win under ordinary racing luck. The racing associations have never before hung up so much money in purses. The horse which can go down the line this year and win a fair share of his starts will take home with him in the fall more net cash than he could have taken in any former year. The prospects for attendance are of the very brightest and most of the more important associations have made large improvements on their racing grounds. Nor are they alone in their efforts at betterment. The smaller societies and the fair managers are doing their best to make the coming season the greatest on record. The man who is fortunate enough to drive a winner will get more money out of him in the smallest circuits just as the fastest will earn larger returns in the first meetings in the land.

In breeding circles all is hustle and bustle. The owners of mares are preparing to mate them and the stallion men are determined that they shall have every chance to do so. Firms which sell breeding horses as a regular business report demand better than ever before. Thousands of good stallions have been sold to stand in the country and at prices certainly high enough to warrant the passing of good, well bred individuals in exchange. Not in the days to which, a few years ago, we looked back with such intense longing was the breeding business in more active condition than it is now. A measure of progress also is visible in the breeding world. Many men are handicapped by the want of first class mares, but that condition will right itself and in the meanwhile the buyers will take the surplus at paying profits.

The automobile is steadily increasing in numbers and utility, but so far as can be judged from the facts which can be reached, it has not yet succeeded in displacing a horse. The "motor devils" are so common on the streets and roads now that one hardly turns to look and yet more horses are being used and at higher prices than when the automobile first reached this country in practicable shape. Verily, the horse has come into his own.—*Breeders Gazette*.

## News from the North.

[Portland Rural Spirit.]

Entries to the Everett early closing stakes close on May 2d. They are: \$500 for 2:40 trotters and \$500 for 2:25 pacers.

Every horseman should have an entry in one or both of those big \$2000 stakes at the Oregon State Fair. Entries close May 15th, and you will be sorry if you are not in.

N. G. Smith, of Everett, Wash., passed through Portland last week with Mary L. 2:23½ by Maine Hero; Molly, a four year old mare by Maj. Seattle out of Mary L. 2:23½, and Victoria, a two year old by McKinney out of Mary L., on his way to Salem, where he will locate for the present and opened a training stable. Mary L. and the four year old mare will be bred to Zombro 2:11. They are owned by E. J. Lane, of Everett.

E. P. Clark writes as follows from Seattle: Thinking it might interest your readers, I write you that I have matched up two of our race horses, making the best team that was ever in our part of the country, and sold them for the highest price. The team is Maplemont 2:20 and Adimont 2:18, pacers. I sold them to Mr. James McCullough, of Machias, Wash., for \$1400. He will use them as his private driving team between his shingle mill and home. That makes five sales of road horses that I have made in the last year, ranging from \$500 to \$1000, which, I think, shows pretty good for this market.

The Walla Walla County Fair Association has purchased for \$10,000 the Mrs. Henderson property at the southwest edge of town, and will start extensive improvements shortly, and by autumn will have permanent grounds, stables and a full-mile race track ready for a complete county fair. The purchase consists of 70 acres. Fifteen thousand dollars has been collected with considerable more subscribed or available, and the proposition appears fully financed. The fair association is just incorporated with a capitalization of 15,000 shares at \$25 each. The purpose, apart from building up the county fair grounds, which Walla Walla has needed for so long, is to make the town the big wintering town for race horses of the Northwest. This summer accommodations for 100 horses will be built, and these large stables will be made to shelter 150 by another year, if the expected patronage materializes. "Horsemen have been anxious to winter here for many years," said Secretary R. B. Caswell, and "lack of stabling equipment being the only preventive."

## Things Booming at Empire Track.

There are about 200 horses now located at the Empire City track says Trotter and Pacer, and Secretary Reeves is receiving applications for stall room every day. Some of the prominent trainers gave it out that they would not train there this year unless there were some dirt roads made available in the vicinity to jog over. George Spear was one of those. He visited the track the other day and found that men had been working on stretches of dirt road right handy to the track and have put them in fine shape so that trainers can jog for several miles on soft and shady roads. A corps of men have been employed to do nothing but keep those roads in good shape. Mr. Spear went over them and said they were all right and that he would move the Smather's stable to the track as soon as the weather was a little more settled. He will put Lord Derby in shape there for his \$10,000 match race with Major Delmar.

"Honest" John Dickerson has engaged sixteen stalls and will go there in a few days. He will also have Gen. Brayton Ives' horses and several others from outside owners. A. M. Perren, the Buffalo road rider and amateur driver, has engaged eight stalls for his matinee and speedway horses; Theodore Maxfield and several others have spoken for stall room, so that when the horses get up from the South next month and the stables from California the Empire track will be very lively. Monroe Salisbury will have a large string and Secretary Reeves has engaged a professional and scientific farmer to put in a crop of barley for the use of the "Kingmaker," as well as for any other of the trainers who want to use it. P. H. Follette, who will look after the barley, is not only a skillful, practical farmer, but a well-posted botanist, so that the Californian can rest assured that he will not only have barley to feed, but the very best barley that skill can produce.

## Cross Country Racing.

John E. Madden, who talks of devoting some attention to the development and racing of steeplechasers, some time ago made the announcement that if he decided upon doing so, he would undertake what would be, as far as this country is concerned, something in the nature of a new departure. His idea is, that

steeplechasers should be selected for their adaptability to the game, in size, conformation, disposition and way of going, and that they should be educated to the business from the very beginning of their racing career. What he particularly objects to in the system is the conversion of racing "has-beens" into cross country candidates.

In this, as in other matters connected with the practical side of racing, Mr. Madden seems to have taken the common sense view. Dicky legged horses that have been found too far gone for racing on the flat, are patched up and sent through the field to furnish entertainment for race-goers at a game which always has proved popular from the spectator's viewpoint, while the plungers and bookmakers stand idly by and wait for the next race, or handle small sums "just for the fun of it" because of the proverbial uncertainty of everything connected with steeplechasing.

If Mr. Madden's plan were to be carried out by some of the well-to-do owners and successful trainers the sport soon would wear a different aspect. A sound, game and good tempered steeplechaser, thoroughly educated to the business, should be as good a horse to bet on as the sound, level headed flat racer, and over the standard courses, such as obtain on The Jockey Club tracks, the stanch, sound, cross country horse educated to the business from colthood soon would put the culls from the flat racing stables "out of business."

Thomas Hitchcock, Jr., who is one of the most ardent admirers of the cross country horse to be found in America, is one of the owners who appears to believe in the theory expounded by Mr. Madden, and he selects his hunters and steeplechasers with the belief that no race horse is too good to be sent through the field; but, of course, under the old rules, when courses were constructed with the view of popularizing them with the majority of the owners of steeplechase horses, real jumpers, educated to the business, were at a disadvantage.

With the reform already adopted by The Jockey Club tracks in the matter of steeplechase courses, the horses bred and educated for the game soon should be at a premium, and when that stage of progress shall have been reached, it is not too much to hope that America may produce the best cross country performers in the world.—*Daily American*.

## Horses at St. Louis Fair.

The extent of the consideration to be given to live stock at the World's Fair next year is evidenced in the plans the chief of that department has made for innovations in all the classifications. Provision will be made for displays not heretofore given attention at any previous exhibition.

As an instance may be given the plans for awards to "the horse of commerce." Geldings for all purposes will be provided for. The cavalry, artillery and ambulance horses are to be in one or more classes, which will show the needs of the different nations as to war animals. The coach and saddle horses, the omnibus animal and the expresser will be on display. The draft horse, the roadster and the general purpose horse will come in for awards. A class of especial interest will be the fire department horse, regarding which correspondence is now in progress with fire chiefs of the larger cities.

These classes will have a strong influence in giving a clearer understanding of the markets they represent and the opportunities offered in them. The standards as to commercial horses are not so clearly understood as they should be, and the purpose at St. Louis is to bring them out so that those interested may get the most benefit.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Horse Owners Should Use  
GOMBAULT'S

## Caustic Balsam

The Great French Veterinary Remedy.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### San Francisco Bench Show.

The seventh annual show of the San Francisco Kennel Club last week was a gate success—the first in years, so there's luck in odd numbers after all. The entry was the smallest in the history of the club, barely 300 dogs were benched. The reasons for a light entry were manifold, but not through any fault of the present club personnel. Suffice it to say the Bench Show Committee, Hon. W. C. Ralston, Chas. K. Harley, Will S. Kittle and J. L. Cunningham worked hard and faithfully and pulled off a good show which with a few exceptions ran smoothly from start to finish.

The printer played havoc with the catalogue and was late with both editions, this faux pas was decidedly felt during the first day's judging.

The judging of specials was the feature of the show and frequently during close contests evoked applause from the spectators.

In general, Mr. Ripper's decisions were satisfactory. In several instances the sentiment of a large majority of fanciers was contrary to his award.

Dr. C. M. Selfridge judged the Cocker classes. Several of his decisions, particularly in awarding specials, evoked a lively dissent. This sentiment threatened at one time to take the form of an acrimonious controversy in print.

Below we give a review of the different breeds shown. A list of awards and specials is postponed until next week, by reason of several inaccuracies found in the marked catalogue list copied, just as we go to press.

St. Bernards—This breed was not up in numbers to previous years. The dogs were of good quality, as a rule, and far ahead of what has been recently shown. Bitches, with one or two exceptions, were only of fair average. Major Bruce, first in puppies, has a good head and sound color, but is not right behind and has bad pasterns. Gothard, the first novice dog, is a nice even sound dog with good color and markings. Glenwood Booze, second, is an even sound St. Bernard and closely pressed the class winner. Tzar II, third, a big-bodied, plain-headed one. His most serious faults were in color—white predominating with brindle markings—and lack of character. Sacramento Pride, reserve, a Lester C. puppy, was rather ragged and out of condition. In limit, Grand Master II, shown in good condition, easily disposed of Tzar II. In open, Lester C. one, Le King second and Tzar third. Le King's very good head must have carried him up a peg, considering his condition. Winners put Lester C. in the champion class. The new champion was shown in grand condition, and is without doubt one of the soundest even big dogs we have ever seen. It has been claimed he will go 36 inches at the shoulders. We never took his measure, but will vouch that he goes very close to this phenomenal height. Grand Master II, reserve winners, fell right.

Puppy, novice and limit bitches were indifferent as a class. In open, Gypsy Lee II first, a good, active young one and a nice shower. Lady Melba, second, lacks St. Bernard character, is plain faced, long in muzzle, is nicely marked and well colored; shown in good condition. Schaezohen, third, only fair. That good bitch, Alta Rachel, winner of special, was far ahead of anything in bitches. Gypsy Lee II winners. Queen Bess, reserve and first novice, an ordinary one but put down in nice shape. In smooths, Duke Russell is a fine, sound young dog, possibly as good a smooth as we have here. Two bitches were but mediocre.

Great Danes were very good in quality and an even lot, better than we have noticed in previous shows. Puppies brought Woodlawn Thunderbolt out in front. He is an uncropped, big, upstanding youngster, has lots of bone and substance, good long head and good brindle color. Kempf, second, a blue dog of good type but small. Beauty, third, small and light boned. Both puppies carry good Dane heads. Rupert of Hentzau, first novice, limit and reserve winners, is a trifle long east and a bit low in withers. His temper handicapped him in the ring. Ruy Blas, second limit, is a sound, rare good one, handicapped in size. Alphonse, third, rather plain and slightly lacking in type, but quite a nice dog at that. Bluebeard properly took winners and first open. He is a big matured dog and holds well, is a grand shower, has a beautiful neck and shoulders and a good front. Rupert second Ruy Blas third could not have been different.

Cunningham's Carlotta, first winners, open and limit, is a handsome harlequin; she might be larger in head, however. Carmencita, second limit, is much better in head. Tempest, third limit, was placed right. Maud S., second open and reserve winner, is a matured, well favored bitch, good in body, substance and conformation and would not have been lavishly treated had she been out up a peg.

The judge knew a Greyhound and placed the small class in their order. Roker is not only a show dog, but different from what the bench generally gives us, is a performer and stake winner, one of the hottest footed dogs on the Coast. Fiery Fannie is the litter sister of Po. class Footsteps, twice a Waterloo Cup winner. Roman Athlete and May Hampstead were reserve winners to the two above mentioned. Leashmen cannot further contend that show dogs are not performers. This quartetted disposition of a fallacy in respect.

Pointers were fewer than for years past; with but one exception the Pointer kennels were unrepresented.

Rap Rattler, winners, first open and novice, is a rather heavy headed dog, but full of character and substance. Cuba Jr., reserve winner, second novice and first limit, could have shifted the honors without doing Rattler a great injustice. In bitches Oregon's Jessie II., a winner on the recent northern circuit, romped through four classes on top. She is black ticked and handsome, a showy mover, shows type and substance, good legs and feet and altogether a hard one to beat. Wee Cora, second novice and reserve winners, is a stylish looking daughter of Senator P. Jingo's Bagpipe, a good old bitch, the dam of field trial winners, was nosed out by good young dogs.

English Setters as a class were ahead of the Pointers. In numbers there was a falling off from the entries at previous shows. Hardy, first novice and reserve winners, is a good type, a handsome blue belton and shows quality and substance to a degree. Cato Jr., winners and first open, was the Setter surprise when Ch. Buckwa was placed third. The judge seemed to go more to the English type of Setters. Judge Hunter, second open, was not treated any too generously. In bitches the northern dog Albert's Rosalind turned up winner and first open. She is a rather large type with a long well shaped head and nicely put up body, she was however a bit fat and not in the best of coat. Maggie F., reserve winners and second open, was placed right. Novice bitches, outside of the winner, were rather on the weedy style.

Irish Setters were the poorest class shown in years. Hector, a northern dog, was the best in the lot, he is a good old dog, with a fine head and shoulders, well sprung ribs, good back, loin and color. The placing of the dogs fell properly. In bitches Queen Bess won properly in her company but was lucky to be in a poor lot.

Gordons were better represented than usual, but no better in quality, there was not a good one in the string.

Irish Water Spaniels again brought Ch. Dennis C. to the front, he stood out easily from the rest shown, tho' he was a bit out of coat. Riley second open and reserve winners was in proper position, a very good specimen and way ahead of the balance. As a class, with these exceptions, the breed was not up to former years. Such dogs as Dan Maloney and Belle Marsh were missed.

Cockers came out strong in entries and teeming with quality, far above the average; it might be said without exaggeration that the best on the Coast were against each other. Delverton Wonder, quite a nice headed one, but not all right in front, was easily first. Frisco's Boy, second, was placed right, although a bit long in muzzle and with ears up a trifle too high. Falty was a close third. Portland Dude, quite a nice sort with a good, straight coat, plenty of bone and substance, first novice, easily beat a rather ordinary dog, Nairo Comet, in novice. Black Silk Jr., first limit, is a good, even, sound dog, slightly on the large size. In open Hampton Promise, first, a sterling good one of the right type, with plenty of substance and bone, a proper Cocker head, easily disposed of Duke Obo, who is a fair sort. Hampton Promise, winners. Portland Dude, reserve, was closely pressed by Black Silk.

In puppy bitches Plumeria Victoria (Lady Iris) was easily first, scoring over the class in head, body, coat and front. She is a bitch that should do better later on. Floss Silk, second, is a fair ordinary sort. In novice Silkie Trotwood, a neat, fair type, out of coat and condition should have been third. Bessie J., second, is quite a clever bitch of the right type with a pleasing head. Plumeria Victoria should easily have gone to the head of the class. Limit bitches came right. Miss Frivolity, first, a good even one with a rather wavy coat went over Belle of Oakland fairly.

First open, Plumeria Portia, is about the best on the Coast to-day and was rather harshly treated when the race for the tri-colored ribbons came up, where she was easily first. Reserve winners should have gone to Plumeria Victoria instead of Silkie Trotwood winners and Miss Frivolity reserve.

In reds, Delverton Demi, first puppy and reserve winners, quite a nice style of puppy, might be better in stop and is washed out in color. Victory, second, also first novice, easily disposed of Red Jack third, who has a long, snipey head and took a place because there was but three dogs in the running. Plumeria Beau II, first in limit, was down in good condition and should have gone to reserve winners. In open and winners, Hampton Goldie could hardly have been beaten. Puppy bitches was an even procession, Little Maid we thought a bit small, Nairo, Plumeria Princess and Van W was the card. Exception could not be made to Coquette Bonnie, first and Golden Girl, second, in novice. Limit bitches showed more contrasting features. Floradora, first, and also winners, has the right type, an agreeable head, good coat and plenty of bone. California, second, is near right in size, short and compact; qualities that are wanted in a Cocker. She could do without so much wrinkle in her face and a weak muzzle. Pattern, third, crowded number two very closely and is a comely little one. Plumeria Sappho, v h c, could have been given second without creating a breaking tension.

Little Dorrit, first open and reserve winners, a stylish sound bitch teeming with type, having plenty of bone and substance and a good flat coat, is no doubt the best red bitch on the Coast to-day. Second open went to Plumeria Flo, who is a bit on the large size, with a long and somewhat weak muzzle. Plumeria Flo pressed the reserve winner up to the crowding line. Lillian Ray, third was a fair styled one, but in too warm going.

The Cocker bone of contention was brought out and polished during the special awards. Princess Flavia could have been awarded the special for best in the show over Hampton Promise. A better race would have been seen in a go between Flavia and Plumeria Portia, these two, however, did not come together.

Bull Terriers were in the opinion of the judge a splendid showing. In this breed there was more quality than ever before benched at a Coast show. This improvement is due to the importation of such dogs as Ch. Woodcote Wonder, Bayview Brigadier, American Belle and Newmarket Queen, as the winners proved to be almost without exception the progeny of this quartette of good ones. Champion Banjo has also been a factor of good influence for the breed.

In puppy dogs, Edgecote Duke, first, is quite a fair youngster, showing a deal of bone but has a rather thickish head. Edgecote Figaro, second, lacks character, is plain in face and cheeky with large round eyes but has a good body, legs and feet. Woodlawn Wonder first novice is a handsome, stylish, sound upstanding dog teeming with quality. He was given first limit (over 35 lbs.) and reserve winners and can readily be recognized as a Ch. Woodcote Wonder puppy by his close resemblance to his sire. Hawthorn Joy, another Woodcote Wonder puppy lost to the winners in head and front. Edgewood Duke, third novice, was a bit round in skull, heavy and quite loaded in shoulders. Edgecote Figaro, second puppy, was lost in the class. First and second open dogs (under 35 lbs.) turned up in Heathcote Wonder (Ch. Woodcote Wonder-Newmarket Queen) a clean looking and handsome lightweight, with plenty of length of head and a well filled up face, qualities somewhat rare in lightweights. Champion Banjo put down in great condition showed in his old style and won first open for under 35 lbs.

In heavyweight open and winners, Champion Woodcote Wonder took the blue and tri-color. This phenomenally preserved prize winner stands alone to-day and is in as good fettle and shows his mettle as well as ever. In a scrap with an Eastern dog which broke away from the handler and went up to "Ben" with a chip on its shoulder, the former was taken away badly chewed up after the show closed on the last night.

Puppy bitches, Rowena, first, was a nice type, with clean shoulders and pleasing front. Hawthorne Pleasure, second, is a beautiful headed puppy, but lacks substance and has an exceptionally bad front. Dixie Fletcher, third, a fair sort and does not show indication of possible improvement. Yours Truly, v h c, was badly handicapped by newly cropped ears.

The first novice bitch, Edgewood Jean II, was turned into the ring hog fat and in ordinary coat. She is heavily loaded in shoulders, has as pretty a pair of eyes as desired—with a sickle tail for the other extreme. She is thick and round headed and pig jawed, has a fair short back and sound legs and fairly good feet. All this did not seem to count with the judge for he afterwards gave her special for best in the show, a pick we cannot possibly endorse. Probably she was so generously treated as she may be the sort that go in shows, "across the water" to-day. Woodcote Princess, second, and Hawthorne Pleasure, third, were followed with reserve and letters for the balance of the class. Limit (under 30 pounds) were represented one, two by Woodcote Wonder bitches. Limit (over 30 pounds) Edgewood Jean II, first. American Belle, second, beats Jean in length of head, skull, fore face, shoulders, front, coat, finish and substance and should easily have been first. This bitch is right at both ends. Dot, a sweet bitch, should have been second and is an all round, cleaner built dog than the class winner. Limit (under 30 pounds) Hawthorne Pleasure first, Naughty Nan second, and Yours Truly third, will prove an entirely different rating at a future show. Open bitches (over 30 pounds) American Belle first, Dot second and Bloomsbury Queen third was the proper order. In winners bitches, a reversal was more in line instead of Jean first, American Belle second was the running.

In the Bull Terrier classes there was forty-three entries, 15 dogs, 28 bitches. Of these Champion Woodcote Wonder's progeny had nineteen wins—5 dogs, 14 bitches, nearly 50% of the entries. American Belle and Newmarket Queen each had five winners, almost 25%.

Collies were numerous and high class. Tyke, first puppies, novice, limit and winners, is a clean cut, handsome dog and Ormskirk Verona Bob (Cheviot Construction) second limit, first open and reserve winners were the quality of the dog classes aside from Champion Ormskirk Emerald Jr. in for specials only. Emerald however proved his mettle, he was taken in the judging ring by mistake and did business from the start. He took the special for best without a struggle. Robert Bruce, an overrated dog, found his proper place, reserve in limit. Brandane Dullie, first novice, limit, open and winners, and Ormskirk Duchess, second open, were the stars of the bitch classes. Presidio Lassie, first puppies, was treated, we think, too liberally in getting reserve winners.

Fox Terriers did not show up anything sensational and, on the whole, were rather a poorer lot than was to be expected. The exceptions were Wandee Blizzard, Sabine Fearless and Wandee Maye. With the stock that has been brought out here something more should have been done by our breeding fanciers. Puppies in smooths ran Wandee Blinker, first, a sweet puppy, clean headed, nice top and good legs and feet, an easy winner. Golden Truth, second, lost to him in head. Mac, third. In novice, quite a smart one, nice fronted with good shoulders was Forest Flash, first. Garston Prefect, second, who smothered Flash in head, ears, character and coat, was handicapped by a bad right foreleg, a recent injury. Bragg, third, is a clean built, stylish one with a good head and coat. In limit, open and winners, first went rightly to Wandee Blizzard (Lithian Blizzard). He was put down in good condition and is a real good dog; he is a bit low in the withers and with this exception should hold his own with the best company in the East. Wandee Jester was second in limit and reserve winners. Puppy

bitches were Golden Soubrette first, Wandee Zephyr second, Woodlawn Water Lily third. Weliked Zephyr as the better of the trio. Novice bitches were the weakest class in the ring. Becky first, Water Lily second. Wandee Mayse, first limit and reserve winners, is a smart, showy bitch, has a neat head, small, well set dark eyes, good coat, but is a bit tight in bone for her size and might be a trifle better in feet. Withal, she will catch with most judges on general appearance and style. Millstream, second, is in whelp. In open bitches and winners, Sabine Fearless was first. She is a neat, clean cut terrier, such as we like to see, and was up to her Eastern and English reputation. Norfolk Truemen, whom we neglected to mention above, was in for specials only and won the President's trophy. He was fit as a fiddle.

Wires as a class were ordinary and few. Cairnsmuir General, first limit, second open and reserve winners, was put down in excellent shape and should have been treated better. Humberstone Bristles, first open and winners, was put down patchy in coat and in poor condition. The judge was kindly to the old dog that he brought over several years ago. The bitch classes were only noticeable as an impulse to break the Third Commandment.

Irish Terriers were more and in better shape than ever. There seems to be a demand for them. The two letter puppy Rusty Nibs was lucky. In limit, open and winners, Irish, undoubtedly the best one on the Coast, was in front. He is a "Mick" from the ground up and will go a race in the best company. Galtee More, second open and reserve winners, was easily disposed of. In bitches Shan Van Vocht, first limit, second open, a sweet little bitch with lots of quality, tho' a bit short in head, when put down right will pass Royal Moreen, first open and winners. Lady Power was second limit.

Bulldogs showed a slight improvement. Woodlawn Rustic, a seven months puppy, is a typical son of Ch. Ivel Rustic, he took first puppies, novice and reserve winners and will readily beat General Pole Carew first limit and winners if they come together again. Ivel Damon was absent. Endcliffe Pleasure had a walk-over in winners and open. Bully second novice was a good looking matured brindle but could not beat the Ivel Rustic puppy. That good one, Ch Ivel Rustic was missed from the bench. George S. Thomas thought so well of him that he bought him and took "Billy" back East on Wednesday.

In Bostons, Ch. Col Monte took first open and winners. Roundsman second open and first limit was a bit off in condition but should have been placed reserve winners and been given the special over Billy first puppy and novice, as he had decidedly a shade the best of the argument. Lord Quex second novice and Nifty second limit and third open had their due. In bitches Ch. Selwonk Beauty outclassed the rest. Endcliffe Vernet was handily reserve winners and first limit.

Dachshundes had sixteen entries, Schwartz winners first open, limit and novice won rightly. Benny reserve winners, first puppy, second limit and open was turned over by a close margin. Pretzel took winners, first open and limit bitches on merit in light competition.

Two Mastiffs, fair, big dogs, such as they are here, showed the gradual lack of interest for a grand breed. In Foxhounds there was also a lack of entries. The honors rested with Crowder, Beech and Chinny Billy. Melody and Lou were a couple of good bitches and ranked in winners in the order named. Had the Country Club and the San Mateo Club shown their packs, some good hounds would have been seen. One Field Spaniel, Matt Grim, and a Clumber Spaniel, Beech Grove Dick, were suggestive of good ones. Two Bobtails, Dame Marjory and Luath, were placed one, two. These were the first of the breed shown on a local bench and seem to be a bit light in size, particularly Luath, according to the judge. Ch Diavolo, a very good French Bulldog, was alone on the bench. The catalogue does not give him an award, however, he was taken in the ring and should have had a blue ribbon.

Two Skyes, Bobby Scott and Bessie Scott, were the two best ever shown here. Pomeranians were four in number and ordinary. Yorkshires were represented by nice ones, Merry Module and Rosetto. One good Maltese Terrier, Margie, was on the bench. Toy Terriers, Japanese Spaniels, Italian Greyhounds and Chows had five entries, fewer in numbers and under the quality of earlier shows. In Miscellaneous the curly Retriever, Jim Budd, won handily over an Irish Wolfhound, one that will not do at all.

Of all the Oregon rivers, and there are many wonderful streams in that land of soft rains, the Santiam, the Rogue and the Mackenzie are perhaps most famous among open-air people, writes Caspar W. Hodgson in *Sunset Magazine* for April. They all have sources in Cascade peaks, they are bordered with noble forests and are never failing, clear and cold, and stocked with gamy fish. But for giant trout and for a certain dash of the waters in which they live, the Mackenzie is easily the leader.

Striped bass are being caught daily in the "straits" and about Tiburon by anglers out in trolling boats.

A few fish have been caught in Lake Merritt. A new boat house has been opened at that resort by a well known young sportsman and anglers can now enjoy a day's fishing on the lake without being compelled to buy a baat.

Free!! Free!! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms, etc. Enclose stamp for reply. No charge will be made for information furnished.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

Trout angling enthusiasts are more than pleased with the daily increasing prospects of fly-fishing. In fact on many favorite streams during the past week the fish have readily taken the fly.

With the continuation of the pleasant weather the streams will soon be in ideal condition, low and clear. Recent storms in the mountains of Santa Cruz, Monterey and San Bernardino counties played havoc for the time being with the streams.

Shooting in the Bohemian Highlands.

The sun is just up, and the dew on the grass sparkles like priceless gems. The hunters' rendezvous is on the high road, and at the boundary of some particular Revier which the chief forester has determined to be the scene of our sport on this occasion. One by one carriages roll up, and warlike-looking individuals clad in loose wraps get out, and divesting themselves of their covering display shooting costumes of Tyrolean Loden, warm and waterproof. Gun barrels gleam in the red sunlight, game bags full of lunch and cartridges, flasks full of good red wine, refreshing even when warmed by the sun; every gun slung by a strap over the shoulder. The dogs chase to and fro, eager for the sport to begin. Finally the last guest has arrived, and with a little speech announcing the game of the day to be partridge, the Chief Forester gives the signal to advance. A dozen hunters deploy to right and left, while between them step in the game beaters. The line now advances, the dogs working beautifully in front. The course lies over a rolling country, planted largely with potatoes and sugar beets, in the shade of which the partridge loves to "bathe" in the soft earth. Woe be to him not provided with leggings or high boots, for the vines will soon wet him above the knees as he plunges through them. The German Rebhuhn, or partridge, is as large as a pigeon, and has only three toes. It cannot perch upon a tree or fence, and consequently is always found upon the ground. The young birds have yellow legs, which become grey with age, and the cock has a red shield on his breast. As the line advances the dogs point from time to time, and with guns ready the shooters slowly advance, and as the covey "raises" each hunter chooses his bird directly in front of him. The game not bagged at once flies forward, and is flushed again later. About ten o'clock a halt is made, and a sandwich and a glass of beer are indulged in. It is still too wet to sit down—unless a convenient stone can be found. Away the party goes again. The sun grows powerful, and perspiration and gun-powder smoke transform them into a company of Moors.

The hunting party have gradually descended, and look down over the borders of Bohemia into Saxony, "Sachsen wo die schone Madchen wachsen," writes our correspondent. Behind us loom the Isergebirge and old Jeschen's cone, while ahead of us the restaurant on the summit of Giggelsberg beckons alluringly and hints of cool beer, served by pretty waitresses. We wonder if our path to-day will extend within reach of its hospitality. The fields of oats and rye are not yet reaped, and they fairly scorch us as we work our way around them. A few weeks later and we will have an open country. However, Bohemian grain fields are more garden spots in point of size, and do not interfere much with our march. About noon we come to a spot, selected beforehand, where in the shade we find a table set with bread and butter, cheese, gold game, and plenty of beer and wine. Cartridges are withdrawn, guns secured, and it is with a relish that only follows hard work that we eat our dinner; then we rest on the grass, smoke and swap lies, called by the polite Austrian "hunters' Latin," and discuss the more remarkable features of the day's sport.

The sun grows less powerful, the atmosphere becomes grey; over the tops of the mountains come rolling heavy clouds, which tumble down upon us; the air becomes chilly; it begins to drizzle, and finally pours. Old Rubezahl resents our trespassing upon his domain. Small wonder that the superstitious peasant believes implicitly in the God of the Mountain when the weather can make such sudden changes as this. Quite as suddenly, however, the mist rolls away, and old Sol comes out as hot as before, while we tramp along with soaked feet.

About sundown we arrive at some village inn, to which our carriages have been sent, and partake of the simple meal of roast pork and potatoes, with cucumber salad. After the meal, the Oberjaeger, who sits at the head of the table, takes out his little book and notes the number of birds killed by each hunter, and much fun arises from the fact that the total number of birds actually killed is usually less than the number reported shot by the respective Nimrods. This is sometimes due to two hunters claiming the same bird, but I am afraid that exaggeration sometimes is indulged in. The number of misses is next asked of each hunter, and he must pay two kreutzers into a fund for the education of foresters' children for each miss. The most successful shot is then proclaimed king by the Oberjaeger and glasses are filled and healths are drunk with the fortunate individual, who must try to make a more or less witty speech. After this the party is free to drive home as they please, though some of the older men may sit longer over a friendly game of Skat. The result of such a day's sport will be, in good season, 300 to 400 birds. A more interesting hunt takes place just before Christmas, when the ground is frozen and covered with snow. This is the Kreisjagt, or circle hunt. The game is hare. A hundred hunters more or less, with as many beaters, are on hand; and at the direction of the Oberjaeger, the Jaegers step out in opposite directions, followed at intervals by the hunters as designated by the Oberjaeger, and between every pair of guns is a beater. Each Jaeger leads his line to form a great semi-circle, finally meeting his colleague, and thus forms a circle a mile or more in diameter. As soon as the Jaegers announce with their horns that the circle is completed, the Oberjaeger blows a signal for the whole line to advance slowly to the centre. Every now and then a shot is heard, and a hare is seen to roll over or to run across the circle, only to meet the deadly row of guns on the opposite side. The circle grows smaller and the firing more rapid, while the number of perplexed hares scampering from one side to the other increases. The Oberjaeger now blows his horn to indicate that the circle must no longer be fired into. We still advance, but allow the hares to break through the line, turning and shooting them after their escape. The circle has now become quite small and seems alive with hares, so the third signal notifies the shooters to stand fast while the beaters advance alone. Now comes the exciting moment, when it seems to rain hares. Only one instant; but hares to the right and left break through the lines, running for their lives. The guns boom like an engagement of infantry, and when the smoke clears away the ground is strewn with the slain. Several hundred hares are the result of such a Kreis, and these are hung on frames fitted to the backs of some of the beaters, who are dispatched home with the booty. Enough hares escape always to prevent their extermination, and the game is sold to wholesale dealers.

Quail Shooting in Egypt.

[By Clipperton.]

The temple of Komombos, is one of the most imposing in Egypt. This is not due to its great size, but is owing rather to its commanding position. It stands on a broad curve of the river, where the Nile makes a sharp turn, and the broad, steep wall descending from the wide *parterre* in front of the ruins to the water brings the massive columns into majestic relief against the intense blue sky. We were lazily floating down the river one day, about four miles from Komombos. The surface of the water was glassy, excepting where an eddy sent the water swirling into silent circles, or one of the large Nile fish leapt into air in pursuit of its shiny little smelt-like prey. We were floating now sideways, now stern foremost, and the sleepy monotone of our boatmen chanting as they used the unwieldy oars, or the sing-song cries of the *shadoof fellahs* (peasants engaged in supplying water to the irrigating ditches) as they raised and lowered their goat skin buckets, were the only sounds. Moving with the current we were, and making about three miles per hour. It was very warm, but Selim, our dragoman, suggested that we go ashore in the felucca and walk down to the temple, through the lentil fields, and shoot some quail. The Messina quail is a curious little bird. Hatched in Europe in June, he grows up on the fat of the land, and in October, when the nights become chilly, he travels southward, getting strong of wing and plump of body from the grain fields of France, Italy and Greece. He then crosses the Levant, making as many stops as there are islands in the extreme eastern Mediterranean. He makes short stays at Crete, Cyprus and Asia Minor, and, tired out, he at last comes to the Delta of the mighty Nile and travels up its fertile valley. On and on he flies, past the first cataract into Nubia, past the second cataract into the Sudan, past the now unknown country of the Mahdi and the Khalifa, on and on to Abyssinia. There he spends the early winter months and returns by the same route in February to spend his summer

Europeans with his family cares. On the way down the valley in February he grows very fat upon the ripening grain. His favorite food, however, is the small or small bean. When at last he drops exhausted from the shores of Greece or Italy he is so "blasted" that he can be snared or often picked up by the thousand, and is served as *petite maitre* in every hotel and restaurant in Europe.

On landing we found no trouble in securing the services of a local *shikari* or guide. His name was Ahmed Nass, and he had six youthful beaters of whom he engaged at one-half piastre each (2 cents), and we started down the fields. I took my position in the centre of a line covering perhaps 50 or 60 yards. Selim, having a gun, guarded the right wing. Ahmed walked at my right. The signal to start is given and our little army moves forward. And now the air is filled with the shrill cries of the beaters. Each boy pitches his cry in a different key, and the resultant sounds from end to end of our line are quite comparable to the chorus made by a number of tree toads at home, rolling out their shrill calls before or after a thunderstorm in summer. Soon the little birds begin to buzz up. They rise singly or in pairs and occasionally three at a time. They have a rather swift, low flight, and rarely fly far, dropping into the wheat or lentils with a sudden tumble, resembling quite forcibly our sora or rail (*Porzana carolina*). In fact, this shooting strongly reminds one of rail shooting, if imagination but substitutes boats for men. These fields are completely submerged at "high Nile" or during the inundation. As the water recedes the mud dries and cracks, and as little or no cultivation is necessary before planting, the ground is left very rough and the walking is disagreeable. The guns are cracking now right and left. At every few steps one, two or three birds flip up, and we pass over many which rise behind us, but are allowed to escape on account of the danger, as quite an army of men and boys follow us as rear guard and in the hope of getting a little *buksheesh* (money).

We pass many groups of the *fellahs*, with their donkeys, camels and sheep. Their summer homes consist of a small inclosure made of corn stalks woven into walls, and set on end. The women and children spend their days squatted on the shady side of this wall, and at night all sleep inside. There is no roof, as there is never rain in Egypt. When the inundation begins again in June or July they betake themselves with their belongings to the mud villages, which are sufficiently elevated to escape the water. In times of exceptional flood the mud houses melt away like snow before the sun, and the inhabitants live in boats and upon improvised rafts tied to the trunks of the palm trees. At such times one sees camels, donkeys, sheep, goats, chickens, and dogs and people all crowded together. The sharp report of the gun goes on incessantly. A puff, a cloud of dusty feathers, and little Mamoud rushes forward to retrieve. A reload and on we sweep. If the quail are as plenty as this all the way down the valley what countless millions there must be! The chief engineer of the railway now building tells me that he hunts these little birds with his Fox Terriers as retrievers. They are also hunted with pointers, and afford excellent sport. Hassan, our boy from the dahabeah, is kept busy supplying me with cartridges, and as his load grows lighter his *qilaba* bulges as the dead birds are passed from one or another of the beaters to his care. As we approach the great ruin of Komombos it is impossible not to think for a moment of the strangeness, the incongruity of the scene. Here one stands, shooting quail with a hammerless breechloader in the shadow of one of the grandest works of the hands of men. If on the eve of the twentieth century of the Christian era old Tothmes II (1700 B. C.) could lift his mummified head from his sarcophagus and look about! What would he say? The little quail, however, has never changed. In all the temples, in all the tombs, one sees the little fellow depicted in all his colors with life-like fidelity. Our dahabeah, the Ammon-Ra, is found at the bank above the ruin. How good to get out of the broiling sun. We use up our last morsel of ice, brought on at Assuan, and we sit and count our forty-five plump little birds.

### AT THE TRAPS.

The California Wing Club live bird shoot is the program event for Ingleside to-morrow.

The program is issued for the initial blue rock tournament of the San Francisco Trap Shooting Association at Ingleside on May 23d, 24th and 25th.

In giving this tournament the management only desires to encourage trap shooting and to foster a sport that is deservedly popular, towards that end the San Francisco Trap Shooting Association are devoting the use of its grounds and services free of charge, and trust that their efforts in the direction offered will be received by the shooter in the spirit in which they are given.

All shooters will start at the 16 yard mark. Each day will be divided into two sections of five, 20 bird events each, or 100 birds, a total for the day of 200 birds. The scores made by contestants in each section of the tournament will constitute the basis upon which they will be handicapped in the next section they shoot in, as follows: Shooters making 90 per cent or over, will be placed at the 20-yard mark. Shooters making 85 to 89 per cent, inclusive, will be placed at the 18-yard mark. Shooters making 80 to 84 per cent, inclusive, will be placed at the 16 yard mark. Shooters making less than 80 per cent will be placed at the 14-yard mark. A shooter not completing a section of 100 birds will be arbitrarily handicapped for the next section he may enter.

The shoot is open to the world. Starting for birds only barred. Inter-State Association rules will prevail excepting as otherwise stated in the program. There will be five sets of traps arranged on the Sergeant system, unknown traps, unknown angles.

Weight of guns is unlimited, guns larger than 12 gauge are prohibited. The flight of targets will be about the same (50 yards) as prevailed at the Grand American Handicap. The purses in all events will be divided into four moneys, in the ratio of 4, 3, 2 and 1, according to the "Rose System." The official scores will be kept in plain view of the contestants and it will be the duty of each shooter to see that the proper results are accurately recorded.

Shooters will be required to make entry in events twice daily, at the commencement of each section of events. Shooting will begin at 8:30 A. M. each day. The grounds will be open for practice during the entire week preceding the tournament. At practice, targets will be trapped for 2 cents each.

The program consists of ten twenty bird events and one consolation event each day, entrance to each event being two dollars, which includes the price of targets, which will be deducted from pool divisions at the rate three cents per target.

No expense will be spared to make the tournament run smoothly. The most expert and competent help will be secured and the office force will be large and capable.

Any monies left over after this tournament is completed will be placed in a separate fund and used for tournament purposes, and will be controlled by the Advisory Board of this tournament.

The consolation race will be open each day for shooters, who have shot in all of each day's events and whose average has not been greater than 80%. Handicaps will be arbitrary. The added purses in the consolation events at 20 targets will be \$50, entrance \$2.00. A trophy will go to the shooter making the highest average. Fourteen hundred dollars, the largest sum ever given at a similar meeting in the United States, will be distributed through the different events.

On the day following the close of the blue rock tournament, the pigeon grounds will be open for live bird shooting.

Indications point to a large entry of shooters. The management propose to have every facility arranged for the comfort and convenience of shooters in attendance.

The program published is complete in detailed information and is a creditable guarantee of earnestness in endeavoring to make the meeting the greatest blue rock trap shoot ever held on the Pacific Coast.

The gentlemen having the affair in charge are the following: Directors—Edward Donohoe, president; Edward E. Drake, vice-president; Clarence A. Haight, treasurer; Alex. M. Shields, secretary; executive committee—Clarence A. Haight, Alex. M. Shields, Edward E. Drake; advisory board—Phil P. Bekeart, Alex. M. Shields, Clarence C. Naumann, Edward Donohoe, Edward E. Drake, Clarence A. Haight, Henry E. Skinner.

The man behind the gun is, of course, the important feature in the winning results; notwithstanding this, the shooter is not up to the race unless his gun and the ammunition he uses are up to date and the best procurable.

The winner of the recent Grand American Handicap, Mr. M. Diefenderfer shot with an American gun, using Du Pont powder loaded in U. M. C. "Arrow" shells.

Not any less important wins were those of the Preliminary and Consolation Handicaps. Mr. Max Hansler, a nineteen year old youth, winner of the Preliminary and runner-up in the big handicap, used an L. C. Smith gun and U. M. C. "Arrow" shells. Dr. A. Quick, an amateur pure and simple, winner of the Consolation Handicap, shot an L. C. Smith gun, using Du Pont powder loaded in Winchester Leader shells; he broke 95 out of 100 targets.

The U. M. C. Co. and the W. A. R. Co. made the evenings at Kansas City pleasant for many attending shooters. Mr. Irby Bennett was the host on behalf of the Winchester Company; Mr. A. C. Barrell acted for the U. M. C. Company.

At the Union Gun Club shoot on the 19th inst, the Phil B. Bekeart cup was won for the second time by C. C. Nauman. D. Daniels won first medal, T. L. Lewis won second monthly medal. The scores in various events were the following:

Club match, 25 targets, 16 yards rise, \$15 added, 6 equal moneys, six classes.—Daniels 22, U. M. C. 23, Lewis 12, Iverson 20, "Slade" 6, Fuller 6, "Slade" 21, Mitchell 16, Carroll 10, Gordon 16, Walpert 18, Justins 19, Haight 19, Shreve 6, Bruns 19, George Sylvester 19, W. Hansen 18, Burnell 22, Pisani 19, Muller 20, O. Sylvester 18, Hall 20, Davidson 16, Potter 18, Taylor 15, 22; Dr. Hansen 12, 14; Schniffen 18, 21; Nauman 25, 24; Bell 8, 11; Hoyt 21, Peguillon 14, Sullivan 16, Umphred 19, Sylvester 22, Umphred 14, Fisher 23, Cooley 22, Lebert 9, Nickels 11, Walsh 12, Wollam 17, Westphall 16, Pete Hansen 10, Masterson 7, Finocchio 11, Eggers 10, Harrison 22, Bell 11, Knick 19, Blanchard 20, Patrick 11, Larsen 18, Morrison 17.

Best scores. First class money Nauman; second Taylor, Harrison and Burnell; third Taylor, Pisani, G. Sylvester and Haight; fourth Westphall, Davidson and Gordon; fifth Barber, Lewis and Walsh; sixth Carroll, Eggers and P. Hansen.

Club handicap match (monthly medals), 25 to 30 targets, 16 yards rise, target handicap governed by scores shot in club race, first medal over 68%, second medal under 68%. G. Sylvester, 27 targets, broke 22; Fish 28, 23, Iverson 26, 26, Pisani 27, 23, Lewis 30, 17, Hansen 27-25, Gordon 28, 22, Muller 26, 19, Fisher 26, 14, Carroll 30, 23, Burnell 26-22, Burns 26-20, Mitchell 28-9, Hoyt 25, 20, Blanchard 25-15, Daniels 25-25, U. M. C. 25-22, Taylor 25-19, W. Hansen 27-18, Cooley 26-23, Knick 27-17, Walpert 27-23, Dr. Hansen 28-19, Fanning 25-22, Patrick 30-15, Shreve 30-17, Fuller 30-12, Nauman 25-21, Haight 25-23.

In the shoot off at 10 yards, Daniels scored straight, Hansen 8, Iverson 7, G. Sylvester 7. Lewis scored 7 and Knick 6 for second medal.

Open to all match, handicap, 10 targets, Sergeant system. Foster 18 yards, broke 8; Burns 18-15,

Harrison 16-14, Potter 16-16, Murdock 16-15, E. Klevesahl 16-13, Pisani 16-13, Donohoe 16-15, McConnell 16-17, W. Hansen 16-12, Burnell 16-10, Taylor 16-12, Masterson 16-11, Lewis 16-10, Justins 16-14, Jensen 16-10, E. Klevesahl 16-16, H. Klevesahl 16-13, Nauman 20-19, Haight 20-13, U. M. C. 20-14, Sylvester 20-18, Daniels 20-15, Iverson 20-13, Fisher 18-15, Fish 18-16, Knick 18-11, Walpert 18-16, Nauman won first money, G. Sylvester second and Dr. McConnell third money.

Phil B. Bekeart challenge cup race at 100 birds—Nauman 92, Daniels 86, Iverson 84, Lewis 47, George Sylvester 83, Fanning (birds only) 85.

Team race at 25 targets—Blues—Captain Nauman 24, Haight 20, George Sylvester 20, Walpert 20, E. Klevesahl 20, McConnell 10. Total 123.

Reds—Captain Iverson 22, Daniels 21, Burnell 17, Burns 17, Jansen 22, Justins 22. Total 121.

The scores for the Empire Gun Club shoot on the 19th inst are the following:

Club championship diamond buckle race—25 targets, 16 yards—Hauer 18, Seaver 22\*, Houpt 19, Zeiner 22\*, Beattie 17, Webb 22, Allen 16, Seaver 21, Bender 7\*, Gere 13, Cullen 18\*, Parent 18\*. \* Birds only.

Money match, 5 pairs and 15 singles, 25 targets—First class—Webb 22 yards, 13 singles, 7 doubles, 18 breaks; won first money. Second class—Hauer singles 20 yds, 10, doubles 18 yds 6; Houpt 16-9, 14-6, 15; Beattie 16-11, 14-9, 21. Beattie won second money. Third class—Allen the only contestant, won third money. Singles 18 yds, 11, doubles 16 yds, 10, 21. Fourth class—Dr. Parent, singles 16 yds, 10, doubles 14 yds, 7, 17; Dr. Gere 16-9, 14-3, 12; Pennington 16-5, 19-4, 9\*; Gupitl 16-6, 16-3\*, 9; Bender 16-3, 16-3, 6. \* Birds only. Dr. Gere won fourth money.

Sweeney record medal match—Hauer 7, Webb 12, Allen 4, Beattie 4, Seaver 4, Swales 3, Allen 0, Seaver 18, Hauer 2, Webb 6, Hauer 5, Hauer 1, Swales 1.

Special handicap prize gun race, 20 targets 10 singles 5 pairs, distances handicap. Allen singles 18 yds, 5 breaks, doubles 16 yds, 8 breaks, 13. Seaver 22-9, 20-5, 14. Cullen 16-8, 14-6, 14. Hauer 20-9, 18-9, 18. Webb 22-5, 22-5, 10. Beattie 18-7, 18-7, 14. I. B. Hauer is high gun so far this season in the race.

At the Millwood Gun Club shoot on Sunday, April 26th, W. Collins won the club badge for the month. W. Arnold was high gun for the Orr trophy and C. J. Ashlin made the high score in the Feudner trophy match. The results of the shoot follow:

Club badge match, 25 targets—W. Arnold 13, W. Mersfelder 19, W. Price 15, C. J. Ashlin 15, Charles Kewell 12, J. K. Orr 21, Slade 21, C. H. Zeiner 22, E. A. James 12, Robert Van Norden 16, A. Decourtieux 12, David Hairfield 12, E. Turpin 14, R. C. Haas 14, J. Newlands 14, G. W. Collins 18.

Orr trophy match, 25 targets—Turpin 17, James 16, Kewell 16, Arnold 23, Decourtieux 22, Hairfield 22, Haas 17, Van Norden 18, Ashlin 20, Collins 19, Newlands 17, Price 22, Mersfelder 22, Slade 19, Zeiner 16.

Feudner medal match, 25 targets—Zeiner 21, Turpin 17, Kewell 16, James 16, Arnold 23, Decourtieux 24, Haas 16, Collins 24, Van Norden 18, Hairfield 22, Ashlin 25, Price 24, Mersfelder 23, Slade 21, Orr 16.

Following the regular shoots a ten-bird team race was shot. The scores were:

No. 1—Captain Ashland. Price, Mersfelder, Collins, Van Norden and Haas. Total score, 43.

No. 2—Captain Arnold. James, Kewell, Hairfield, Decourtieux and Orr. Total, 44.

A good attendance visited the Washington Gun Club shoot at Sacramento and excellent scores were made considering the disagreeable day to shoot. C. De Merritt carried the honors of the day with a score of 23. Following are the scores:

Club shoot, 25 targets—E. Peek 18, J. J. Bohn 18, Rubstaller 19, Woods 19, Hal Stevens 16, J. R. Hughes 11, J. W. Hughes 21, Soule 13, Flohr 17, Mathews 16, Chapman 17, De Merritt 23, Carey 19, Becker 16, O'Connor —, M. Newbert 21, Vetter 21, Dorsey 10, Perkins 10, Smith 10, Morgen 16, J. R. Hughes 10, Weldon 16, J. W. Hughes 18, Carey 18, Catter 15, Burston 15, Smith 19, Vetter 16, Chapman 12, Stephens 21, Becker 18, Carey 14, Weldon 19, J. W. Hughes 20, Newbert 21, Vetter 20, Morgen 15, Burston 12, Stephens 21, E. Peek 19, J. W. Hughes 17, De Merritt 19, Skinner 16, Woods 13, Rubstaller 15, Flohr 16, Morgen 15, Becker 15, Peek 13.

The Oak Park Gun Club held a regular shoot last Sunday at Sacramento, although the day was somewhat breezy good scores were made, the total average for the club shoot being 19. Brady again held his own over all comers with a score of 22, and was high gun for the day.

The feature of the day was a team shoot between the Chickasaws, captain Brady, and the Choctaws, led by Davis.

The scores made were as follows:

Match at 10 targets—Kerr Jr. 7, Davis Sr. 8, Vetter 8, Vandeford Jr. 10, Kerr Jr. 7, Davis Sr. 9, Vetter 8, Vandeford Sr. 7, Brady 9, Marty 7, Stevens 9, Marty 8, Stevens 9, Brady 6, Woodworth 10, Amber 7, Davis Sr. 10, Guynot 3, Davis Sr. 7.

Match at 15 targets—Stevens 13, Amber 10, Stevens 11, Amber 12, Davis Sr. 13, Brady 12, Marty 10, Woodworth 13, Davis Sr. 14, Guynot 5.

25 targets—Guynot 13, Gusto 21.

Club shoot 25 targets—Kerr Jr. 19, Vetter 19, Davis Sr. 21, Brady 22, Marty 21, Vandaford 16, Snook 12, Amber 19, Stevens 21, Woodworth 21, Gusto 18.

### New Cameras. New Cutlery.

The H. E. Skinner Co., 801 Market St., San Francisco, are receiving the 1903 Cameras, Paper Plates, and everything pertaining to a first class Photographic shop. Their dark room is at the service of all customers, and beginners will be cheerfully taught, free of charge. How about taking a camera along on your outing trips? The Skinner Co. are doing a lively business with the "Stiletto Cutlery." These goods are made in Pocket Knives, Razors, and Scissors all fully warranted and are not excelled by any brand. \*

### Chickens and Eggs.

In the report of the State Agricultural Society for the year 1901, is a very interesting article by Henry Barrar, of San Jose, on Poultry Culture and its Advantages in California, from which the following extracts are made:

"There is no fear of this industry being overdone, as there is an unlimited home market for poultry products and there always will be an unlimited demand for these products in our island possessions and the Orient.

"The United States imported millions of eggs in addition to the estimated \$140,000,000 worth marketed last year. The demand increases faster than the supply, and this industry represents to-day, in annual output and stock on hand, the enormous sum of \$700,000,000, and is second on the list of industrial economics.

"The figures of the Department of Agriculture show approximately, last year, two hundred and eighty-five million (285,000,000) chickens in the United States, and ten billion and one million (10,001,000,000) eggs, or about 655,000 tons, exclusive of all eggs used or consumed before reaching market.

"The output of eggs last year was greater than the postal revenues, and large enough to have paid the entire expenses of the War Department.

"To encourage the investment of private capital this State should assist its poultrymen and the public in general in mastering every detail of this business. The lack of interest of the average citizen is only exceeded by the inertia of the State. Breeders and keepers of fowls are uninformed as to the fundamental facts and established principles, which are no longer subjects of experimentation. No State in the Union has greater natural resources, finer climatic conditions or a better market. Instead of importing poultry products we should have thousands of poultry farms throughout the State and be exporters. There is no other industry in California which offers a more independent and a more enjoyable way of earning a livelihood; no other department of farming will yield larger returns."

Mr. Barrar advises keeping poultry in orchards, and says:

"Our orchardists are gradually awakening to the importance of combined fruit and poultry culture. In addition to the valuable service rendered in ridding the orchard of insects, the fowls are a never failing source of revenue. Poultry distributed throughout an orchard on the colony plan thrive well and yield a large income in proportion to the expense."

The article closes with a quotation from the United States census report, showing that in California on June 1, 1900, there were 55,479 farms; the value of poultry being \$1,877,489; eggs produced, 24,443,540 dozen, of the value of \$5,854,679. He also quotes from the receipts of dressed and live poultry received over the lines of the Southern Pacific Company from points outside the State during the calendar year 1901, dressed poultry, 3,363,790 pounds; live poultry, 4,801,660 pounds, and from the Chamber of Commerce of San Francisco report for 1901, showing the receipts of eggs from interior California points to have been 8,564,940 dozen.

George Andrews, Secretary of the Fresno Poultry Association, writes in the same report about "Raising Poultry in the San Joaquin Valley," and begins by saying:

"Should I tell you that if I had all the chickens and eggs that are produced every year in the United States I could buy all the gold, silver and other minerals mined in the United States in a year, and pay the interest on all the farm mortgages besides, you would probably not believe it. If you were told that one year's product

of the hen would buy the entire wheat and cotton crops of this country, you would probably doubt that also. Again, if I told you that the product would equal the total value of the sheep, wool, hog and potato crops of the land, that would sound 'fishy,' too. Yet all these are facts. The total product of poultry, that is, eggs and fowls sold on the market, is estimated, after careful and thorough investigation, as being about \$290,000,000 per year."

### Crude Oil Versus Gophers.

In Sutter county the sprinkling of oil on the river levees has been found to be an excellent protection against the borings of gophers and ground squirrels, which threaten the security of the barrier raised against the encroachment of the flood waters, says the Stanislaus News. Crude oil is so distasteful to these pests that they shun the ground covered with it. The Sutter county experiment has also proved that an oil covering to the levees forms a splendid safeguard against the damaging effects of the lapping of the flood waters, as the latter slide harmlessly up and down the oiled surface of the bank. The discovery has been of incalculable value to all valley landowners whose property is protected from overflow by levees, as the friction of the water on their unprotected slopes is always a source of danger.

The Stockton Mail publishes a report from Bakersfield that gophers have destroyed four miles of asbestos in which the pipe line of the Standard Oil Company has been encased for the protection of the pipes against the effects of the elements and the preservation of an even temperature in the crude oil during its passage to tide water. These pests are said to have burrowed through the meshes of the wire netting wrapped around the asbestos for its protection. What they find in the mineral which attracts their fancy is unknown. But it is asserted that the pipe so covered has been thoroughly stripped by them, and the contractor has suffered considerable loss in consequence.

Curiously enough, the engineers in charge of the pipe line construction have overlooked the best and most effective remedy available against such depredations. At all events, the Sutter county levee experiment proves that the smearing of the asbestos with the crude oil which the pipe line is designated to carry will keep away the obnoxious rodents. Perhaps the application of crude oil will also serve as an effective preservation of the metal against the action of the weather. If so, its use will serve a double purpose and result in a great saving. It is certainly worth trying.

The old method of allowing stock to rustle for itself during the winter is fast giving way to methods more in conformity with the modern ideas of the cattle industry. Up to eight or ten years ago it was a very uncommon thing to provide feed for stock for the winter. Stockmen left their cattle entirely to the mercy of the elements, and when in later years stockmen began to realize the folly and imprudence of such a method and decided to provide for their stock for the winter their aim was confined merely to the effort of saving their stock from actual starvation, in other words they aimed merely to carry their stock through the winter. This indeed was a great step in the right direction, but some of the more progressive stockmen have decided to get a step further. They are no longer satisfied with merely carrying their stock through, but are determined to keep them growing all the time. In the language of C. B. Lucas, the question that presents itself to the stockman as the winter approaches is this: My cattle are now in fairly good shape, winter is coming on and grass is short, what shall I do, shall I allow them to go on and subsist on the grass as it is, though by doing so they will lose in flesh, shall I feed them merely to carry them through or shall I feed them with a view of keep-

ing them growing, though by doing so it will cost me \$4 or \$5 per head. Mr. Lucas has no hesitancy in answering the question by advising to feed them with a view of keeping them growing. This is a system he has adopted and finds it very profitable. The time has come when the stockman must keep his stock in a marketable condition and it will not be long before cattle will be sold entirely by weight on the ranches, but to make such a system profitable depends very much on the quality of the stock. There are other stockmen who have adopted the method of Mr. Lucas and this view is rapidly growing among the progressive stockmen in the State.

Every dairyman should know that suppressing milk secretion tends to weaken fecundity and thereby to shorten the reproductive period of cows. The better milkers are almost invariably the best breeders in the herd, while the shy breeders are rarely, if ever, found among heavy milkers. Cows that do not milk well seldom breed regularly until advanced age is reached and their calves are necessarily stunted unless provided for with a nurse cow. The most important reason for combining milking quality with beef, however, is rarely considered at all. Still, it is a prime factor in maintaining smoothness and quality. To suppress milk is to curtail fecundity or breeding quality and to do this tends to unsex the animal. As a direct result such females become coarse and masculine. The scant milker becomes a shy breeder and grows gandy and unattractive even in flesh. It is a rare exception to find a Shorthorn that will carry flesh smoothly and evenly to maturity unless descended from good milking ancestry.

Strike!—if they don't give you J. & S. Napa Soda when you ask for it

### WANTED---HEREFORDS.

ABOUT A CAR LOAD OF ONE-YEAR-OLD Hereford Heifers. Must be good stock. Address, giving price and particulars, HEREFORD, care of BREEDER AND SPORTSMAN.

### WANTED--TWO STALLIONS.

DESCENDANTS OF DIRECTOR, ELECTIONEER or Guy Wilkes. Must be standard and registered. Ages between 4 and 6 years--no older, and must stand between 14.3 and 15.2 hands in height. Must pass veterinary State price and location. Apply to WILLIAM G. LAYNG, 246 Third street, San Francisco.

### ALAMEDA RACE TRACK.

A FEW STALLS ARE FOR RENT AT THE Alameda Race Track. The track is in first-class shape for working trotters and pacers, and will be kept so. Apply to A. O. GOTT, Secretary, 1363 Park street, Alameda.

### NEW MODEL 1903

THE BEST IN THE WORLD.  
O'BRIEN & SONS

Cor. Golden Gate Ave. and Polk St.  
SAN FRANCISCO, CAL.

**SAFETY PREGATOR OUTFIT**  
A practical, durable, and easily used Impregnating Outfit, which will increase the income from your stallion. GUARANTEED to give satisfaction. A necessity in every breeding stable. Write for descriptive circular. Price of Pregator, \$5.00. Outfit, complete, \$7.50.  
E. O. CRITTENDEN, ELYRIA, OHIO

Every feature connected with the **PALACE HOTEL** was designed and introduced for a double purpose--surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

### California's Colossal Caravansary.

In the center of the hotel is the famous court and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and typewriter offices are directly off the court. Outside--the whole sale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance

## Golden Fern's Lad.

The Jersey breed, the Jersey bull, the Jersey cow, the Jersey and England, the Jersey and the United States by Mr. J. S. Peer, introduced to the American Jersey cattle an influence which will be felt for many years to come. The Jersey breed came off with the highest honors. At Buffalo two years ago, Jersey breeders were caught napping and the Guernseys, a sister breed of the Jersey, came off with rather the higher honors, owing to the greatness of the cow Mary Marshall, though the remainder of the Guernsey representation was not remarkable. This default has put the Jersey breeders on their mettle and they intend, apparently, to leave no stone unturned to supplement their Chicago laurels by a winning at St. Louis.

In the great history of Golden Lad, of whom he is a true descendant, Golden Fern's Lad occupies a similar position to that formerly occupied, for instance, by the stallion George Wakes or the stallion Electioneer in the family of Rysdyk's Hambletonian. It was Golden Fern's Lad who got the great young bull Flying Fox, which brought, in Mr. Cooper's Importation Sale last year, \$7500 at auction.

Preparations are being made to hold competitive dairy tests at the great St. Louis World's Fair next year. Great excitement developed from similar World's Fair tests in Chicago in 1893, when the Jersey breed came off with the highest honors. At Buffalo two years ago, Jersey breeders were caught napping and the Guernseys, a sister breed of the Jersey, came off with rather the higher honors, owing to the greatness of the cow Mary Marshall, though the remainder of the Guernsey representation was not remarkable. This default has put the Jersey breeders on their mettle and they intend, apparently, to leave no stone unturned to supplement their Chicago laurels by a winning at St. Louis.

These dairy tests naturally bring to the front the best cows of the different dairy breeds just as a great central trotting meeting or running meeting brings to its grounds the best horses in the country. Quite an important problem with those who loan their great dairy cows for exhibition purposes is the coupling of them at the proper season with bulls worthy of their merits. It is said that strong pressure has been brought to bear upon Mr. Thomas W. Lawson to permit Flying Fox to be taken to the St. Louis Fair as service bull to the Jersey contingent in the dairy contest. Mr. Lawson's liberality is such that in a public spirited way he would do almost anything to advance an interest in which he had embarked, but he could only let Flying Fox go at great personal loss for the reason that he has at home a very remarkable herd of cows that require his presence.

No bull, living or dead, has within the same period of time accomplished as great a prize winning and public dairy test record among his progeny as Golden Fern's Lad, the sire of not only Flying Fox, but of a whole list of celebrities in Jersey, England and America. The management at St. Louis would, I believe, find it greatly to assist their entry list in the Jersey department if they owned the bull Golden Fern's Lad, who is to be sold at auction on the 12th of May, and retain him at the World's Fair for those breeders who sent their cows there for competition. The American Jersey Cattle Club is a spirited organization and through its influence a syndicate might readily contribute the funds to secure this bull. If the Jerseys win at St. Louis as they did at Chicago the benefit to the breeders of the country would almost be immeasurable by the prestige which the breed would attain throughout the dairy work.

The uniform excellence of the cows got by Golden Fern's Lad P-2729-H. C. was the wonder of the Island of Jersey as soon as his earlier career as a sire had made the facts evident. Subsequently they became the admiration of all England, where the bull had gone and where most of his Island bred daughters followed him. The leading herds of England were vying with each other to secure for exhibition and breeding purposes the very finest cows on the Island at the time when Fern's daughters were coming into their inheritance. To obtain the best was to obtain his daughters, and it pertained followed that the Island was promptly stripped of them, and particularly of the

better ones. They found places of honor in the herds of Lord Rothschilds at Tring Park, Mr. J. Reid Walker at Rugeley, Mr. R. J. Pope, Plumpton; Capt. A. B. S. Frazer at West Tarring, etc. A few determined Island breeders put prohibitive prices upon good daughters of Golden Fern's Lad, and when American breeders, after a long lapse, resumed importing on a more considerable scale, these few remaining daughters of Golden Fern's Lad were the highest priced cows on the Island. In his importation of 1899, sold at auction in May, 1900, Mr. T. S. Cooper brought one of these, registered here as Golden Sultana 146282, that fetched the top price of his sale, \$1600. Two years later, in May, 1902, the bull Flying Fox

P-2729-H. C., by Golden Fern's Lad, topped the same importer's sale by bringing \$7500, which is the highest auction price for a Jersey that has yet occurred. But these conspicuous instances in this country very faintly reflect the great value of Golden's Fern's Lad as a sire measured by the achievements of his daughters in the dairy tests and his sons and daughters in the show rings and the breeding fields of the Island, England and, to some extent, America.

There are so many other great bulls, cows and heifers in this remarkable importation as to insure its becoming a historical event.

PETER C. KELLOGG.

Jackson's Napa Soda untangles the feet

PETER C. KELLOGG, Auctioneer,

is instructed by

Mr. FRANK S. PEER of Ithaca, N. Y.

to sell at Auction,

TUESDAY, MAY 12, 1903, at 10 o'clock at

HEXAMER'S HOBOKEN RIDING ACADEMY,  
219 Hudson St., Hoboken, N. J.

upwards of Eighty-Five

Imported Jersey Cattle of Island and English Breeding

Selected and imported by him for the American Market.

The English contingent was obtained from the very celebrated Chestall Herd of J. Reid Walker, Esq., Rugeley, Staffs, England, in choosing which Mr. Peer had the valuable advice and assistance of Mr. Frank Sugden, Agent of the Chestall Estate, one of the foremost judges and breeders of Jerseys in England.

Among several valuable bulls in the importation are the world-famous GOLDEN FERN'S LAD and the very exceptionally bred BROOKHILL FOX by Flying Fox out of Brookhill Rose 2d. Mr. John Thornton, of eminent authority pronounced these the best two bulls in England. Many Island breeders regard the former as the greatest Jersey sire that ever lived. There are eight daughters of Golden Fern's Lad, and numerous get of such highly approved sires as Napoleon Bonaparte, Eminent 2d, Forfarshire, Hamlet, Golden Lad 3d, Orlando, Flying Fox, Financial King, etc. Many of the females are bred to Golden Fern's Lad and Brookhill Fox.

The cattle now in the United States Quarantine Station at Athena, N. J., will be removed thence, with clean bill of health, directly to the place of sale on or before Monday, May 11th, on which date they may be inspected by the public. Hexamer's Riding Academy is but three minutes' walk in Hoboken from ferry and 30 minutes or less from New York City via ferries at Christopher and Barclay streets.

It is too late to send for catalogue, but telegraph your remittance and orders to

PETER C. KELLOGG, 107 John St., New York.

# MAMMOTH CHART

SHOWING

## Skeleton of the Horse

### GIVEN AWAY To OUR SUBSCRIBERS

This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse, as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

such a Chart has ever before been published. The artist, in preparing this Skeleton, visited the Anatomical Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for one dollar, but any reader can have it who will remit THREE DOLLARS.

Between the dates of May 1 and June 1,

for one year's subscription, it will be mailed, carefully packed, in a heavy pasteboard tube for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

## No Foot--No Horse

From the Shepherd's Notebook.

The feet of every member of the flock should be trimmed before sent to pasture. The best breed of sheep is the one that suits both taste and requirements. Liking induces interest; interest brings enthusiasm and enthusiasm pays in sheep-raising. The shepherd that treats his sheep like friends is the most successful in their care. A ram must be a typical specimen of the breed he represents in order to secure results expected. Pure air and sunlight have a favorable effect in the breeding of ewes. Their quarters should be kept dry. Feeding a lot of rich grain the first few days before weaning is a common mistake and causes a good deal of trouble, which often occurs both to the ewe and the lamb. If the ewe is weak at lambing time, oatmeal is one of the best and most strengthening foods. It is nourishing, increases the milk flow and prevents bowel trouble in the offspring.

Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

TROTTER TRACKS.—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

THE SECRETARY.—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

THE SANDPIPER.—How the Dutchman did not balance his bill for gravel while the little man in brown stood pat, and those who had the real sure thing—well, they lost, as usual.

A STRANGE LAND.—How a shipwrecked Buckeye made a stir in another racing world. Utopian, unique, and if you do not believe it, you can say it is untrue.

McDOEL.—How the best green horse in Missouri broke into turf history. He won the Transylvania. That is enough. If you were there you know why.

STRANGER.—A lightning-going pacer of Northern Ohio, whose history has a pinch of romance hooked on to it.

ANDY AND I.—What the well known pair learned in France and England after the hotel clerk checked the sign language. They could not parlez vous.

RIDE OF A LIFETIME.—How Flying Jib put a crimp in the boss trotter on the speed drive in Wade Park.

PAT SHANK.—Someone said he was a colt breaker, but he broke the wise when the thirteen combination and Eloise won at Detroit.

We will send this valuable book free as a premium to anyone sending two new subscriptions for THE BREEDER AND SPORTSMAN at \$3 each, or will send the book alone, postpaid, on receipt of price, \$2. Address

THE BEST WAGON IN THE WORLD

WEIGHT 48 to 65 Lbs.

Entirely Different and away ahead of any other wagon ever made. It is easier to pull and faster than a sulky. Thoroughly practical, handsome and durable.

THE BENJAMIN RACING WAGON

ITS GOOD POINTS.

entirely new. It is absolutely noiseless and positively prevents the axle from swinging. Our Axles are the strongest that can be made and are in a continuous piece. Wheels. We make our own wood and wire wheels complete. Our Ball Bearings are the best made and are water and dust proof. The Shafts are handsome and strong and can be instantly removed. They are steel plated top and bottom, free from bolts in any part of them, and so attached to the wagon they cannot rattle, as they have no springs, catches or traps to get out of order. The cross pieces are steel plated and trussed, making them very light and stiff. The Whiffletree is held by our own device and cannot rattle and when desired can be quickly removed. We manufacture truss poles and neck yokes. Our Truss Poles are very attractive and are free from braces to bend and rattle. Should any accident happen it can not snap off like an ordinary pole. The neck yoke presents a handsome appearance, is light and strong, and like the pole cannot snap off. The pole passes through the neck yoke, which holds it securely and carries it several inches higher than an ordinary kind. Tubing is not used on our wagons, as it is unreliable. Send for prices and catalogue.

The Body is made in one piece, rounded at the corners, having no joints to come apart or corners to open, thus making it the lightest, strongest and most beautiful in appearance. The Fifth Wheel is original and

## "SAVE-THE-HORSE" TRADE MARK SPAVIN CURE

**POSITIVELY AND PERMANENTLY CURES**

**BONE AND BOG SPAVIN. THOROUGHSPIN. RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.**

FROM A REPUTABLE AND NOTED TRAINER.  
Glenville Driving Park, Cleveland, Ohio.  
For the enclosed \$5 please send me one more bottle of "Save-the-Horse" It is doing great work.  
Respectfully,  
MILLARD F. SANDERS.

Hartland, Mich.  
Find enclosed money order for \$5, for which send me another bottle of "Save-the-Horse" spavin cure, as it has done all you claim for it for me. With the bottle I bought of you I took off a curb, spavin and a side bone on a three-year-old mare that other spavin cures refused to help in the least. I consider your spavin cure the best on the market.  
E M PARSHALL.

Howick, Quebec.  
I had a mare suffering from a bone spavin and very lame. I concluded to try a bottle of "Save-the-Horse," and at the expiration of six weeks' treatment she was free from all lameness and I consider it one of the greatest compounds made.  
DAVID BARRINGTON

Edgewater, N. J.  
Enclosed check for \$5, for which you will kindly send me another bottle of "Save-the-Horse" by Wells Fargo Express soon as possible. The horse that I have been treating with "Save-the-Horse" went sound and I sold him, and the last I heard of this horse he was still going sound and was working

every day, and I think he will stay sound. The bottle I am ordering now I will use on another horse that has a pair of spavins and a curb; he does not so very lame but walks on his toes, but I think "Save-the-Horse" will bring him around so that he will walk all right. Very truly,  
OTTO MEYER.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous failures in treating, the concentrated, penetrating, absorbing power of this remedy is unfailing.

**\$5 PER BOTTLE.**

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Copy of Guarantee sent upon application. \$5. at all druggists and dealers, or sent express prepaid.

**TROY CHEMICAL CO., Troy, N. Y.** D. E. NEWELL, Pacific Coast Agent  
519 Mission St., San Francisco.

## The New Simplex Cream Separator.

MR. MUNROE, CARE OF WEATHERLY CREAMERY CO., PORTLAND, OR.

Dear Sir: The No. 2 700-lb. Simplex Hand Separator I bought from you is a dandy. It will separate 850 lbs. of milk per hour by opening the milk faucet wide open. I made several tests of the skim milk, running the machine over capacity and skimming 850 lbs. per hour at 80 degrees. Skim milk tested .01. 700 lbs. at 56 degrees .02.  
My boy ten years old ran the Separator to skim 291 lbs of milk. I made four pounds more of butter off of 1200 pounds of milk than I did with the old machine. Any one in doubt of the Simplex Separator's work, refer them to me. It is far easier to clean than the — Separator.

Yours respectfully,

WM. H. MILLER,  
Fish Hawk, Columbia Co., Or.

# ARNER 3:1300

Sire CHAS. DERBY 2:20 (sire of Don Derby 2:06, Much Better 2:07¼, Derby Princess 2:08½, Diablo 2:09¼, 11 in 2:15 list, 33 in 2:30 list.  
Dam BERTHA by Alcantara 739.

Season of 1903, to close June 1st,

AT SAN LORENZO, CAL.

Fee \$25 FOR THE SEASON. Usual return privileges. Good pasturage \$3 per month, and best of care taken of mares. For further particulars address

C. BRANIN, San Lorenzo, Cal.

# Iran Alto 2:12¼

By PALO ALTO 2:08½ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12¼. Pasante (4) 2:13, Palita 2:16, Rio Alto 2:16½, Palatine 2:18, and 11 others in 2:30 list.  
Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31¼, and of 3 in 2:30 list, and the dams of 8 in 2:30 list  
Second Dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12¼ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

JAMES W. REA, San Jose, Cal.

# Guy McKinney

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

FEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:20 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

## BAYSWATER WILKES 2:25¼

Son of Sable Wilkes 2:18 and Fanny Bayswater Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10¼

WILL MAKE THE SEASON OF 1903 AT

WINTERS, YOLO CO., CAL. FEE \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gamesness. The only two year and three year olds of his get to start last year were race winners. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of last year's winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12. Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. Excellent pasturage for mares \$3.50 per month. For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Futurity Winning Family.

## SEYMOUR WILKES

REG. No. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Evistou (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Old Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30.

\$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

BLOOD THAT PRODUCES CHAMPIONS

## STICKLE

Sire, SILVER BOW 2:16 (sire of 8 in 2:30) by Robert McGregor 2:17¼ (sire of Cresceus 2:02¼).

Dam G ACE, dam of Daedalion 2:11 Croole 2:15 (sire of Javelin 2:08¼) and Eagle 2:19¼, and grandam of Sir Albert S. 2:03¼, by Buccaneer.

Will make the Season of 1903 at

Race Track, ANGELS, Calaveras Co.

Terms, \$25 the Season,

WITH USUAL RETURN PRIVILEGES. For further particulars address

GEORGE E. STICKLE, Angels, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

## NUTWOOD WILKES.

Has produced 21 yearlings that have produced two three-year-olds in one season with records of 2:12 and 2:14, respectively. Who is it, ex-champion three-year-old of the world, who has recorded 2:09 1/4. John A. McKerron 2:05 1/4 (2:12 1/4) as a three-year-old is the fastest trotter of all the famous trio—George Wilkes.

NUTWOOD WILKES will make the Season of 1903 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

IS THE SIRE OF

For the Season  
With return privileges

For further particulars apply or address

MARTIN CARTER. Nutwood Stock Farm, Irvington, Alameda Co., Cal.

## BONNIE DIRECT 2:05 1-4

Winner of fastest 5-heat race paced in 1900. Winner of Chamber of Commerce Stake at Detroit; Blue Hill Stake at Readville, and three other great races. Biggest money winner of "New" Pacers of 1900, having \$7575 to his credit the first year out.

Sired by Direct 2:05 1/4, sire of Directly 2:03 1/4, Hal Direct 2:04 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, etc.

Dam BON BON 2:26 (dam of Bonsilene 2:14 1/4), by Simmons 2:28, sire of Helen Simmons 2:11 1/4, New York Central 2:13, etc. Also sire of dams of Ferenzo 2:07 1/4, Tomboy 2:10 1/4, Owyhee 2:11, etc.

Second Dam BONNIE WILKES 2:29 (dam of 3 in list) by George Wilkes 2:22.  
Third Dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

BONNIE DIRECT is a black stallion, 15 1/4 hands high, weighs 1200 lbs. Is a good individual, has best of feet and legs, and is absolutely sound in every way.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates.

C. L. GRIFFITH,  
Pleasanton, Cal.

Sire of ALONE (4) 2:09 1-4.

## Limonero=3=2:15 3=4. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/4 got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/4 will make the season of 1903 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,  
Owner.

J. H. WILLIAMS,  
University Station, Los Angeles, Cal.

Lula (by Norman 25) Record 2:15 Winner of 66 heats in 2:30

## Grease Heel, Scratches.

MUD FEVER, HOOF ROT, SPEED CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—it will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores. Etc.—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

SORES and SADDLE GALLS there is none  
superior.

The horse CAN BE WORKED AS USUAL.  
For BARBED WIRE CUTS, CALKS, SCRATCHES,  
BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery  
as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING.  
In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1901 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
it is THE GALL CURE OF THE 20TH CENTURY.  
It is a quick and sure cure for those troublesome  
skin cracks under the fetlock which injure and often  
lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

**THE HARNESS STALLION STAKE**, inaugurated by the California State Agricultural Society last year, to be trotted by then three year olds in 1905, the get of stallions nominated last year, will close for entry of the foals on June 1st. As will be seen by the advertisement in this issue, 38 stallions were nominated in this stake, the fee being the amount at which the stallion stood for public service in 1901, and if a private stallion the nomination fee was \$20. The amount thus paid into the stake was \$1140, to which the State Agricultural Society adds \$1000, making the value of the stake \$2140 before a single colt has been entered. The entrance fee for foals of 1902, now yearlings that are the get of any of these stallions is \$50, of which only \$5 must accompany the entry. If there is a liberal entry the stake should be worth \$10,000 and will be the largest stake ever trotted for by three year olds on the Pacific Coast. There will be both trotting and pacing divisions of this stake, and the manner of dividing the money between them is an ingenious one.

The stake was inaugurated and intended as a trotting stake and therefore the money paid on the stallions nominated, together with the money added by the Society, will go to the trotting colts, together with all money paid in by the owners of the colts that trot. Recognizing that there is always quite a proportion of pacers, however, the entrance money paid in on the colts that take to the lateral gait will be set aside as a stake for them to contest for as three year olds. Owners will have until May 1st, the year of the race to declare whether their colts are pacers or trotters. Hopples are barred in both classes. It is one of the best stakes ever devised and should have a very large entry list.

**THE STANFORD STAKE** for foals of 1902, to be trotted in 1905, is advertised in this issue. This is one of the California classics and has been a very successful stake in years past. It has been increasing in value right along and was worth \$760 to the winner last year and will go over \$1000 this year in all probability. Every breeder should see that his stallion is represented by one or more entries in this stake. The advantage of having the get of one's stallion win stake races was made very clear last year when Ariston won both the Occident and Stanford Stakes and immediately the Walnut Grove Stock Farm booked some of the best mares in California to the colt's sire, Nushagak, many of them the property of owners who had previously never heard of this grandly bred young horse. The date of closing of the Stanford Stake is June 1st.

**THE BLUE RIBBON SALE**, which opens at the big pavilion of the Fasig-Tipton Company at Cleveland, Ohio, on Monday next, is remarkable for the number of high class California horses catalogued to be sold. The horses from this State are the great features of this sale, which is one where speed is shown under the watch before the horses are led before the auction box. For two days prior to the sale public workouts are held over the Glenville track and buyers are shown what the horses can do and the condition they are in. The Santa Rosa Stock Farm has sent Anzella 2:06½, Lou Dillon, trial 2:08½ half in 1:01½, Sir Albert S. 2:03½, Dolly Dillon 2:07, Marengo King 2:29½ by McKinney out of By By by Nutwood, Bousilene 2:14½, and several others without records. The Griffith Estate has five green horses in the sale, Geo. A. Davis of Pleasanton sends Rey Direct 2:10 and three of his get, Col. J. C. Kirkpatrick sent Thornway, trial 2:10½, and two others, the Meek Estate sends Hullo 2:16½, Lady Fair 2:17½, Enoch 2:12½ and four or five more, and different owners have consigned Gazote, a green two year old by Nazote; Zambra 2:16½, champion five mile trotter with world's record of 12:24; Owyho, a three year old phenomenon by Owyhee 2:11, out of the dam of Diabla 2:09½; Searchwarrant, a fast two year old by Searchlight; Mildred S., a two year old trotter by Klatawah 2:05½; Carrie M., a very fast green mare by Diabla; Diablita 2:15½ and several others. There are about five hundred horses catalogued to be sold at the Blue Ribbon sale and all California breeders are greatly interested in the outcome of this, one of the greatest of the annual horse auctions.

**THE OREGON STATE FAIR**, which is to be held from September 14th to 19th this year, advertises four stakes for trotters and pacers to close next Friday, May 15th. The Greater Salem Stake is \$2000 and for pacers of the 2:17 class. This the largest stake offered on the Pacific Coast for the side-wheeled brigade. The Lewis and Clark Stake is \$2000 for trotters of the 2:20 class. The Webfoot Stake is \$500 for three year old trotters and the Inland Empire is a stake of \$500 for three year old pacers. The entrance fee to all these stakes is five per cent, of which two per cent is payable May 15th, when entries close, and three per cent September 1st. Right to transfer or substitute is open to August 1st, but such substituted horses must be eligible May 15th. A large number of additional purses will be announced later on. The fair is held at Salem, Oregon, where is one of the best mile tracks in the northwest. Quite a number of California horsemen are contemplating making entries on the North Pacific Circuit this year and all who go should make entries at Salem. M. D. Wisdom, of Portland, is secretary.

**THE VICTORY** of Ribbonwood, the New Zealand pacer that defeated the Australian trotter Fritz last month at Christchurch, New Zealand, is another feather in the cap of the family of Williamson's Belmont. Wildwood, his sire, was bred at Palo Alto Stock Farm and is by Good Gift (son of Electioneer) out of Amlet by Fallis 2:23, another son of Electioneer. Amlet's dam was by Langford and her second dam Lady Bell, a great broodmare by Williamson's Belmont. The next dam, Puss by Lance, was the granddam of Mr. R. E. deB. Lopez's stallion, James Madison 2:17½.

**MR. J. H. STEINER**, Secretary of the American Trotting Association, died at his home near Cataract, Indiana, on Tuesday April 28th. Mr. Steiner was Secretary of the association from the time of its organization in 1887 until his death. During the past year he has been in feeble health and his death was not unexpected. Mr. Steiner was an able official and a man who had the confidence of all who knew him. His death will be sincerely regretted.

Another chapter in the long pending litigation involving the ownership of Sun Pointer, son of the famous Star Pointer, is now developing in the Superior Court at Augusta, Me. Already \$15,000 has been spent in litigation over the question of ownership. Sun Pointer is seven years old, and, although continuously in training since eleven months old, has never started in a race, all because of the litigation, which has occasioned no end of trouble between sheriffs, claimants and constables. The horse is in possession of Leslie W. Folsom, his trainer, but John E. O. Johnson of Boston, claims him, by virtue of sale from Harry W. Barrett, of Boston.

Zella Directum by Directum 2:05½, dam Crescent 2:24½ by Robert McGregor 2:17½, is proving to be a remarkable trotter. This filly is two years old and if started in the two year old division of the Futurities, will be able to uphold the reputation of Directum. She is large, well formed, good headed and possesses the bull dog grit of her sire. She is owned by the International Stock Food Co., Minneapolis, Minn. They feel that they have a sensational trotter in this filly and she is certainly bred in the lines for extreme speed.

## The Direct Family.

Reports from Memphis include among items of interest the trials of the various youngsters by Direct Hal, which indicate that he is not only a wonderful racing machine, but a successful sire as well. Notwithstanding the fact that Direct Hal has been sent back to the farm, he is still to be considered in discussing the cracks of this year's racing season, and while it will doubtless be some time after the beginning of the Grand Circuit before he puts in an appearance, he is almost sure to play an important part in the racing program, if he is not the star itself. Direct Hal and Dan Patch are excellent examples of the trotting bred pacer, although, of course, the former through his dam owes allegiance to the great Hal pacing family, and doubtless my friend Trotwood would take up the cudgel in defense of this wonderful strain and refute the idea that the hero of last season's pacing brigade is more of a Direct than a Hal. Direct Hal is typical of his sire's family in conformation and general appearance, despite the fact that his markings are those of his dam. He has that punched up appearance so characteristic of his sire, and while he is not as much so as Directly, Prince Direct or Direct himself, I think he could easily be recognized as a member of this great family; he certainly is very like his sire in his gait, albeit he has somewhat more stride and does not chip it off as did Direct. Close family resemblances are one of the most striking characteristics of this family, and these resemblances have always been considered by horsemen as an indication of potency and strong individuality. Such resemblances or characteristics are not usual in the trotting horse and is especially conspicuous by its absence in the Wilkes family that breeds in all colors, shapes, sizes and gaits. Direct Hal, while he could be easily picked out as a son of his sire when alone, did not noticeably resemble the family when he appeared last autumn in harness with Prince Direct, for the latter is his sire over again, except in an exaggerated form. It is really remarkable that a horse built on such lines could be possessed of such wonderful speed and such absolute gameness. I doubt very much if a gamer horse ever lived than Direct himself. He had as much speed as any horse that ever lived, and yet he absolutely defied all laws regarding structural analysis in horses intended for speed, except that he had great depth through the heart and great length from hip to hock. Direct Hal is the best of the family as far as conformation is concerned, having more length and lacking almost entirely that peculiar appearance about the head and neck that has given the family such a cobby look. Yet in spite of this the family is one of much quality and finish, and one of exceptional gameness.—*Hawley in Kentucky Stock Farm.*

## Death of Charles R. Hoppin.

The following dispatch came over the wires on Tuesday last:

WOODLAND, May 4.—Charles R. Hoppin, a pioneer of California and a resident of Yolo county for more than half a century, died at his home near Cacheville at 11 o'clock this morning. He had been in failing health for some time but arose this morning, apparently better than usual. He ate a hearty breakfast about 8:30 o'clock. Shortly afterward he complained of feeling very ill. He was put to bed, but soon lapsed into unconsciousness. He died of an apoplectic stroke.

Mr. Hoppin was a native of Madison County, New York, where he was born on March 29, 1829. In 1849 he crossed the plains with ox teams, reaching Lassen ranch on October 20 of that year. He mined in that vicinity for nearly a year, after which he located in Yolo county. He and his brother jointly purchased 8000 acres of land near Cacheville.

Hoppin crossed the plains three times. In 1874 he returned to Niles, Mich., where on the 10th of November he was married to Miss Emily A. Bacon, who survives him. They returned soon afterward to California and lived continuously at the Hoppin home north of Cache Creek and west of Cacheville. To them were born six children, Fred, Harriet, Edward, Edith, Charles E. Jr. and Dorothy. Edward, the second son, died two years ago last January. The others are still living and, with their mother, were at the bedside of their father when he breathed his last.

Nearly all of Hoppin's life was devoted to agricultural pursuits, which he conducted intelligently and judiciously. He gave his closest attention, deepest study, excellent judgment and untiring energy to the management of his business affairs. He was a lover and breeder of fine horses and some of the fastest animals in the history of the State were the product of his stock farm. He was for many years president of the Fortieth Agricultural District Association.

Mr. Hoppin was one of the prominent horse breeders of Yolo county, having bred Yolo Maid 2:12, one of the phenomenally fast pacers of 1891 when she was campaigned in the east on the Grand Circuit. For several years, until failing health compelled him to resign the position, he was President of the Yolo County Agricultural Association and as such had the respect and confidence of every person that had dealings with that organization. His death is a loss to the community at large.

## JOTTINGS.

THE STREET FAIR FEVER has about run its course in California. Like many other novelties sprung upon the public at an opportune time, it has enjoyed great popularity for two or three seasons, but the people are fast finding out that it was never anything more than a catch penny device, promoted and managed by a crowd of tin horn gamblers and fakirs who were smart enough to secure the co-operation and endorsement of some respectable fraternal organization in carrying out the scheme. The recent "carnival" at Alameda has ended in a flat failure and the local lodge of a respectable order is left to foot a lot of bills. The street fair as conducted in California has never fostered any legitimate industry or encouraged the improvement of any farm or mechanical product. It has invariably been a scheme designed to fleece the human moths who are attracted by a glare of light and color, and has, in nearly every instance, left a rather bad taste in the mouths of the respectable portion of the community. At Alameda the most audacious of "tin horn" gamblers were permitted to ply their filthy trades until the public press called attention to them and demanded their suppression, and there is not a municipal corporation in California where a street fair has been held, but has experienced the same thing to its own disgrace and embarrassment. One of the peculiar features of the street fair has been the ability of its promoters to secure the active aid and endorsement for all its features by a class of citizens who frown upon a race meeting because money is wagered upon results of the contests. Many of those who talk the loudest against horse racing because wagers are made upon it, will tolerate without one word of protest every skin gambling game and indecent performance ever devised that will pay a percentage of its profits into the coffers of the fraternity in whose name a street fair is given. The same parties will draw a comparison between district and street fairs to the disparagement of the former because larger crowds attend the street shows. They might with equal propriety draw a comparison founded on the box receipts between a scientific lecture and a prize fight.

In view of the experiences of the past in California would it not be well for the harness horsemen and all who are interested in giving harness race meetings to divorce themselves entirely from the professional gamblers? There should not be any bookmaking permitted at any trotting meeting and the city authorities should be particularly requested to see that nothing prohibited by law is tolerated during the week of a race meet. It seems to have become the custom in many California towns for the local authorities to close their eyes during fair week to gambling games that would not be permitted at any other time. This has caused many good people to associate speed contests between horses with all that is low and vile in human nature, and the horsemen are compelled to carry a load of censure which is unjustly and unfairly placed upon them.

The breeding, training and racing of the light harness horse has developed in the United States one of its greatest industries. It is a legitimate business, just as much so as ship building, agriculture or fruit growing. Some of the most prominent and best men in the nation have been the breeders of trotters and pacers, and have enjoyed seeing them raced. It is an industry in which millions of capital are invested, and which is not only one of the nation's chief sources of wealth, but gives employment to thousands. There is no reason why harness meets should be accompanied by a band of short-card players and sure-thing gamblers, and the promoters of such meetings should demand that the local authorities in places where racing is given should suppress all these law violators. It is not right that the horse breeding and racing industry should be made to bear the blame that attaches to wide-open gambling and other violations of the statutes just because the congregation of large crowds to enjoy the sport of racing furnishes the "tin horn" fraternity a chance to ply its trade. Every law, state or municipal, that is enforced during the year should be as strictly enforced during the week of a race meeting or fair. If this is done, harness racing will soon assume the same position in California it has acquired in the East—that of the greatest of legitimate American sports.

As will be seen by an account of the race printed on another page of this paper, the New Zealand pacer Ribbonwood, son of the Palo Alto bred trotter Wildwood, defeated the Australian trotter Fritz in the race which came off at Christchurch, New Zealand, April 11th. Ribbonwood won in straight

heats, the last heat being in 2:10, which stamps Ribbonwood as a very fast horse, as all Americans who have visited New Zealand agree that their tracks are not so fast as ours. There are rumors in New Zealand that Ribbonwood may be brought to America and raced, and we hope the report may be true, as it would give us a chance to judge better of his abilities. One thing is certain, the match, which was for \$2500 a side with \$500 added by the club, has greatly increased the interest in the harness horse as a racer and will do much for the breeding interests of that country. The match drew an immense crowd of people and very nearly \$30,000 went through the totalisator on the result of the race. Fritz, the trotter, was outclassed from the start. The two horses scored four times before getting the word for the first heat, which caused Fritz to act badly and he was beaten five lengths the first heat in 2:14 1-5, a length and a half the second heat in 2:13, and was beaten eighty yards in the last heat in 2:10, which is equivalent to being distanced.

Australia and New Zealand have furnished a market for quite a large number of California-bred trotters and pacers, and we expect to see the demand increased very soon. A stallion that is standard and registered and has speed and the ability to show it in races is largely patronized by the Australasian breeders, if he has substance and quality. The small, light boned horse is not popular in the antipodes.

Kelly Briggs 2:10 1/4, the best little horse that has worn the hoppers in California for some time, was sent to Cleveland in charge of Farmer Bunch last Tuesday by his owner, that popular amateur horseman of Sacramento, Mr. Frank E. Wright. Kelly Briggs was not consigned to the sale, but goes East to race and will be entered in the 2:11 and faster classes at some of the big meetings. Ever since the day I first saw him at Santa Rosa at the Breeders' meeting, in 1899, I have had faith in his pacing to a record of 2:05 or better, as he has two-minute speed, one of the best racing heads a horse ever possessed, and is as game as the gamest. When I saw him make that phenomenal mare, Miss Logan, pace the race of her life and lower her record to 2:06 1/4 to beat him at Woodland last year, I was convinced that he would yet fulfill all my expectations, and if no accident happens him he will be in the 2:05 class when he comes home this fall. Bunch will train the son of Bayswater Wilkes at the Cleveland track, and Mr. Wright will enter the pacer in available stakes that are yet open on the Grand Circuit. Here's hoping the little horse wins every time he starts and gets a record that will rival Prince Alert 2:00, the fastest hopped horse in the world.

The Salisbury string left Pleasanton Tuesday for Empire track, New York. There was great speculation as to how the green pacer Mush would act when it came his turn to enter the equine palace car provided for the Kingmaker's horses, as he has notions of his own about entering strange places. Owing to this peculiarity he is always shod in his stall, and even there can wave his heels about in a manner that makes a horseshoer rather tired by the time he has finished his job. Mr. Salisbury, Ben Walker and the grooms prepared themselves for anything that Mush might do in the way of wild and woolly actions on the station platform, and rigged all sorts of devices to prevent the big pacer from hurting them or his own precious anatomy should he take a notion in his head to kick the train off the track. But Mush surprised them. He acted like a refined gentleman accustomed to travel and walked up on the platform and into the car like an experienced globe trotter. He neither looked to the right nor left, nor stopped to see if his alfalfa and blankets were checked, but took his place in the apartment of the drawing room assigned him and acted very much at home. Mush is a green pacer, but he is no Rube and there is no danger that any gold bricks will be worked off on him in New York.

The San Francisco Chronicle of Thursday states on the authority of a well known bookmaker that on Tuesday last \$3000 passed through the hands of the syndicate operating the book at the Petaluma running meeting, of which \$1800 or sixty per cent was kept by the layers of odds. As the usual book made by the average syndicate at country meetings in California is about a sixty per cent one, the Chronicle's informant is probably correct in his statement. I have not called attention to this item for the purpose of drawing any comparisons between betting systems although a very marked one might be made by showing that one auction book, handling the same amount of the public's money would have taken but \$150 out of the \$3000 for its commission. I do wish, however, to call the attention of the readers of this paper, and district fair directors, to the amount of money which this widely advertised and boomed running meeting

up at the poultry and egg town is causing the form players to wager. Tuesday was one of the best days of this meet, for the benefit of which a special train with low rates for the round trip, is run every day. Taking these figures as an average for six days of the meeting, \$18000 will be the total sum played on all the races at Petaluma this week by the public. Now that is just about the amount that has gone through the auction box here in California on an average at our district fair trotting meetings of the past few years where that system of betting has prevailed, and because of that comparatively small play as compared with the wagering of twelve or fifteen years ago, the bookmakers and the turf reporters of the San Francisco daily press have made a very loud claim that trotting races are no longer popular with the trotting public and that the people who attend races demand the booking instead of the auction betting system. The figures will show just why the bookmakers make the claim. Eighteen thousand dollars passing through an auction box during six days of racing would mean \$900 taken out of the entire sum as commission at the rate of five per cent for handling the money. This would amply pay the expenses of printing the tickets and paying the auctioneer and his crew of clerks, and leave something for the association. But the syndicate of bookmakers that has handled the betting privileges in California for the past few years to the detriment of racing in the interior of the State, know the profits of their game, and make the associations such offers for the same as are almost invariably accepted. A syndicate making even a forty per cent book (and very few syndicates have ever made one lower) will keep just \$7200 out of the amount played by the public during six days where the average is \$3000 per day. It is no wonder they can afford to give \$2000 or more to a district fair meeting for the betting privilege during a week's meeting and the only wonder is that the directors do not insist on a larger price.

The Petaluma running meeting will be a good object lesson for the district fair promoters who have been wheedled by the bookmaking fraternity during the past few years into believing that harness racing is not popular in California, but that the gallopers are great drawing cards. The fact is, that where bookmaking is prohibited the runners will not draw enough money at the gate in any town or city in California to pay the rent of the grounds, while quite a respectable crowd will attend harness races even though no opportunity is offered to bet on the results. Had the Petaluma meeting been devoted entirely to harness racing and the same crowd been present every day that has been in attendance there this week, it would have been written up as a flat failure by the running turf reporters and offered as proof conclusive that trotters and pacers will not draw a crowd.

## California Horses Sold in New York.

For the purpose of showing how prices for trotting bred horses as paid in a New York salesring compare with those paid in California, the following account of the sale of a consignment from Rancho del Paso held by Matt Dwyer in New York on the 23d and 24th of April will be of interest to our readers:

Elmendorf, br g, 1894, by Knight, dam Maud, by Echo, \$510.

Cornado, b g, 1891, by Cornelius, dam Ruth, by Kentucky, \$400.

San Encidia, b g, 1896, by Bay Bird, dam Violet, by Echo, \$350.

Spendthrift, br g, 1897, by Knight, dam Lightfoot, by Hubbard, \$275.

Dorothy, b m, 1897, by Bay Bird, dam by Albert W., \$225.

Terser, b m, 1897, by Knight, dam by Albert W., \$250.

Vorworts, b g, 1898, by Bay Bird, dam by Del Paso, \$300.

Argonaut, b g, 1897, by Bay Bird, dam by Antevolo, and Bert Harte, b g, 1897, by Bay Bird, dam Ma Belle, by Echo, \$850.

Albert Patchen, b g, 1899, by Bay Bird, dam by Albert W., \$325.

Bandmaster, b g, 1895, by Knight, dam Visalia, by Echo, \$225.

Ringmaster, b g, 1895, by Knight, dam Network, by Echo, \$310.

The above horses were all well broken, good lookers and prepared especially for the New York market. As will be seen from the pedigrees given they were a well bred lot.

Looking at the condition of the trotting turf throughout the country at large, affairs are in very good shape and the coming season promises the best ever known in the history of trotting.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Mokelumne Stock Farm Sale.

A crowd that occupied every seat in Fred H. Chase & Co's big pavilion at 1732 Market street in this city last Tuesday evening was attracted by the dispersal sale of Geo. H. Fox's horses from his Mokelumne Stock Farm and while a few very old broodmares and several yearlings in rather poor condition went for low prices, the average was good and the sale a satisfactory one, as the good average of \$164 per head was obtained.

The top price of the sale was paid by Mr. T. F. Judge the well known stock raiser and wholesale butcher of this city who bid \$1050 for the grand looking and fast green five year old stallion by Silver Bow 2:16 out of Grace, the dam of three in the 2:20 list.

With the exception of the few yearlings the stock was all in good condition and the bidding was generally prompt and spirited when the horses were led into the ring.

The great broodmare Grace foaled in 1880, and therefore 23 years old, was led into the ring in splendid condition and with a handsome filly by Mokelumne 37558 at her side. Mr. Fox had a limit on her, the only one in the sale that was so restricted, and she was retained by him.

The summary of the sale is as follows:

Vesper, br m, 1887, by Prompter-Sybil by Singleton; F. Gomme, \$170.

Bay filly, 1898, by Silver Bow-Vesper by Prompter, Geo. Stickle, \$225.

Bay filly, 1899, by Silver Bow-Vesper by Prompter, Fred Chase, \$180.

Vesper Bell, blk m, 1894, by Director Jr-Vesper by Prompter; W. H. Pelton, \$115.

Bay filly, 1901, by Silver Bow-Vesper Bell by Director Jr; H. Springer, \$100.

Bay colt, 1902, by Silver Bow-Vesper Bell by Director Jr; W. Martin, \$60.

Elma, b m, 1893, by El Benton 2:25-Grandma by Orphan; F. Gomme, \$225.

Bay gelding, 1900, by Silver Bow-Elma by El Benton; F. Thomas, \$130.

Bay gelding, 1901, by Silver Bow-Elma by El Benton; W. Martin, \$75.

Flora, gr m, —, by Judge Waller-by Stonewall Jackson; J. W. Hayden, \$60.

Silora, gr m, 1898, by Silver Bow-Flora by Judge Waller; Sam Gilmore, \$100.

Bay colt, 1902, by Daedalion 2:11-Flora by Judge Waller; Geo. W. Kingsbury, \$30.

Chestnut gelding, 1900, by Silver Bow-Miss Fletcher by Hyder Ali; W. Stone, \$85.

Miss Fletcher, ch m, 1891, thor. mare by Hyder Ali; John Parrott, \$100.

Ariel, ch m, 1889, by Bourbon Russell-Alma by Almont Rattler; Thos. Roche, \$85.

Annie G., b m, 1881, by Mambrino Boy-Bonnie S. by Bonnie Scotland; William Levy, \$50.

Venturess, ch m, 1879, by Arthurton-Lady Venturess by Belmont; Lou White, \$50.

Chestnut colt, 1900, by Silver Bow-Venturess; A. McBean, \$225.

Chestnut colt, 1902, by Monterey 2:09½-Venturess by Arthurton; John Nolan, \$130.

Fantail, b m, 1889, by Greenwich-Miss Jessie by Baden Baden; H. Busing, \$115.

Bay colt, 1902, by Daedalion-Fantail by Greenwich; Sam Gilmore, \$45.

Bay colt, 1902, by Monterey 2:09½-Kitty Fox by Pancoast; P. J. Williams, \$225.

Bay colt, 1902, by Silver Bow-Josie Clawson by Nushagak; Conn Hawkins, \$230.

Anticipate, b m, 1891, by Steinway-Tone by Ferguson; A. B. Spreckels, \$175.

Bay gelding, 1899, by Silver Bow-Anticipate by Steinway; F. A. Perkins, \$230.

Bay stallion, 1898, by Silver Bow-Grace by Buccaneer; T. F. Judge, \$1050.

Total for 26 head, \$4265. Average, \$164.

After the close of the Mokelumne Farm sale several horses, the property of different owners, were disposed of at fair prices.

## Payment June 1st in Stanford Stake.

There is a payment of \$10 to be made June 1st in the Stanford Stake, for foals of 1900, to be trotted this year at the State Fair in Sacramento. In last week's issue of the BREEDER AND SPORTSMAN it was stated that no further payments were due on the Occident and Stanford stakes except the final payments. This was true of the Occident Stake but not of the Stanford. The payments on these stakes for this year are as follows:

Stanford Stake—\$10 payable June 1st; \$20 on the tenth day before the first day of the fair this year.

Occident Stake—\$50 payable thirty days before the race.

Jackson's Napa Soda does not tangle the feet.

## Big Profits in Racing.

It is estimated by a turf writer on a local daily, who has taken the trouble to figure up the receipts and expenditures that the California Jockey Club's profits for the 143 racing days which closed on Thursday of last week will aggregate the enormous sum of \$300,000. He says: "While the gate receipts are not public property, it is a certainty that they averaged \$1500 or more every day. The association gave away in purses and stakes no less than \$425,000. The revenue from the bookmakers and minor privileges footed up that amount, consequently the entire gate receipts were clear to the association, besides the revenues from poolrooms throughout the country through the Western Union Company. The latter rake-off amounts to thousands of dollars every week."

Outside of the association no one has had much cause to rejoice except the great majority of the bookmakers. It was a grand season for the pencilers, especially those who disregarded form and took the money on favorites and second choices. The percentage of winning favorites was lower than any year in California, which is certainly a blot on racing. On an average twenty books were in operation during the season. If the records of the association were open to public inspection they would show that the privilege money of the bookmakers at \$120 per day would aggregate close to \$360,000. Add to this the sum \$150,000, the amount for operating the books, it will be seen that it cost the bookmakers half a million dollars to operate during the twenty-four weeks' racing.

Men who should know state that the bookmakers not only won this \$500,000, but \$250,000 into the bargain. This is not hard to understand when three bookmakers alone cleared up, above expenses, \$130,000. The three bookmakers were George Rose, Joe Harlan and Bob Lloyd. Other good winners on the season were: Bill Jackman, Chicago Club, Schley Club, Barney Schreiber. Henry Friesenhausen (better known as "Little Henry"), H. Miller, Max Frank and Jim Davis. The latter was a heavy winner at one time, but he lost back over \$25,000 the last month. Gus Blum quit about \$1000 loser. Caesar Young was possibly the only big loser who stayed here throughout the season. He did not have such clear sailing as in former years. In addition to the heavy speculation at the track, it is reckoned that the handbook operators around town handled something like \$75,000 a week.

There were few big winners among ground bettors. In fact, it was a most disastrous meeting for the public."

## A Horse's Jump.

In steeplechasing it is interesting to observe a horse jump a fence, and note the precise point on the "wing" of the jump which shows how high it raises its body to get over safely. This is found to be very much lower than usually imagined.

A fifteen hand horse is five feet high, and its body is two and a half feet from the ground; therefore, in order to clear a fence four and a half feet high, the horse would have to raise its body only two feet. But since it can, and generally does, brush through at least six inches of the hedge, there is no necessity for a horse rising more than eighteen inches at the fences.

Now, if you lower these jumps so that the horse may not have to rise at all to clear them, you actually make them dangerous.

In some of the old courses they have done away with the wall, the bank, the board fence, etc., in their stead remain about eighteen inches to two feet of the old obstacle, surmounted by a foot and a half of earth and a lot of brush. These obstacles, notwithstanding the fact that they are practically alike—a brush jump with an earth base—are still called the "wall," the "bank" and the "board fence."

This recalls the story told of a celebrated English gentleman rider, "Doggy" Smith, who was asked by one of the stewards at Sandown Park, after a steeplechase in which he had ridden, how he liked the course. He replied: "Oh, the course is all right. But, I say, you ought to have a lot of labels made with 'This is a wall,' 'This is a bank,' 'This is a water jump' printed on them; then we might think we'd been steeplechasing, which is more than I can think now."

This was before the jumps at Sandown were raised. Even in England they go through the same periods of relaxation of rules, followed by strenuous efforts to enforce them—and re-enforce them—just as we do here.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST Secretary, 510 Golden Gate Ave., San Francisco E. J. CREELEY, D. V. S., President.

## Big Entry List at Providence.

The Narragansett Park Association has received the big entry of the year in the early closing events to be raced at the Providence Grand Circuit meeting, August 31-September 4. Especially noteworthy is the list of nominations in the two \$10,000 events for 2:14 trotters and 2:11 pacers, which considerably exceeds any entry yet received in similar classes of equal value. For the six events aggregating \$28,000, 106 nominators have named 236 horses.

The sensational entry of the season appears in the Roger Williams \$10,000 2:14 trotting class, which shows the record breaking figures of 27 nominators and 56 horses. The other big trotting purses are the Massachusetts \$15,000 2:12 class at Readville with 16 subscriptions, the Charter Oak \$10,000 2:09 class at Hartford with 15 and the Bonner Memorial \$20,000 2:12 class at Brighton Beach with 18. The Roger Williams has nine more than the next largest and nearly twice as many as the smallest.

The Park Brew \$10,000 purse for 2:11 pacers, the third renewal of the richest offering ever raced for by a pacing class, has 18 nominations and 41 horses named in comparison with 16 in the Brighton \$10,000 2:10 pace at Brighton Beach and 15 each in the \$5000 2:10 pace at Empire City and the \$3000 2:10 pace at Readville.

The 2:19 trot has 18 nominators of 41 horses, the 2:25 trot has 15 nominators of 39 horses, the 2:15 pace has 15 nominators of 27 horses and the 2:20 pace has 13 nominators of 32 horses.

While the economical advantages of short shipments and a liberal system of payments were doubtless responsible to some extent for the big entry, there is more evidence that horsemen are better satisfied to race under the old three in five plan than take chances with the various novelties that have been invented to bring the harness classes into closer conformity with the runners.

## Trotters Make Good Saddle Horses.

After a trotting bred horse is broken to drive it is very little trouble to give him a little education under the saddle. There are thousands of horses sold every day that would bring a little more money than is received for them, if they were all around horses, instead of being fit for but one purpose. The horse that is good single or double and under the saddle is in big demand if he is gentle and fairly good looking even though he can show no speed.

In this connection, the following from the *American Horse Breeder* of April 28th will give an idea of the demand in New York for the horse that can do more than one thing.

The special sale of Kentucky saddle horses was held at the American Horse Exchange on Wednesday, April 22d, under the management of W. D. Grand. Most of the horses were consigned by S. T. Harbinson. While they were catalogued as Kentucky horses, this does not mean that they were Kentucky-gaited horses, for they were actually trotting bred horses converted into saddle horses, and most of them were also broken to harness. The top price was \$1335 for the very handsome brown gelding Exclusive News, a five year old, 15.3 hands high. He was purchased by Dr. C. E. Rider, who declined to give the name of the real owner.

Mrs. J. B. M. Grosvenor paid \$775 for the little bay mare May Wheat. She is 15 hands high, and one of the smartest little steppers seen in New York in a long time. In contrast to her was the big, bay gelding Dispatch, 15.3 hands, and sold as a weight carrier. He certainly did not belie his looks, and he brought \$600.

The cocky little black mare, well named Lady in Black, brought \$500, and she ought to prove a winner in the show ring. In all sixteen head were sold for a total of \$8920, an average of \$560, and this illustrates what the advantage is to the dealer or breeder who will bring his horses into this market in perfect condition and thoroughly educated, for these two special qualities made these horses sell so well.

There can be no set rule for breeder to go by as to mating his mares. If his judgment leads him to think that a certain stallion will be a suitable cross for a certain mare, both breeding and individuality having been considered, the proper thing to do is to make the experiment, even though the mare has produced speed by some other horse. It is possible that the experiment will not result satisfactorily, but, on the other hand, as is fully shown by many cases, it may be productive of an improvement over even the best of her foals by the sire or sires she had previously been mated with.

California's favorite hot weather drink—Jackson's Napa Soda.

## A New Starting Gate.

A St. Louis carman, J. Frank Carr, an owner of horses, has produced a starting device that when fully perfected is expected to revolutionize all starting tar-racks now in use. Given two public trials at Kinloch Park race track, the Carr machine has sent away large fields with almost automatic precision, the delays at the post in each instance being not over two or three minutes. Its trials were closely inspected in each instance by fully a thousand people, who crossed the track to the beginning of the backstretch and lined both fences en masse and the verdict was unanimous as to its merits. While a bit cumbersome, as at present constructed, this can be fully remedied.

Briefly, writes "Gleaner," the Carr starting gate consists of a series of padded sections which are worked on hinges and have parallel arms, flank high, separating each horse from its neighbor. These, as well as the main machine, in the rear of each horse are heavily padded, so that the animal cannot injure itself. In these padded sections a horse cannot kick or be kicked, nor can it swerve on any horse as under the present systems in use. A horse in the Carr gate cannot back or get "hung" in any webbing, because the webbing in front of each horse is only about four feet wide, breast high, perfectly taut and parted in the middle at the electric signal, each part instantly disappearing in pockets at the ends of each section ring. There is absolutely nothing to "hang" on, the single strip of webbing being instantly drawn out of the way. Starter W. M. Murray, formerly C. J. Fitzgerald's assistant at New York, started the horses from the machine and was much impressed with its superiority over the ordinary barrier. When fully perfected the Carr starting machine is expected to take the lead. Horses and jockeys will need to be schooled to its use, but that they will become familiarized with it after a trial or two is a certainty.

## Hartford Futurity Entries.

Horace W. Wilson, secretary of Charter Oak Park, has completed the compilation of the entries to the fifth renewal of the Hartford Futurity, value \$15,000, for foals of 1903. The list shows a total of 840 mares, the pick of American trotting mares now with foal. While the Hartford Futurity did not receive as many entries this year as the Kentucky Futurity or the Horse Review purse, it must be remembered that the Hartford event does not allow the substitution of mares after the date of closing and none but mares surely with foal have therefore been named. Out of 361 different nominations 224 name only one mare each. It insures widespread interest in the race. Sixty nominations name two mares each, twenty name three mares each and eighteen name four mares each. Fifteen nominations put in five mares apiece. Twelve other nominations put in from six to ten each. The largest nomination is the Walnut Hall Farm, Donerail, Kentucky, which names thirty mares. J. Malcolm Forbes is second on the list with twenty-four and Dreamwold Farm (Thomas W. Lawson) names twenty-two. Hudson River Farm, Poughkeepsie, New York, names twenty-two, and Mariposa Farm, Pawtucket, R. I., eighteen. East View Farm puts in sixteen and Empire City Farm twelve. Idle Hour Farm, Macon, Ga., has eleven nominations. Five nominators name ten each. There are: J. L. Druin, A. C. Hawkins, Maplehurst Farm, Henry Schmulbach and Palo Alto Farm. Mr. A. J. Welch is well pleased with the list, which is well rounded and nicely balanced, and a sincere tribute to the progressive policy of the Charter Oak management.

The trotting horse world depends in a great measure on the Register, says an exchange, and yet breeders are very lax in sending the facts concerning their foals. However, when they are in a position to sell or buy, and they find that the Register has made a mis-

## May Day Races at Dixon.

At the half-mile track at Dixon, Solano county, it is customary to hold a day of mixed racing on the first of May each year. The custom was duly observed this year and a large crowd was present to see the sport. Three races were on the card and in the trot for named horses the track record was broken, Leola, a black mare owned by Henry Peters, winning after five heats had been trotted and making one heat in 2:25, an excellent performance.

The entries were F. Robben's b h Ingo, Emil Holing's b h Ringrose, M. G. Morgan's b h Ben Bolt, Carey Montgomery's blk h Director, Henry Peters' blk m Leola, E. Lindley's b h Dart. Henry Peters' entry won the first, second and fifth heats, and Montgomery's the third and fourth, and the best time was 2:25. The entries for the two year old race were H. B. Robben's b f Daphne, M. J. Ream's b f Little Eva and A. H. Holly's blk f Black Rhoda. Little Eva won: time, 1:35.

Red Star, George Masten's horse, won the half-mile running dash in 55 seconds.

The horse presents us with an example of one of the most perfect pieces of machinery in the living world. In truth, among the works of human ingenuity it cannot be said that there is any locomotive so perfectly adapted to its purposes, doing so much with so small a quantity of fuel as this machine of Nature's manufacture—the horse. And as a necessary consequence of any sort of perfection, of mechanical perfection as of others, you find the horse a beautiful creature, one of the most beautiful of all land animals. Look at the perfect balance of its form and the rhythm and force of its action. The locomotive machinery is in its slender fore and hind legs; they are flexible and elastic levers, capable of being moved by very powerful muscles; and in order to supply the engines which work these levers with the force which they expend, the horse is provided with a very perfect apparatus for grinding its food and extracting therefrom the requisite fuel.—Hurley.

The number of horses sold in the Chicago market in 1902 was 102,100, against 109,353 in 1901. The average for ten years (1893-1902) was 105,150. The prices paid and the trend of quotations indicate that the falling off in number of sales the past year was due to a shortage in supply, not to a diminished demand. Thus, the average price of draft horses was \$166 for the year, against \$157 in 1901; carriage teams, \$450, against \$400; drivers, \$145, against \$137; and so on. And the average quotations in December were higher than in January, except for carriage teams, which ruled at the same figure in the last month as in the first.

W. G. Layng, proprietor of the Occidental Horse Exchange, has made arrangements for a combination sale of standard bred trotters and pacers and roadsters at auction at Salinas, Saturday, June 6th. Catalogues will soon be issued giving the list of animals to be sold and the pedigree of each. There will be about fifty head to go under the hammer. Among the consignors to the sale are J. D. Carr, J. B. Iverson, William Vanderhurst, C. Z. Hebert, J. R. Hebron, M. J. Smeltzer and probably several others.

Are you going to Denver? The races on the Colorado circuit promise well this year, and entries for a large number of them will close on Friday next, May 15th. On the same date substitutions may be made in stakes already closed, but not later. Read the half page advertisement in this issue of the BREEDER AND SPORTSMAN.

Secretary Shanklin of the Kentucky Trotting Horse Breeders Association thinks that the track this year will be faster since it was resoled than the day that Sir Albert S. paced a mile there last fall in 2:03.

Dr. Johnson, a green pacer by Online, that showed a mile in 2:14 last year, is one of the best things in George Saunders' stable in Albany.

Ed. Geers is now beating 2:20 with nearly all of his record horses and with some of the green ones.

Ed Geer and W. L. Snow will be at Glenville about the middle of May with their big stables.

Ananias 2:05, by Patron, will be trained and raced again this year.

Like all good things, Jackson's Napa Soda has a dozen counterfeits. Watch out!

REY DEL DIABLO (2) 2:23.

A high class son of Diablo that is showing great speed at Pleasanton this year.

## Answers to Correspondents.

W. P. Eddy, Modesto—Please give the correct breeding of Pacheco Wilkes. Has he a record of 2:12½, and, if so, where did he make it and what year?

Pacheco Wilkes is standard bred but not registered. He is by Guy Wilkes 2:15½, dam Rosedale by Sultan, second dam Inez by The Moor, third dam Katy Did by Fireman, thoroughbred. He has no record so far as the books show.

Robert Elwert, Alvarado—Do you know of a son of Electioneer called "Anavolo," also of a mare called Dorothy with a mark of 2:26 trotting? If so kindly give breeding of both.

We cannot find any son of Electioneer by that name. You have probably misunderstood the name. There is a son of Electioneer now at San Jose called Alta Vela, that has a record of 2:11½. Another son of Electioneer was called Antevolo. He took a record of 2:19½ and was sold to Eastern parties some years ago. We cannot find any record of a mare named Dorothy that has a trotting record of 2:26.

The first sale of the horses of the Santa Rosa Stock Farm, sold on account of the death of Mr. Henry Pierce, will take place at the Occidental Horse Exchange in this city on June 23d. Further announcement will be made next week.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

take in regard to the particular thing in which they are interested, they kick hard and talk loud about the inaccuracy of the Register, when they are alone to blame. Breeders should be compelled to register all foals within two or three months, and those who fail to do so should be made to pay a penalty large enough to wake them up. The enforcement of such a rule would be all in favor of the breeders. Many breeders and trotting horse men appear to think that those who are supposed to keep the records are mind readers, and should know just as much about their particular horses as they do themselves. They do not stop to consider that while they are familiar with their own horses, they know but very little about others' horses. The man who attends to the statistics has thousands of horses to look after. The owner pays little attention to any except his own. Let breeders and owners of harness horses be honest and send in their information as they know it to be, and it will not only be of great value to themselves, but to the trotting horse world at large. Suppose breeders registered all foals before they are six months old. It would be in their favor, make it easier for the statistician, and there would be no chance for ringing or anything of that sort in a very few years. Until the breeders realize the fact that they must register accurately every foal by the time it is four to six months old, they will always have the trouble they are having now, and will always be blaming some one else for it, when they themselves are the only ones to blame.

## Notes and News.

Pleasanton will give a big fair and race meeting this year.

The Oregon State Fair will give a \$1000 purse for 2:14 class trotters.

Harry Logan 2:12½ worked a mile this week at Pleasanton in 2:11½.

Bingen 2:06½ beat Dare Devil 2:09 in the show ring at Boston last week.

Budd Doble was expected to arrive at Cleveland this week with his stallion Kinney Lou.

Vallejo will soon announce a program for its harness meeting, which is to occupy a place on the California circuit.

J. C. McKinney is very positive that Beauseant 2:12 will be able to lower his record several seconds under the management of Ed Geers.

Mush broke all records before he left for the east. He turned the last half of the track at Pleasanton in one minute and a half second.

Sam Bowers 2:11, the Spokane pacer, is expected to get a record of 2:06 or better this year. John Lance has him in training at the Spokane track.

C. A. Durfee shipped the three year old stallion Sterling McKinney to his owner, Sterling R. Helt, of the Maywood Stock Farm, Indiana, last week.

The Golden Gate Park Driving Club will hold an important meeting at its rooms in the Palace Hotel this evening. All members are requested to be present.

One of the handsomest foals in California is at the side of Lida W. 2:18½, dam of Nutwood Wilkes 2:16½. The foal is by Stam B. 2:11½ and is a credit to any horse.

The Stockton Driving Club will doubtless give a meeting this year during the week following the State Fair. Liberal purses will be given the trotters and pacers.

John R. Sawyer, who formerly trained the Van De Vanter Stock Farm horses, is now located at Portland, Oregon, where he has opened a public training stable.

Alameda, 2:09½, by Altamont, foaled a bay colt by Baron Review, at Parkway Farm, Goshen, N. Y., April 21. She will be bred to Fred Kohl, 2:07½, this season.

One hundred head of horses and mules of all descriptions were sold by auction at Stockton last Saturday. The total amount of the sales was \$5000, an average of \$50 per head.

Arion 2:07½ is Electioneer's fastest trotter; The Abbot 2:03½, the fastest by a son; Klatawah 2:05½ is the fastest pacer and Dolly Dillon 2:07 the fastest trotter produced by a daughter.

Miss Georgie, the filly by McKinney out of a Nutwood Wilkes mare, was given a full mile at Pleasanton this week and reeled it off in 2:11½. She is one of the best gaited pacers at that track.

The Harness Stallion Stake advertised by the California State Agricultural Society is the best stake ever devised on this Coast and promises to be the most valuable. Read the advertisement in this issue.

There are three stands at the Vienna track. Admission to one costs \$1.20, another 60 cents and another 40 cents. Then there is a field for the still poorer classes and the admission to it only costs 8 cents.

One of the handsomest colts on the Pacific Slope is Citizen Bird, a two year old by Gyr Falcon, son of Zombro 2:11 and out of Coquette 2:30 by Altamont. He is a coal black and is owned by Mr. Thos. Griffiths of Spokane.

L. B. Lindsay has a stable of good horses at Spokane. The fastest one in his string is Le Roy 2:10½, that looks like first money, as he can lower his record to a certainty. Mr. Lindsay has a full brother to Caryle Carne that is quite promising.

Some of the secretaries down the Grand Circuit think it would be very advisable to have their tracks covered with asbestos, as some of the trotters and pacers will certainly burn up things if they only make good what was said about them during the winter months.

Merry Monarch is the name given a four year old black pacer by McKinney out of Deta, full sister to Chehalis 2:04½, etc., that is showing great speed for John Lance, who is training him at Spokane. Merry Monarch belongs to Howell W. Peel, president of the Spokane Association.

M. D. Bryson of Linden, Cal., writes us that he is getting a number of well bred mares for his stallion Guy McKinney through the advertisement in the BREEDER AND SPORTSMAN. Guy McKinney is one of the best bred as well as one of the most grandly formed stallions in his country.

Small breeders, who are sometimes timid and always conservative, need have no fears for the future, provided they breed to the right kind of a stallion, is the advice of the *American Sportsman*. There is nothing more certain in the future, not even taxes, than an increasing demand for road and speed horses of breeding and quality.

When a distance judge waves his little red flag in the face of some trotter or pacer it means a right smart move to the owner of the horse than it does to the occupants of the grand stand. Many an owner has experienced a "nervous chill" at such a moment, and few enjoy the emotions following such an experience.—*Western Horseman*.

At what age will a mare stop breeding? Mr. Louis Yeckel of St. Louis has a black mare that he knows to be thirty-three years old this spring. A year ago last spring he bred her to Prince Rene, standing at John F. Keck's farm near Millstadt, Ill., and she had a bay filly by him. Does any one know of a mare thirty-two years of age that breeds?

It is reported that Mr. H. K. Devereux, owner of the stallion John A. McKerron 2:05½, is negotiating with Budd Doble and the latter may drive the son of Nutwood Wilkes in his attempt to secure the world's record this year. If this speed trust is organized it will have the best wishes of every horseman in California and all will hope to see the record broken.

M. W. Savage, of Directum 2:05½ and Dan Patch 1:59½ fame, continues to pick up promising broodmares wherever he can find them. One of his recent purchases is Oneida Lockheart by Lockheart 2:08½, the fastest trotting son of Nutwood 2:18½, dam by the old time champion trotting stallion Smuggler 2:15½. Oneida Lockheart is the dam of the stallion Lottheart 2:20½.

Stemwinder 2:31 is dead. The dam of Directum 2:05½, Directina 2:16½ and Electrina 2:20 was taken suddenly ill at the farm of Geo. A. Davis, near Pleasanton.

NORA McKINNEY 2:12 1-4.

A California bred mare that is one of the best trotters on the New York Speedway.

anton, one day this week and died in a short time. She was one of the great mares of trotting history and the lateness of receiving the news of her death prevents us giving any particulars. Something of her history will be given in a more extended notice next week.

The handsome stallion Amador Chief by Ulster Chief, son of Hambletonian 10, has been purchased from his former owner, Capt. Harry Morse, and will be taken north to make a season in Modoc county, this State, and at Lakeville, Oregon. Amador Chief is a horse of good size and style and is well bred. He will be in charge of Mr. T. P. Schwartz, who will also have the thoroughbred stallion Joe Terry by Flambeau.

Doug Thomas has in his string at Marchmont Stud, Paris, Ky., a five year old gelding, full brother to the Futurity winner, Katherine A. 2:14, as a two year old, which the Bourbon county sports are now touting as a dark M. & M. candidate. No effort was made to train this gelding until he was a three year old, and he went wrong early that season, and was off all of last year. He has been doing well this spring and Thomas regards him as a most promising prospect.

The well known broodmare Nell, the dam of Vassar 2:07, Belle Vara 2:08½, Susie T. 2:09½ and Ambidexter 2:11½, is in foal to Axworthy 2:15½. She is now twenty-five years old, and has already had three foals by Axworthy, all of which will be sent for records this year. Sunol 2:08½ is again in foal to Axworthy 2:15½, and her owner, John H. Shults, is greatly in hopes that she will have better luck this season than has attended her previous breeding ventures. Last year her foal died after a few days.

Ben Benjamin, of the *Chronicle*, the ablest and most energetic newsgatherer and reporter of the San Francisco corps of turf writers, went to Petaluma and accepted the position of associate judge at the running meeting which has been in operation there this week. Before going he was assured that there would be an open betting ring, and with this assurance accepted the position. He resigned his position after one day's service, as the betting was conducted on the syndicate system of the "cinchiest" kind.

John Gordon, who was up from San Jose attending the sale of the Mokelumne Stock Farm horses this week, is training a three year old full sister to Robert I. 2:11 at the San Jose track and says she is, in his opinion, the best of all Anna Belle's foals. She has only been in his hands two weeks, but can show great speed. She is 16 hands high and a very handsome dark brown in color. This filly belongs to Green Meadow Stock Farm, and is not for sale. Her sire, Hambletonian Wilkes, has 22 mares booked to him so far this season, which is close to his limit.

There are now at Baywood Stud, San Mateo, two trotting bred colts that are for sale and that should be secured by some harness horse admirer as both are good prospects. Both are yearlings. One is by that great horse Bonnie Direct 2:05½, first dam Charmion by Whips, sire of Azote 2:04½, second dam Lizzie H. by Whipple's Hambletonian, third dam Lizzie Harris by Comus, son of Bashaw 50, fourth dam by Arnold Harris, son of Whalebone. This is a royally bred colt and will make a high class stallion. He combines the blood of Director, Simmons, Electioneer, and other great sires. The other colt is by Boodle 2:12½, dam Wild Bee 2:29 by Piedmont, second dam Wildflower 2:21 by Electioneer, third dam Mayflower 2:30½ by St. Clair.

What promises to be a most important and powerful organization was effected at Philadelphia a few days ago. Eighteen road drivers associations formed a central association, the same to be known as the United Road Drivers and Good Roads Association of Pennsylvania, the principal object in view being to secure good roads and that the new organization has much power and influence is evidenced by the fact that the State Legislature has already voted \$6,000,000 to be expended for the improvement of the roads in that State. It is to be hoped that the new organization will next put forth an earnest effort to secure the passage of an equitable racing bill, as such a measure would prove of inestimable benefit to the general harness horse interest of Pennsylvania.

The grandly bred mare Bell Bird, purchased at the Palo Alto sale in January last year by Mr. Fred Raschen of Sacramento, died at the home of her owner a few days ago. Bell Bird was by Electioneer out of Beautiful Bells and had a two year old record of 2:22 and was the champion yearling of her time, trotting to a record of 2:26½ that year to a high wheel sulky. She was in foal to Nutwood Wilkes when she died, and the death of mare and colt is a very severe loss to Mr. Raschen and the breeding interests of the State. Mr. Raschen owns a yearling filly from her by Iran Alto that is showing very fast at the trot at the Sacramento track and is looking fine. The loss of a member of the great Electioneer-Beautiful Bells family is one that cannot be counted in money values, especially as it was Mr. Raschen's intention to continue breeding her to the highest class trotting stallions in California.

A rule of the National Association, most frequently violated by track secretaries, is rule 6, section 3. The rule is as follows: Section 1.—An accurate and sufficient description of each entry will be required such as shall identify the animal and shall embrace the following particulars to wit: Section 2.—The color shall always be given and when necessary to identification the marks shall be stated. Section 3.—It shall be distinctly stated whether the entry be a stallion, mare or gelding, and the names of the sire and dam if known shall be given in all cases, and when unknown it shall be so stated in the entry. If this requirement as to pedigree is not complied with the entry may be rejected, and when the pedigree is given it shall be stated by the member with the publication of the entry, and if a pedigree or record be falsely stated, for the purpose of deception, the guilty party shall be fined, suspended or expelled.

Among the Californians who will be seen on the Grand Circuit this year is Mr. William Hendrickson, the well known capitalist of this city, who will make the occasion one of pleasure. He has shipped three of his horses east—Clay S. 2:13½, a full brother to that horse and a gray mare by Almonition. The two latter have no record. Mr. Hendrickson is one of the veteran horsemen of this state, and brought the stallion Geo. M. Patchen Jr. 31 here in the '60's. Mr. Hendrickson purchased Clay S. last year and thinks he will be a good horse in his class. At any rate he has shipped him to Cleveland and will have him worked there. Clay S. will be entered in the 2:14 classes if he reaches Cleveland all right. Mr. Hendrickson was accompanied by his wife and they will not return to California until the approach of winter. Mr. H. says he will be at the Detroit meeting which opens the Grand Circuit and if he likes it may go clear down the line.

Hamlin's Almont, Jr. 2:26, now thirty-one years old, but still vigorous and able to beget foals, has for several years been banished from Village Farm to the wilds of Cattaraugus county, and although he has been one of the greatest sires ever owned in Western New York and is acknowledged to be the greatest son of Almont, he is the sire of no son from any of the great broodmares at Village Farm, and, apparently, will die leaving no really great bred son to uphold his name and fame, says the *Buffalo Express*. Many of the patrons of Village Farm have tried to induce the Messrs. Hamlin to give the old horse a chance to beget a son from some of the great mares at Village Farm, but thus far they have not succeeded. John Benstead, of this Buffalo, is one of those who think this much is due Almont, Jr., and he recently said that if he were to be brought back to Village Farm he would mate with him an own sister to Shadow Chimes 2:05, that he owns. Mr. Benstead is quite partial to the blood of Almont, which in not to be wondered at, as he bred Metellas 2:11, from a daughter of Almont, and Excellence, 2:19½, from a daughter of Almont.

## Ribbonwood Defeats Fritz.

The much talked-of race between the New Zealand pacer Ribbonwood by Wildwood and the Australian trotter Fritz by Vancleve came off at Christchurch, New Zealand, on Saturday, April 11th, and was won by the pacer. The *New Zealand Review* gives the following account of the race:

There was never any doubt about the popularity of the contest between the respective champions of Australia and New Zealand, and those who held that the "people's sport" had become so firmly fixed in public favor that a record attendance would gather to witness Fritz and Ribbonwood, were completely justified on Saturday. On the two preceding days people swarmed into Christchurch, and on the morning of the eventful day the city wore the appearance of a New Zealand Cup day. Where and how the number of visitors were accommodated cannot be told, but on Friday the various hotels and other resting places were turning away disappointed would-be guests by the score. However, they all turned up at the New Zealand Metropolitan Trotting Club's grounds at Addington, and with the hundreds of strangers who came to town during the morning, and the thousands of local people, formed the most enthusiastic crowd that ever assembled on a race course. There is no doubt that the reports of the fast times done in training by both Fritz and Ribbonwood largely affected the attendance, and though there was natural disappointment at the failure of the Australian champion to reproduce his best track form, both horses came in for an intensely enthusiastic reception. The large crowd was certainly impartial. Fritz, who has previously visited New Zealand, has long been an idol of the sporting public, for Australasia has certainly never produced a finer trotter, while ever since Ribbonwood first showed his extraordinary brilliance as a two year old, his countless admirers have steadfastly believed in his absolute supremacy over any trotter or pacer in the Australian colonies. He is a wonderful little horse, and probably there are very few four year olds that could equal his performances even in America, the home of the trotter.

As regards the match, it may at once be said that Ribbonwood won easily. He was never really extended in any of the three heats that were decided, though he did lower his record for the mile in the third heat to 2 min 10 sec. From the easy manner in which he accomplished this remarkably fine performance, it was plain that he could have paced considerably faster had he been pressed. It would be pleasing if he were given the opportunity, at the present meeting, of showing what he is really capable of. It is known he can cover a mile in 2 min 10 sec with great ease, and on the form of Saturday it may be presumed that the undoubted champion of Australasia is able to knock some seconds off his present great record. Ribbonwood was in the fittest possible condition, and the longer the contest continued the faster he seemed to travel. With Fritz, however, it was different. Always a nervous horse, he suffered by the distracting delays before the start of the first heat, and he never really recovered his equanimity during the afternoon. These delays, or false starts, were none of his driver's seeking. It is claimed that the horse drawing the inside running has every right to all the advantages that position gives him, but Price certainly seemed disinclined to allow Fritz to get on level terms in either the first or third heats. In the first heat Ribbonwood had nearly a length's lead when the starting point was passed. Though Fritz was worried by the false starts, he was clearly over-matched by his very brilliant younger rival. In Mr. Buckland's opinion Fritz never once took hold of the bit properly, and never at any time trotted with the freedom he exhibited at the Middle Park track on the morning before the day of the match. Ribbonwood may go to Australia presently, for three £100 free-for-all races are to be arranged in Victoria if he will go over. Failing a visit to Australia, the brilliant son of Wildwood will go to the stud for the season."

The summary of the race is as follows:

Match of the champions, a stake of £500, each with 100 sovs. added. One mile, best three heats in three days.					
Ribbonwood, by Wildwood	...	1	1	1	
Fritz, by Vancleve	...	2	2	2	
Time First heat	0:34	1:05 1/5	1:30	2:14 1/5	
Second heat	0:31 1/2	1:06	1:32	2:17	
Third heat	0:32	1:04	1:35	2:10	

## A New Thing in Shoes.

Murray Howe tells the following story in last week's issue of the *Chicago Horse Review*:

There has been great excitement around the track for the past two weeks over a horse shoe devised by Mr. W. H. Lake of England. Mr. Lake has been spending the winter at the track studying American methods of training. After he had watched things for a couple of months he announced to his friends that he was the patentee of a horse shoe designed to remedy faults of gait that double gaited horses are commonly afflicted with, and asked for permission to demonstrate its merits on a few more or less worthless specimens of the genus trotter. The first victim was a bay gelding by Red Heart called Fido, belonging to the writer. This horse could trot fast at times, but was inclined to mix and single-foot a great deal. The shoes were so widely different from anything the boys had ever seen that they stirred up no end of controversy and brought out a large audience of the talent to witness the initial trial. Much to the astonishment of men like Ed Geers and Dick Benson, the horse could trot many seconds faster than he ever could in his life before, and never offered to mix or single-foot. The next day there was a general scramble for the blacksmith shop, as every trainer around the grounds had a mixed-gaited horse or two which they were willing to experiment with. Geers tried them first on the black trotting mare Ellenwood. She had been single-footing and scalping very hard and was in trouble at any rate of speed faster than a 2:30 clip. In her second workout with these shoes on, she stepped a half in 1:08 and a quarter in 32 1/2 seconds. Another pair was then tacked on to the black colt Traveleso by Direct Hal. This colt, of course, as one would

RIBBONWOOD 2:10

surmise from his breeding, always had more or less trouble in sticking to the trot; but from the time he first felt these English shoes on his feet, he has never offered to make a misstep, and on last Friday Lew Banta worked him an easy mile in 2:22, last half in 1:09, last quarter in 0:33. This was good enough for Mr. Geers, so he immediately had a set put on The Questor. This gelding was quite a trotter last fall and was separately timed as good as 2:10 in several of his late races, but this spring, following in the footsteps of many another of his tribe, he has been somewhat tied up in his gait. The first time out of his box, however, with his English shoes on, he showed that he was a greatly improved horse, both in point of speed and in his way of going. On Saturday Banta moved him an easy heat in 2:17, last quarter in 32 seconds, last eighth in 15 seconds.

Dick Benson gave these shoes an early trial on a little bay mix-gaited mare by Prodigal that could not go fast enough to get out of her own way; she struck a trot instantly, and could go a 2:40 gait a few days afterwards. Dick has since had them put on the gray gelding Darwin 2:13, but as I have not seen him worked out since, I do not know whether or not they improved him any. Billy Byington put them on one colt that dropped down eighteen seconds in his first workout. He then tried them on two other colts with satisfactory results. The Grattan Farm trainers, Nickel and Putnam, have tried the shoes with results similar to these above. A particularly bad going member of Putnam's string dropped from three minutes to 2:40 immediately. Scott McCoy, not to be outdone by the others, decided to give the shoes a trial on the three-year-old trotting colt Peerless by Grattan. Peerless always did prefer the pacing gait

to the trot, and it has been rather a difficult matter to train him at the latter way of going. English shoes proved to be just what he was waiting for, as he squared away at once, and in three workouts dropped from 2:40 to 2:26, with a last half in 1:10 1/2, a last quarter in :34 and a final eighth in :16. After giving the shoes another trial on a brown filly called Dear Me, Scott announced that he thought these shoes would prove as great a factor in the evolution of trotting speed as the bicycle sulky has. Mr. Lake, the inventor of the shoe, is one of the few Englishmen who own American trotters, and he hit upon this shoe after a long series of experiments upon a great number of horses. The shoe itself is simply an ordinary horse shoe with two small square steel bars welded on the top surface, one placed from one to two inches back of the toe, and the other the same distance from the heel clear across the shoe, the relative positions of these two bars determining just the effect on the horse's action. As both bars are on the outside of the shoe altogether, they are the only part of the shoe touching the ground when the horse is at rest. Experiments have shown that different horses need the bars in different positions. When Mr. Geers first looked at the shoe he was of the opinion that no horse could trot at all in them; but after seeing its value demonstrated he was the first man to give it a trial, and is now using more of them than any one else. Dick Benson says that if he had a string of green colts he would put this shoe on every one of them. It ought to prove a very popular shoe also for coach horses, as one of its direct effects is to materially increase a trotter's action. On this account it did not prove successful on several horses that had a lot of action to start with.

## Converting Trotters and Pacers.

Murray Howe writes as follows in the *Horse Review*: "If any one of the gentlemen who have predicted a disastrous future for the American trotter unless the increase of the pacer is checked in the near future, will spend a month down here during the height of the training season, we will take a contract to dispel all cause for alarm from their minds. Trotters are converted to the pacing gait and pacers to the trotting gait with such frequency around the track this spring that any one who keeps track of training operations in general would be forced to the conclusion that the trainer of to-day will make the pacing bugaboo look very harmless any time the lateral way of going becomes unfashionable on our speedways and race tracks. A case in point to show how quickly the transformation is sometimes brought about happened last week. Scott McCoy had been training the pacer Carnot 2:08 1/2, by Lochinvar, for his owner, General Carnes, of this city, for several weeks, but as the horse did not show that he would be a sure money getter in his class Scott concluded to try him as a trotter. Carnot has been handled by many different trainers and no one familiar with his career would have suspected that he could trot at all. He was sent to the shop, however, and came out rigged with a pair of twenty-ounce shoes and a pair of six-ounce weights. At the first score he struck a trot and jogged a mile in 2:38. Twenty minutes later he stepped one in 2:32, last half in 1:15. Two days later he trotted another easy heat in 2:30, last quarter in 34 1/2 seconds. The horse does not act as if he ever knew how to pace and his driver says it will take but a very few workouts to drop him down to 2:15. As to the weight he is carrying, that will come off at the rate of several ounces a week and in all probability he will race at a trotter in ten ounces or less. The three year old trotting colt Peerless, by Grattan 2:13, that McCoy has been working recently, is another one that was a natural pacer, but as his owner did not want him to go that gait he has been schooled at the trot with the result that he can now step a mile close to 2:30 and a quarter in 35 seconds."

## No Experiment.

Campbell's Horse Foot Remedy has been more extensively used during the last twenty years than any other, and it is no exaggerated statement to say that a greater quantity of it has been sold during this period than the combined sales of all other hoof remedies. The merits of Campbell's Horse Foot Remedy have never been questioned. It will do all that is claimed for it, and a 500-page book would not contain the testimonials which have been received from celebrated trainers, prominent horse owners, veterinarians, teamsters, business firms, fire departments and public and private corporations.

Horsemen of Cleveland, O., will be disappointed if the name of Del Toro does not head the list of summaries when the Kentucky Futurity for three year olds is finished next fall. This promising colt is by Patron 2:14 1/2. His dam is by Kentucky Prince and his second dam Suisun 2:18 1/2 by Electioneer. Del Toro will have two dangerous competitors of the Wiggins family in Katherine A. (2) 2:14 and Hilgar (2) 2:15 1/2 to settle with in that event.

Sober up on Jackson's Napa Soda.

## The Orloff-American Trotting Cross.

[N. K. Feodosieff in Chicago Horseman.]

I should like to call the attention of your readers to the success we have obtained during the past few years in Russia by crossing the American trotter on the Orloff. Our experience may prove of great value and interest to the American breeders, as I have become convinced that the Orloff will prove to be the best outcross for the American families, and in my opinion it is only a question of time and the mingling of the best American with the best Russian blood to produce much faster horses than we have at present in Russia, and perhaps equal to the best horses that America has produced.

Some years ago, when I became familiar with the Orloff trotting horse, I was struck with their trotting instinct, possessing great natural speed that can be developed with very little education, in fact, much less than American horses demand. Their greatest trouble was that they could not stand the amount of work necessary to develop extreme speed. In studying their pedigrees I found that in all our fastest and most successful race horses, there is a thoroughbred cross close up, and as I was familiar with the gameness and great racing qualities of the American trotter, I thought that the English blood coming through a trotter should improve the Russian horse to a greater extent than the same blood coming through running lines.

It is a matter of great satisfaction to me that what was only an opinion formed a few years ago has to-day proved to be a fact, as the best trotting horses we have now in Russia are bred in this way.

The first and about the only half bred American foaled in 1894 was Cleopatra by Prince Warwick and Krases, a Russian mare. She commenced her career by winning the Derby for three year olds in Moscow in 1896. She has been raced without any let up ever since summer and winter and at all distances, trotting a mile in 2:16½ and two miles in 4:44½. This winter she won several races and got a record of 2:20 over the ice, having won to date over 100,000 roubles. The next one to appear was Dor di Rasbourny by Dempsey, a son of Patron and a Russian mare.

When Mr. George Fuller was here he saw this colt and expressed the opinion that he was one of the best he had seen anywhere, and was worthy of being taken to Kentucky, being seventeen hands high, very handsome and symmetrical in form. Mr. Fuller proved to be right, as this horse has already a record of 2:18½ for a mile and 4:44 for two miles. He trotted two miles on the ice this winter in 2:46 and is improving all the time. The next one is Luda Ferdit by Bivaley, a horse bred by the Grand Duke Dimitry, and Frankie R., an American mare. Luda Ferdit took a record of 4:45½ last summer and trotted four vests (2 2/3 miles) in 6:29½, which is now our winter record for the distance.

The American mare Polly (pedigree untraced) that is in the stud of Count Vorontz off Dashkiff produced two fillies by Russian stallions, both of which were the best four year olds of their respective years, 1900 and 1901; one of them, Prite, taking a record on the ice of 2:24½, and the other, Krassa, a record of 2:20½. This winter Baron C., a son of Nominee and a Russian mare, trotted a mile in 2:19½. Siedinonaia by Alvin 2:11 (imported by me in 1894) and a Russian mare, is the best four year old filly this year. She took a record of 2:21 and has to her credit most of the big races for four year old mares.

The best colt that has appeared yet is Alvin Maladoi by Alvin, and also out of a Russian mare. He commenced his four year old career by winning the Futurity Stakes a year ago. This is the richest stake we have. Since he was started eighteen times in his four year old, and won every race without making a single mistake. He beat the four year old record three times, lowering it to 2:16½ last summer, and this winter to 2:18½ on the ice, which is within three-fourths of a second of the aged record. He won the Produce Stake in St. Petersburg March 9th, and equaled his record over a bad track. You can fully appreciate the value of his performance when you take into consideration the fact that the new ice record of 2:15, established the past winter by Cresceus, is only 3½ seconds faster than that of Alvin Maladoi. Many think that this colt would not have made a poor show in the highest society in America, but not liking conjectures, I am satisfied to judge of his merits by his performances here.

Will Caton, who is a very young man yet, deserves a lot of credit for driving this colt in so many hard races and keeping him improving all the time. Alvin Maladoi is dark bay in color, about 15½ hands high, very stoutly built, a splendid set of legs and feet, and with a neck and head fine enough to ornament any thoroughbred horse. He is perfectly sound, good gaited and game. If nothing happens to him he

should trot a mile close to 2:12 this summer. He has already won over 70,000 roubles.

We have now representatives of many of your leading families in our studs, such as Wilkes, Nutwood, Electioneer, Belmont, Almont, Stranger, Clay, etc., and all have produced speed with wonderful uniformity when crossed on Russian mares.

This cross becomes all the more interesting when the facts taken into consideration that such horses as Alvin, Nominee, Passe Rose, by Patron, Dempsey, also by Patron were bred to some good and fast American mares, and their produce has not yet appeared on the race course; and these same horses bred to Russian mares invariably produced speed. I have mentioned only the best half American colts we have, but there are many others that have won their share of the money.

This year amongst the best of our three year olds we find the get of Passe Rose, Winterset, Bayruth, Alvin, Baron Rogers, Harlo and Flush. Over fifty per cent of all the American horses that are in Russia to-day were imported by me, and I am very proud of their success. I should be very glad if some of your leading breeder, such as the Messrs. Hamlin, Alexander, Emery, Forbes and others would try this cross with some of your highest bred and fastest stallions, being positive that they will obtain a still more brilliant result than we have. There are plenty of good mares here, and for the purpose of such an experiment I have no doubt that the very best of them could be got.

We owe much for the great improvement in the speed of our horses for the past ten years to Mr. Frank Caton, who was the first trainer here that employed the latest American methods and appliances in training his stable of horses. He well deserves the great success he has had, having won during that time with the help of his son, Will, over one million five hundred thousand roubles, and most of the horses that he trained, either became notable, or materially reduced their records. Indefatigable in his work, always showing the greatest integrity in all his dealings, he has given an example that all our drivers and trainers may be proud to follow.

## Racing Methods in Russia.

[American Sportsman.]

Frank Caton, a former prominent American trainer, who for the past nine years has been training and racing trotters in Russia, arrived in Cleveland this week for a short visit, and will also attend the May sale. Mr. Caton has not been in America for five years, and that his stay in the land of the Czar agrees with him is evidenced by his splendid physical appearance.

He is an entertaining talker, and during an interview with a representative of the *American Sportsman* told of many interesting details in connection with the Russian methods of training and racing. Mr. Caton is training a stable of fifty horses for Count Varnsoff Dashkoff of St. Petersburg, former imperial minister. Included in this stable is the grey trotter Patomats, with a record of 1:15½ on a ground track, that has won over 200,000 roubles, or \$100,000 in American coin. Mr. Caton thinks especially well of the four year old Alvin Moladoy, a son of the game ex-Canadian stallion Alvin 2:11, and out of a Russian mare. He holds both the ground and the ice record for four year olds, 2:16½ for the former and 2:18½ for the latter. When it is taken into consideration that this ice record of 2:18½ was taken over a poor, uphill and downhill ice track, it compares most favorably with the American ice record of 2:15, made by Cresceus a few months ago. With the three year old filly Ryarka by Allaman, a famous Orloff stallion, Mr. Caton won 16 out of 17 starts, earning over \$20,000 with her.

Will Caton, Mr. Caton's son, trains a strong stable for S. N. Konshin, a wealthy merchant of Moscow and was the heaviest money winner in Russia last year.

It seems that the Russian method of training differs a great deal from that in vogue in this country. The horses in Russia are raced the year around, in summer on the dirt tracks, and in winter on the ice. The Russian horses will not stand as much work as the American trotter, their legs not being as good, and most of the American trainers that have gone to Russia soon discovered that their horses would not stay up and race, when worked according to the old fashion.

The tracks are very crude and much slower than those of this country, most of them being built of broken rock and stone, with the crevices filled up with sand and dirt, resembling our macadamized roads, but being much rougher. The shoes worn when racing on the ice have eight to ten calks forged out of the one piece of steel, not welded on, while others have that number of screw holes into which go screw calks, half to three-quarters of an inch in length.

When these become dull, they are taken off and re-sharpened, thus not making it necessary to take off and replace the shoe. The breeding and racing industry is carried on under the direct supervision of the Grand Duke Demetri Constanovich, cousin of the Czar, who has full control of all the tracks and whose decisions are final.
